LIMITS FISH CATCH IN ONTARIO

An order-in-council, amending the
fisheries regulations for the province
of Ontario, has been published in the
Canada Gazette. The order makes it
illegal for anglers to use more than
one fishing line. Except for those
angling or trolling all fishermen must
hold licenses from the department of
game and fisheries of the province of
Ontario. The order reads that "no one
shall fish for, catch or kill in any of
the waters of the province in one day
by angling a greater number than
eight large mouthed or small mouthed
black bass or take away at any one
time a greater number than two days'
legal catch." This regulation also
stated that four masagoons will con-
stitute one day's legal catch. No one
shall catch by angling a greater num-
ber of speckled or brown trout than
in the aggregate shall weigh more
than ten pounds according to the re-
gulations. It is forbidden to take away
more than twenty trout. The order
also contains new regulations regard-
ing the length and weight of fish to
be taken from certain waters, and
new regulations regarding net fishing
on the Great Lakes.

Barney Shukai and Louis Wen-
lesky, sentenced in April last to the
lash and imprisonment in Montreal,
were found innocent of hold-up.
Two constables in Montreal were
fired upon by burglars whom they
interrupted in breaking into homes of
C. C. Ellis and Stewart Clark.

Three Detroiters had a narrow es-
cape from death when a recklessly
driven coupe crowded them touring
car into a ditch near Chatham.

CARETAKER FACES MURDER CHARGE

Follows Death of Byron Mc-
Crodon, Who Was Shot Near
Crossen's Trout Pond.

(From The Cobourg Sentinel-Star,
May 29.)

On Monday morning word was re-
ceived here that Byron McCrodon, of
Toronto, who was shot in the thigh by
William John Crossen, caretaker of
Mr. W. J. Crossen's trout pond at Bal-
more, on Sunday morning of last
week, had passed away at Wellesley
Hospital, Toronto, where he was re-
moved the afternoon of the accident.
It was thought that after Mr. Mc-
Crodon had been holding his own after the
accident, and if anything making a
slight improvement, that he would get
better, and the news that he had been
shot, is still confined to his bed, and
the wound is still "sloughing." One of
the small bullets was removed from
his leg on Sunday, while pieces of his
clothes which entered with the shot,
are also being removed daily by the
doctor. His wound has had to be
dressed daily, and lately it has been
dressed by Mr. Rowe, a Toronto
physician, who is attending to the
wound. Mr. Rowe was informed on Monday
afternoon against Crossen, which
had again to be remanded. Mr. Rowe
was informed on Monday morning
that the passing in Toronto of Mr. Mc-
Crodon, and he remarked that he
was very sorry for the occurrence.
"Mac was a thoroughbred if ever there
was one," he said. A severed nerve
in the leg is causing Mr. Rowe con-
siderable irritation, and the wound is
quite painful.

William John Crossen appeared be-
fore Police Magistrate Floyd on re-
mand on Monday on the charge of a fa-
tally murdered of Edwin H. Rowe on
May 18, and the same charge against
Crossen of attempting to murder By-
ron McCrodon was changed by the
crown in view of the death in Toronto
that day of the latter to one of mur-
der, the new charge reading as fol-
lows: "that William John Crossen on
the 18th day of May, 1924, at the
township of Hamilton, by shooting one
Byron McCrodon, meaning to cause
to the said Byron McCrodon bodily
injury, known to the said William
John Crossen to be likely to cause the
death of the said Byron McCrodon, and
being reckless whether death ensued
or not, and the death of the said Byron
McCrodon having since resulted, from
said shooting, did thereby commit
murder, contrary to Section 238 of
the Criminal Code."

Crown Attorney Kerr said there
was no other charge that could be laid
in view of the death of McCrodon, and
asked for a remand until June 4, at
10 a. m., when it was doubtful if they
could go on unless Rowe was able to
be present. An inquest had been or-
dered by the coroner at Toronto into
the death of McCrodon, and in view
of the fact that they would likely re-
quire the evidence of Rowe at it, there
was no chance of the hearing being
held.

Crossen is represented by his
counsel, Mr. A. R. Willmott, and ap-
peared very dejected. He had been
informed of the death of McCrodon,
and took the news very much to heart.
He was near to collapse, and in view
of this the hearing was not public. A
large crowd was present, but only the
press and officials were allowed into
the hearing. Bail was refused, and
his bondsmen were released from their
bonds.

The murder charge is proceeded
with in Cobourg it cannot be tried here
before the fall assizes, and Crossen
will have to remain in custody at the
local goal until then.

NOTICE TO CONTRACTORS

Separate sealed tenders marked
"Tender for Contract No."
will be received by the undersigned until
12 o'clock noon, Friday, June 20th,
1924, for the following work on the
Provincial Highway:—
Contract No.

Asphaltic Concrete Pavement
(Cold Mixture) on Concrete Base
1052 Cornwall Town 0.95 miles
Asphaltic Concrete Pavement
(Hot Mixture) on Concrete Base
1127 (Alternative) Cornwall town.....
Macadam Roadway 0.95 miles

1020 Belleville Westwary 6.0 miles
Concrete Pavement
1128 (Alternative) Belleville Wes-
terly 6.0 miles

Plans, specifications, information to
bidders, tender forms and tender en-
velopes may be obtained on and after
Wednesday, June 4th, 1924, at the
office of the undersigned, or from
the resident engineers, C. A. Robbins,
Brookville; J. M. Empey, Port Hope.

A marked cheque for \$1000.00 pay-
able to the Minister of Public Works
and Highways, Ontario, or a Guar-
anty Company's Bid Bond for a
similar amount must be attached to
tenders, one cheque or bid bond only
required on alternative tenders.

A Guaranty Company's Contract
Bond for 50 p.c. of the amount of the
tender will be furnished by the Con-
tractor to the Department when the
contract is signed. A maintenance
bond for 25 per cent of the value of
the tender for pavement will be fur-
nished to the Department when con-
tract is signed.

All bonds must be made out on
Departmental forms.

The lowest or any tender not neces-
sarily accepted.

S. L. SQUIRE,
Deputy Minister of Highways,
Department of Public High-
ways, Ontario, Toronto,
May 29th, 1924.

MAY HAVE BEEN A BURSTING METEOR

When Metal Fell from the Sky
in Georgian Bay Shore—
Penetrates Earth.

The most remarkable occurrence took
place at Meaford recently, which was
brought to the attention of The Flashes
Advance man on Saturday last
by Mr. Fred Raper of that place. Mr.
Raper lives close to the bay shore
just at the end of Raper Park,
with the main street in front and
street along the shore at the rear.

On Sunday morning, May 4th, he
went into his back yard at the rear
of his house and discovered a hole
in the ground some eight to ten in-
ches in diameter, and in a flower border
noticed before, in a flower border.
This aroused his curiosity very
much and he proceeded to investi-
gate. Securing a spade he dug down
six or eight inches when he dis-
covered the object which has aroused
so much interest. It is an irregu-
lar mass of what is apparently
burned metal, and of a com-
bination of both, such as are found on
the lake shore. The stones them-
selves give no evidence of extreme
heat, excepting that some of them
are cracked and one split in two, a
broken half being clasped by the
metal. The whole mass weighed ten
pounds, and the biggest half of this
about five. Mr. Raper had heard
no sound and was at a complete loss
to account for his visitor. The hole
had a slant of probably 40 or 50 de-
grees, Mr. Raper says, and appear-
ed to have come from the West. If
so it must have narrowly escaped
the roof of his residence in order to
land where it did.

There is a theory of the mystery
as we read it: On Thursday night
before, the people of Owen Sound
were awakened by a loud explosion
in the middle of the night and there
was much speculation as to the cause,
but it was finally decided that it must
have been a bursting meteor.

The explosion, according to one
who was just going to bed, was pre-
ceded by a noise like the sound of
escaping steam, and the explosion
itself was loud and heavy. A dull
light lit the sky for a short time af-
ter the noise was heard. Many were
awakened, and some even got
from bed to see if any serious dam-
age had been done.

One does not require to stretch
their imagination in order to un-
derstand how a bursting metallic
meteor could throw off a ball of its
molten metal which would light on
the bay shore at Meaford twenty
miles away, bore a hole in the
ground down to the gravel and clasp
the stones in its embrace before it
could cool. It is a genuine curiosity
and Mr. Raper prizes it highly. Pos-
sibly later on, other remnants of this
remnant meteor will be discovered.

SIR THOMAS WHITE
AT THE HOME BANK
Trenton, Ontario

So this time
the bank after bank
has been an obvious misman-
agement. So the whose primary
duty is to care for the interests
confided to them, and who are obvi-
ously and wholly responsible for the
disasters have in some cases come out
scathless. Ministers of the Crown not
primarily responsible and harassed
with countless other cases are pur-
sued with intolerable abuse. The
reason is plain. The depositors who
trusted their money to the Home Bank
many of them through religious or
racial affinities having no hope of get-
ting it back from those who risked
it wrongly. How to convict the gov-
ernment, in the persons of three suc-
cessive finance ministers, of failure to
care for their interests, and so get
their losses repaid out of the peo-
ple's pockets. Sir Thomas White, on
whom the accusation must directly
falls, with those who squandered the
depositor's money—only at the worst
of allowing that misadventure through
neglect. Among other courtesies Sir
Thomas White is accused of having
been caught asleep at the switch.
That was in the very middle of the
agony of having to raise means for
the war, when he had indeed, lost the
power of sleep. Had he put an auditor
into the bank there would have been
a run on it, perhaps on others, and the
same people now accusing him would
have abused him fiercely. Had he
laid the matter before the Bankers'
Association, their altered demon-
stration toward the securities of the distress-
ed bank would have had the same ef-
fect of panic. Had he known the con-
dition of the bank he could have saved
it but he was misinformed and no host-
ile man could have suspected such
fraud as has been disclosed.

Brass Tacks
He—How sweet it would be if we
were two little birds who could fly
out into the great world and build
our nest in the top of a tree!

She—It would be much nicer to be
married and to have a little flat with
two rooms, a bath, a gas stove and
warm water!

When?
George F. Baker, the noted fi-
nancier, was talking, at a reception
at the Plaza, about the Marquis de
Ponthieu, who recently sued Mrs.
Perrin Thompson, widow of a New
York millionaire, for breach of pro-
mise.

"It is pretty small potatoes," he
said, "for an able-bodied man to be
bringing such a suit as that against a
woman."

Mrs. Baker made a gesture of amu-
sed contempt.

"When will American women
learn," he said, "that you can't
judge a book by its title, nor a man
by his?"

S. Matter of Practice

RELIEF TEA "is good tea"

Fine, brisk flavor! Best of all in the
ORANGE PEKOE QUALITY

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

People living in country districts, perhaps far removed from a doctor, are often confronted with cases of accident or sudden illness. At times like this it is very hard to know just what to do on the spur of the moment. Most people get nervous and excited, thereby adding to the general confusion without giving much practical help. If there is any use in saying so, I would strongly advise the person who is on the spot as a helper to keep cool. Try and control yourself and deal with the circumstances in a common-sense way. For instance, if a person gets hurt and is bleeding, the bleeding must be checked. The best way to do this is to get a hard pad and press it firmly against the bleeding spot, or else tie the pad on with your handkerchief.

A lot of alarm and anxiety is often caused in cases of convulsions. When a fit comes on, the sufferer will be lying down, the best position for him, but your common-sense will suggest something soft under his head, and you should use a little gentle restraint if necessary, just sufficient to prevent him from injuring himself in his struggles. If the teeth are clenched and the tongue bitten, try and insert a small stick with a piece of rag wrapped around it, between the jaws.

Cuts and abrasions are perhaps the most common injury met with, and to keep the wound clean is the important thing. When the skin is broken it is particularly liable to be infected with germs which may cause blood-poisoning. If you can only keep the wound clean, nature will do the healing, but nature cannot heal while her work is being interfered with by germs that cause inflammation and pus, or what is known as an infection. Of course, one can control infection by the use of antiseptic solutions, but these may be at hand, so the very best thing to do is to keep the cut or abrasion clean and free from infection if possible. You will ask what to do then. First, bathe the wound carefully and thoroughly with clean water to which you may add some antiseptic solution such as boric acid. Then still, wash the wound with warm water and soap. Do not touch the wound with a sponge or dandel, but something reasonably clean, such as a piece of new lint or clean cotton wool. If none of these are to be had, a piece of clean linen such as a handkerchief will do very well. Then dry the wound and paint on some tincture of iodine if it is available. The iodine may smart, but only for a few moments, and you should not neglect the wound by a pad of boric lint or clean linen. A bandage applied snugly, but not too tight, will stop any further bleeding and at the same time keep the dressing in place. If the wound does not stop or feel uncomfortable, the dressing need not be changed for forty-eight hours or so.

Severe hemorrhage is a condition that requires immediate treatment, but what you can do is only of a temporary nature. Still, you can often save life by checking or controlling the bleeding until the doctor arrives. Keep the patient lying down quietly and notice whether the blood comes out in spurts or in a steady flow. Apply a pressure pad or even hold the bleeding point tightly with your finger until you get assistance. When the pressure pad is applied, bandage firmly at once. Elevate the injured limb as high as possible.

Should the blood still continue to come in spurts, it is evident that an artery has been cut or torn and you will then have to try and compress the main artery by pressure against the bone with your fingers.

Keep the patient lying down quietly and notice whether the blood comes out in spurts or in a steady flow. Apply a pressure pad or even hold the bleeding point tightly with your finger until you get assistance. When the pressure pad is applied, bandage firmly at once. Elevate the injured limb as high as possible.

Sea Fever.
I must go down to the sea again, to the lovely sea and the sky,
And all I ask is a tall ship and a wind
To steer her by,
And the wheel's kick and the wind's song
And the white sail's shaking,
And a grey mist on the sea's face
And a grey dawn breaking.

I must go down to the sea again, for
the call of the running tide,
Is a wild and clear call that may not
be denied,
And all I ask is a windy day, with the
white clouds flying,
And the blung spume and the blown
spume and the sea gulls crying.

I must go down to the sea again to the
vagrant gypsy life,
To the gull's way and the whale's way,
where the wind's like a whetted
knife,
And all I ask is a merry yarn from a
laughing fellow rover,
And quiet sleep and a sweet dream
when the long trudge is over.

—John Mansfield.

THE CHEERFUL WOMAN

Is One Who Has the Rich, Red
Blood of Good Health.

The fact that one woman is bright-eyed, rose-cheeked, strong and cheerful, while another is pale, weak and depressed is due more often than otherwise to the condition of the blood. The way to remedy this depressed state is to build up the blood, and for this purpose there is no other tonic so equal Dr. Williams' Pink Pills. A case in point is that of Mrs. Malvin Abra, Grayley Street, Vancouver, B.C., who says: "About two years ago I was a very sick woman. I seemed to be wasting away and getting thinner all the time. I grew so weak that the doctor sent me to the hospital, but the treatment there did not help me and I returned home. Then I tried a number of tonics with no better results. At this stage my mother came to me, and as she is a firm believer in Dr. Williams' Pink Pills, she started me on this medicine. I can only say that they did wonders for me. I began to get new health and strength after I had taken a few boxes, and day by day this improvement continued until I was again well and able to do all my household work, and I have not had a sick day since. I cannot recommend your pills too highly and urge those who are looking for health and happiness to give them a trial."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Granny, come to our house,
And ho! my lawdy-daisy!
All the children round the place
Is lat a-runnin' crazy!
Fetched a cake for little Jake,
And fetched a pie for Nanny,
And fetched a pear for all the pack
That runs to kiss their Granny!

Lucy Ellen's in her lap,
And Wade and Silas Walker
Both a-ridin' on her foot,
And 'Pollo's on the rocker;
And Marthy's twins, from Aunt
Marin's,
And little orphan Anny,
All a-singin' ginger bread
And giffin' to Granny.

Tells us all the fairy tales
Every thought or wonder—
And 'bundance o' other stories—
Bet she knows a hundred!
Bob's the one of Whittington,
And Golden Locks for Fanny;
Here we laugh and clap their hands
'Listenin' to Granny.

Granny's come to our house,
Ho! my lawdy-daisy!
All the children round the place
Is lat a-runnin' crazy!
Fetched a cake for little Jake,
And fetched a pie for Nanny,
And fetched a pear for all the pack
That runs to kiss their Granny!
—Janet Whitcomb Riley.

GREEN TEA IN GREAT DEMAND.

Twenty-five years ago Green Tea was more popular than Black, but due to the heavy importation of poor quality Japan and China Green Teas, the demand fell off. Ceylon and India started producing Green Tea on a large scale only in recent years. They were of such fine quality and delicious flavor that Green Tea drinkers immediately recognized their superiority and demanded them in increasing quantities. Salada Tea Company is practically the sole importer of Ceylon and India Green Teas in Canada.

New Source of Power.
Motor tests recently made indicate that palm and cottonseed oil may be practical and economical sources of power in the tropics.

Keep Minard's Liniment in the house.

A man should never be ashamed to admit that he has been in the wrong; it is but saying in other words that he is wiser to-day than he was yesterday.

"The man who once most wisely said, 'Be sure you're right, then go ahead,' might well have added this to wit, 'Be sure you're wrong before you stop.'"

EASY TRICKS

Which Card

This trick requires a little practice, but it is well worth it. Well presented, the trick is more mystifying than the description suggests. Show four cards to a spectator, asking him to fix his mind upon one of them. Do not display them too long—just long enough to enable him to see one of the cards plainly. Pat two of the cards on the top of the pack and two of the cards on the bottom and put the pack behind your back.

Throw several cards on the table and ask him to tell you whether or not his card is among them. Do it several times until his answer is "Yes." You will then be able to name the card he selected.

The first handful of cards you throw on the table includes one of the two cards you put on the bottom of the pack. If his answer is "No" you will know that the selected card is one of the three other cards. The cards may be returned to the pack. The next handful of cards includes one of the other three. If it is not the selected card, the next handful will, of course, contain it.

(Clip this out and paste it, with other of the series, in a scrapbook.)

And How They Can Run!

"He seems always in a hurry—what's the matter with him, anyway?"

"Tryin' to get up with his running shoes."

"How they keep in the house."

"Granny, come to our house, and ho! my lawdy-daisy!"

All the children round the place is lat a-runnin' crazy!

Fetched a cake for little Jake, and fetched a pie for Nanny, and fetched a pear for all the pack that runs to kiss their Granny!

Lucy Ellen's in her lap, and Wade and Silas Walker both a-ridin' on her foot, and 'Pollo's on the rocker; and Marthy's twins, from Aunt Marin's, and little orphan Anny, all a-singin' ginger bread and giffin' to Granny.

NURSE CHAPPELLE SAYS TANLAC BRINGS MOST GRATIFYING RESULTS

Nurse With 15 Years' Experience Urges Use of Tanlac—Tells of Her Mother's Experience With World's Famous Tonic.

"I have direct and personal knowledge of so many cases where TANLAC has restored health and strength and helped weak, run-down people to get on their feet that I know it to be an unusual medicine," is the emphatic manner in which Mrs. M. E. Chappelle, Blue Mount and Thomas Ave., Wauwatosa, Wis., a practical nurse of fifteen years' experience, pays tribute to the famous treatment.

"Time and again I have urged TANLAC's use and it always brings the most gratifying results. My own mother, now eighty years old, took TANLAC five years ago, and it has been her standby ever since. Nothing helps her as TANLAC does and she is as strong an advocate of the medicine as I am. Only recently, mother became generally run-down. Her stomach was disordered, her appetite utterly failed her, and she came near having a nervous breakdown. TANLAC gave her a vigorous appetite, corrected all complaints and left her not only well and happy, but so strong and active that she looks after the

Take TANLAC Vegetable Pills.

He deadens all birds with the note Of his so hale and lusty throat.

And with his strong ringing
Each course, each ledge is ringing.

Where sits he? That I cannot mark.
But for his voice now, hark, hark, hark!
How his voice sallies
Ring through these leafy alleys!

What is he? Say a censer, high
By angel hands swung sightlessly,
Whence Heavenward taper
Smoke-wreaths of perfumed vapor.

What is he? Say a beauteous chime,
Fine-toothed, fine-threaded, quick to rhyme,
Though unhehended,
Alert, exultant, golden.

He is—where I can reach him not—
A spark of fire, a message caught
From roofs high over
Those low roofs us that cover.

It irks me not, though old I be,
That he the laurel bear from me;
Sweet bird, I know it,
"Tis yours, the crown at poet.

For what man yet could fathom all
The riches of that treasure hall
Of wondrous singing
The nightingale is king!

Habit is one of the few things in the world that it is harder to break than to make.

To be perfectly proportioned, a man should weigh 28 lbs. for every foot of his height.

ISSUE No. 22—24.

MASONS WILL LAY U.E.L. CORNER STONE

Monument to be Erected at Belleville—Will be at Humble

The largest Masonic gathering held in Canada was assembled at the City of Belleville, Ontario, on Tuesday, June 17th, when the U.E.L. Lodge of Canada in Ontario laid the corner stone of a monument to be erected to the U.E.L. at Belleville. Besides the Lodge Officers, five thousand Masons from Canada and other American cities will participate in the ceremony.

It is 140 years since the U.E.L. was settled in the native forest of what is now Ontario. They brought Freemasonry over from the New England, and public, and notwithstanding the struggles for a livelihood in their new homes, they kept Freemasonry alive. In some instances members walked 60 miles to attend a lodge held in a private home or the back room of a tavern. In 1801 a committee of three walked from Meyers Creek (now the City of Belleville) to Kingston, 60 miles, to present a petition for dispensation to form a lodge and that lodge has been in existence ever since.

The monument will be of a simple, inexpensive character to typify the humble beginnings of the U.E.L. Loyalty, and will consist of a representation of a log cabin mounted on a solid, expansive pedestal with four seats underneath. It will be constructed of cement made from stone and clay off a farm originally settled by one of the pioneer settlers.

AGRICULTURAL CENSUS COMING

Farmers Urged to Forward Returns.

During the course of next month the Dominion and Provincial Governments of Canada will proceed with their joint annual enumeration of the areas sown to field crops and of the numbers of farm live stock. In all the provinces the returns will be collected through the rural schools, except in Prince Edward Island and British Columbia, where they will be sent through the local agents. The present system has now been annually in force throughout Canada since 1918, and at an Interprovincial Conference on Agricultural Statistics, held in Ottawa on January 23, 1924, the existing plans were revised for continuance during the present year and until such time as it may prove possible to evolve better.

In Farmer's Interests

At the conference referred to, certain improvements were effected in the scheduled schedule. The schedule to fill up, and on this card the Dominion and Provincial Governments make an earnest appeal to all farmers to give the information required, urging the following: (1) The statistics are collected and published primarily in the farmer's own interest; (2) They are his protection against misleading reports by speculators interested in controlling or manipulating prices; (3) provide information which determines prices, and so ensure fair play all around; (4) They enable transportation companies to judge of the volume of the crop and to make adequate and timely arrangements for its movement; (5) Bankers require accurate information for the extension of credit facilities; (6) Manufacturers, wholesale and retail merchants and others require knowledge of crop conditions for the establishment of profitable local enterprises which react favourably upon the farming industry; (7) Not the least, the accurate issue of crop estimates; but farmers can help to ensure the accuracy of the government estimates by returning the schedule required. The larger the number of returns, the greater will be the value of the estimates based thereon. It is further pointed out that the completed schedules will be treated as absolutely confidential, and no individual returns will be divulged. The fact is supplied will not be used in any way for taxation purposes or for the imposition of any other liability.

Need for Statistics

In most branches of national effort, the necessity for accurate statistics is being more and more realized. When it is considered that Canada is now one of the world's leading wheat-growing and exporting countries, and that the prices received by wheat growers are determined by world conditions of supply and demand, farmers should realize that upon the timely publication of accurate information depends largely the welfare of the great agricultural industry as a whole and consequently that of each individual concerned in it. If any farmer in this district should not receive the cardboard schedule through the rural school or otherwise by the middle of June, immediate application for it should be made either to the Public School teacher of the School District in which he resides, the provincial Department of Agriculture at the capital of his province, or the Dominion Statistician at Ottawa.

Said in London

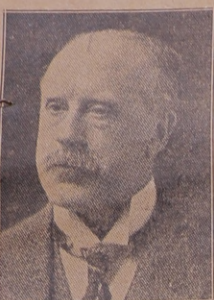

The hairdresser is a born conversationalist—Sir Landon Ronald.

The people who do not realize that people who never think of doing anything else—Bernard Shaw.

And She Did

When Marjorie went in next door she saw some pretty frosted cakes on a large tray.

She brightened up and said happily: "Well, I s'pose you thought some company might drop in and here I did."—Chicago Tribune.

THE LATE EVELYN MACRAE

Prominent Anglican Layman, whose funeral took place on Saturday last in Toronto. A largely attended service was held at the Church of the Epiphany, Bishop Sweeney officiating, assisted by Rev. Canon Lyson Hodge and H. C. Dixon, all personal friends of the deceased, who was father of Mr. L. E. Macrae of Trenton.

PRINCE EDWARD CONSERVATIVES MEET

Annual Gathering Held at Picton.

At well attended meetings of the Prince Edward County Men's and Women's Conservative Associations held in Picton on Saturday, Mr. Morton Weese of Ameliasburg was elected President of the Men's Association for the coming year and Mrs. W. R. Munro re-elected to the Presidency of the Women's Association. There was a good representative gathering, several from each municipality being in attendance.

The Women's Association.

At the Women's Association meeting the following officers were elected: Hon. Presidents—Mrs. John Hubbs, Mrs. H. S. Collier.

President—Mrs. W. R. Munro; Vice-President—Mrs. D. J. Shannon.

Secretary-Treasurer—Mrs. Frank Morden.

The following committee was appointed to work with the county of Ameliasburg, Mrs. Morton Weese; Hillier, Mrs. Ross Bush; Hal-lowell, Mrs. W. R. Fox; Athol, Mrs. Alice Cato; South Marysburg, Mrs. Arthur Bongard; North Marysburg, Mrs. Wm. Anderson; Sophiasburg, Mrs. Sam Clement; Picton, Mrs. T. W. Kinney; Wellington, Mrs. W. D. Wilson; Bloomfield, Miss F. Barker.

THE VILLAGE BLACKSMITH

(1924 Model)

Under an ad for gasoline

The village smithy machine

He's agent for the Jinx machine

And several other brands.

For fear he'd soil his hands.

He wears a gold watch on his wrist,

A pearl pin in his tie.

His hand is a fine piece of machinery.

The finest he could buy.

There's not a thing the smithy wears

That doesn't please the eye.

Week in, week out, from morn till night.

He sees the autos come

With brakes that are not working right.

And axes on the bum,

With gas, repairs, and grease and oil.

He makes a tidy sum.

He has a staff of skillful men

Who toil from 6 a. m. till ten

And sometimes even more.

The smithy never does a stroke—

He thinks that work's a bore.

The children coming home from school

Look in at the open door,

And laugh to see some city fool

Frankford

Mr. and Mrs. A. J. Bingham and family motored to Toronto last week.

Mrs. J. McLaren, Mrs. B. R. McLeod, Mrs. G. Johnson, Mrs. E. Lord, Mrs. H. Houlton, Mrs. W. M. Munro, Mrs. W. S. Shannon, attended the annual meeting of the Women's Missionary in Trenton on Thursday and Friday.

Mrs. D. Windover of Buffalo, visiting friends in town.

Miss Margaret Bowen visiting friends in Belleville, recently.

Mr. H. C. Dixon, all personal friends of the deceased, who was father of Mr. L. E. Macrae of Trenton.

Rev. I. Snell is in Picton attending Conference this week.

Miss F. Farney of Stirling is visiting at the home of Mr. and Mrs. Jas. Gay.

Mr. and Mrs. Williamson motored to Toronto, Tuesday.

Mrs. D. McMullen is visiting friends in Belleville.

Mrs. I. Snell is visiting her mother in Bowmanville.

Mr. and Mrs. P. H. Osterhout are attending Methodist Conference in Picton.

Mr. Lou Herrington spent the week-end with his brother, Mr. S. Herrington.

Mr. and Mrs. Roy Bell, Campbellford, spent Sunday with Mr. and Mrs. W. H. Bell.

Mr. and Mrs. Arthur Osterhout were guests of Mr. and Mrs. P. H. Osterhout on Sunday.

Miss Boyle, Belleville, is visiting her sister, Mrs. H. Madill.

Mrs. Ben Chase left on Monday for the west to visit her sister, Mrs. D. Clarke.

IN HONOUR OF BIRTHDAY

Mr. and Mrs. George D. Patrick entertained a few people at their home on June 2nd, on behalf of Mrs. D. Ketcheson, celebrating her birthday.

She was presented with a half dozen O'Connell teaspoons.

Mrs. Arthur Ferguson read the address and Mrs. Alex. Smith made the presentation.

The address read, Mrs. Ketcheson—

"We have gathered here this evening in honour of your birthday. We think Mrs. Patrick was very kind to invite us to spend the evening together and partake of the lovely things she has provided. We ask you to accept this small present. May we live in closer touch in the future than in the past."

Signed—Mrs. W. Lyons, Mrs. Alex. Smith, Mrs. Arthur Ferguson, Mrs. Mary Forbes, Mrs. D. Ketcheson, Mrs. Geo. Patrick.

A very pleasant evening was spent by all.

QUARTERLY MEETING

Quarterly service will be held in the Frankford Presbyterian Church, June 15, 1924.

Rev. W. H. Gregory is to preach. He will preach Friday and Saturday evenings at 8 o'clock and on Sunday at 11 a.m. and 7.30 p.m. Everybody welcome.

SMITHFIELD WOMEN'S INSTITUTE

The 33rd Annual Convention of the Women's Missionary Society met in Smithfield Church (Meth.), May 29th, Mrs. Hewitt, District Superintendent, in the chair, with Mrs. W. Montgomery as Secretary.

The morning session consisted of reports from the different auxiliary circles and bands, giving a splendid increase in numbers and finances. Total number of auxiliaries, 13; total number of members, 607; amount in honour, \$261.45. An increase of \$38 over last year. An increase in Rest Fund of \$17.00, total \$81.71.

An increase in Easter Offering of \$128, total \$443.00.

An excellent dinner was served by the ladies of the church. Mrs. Bedell gave the address of welcome, which was responded to by Mrs. S. Terrill of Wooler.

The afternoon session was made very interesting by the splendid papers given from different auxiliaries covering the missionary work at home and abroad. The papers were interspersed by appropriate solos from Mrs. Hendricks and little Miss Bernadine Brimble. Rev. J. S. L. Wilson of Brighton gave a most interesting and instructive talk on the temperance issue, giving as his message to the women of to-day: "Hold fast that which you have for we are out to destroy this thing root and branch!"

CARRYING PLACE CEMETERY

2nd Annual Decoration Day

The Cemetery Board, Carrying Place, are holding June 10th as a day to clean-up and decorate the cemetery. All well-wishers are requested to be present to help improve the appearance of our cemetery. Operations begin at 1 p.m.

E. B. YOUNG, Chairman.

YOUR HOME PAPER

Your home paper gives you the greatest interest in the home news. Every issue proves a welcome visitor to every member of the family. If you are not reading The Quinte Sun, try it for a year, and see if it is not enjoyed in your home.

Conclusive Evidence

Absent-minded Professor (to servant)—"You say there is a collector at the door? Did you tell him I was out?" Servant—"Yes, sir, but he didn't believe me." Absent-minded Professor—"Well, I guess I will have to go and tell him myself."—Colorado Do Do.

We Invite You

There are many useful, lasting gifts to be found for the June Bride at The McDonald Hardware Store. Gifts that range from the kitchen to the bed-room, from a Stove to a Saucepan or a Rolling Pin.

Useful Gifts for June Brides

GARDEN TOOLS AT REDUCED PRICES

If you have a back door garden or a market garden, our full line of Spades, Hoes, Rakes, Cultivators, Etc. are at your service. Keep the lawn trimmed with one of our mowers. Priced from \$10.00 up.

FISHING TACKLE AND CAMPERS' OUTFITS

The inexperienced fisherman can capture a creditable string of fish in a couple of hours by trolling with a Bass-Oreno or a Pike-Oreno bait in waters where Pike, Jacks, Bass or other kindred fish are found. These baits dive, dash, dart and wiggle just like an injured fish—a sure fish-getting bait. All kinds of tackle in stock at McDonald's.

Before going camping call at this store for your Collapsible Stove, Wash Basin, some good stout cord, a few nails and tacks, a good hand axe, a rightsize frying pan, or any of the other dozen and one necessities.

(Continued from Page One)

of Christ constraineth us," words which are so familiar to all members of the W. A., as it is the motto of that organization. Mr. Clarke stated that opposition, even malice, or unreasonable opposition, was good for us, developing patience on our part, and careful, thoughtful reasoning, and we become stronger and better for opposition. For without opposition we would cease to grow.

It was opposition, as the preacher said, that Paul every soul was dear, and in 1st and 2nd Corinthians he is dealing with opposition. In Corinth, heard of after he had left. The main aim of St. Paul was to reach where Christ was not named, lest he encroach on another man's territory. His teachings were challenged and factions grew up and even his appearance criticized. The love of Christ for the world was not only generally, but for each individual soul, was so great many would not understand.

To St. Paul every soul was dear, so he continued from town to town preaching and teaching the Gentiles and breaking down the wall of prejudice between Jew and Gentile. This was the sense of the love of Christ for the individual soul that was the basis of all true missionary effort. It was the realization of the value of every soul that distinguished the Christian, real Christianity, from all other religions.

Christians had built hospitals, sent doctors, nurses, teachers, cared for the lepers, with the people, but they saved nothing to touch. It was this love of Christ for the individual that was the hope of the world.

The Individual Soul. Neither Bolshevism, Socialism, Free Thought or any other form of new thought can save the world, for they all disregard the value of the individual soul. The Holy Communion, said the speaker, symbolizes the unifying power of the Gospel of Christ, no distinctions are made, the altar rail, social distinctions can never assume the old proportions where these symbols of the one cup and one loaf are used.

We must, said the preacher, first get a genuine love of Jesus Christ, really understand Him; must see what Christ is like; see Him as He is, the altogether lovable, perfect, ideal, the together adorable Son of God who can enter into the love of Christ for the world.

Other clergy present were: Rev. Canon Armstrong, Trenton, Rev. Canon Dean Byers, Stirling, Rev. Mr. Pringle, Adolphus, Rev. Mr. Ware, Pittsburgh, Rev. Mr. Barber, Gananoque, was present Wednesday evening.

There were 225 Communicants at the morning service.

Welcome to Delegates. Adjournment was made to Canterbury Hall, where the meeting was called to order by the President, Mrs. P. A. McTeer.

Mrs. A. L. McTeer read the following address of welcome: Madam President, Officers and Fellow Members of the W. A. of the Diocese of Ontario. Welcome.

It is for me a great honour as well as a pleasure to extend to you a hearty welcome on behalf of this parish.

Trenton was originally part of the adjoining missions of Ameliasburg and Belleville, and the Chancel window in our Church is a memorial to the Rev. John Cochrane, first rector of Belleville.

All missionary work is noble work and the Woman's Auxiliary commends itself by its past achievements and its vision for the future. We need the support of united effort, of united action in our work to aid and encourage missionaries.

It is the first time we have had the privilege of opening our homes and extending hospitality to the Annual Meeting and we therefore trust that you will kindly overlook any shortcomings and carry away with you only happy recollections of your visit to Trenton.

The well-known words of an old hymn might be adapted to express an appropriate thought:

A charge to keep we have,
A God to glorify,
Never dying souls to save,
And fit them for the sky,
To serve the present age,
Our calling to fulfil,
O may it all our powers engage,
To do our Master's will.
That the blessing of God may rest on your meetings, that you may be profitable and inspiring, that you may all return home with renewed strength and able to go forward in faith and hope, is the wish of our branches of the W. A. in Trenton.

Mrs. T. W. Reynolds of Brockville replied to the address of welcome, in a few happy words. She stated that she was pleased to be asked to reply to the address of welcome, and thanked the Trenton ladies for their cordial welcome. Said Mrs. Reynolds: "The need has no fear of her hospitality; it was untrivial. As for those entertained, they might prove to be angels unwares."

Bishop's Address. Bishop Bidwell then delivered his address.

His Lordship started out by humorously saying he was rather startled, as he thought it was mere mortals he was to talk to, but he had just heard he was in the company of angels. He spoke of the high value of the place in the real organization, the Woman's Auxiliary. He had great difficulties, as there was a great deal of mission work in our own Diocese and they deserved credit for the exceedingly high level they had reached. A parish that has a live W. A. does

SECRETARIES' REPORTS.

The Recording Secretary reported 1615 members in 65 senior branches, 150 in 16 junior branches and 105 in 19 juniors; a total of 2270 members. There were also 884 Little Helpers, and 150 Life Members, one new branch and 3 re-organized branches. There was some discrepancy between the returns from report cards sent out in the month of May and the membership fees actually received, which no doubt would be straightened out in the present year.

The Corresponding Secretary reported that over 130 letters were written during the past year and 130 letters and cards received.

She then debated about life membership certificates and stated that the Ontario Diocese had never had them, as the gold pin was thought to be sufficient. After some discussion the question as to whether the Board should procure these certificates was put to the meeting, and decided that it was an unnecessary expense.

The Dorcas Secretary reported: Total value of sales, \$1,054.49; church furnishings, \$19.00; total, \$1,073.49. Sales, 572 to 10 schools, 16 to Mission stations, 24 to our own diocese and 3 overseas. Total receipts, \$539.37; expenditures, \$100.33; balance on hand, \$439.04. The full amount had been received for boots.

Miss Kirkpatrick asked that all articles intended for overseas sales be sent in not later than the end of June. There was very little on hand and such articles as scarves, dressed dolls, sweaters without sleeves, quilt tops, etc., could be sent.

There was a debate about the material, galathea and denim being much better than print. Bales of material, galathea and denim being much better than print. Bales of material, galathea and denim being much better than print.

He then spoke of the deplorable shortage of candidates for the ministry in our country. The Diocese of Ontario has only 30 per cent. of stations filled. Edmonton would like more men; all over the country the cry is for more men.

This vitally concerns us, emphasized the Bishop. It means our sons are not in proper proportion giving themselves for this work. He thought the atmosphere of the home had a great deal to do with it.

Home Influences. If the homes would consistently maintain the attitude and hold up before our sons the high and holy office of the ministry, more of our own countrymen would take Holy Orders. Refrain from too much criticism of the individual clergy.

We won't be a strong church, said the Bishop, until manned by men of our own country; we run the risk of being looked upon as a Church being manned from outside. He urged that all pray that more of our young Canadian men, who understand the country and its needs, may come forward.

He then prayed that blessing would rest upon the endeavours and great work of the W. A.

Mrs. Price stated that a resolution had been passed at Halifax, Thursday after tea; Mrs. Sibbitt, The Living Message, after Thursday meeting.

Balancing for nomination of officers and four other delegates from diocese, took place.

Meeting adjourned for lunch, which was served by ladies of King Street Methodist Church, in their school room.

Greetings from Sister Societies. At the conclusion of luncheon, Mrs. Walter Smith, President of Trenton Branch, presented the Presidents of the sister societies of the other churches who were present.

Mrs. E. L. Fraser conveyed the greetings of the W. M. S. of King Street Methodist Church.

Mrs. E. J. Wilson conveyed hearty greetings and congratulations from St. Andrew's Presbyterian, and Mrs. J. Graham of Grace Methodist also spoke words of kindly greeting.

Mrs. Price replied in a few felicitous words.

Afternoon Session. Thursday afternoon session opened with Hymn 389 and prayers led by Rev. Mr. Pringle of Adolphus.

Minutes of morning session were read and adopted. Minutes of last annual meeting were taken as read.

Corresponding Secretary read letters of greeting from President of Dominion Board, Carolina M. Hall, Rec. Sec. Dominion Board, M. E. Wale, and Miss Slater, Dominion Cor. Sec'y.

Also a letter of greeting from Mrs. Lennox Mills of Montreal, Honorary President of Ontario W. A.

Greetings had also been received from the following Dioceses: W. A. Secretaries: Niagara, Kootenay, Nova Scotia, Ottawa, Qu'Appelle, Fredericton, Montreal, Toronto, Huron, Algoma, Calgary, Rupertland, Keweenaw, Edmonton, Moosem, and Columbia, New Westminster.

President's Address. The President, in her comprehensive and very interesting address, gave a brief resume of the work accomplished by the W. A. during the past year. Among other advances made was the Pension Fund for Missionaries, which was now established. The W. A. were responsible for 43 per cent. of the total cost of the mission work of the Church and in addition through the duplex envelopes, helped the men pay the remaining 57 per cent. The W. A. had spent \$51,000 in clothing and furnishings for Indian schools.

Miss Lewis, our worker in Le Pas, was returning to Le Pas as a W. A. worker, though not as a missionary, her health not being considered equal to requirements of the missionary fund, which amounted to \$8,000. Four of these intended to take Holy Orders. An additional grant had been asked for by M. S. C. C. for work among incoming white settlers.

THE BOYS MAY MARRY CHRISTIAN GIRLS.

Mr. Rose had bought land and was conducting an experimental farm, and in that way hoped to come in contact with 15 or 20 more of the kind among the women and children and among the Christians. Kangra is 24 miles from Palampur. The compound is on a high hill, overlooking the flat valley. Mrs. Haslam, is carried on by an out but can help any surgical cases, as the doctor has cataracts on his eyes, and women must have a woman doctor. There is room for 16 in-patients. Each patient brings all her relatives. They come and settle in the hospital, all castes; all have to have separate kitchens, and this is a source of great difficulty. It is through the hospital they get the most contacts. At this hospital mid-wives are trained.

Mr. Lewis has a girls' school and a hostel for girls. There are 30 Hindu and 25 Mohammedan girls in the day school, 572 to 10 schools, 16 to Mission stations, 24 to our own diocese and 3 overseas. Total receipts, \$539.37; expenditures, \$100.33; balance on hand, \$439.04. The full amount had been received for boots.

He then spoke of the deplorable shortage of candidates for the ministry in our country. The Diocese of Ontario has only 30 per cent. of stations filled. Edmonton would like more men; all over the country the cry is for more men.

THE CENTRAL ROOM RESOLUTION.

The "Central Room" resolution was withdrawn by the mover, Mrs. C. C. Abbott. The Representation at Annual Meeting. Resolution: Where there is only one senior branch, the President shall be substituted and 1 delegate shall be entitled to vote. Where there are also girls and juniors, 1 from each branch. Bed and breakfast only to be provided delegate or branch. Pay for dinner and supper. Afternoon teas to be dispensed with. This resolution was considered clause by clause and the following amendments suggested: "That each branch send 1 delegate, except where there is only a junior branch in a congregation, when 2 may be sent."

That resolution passed at Nanaimo contributed \$1 yearly to Hospitality Fund, and be given on by branch for entertaining annual meetings, to be used for expenses in connection with the meeting. Afternoon teas to be optional.

Miss Lewis outlined of "The Modern Movement in Japan," commencing and ending her address with the admonition, "Live up to your calling and look up to the Christian faith that whatever might be said by the Japanese against the Christian faith and doctrine, nothing, said against the Christian faith, an ideal, monogram, the Christian Home, though they did not live up to it, polygamy being very prevalent."

Friday Afternoon. Friday afternoon session opened with Hymn 523 and prayers. Minutes of morning session read and approved. Resolutions were then proceeded with.

"Change in Date of Annual Meeting." Moved that for one year we try out, that date of annual meeting be changed to last of April or beginning of May. Carried.

Changes in constitution and by-laws were taken up clause by clause and approved. The clause, Treasurer's books must close by December 15 of each year, being most important change.

Annual Parochial meetings are to be held not later than January 31st. Girls' branches to join in corporate Communion on St. Andrew's Day.

"Shall we endorse new work among white settlers?" In this connection a letter was read from Miss Hall, Dominion President. This work would entail an increase of \$1,000 in the budget for 1925, an increase of \$200 for Ontario diocese. The President urged that from a national standpoint we should do all we could to take these people good Canadian citizens and provide them with the ministrations of the church. The feeling of the meeting was favourable and the Board.

Funds Distributed. The consideration of appeals and voting on Funds resulted as follows: General Fund—\$181.25, \$100.00; Parsonage at Burnside, \$100.00; \$81.25 to Pine Bluff, Saskatchewan.

Little Helpers' Branches—\$137.52: Door of Hope, \$50; G. B. Blind School, \$17.52; Japanese Kindergarten, \$30; Extra-Cent-A-Day Fund, \$48.00; Babies' Fund, Mackenzie River, \$36; Overseas Bales, \$12.00.

Life Members' Fees—\$125.85: Church at Gogama, Mooseonee, \$62.32; West Coast Mission, Columbia, \$23.25; Balance of Thelma, Columbia, \$38.00; Alert Bay, Hospital, \$20.66; Sturgeon Lake Mission House, Sask., \$20.00.

Mrs. Reynolds of Leeds, deanery presented the deanery report, an interesting account of her work among the "Women of Kangra Valley." She stated the women had her best love, their need was so great, they were so pitifully ignorant and anything no someone to teach them anything, matter what and help us if you can. There was urgent need for women medical missionaries, to travel about with medicinal supplies and to treat surgical cases.

The report of Mrs. Watchhorn, Greenview, deanery, was read, also the report of the Secretary of Prayer Partners. Christ Church, Belleville, invited the Annual for next year, 1925.

The question of the Kidney resolution committee presented their resolutions, which were carried.

Treasurer reported collections, missionary evening, \$19.40; Junior evening, \$10.45; Library Collection, \$10.45.

The meeting then adjourned to meet at Christ Church, Belleville, next year.

The thanks of the Woman's Auxiliary are due to the ladies of King Street Methodist Church for the excellent meals provided by them.

Officers Elected. The officers were re-elected by acclamation, as follows: Honorary President: Mrs. E. J. Bidwell, Honorary Vice-President: Mrs. H. Youden, Honorary Secretary: Miss A. M. Keston, Honorary Treasurer: Mrs. H. A. Abbott, Vice-President: Mrs. C. C. Abbott, Recording Secretary: Mrs. F. Hentig, Corresponding Secretary: Miss Ethel Waldh, Treasurer: Miss Louisa Kirkpatrick, Dorcas Sec'y: Mrs. S. Sibbitt, Living Message Sec'y: Mrs. E. J. Wilson, Junior Work Sec'y: Mrs. A. N. Lee, Secretary for Junior Work; Miss E. Reynolds, Secretary for Little Helpers; Mrs. T. Austin Smith, Thank-offering Sec'y; Mrs. Leech, Treasurer, Extra-Cent-A-Day Fund; Mrs. F. D. Woodcock, Organizing Sec'y.

The delegates chosen to attend the Annual Meeting at Hamilton were: Mrs. C. C. Abbott, Vice-President; Mrs. F. Hentig, Recording Secretary; Mrs. Reynolds, Treasurer; Mrs. L. Youden, Secretary; Mrs. E. J. Bidwell, Honorary President; Mrs. H. A. Abbott, Vice-President; Mrs. C. C. Abbott, Recording Secretary; Mrs. F. Woman of To-Day

WASTE NOT, WANT NOT.

It is very necessary that small repairs be made wherever their need is apparent, for "A stitch in time always saves nine." A neglected dwelling soon gets a run-down-at-the-heel appearance, and the value depreciates rapidly.

Wherever papering is to be done, clean off the old paper by moistening with a whitewash brush dipped in hot water. Let soak awhile and the paper will come off quite readily. Then, with plaster of Paris mixed with milk to prevent it setting rapidly, or fibre plaster which is mixed with water and hardens so that it is of board-like solidity—fill up any cracks and any places where the baseboard has shrunk away from the plaster. Smooth off these places with a little sandpaper when they are dry, and a much better papering job will be possible.

Specify that your paper hanger will cut and match the paper at the corners of the room; otherwise there will be a twisted and broken appearance in a short time, because of the somewhat uneven settling of the walls, and the fact that the paper was not crowded closely into the angle.

Where worn door sills, splintered boards, or warped places in the floor show themselves, attend to the repair as soon as possible. Mark the warped places with a small lead pencil mark as to where nailing is necessary.

To nail when the warping is present, will nearly always break the tongue of the board or split it in the middle. When the heating plant is going, the floor will dry out—the boards will come back where they belong, and then the pencil marks will indicate just where the nailing should be done. Replace worn or broken boards at once.

When the wood finish of some ready-built houses has a cheap appearance because of its thinness and its quality. This effect may be relieved by purchasing suitable moulding at a lumber-mill. Have a carpenter take the measurements and attend to the mitering of the corners. Nail this moulding carefully in place about the doors and windows. Putty nail heads, and when the room is painted, or painted and enameled, the appearance will be wonderfully improved.

COAXING THE MILK-DRINKING HABIT.

There are times, even with children brought up on the farm, when they will refuse to drink milk. After having been weaned from the wholly milk diet, they like the solid foods so well

that their glass of milk at each meal is neglected. And too many times, the two or three-year-old suddenly revolts against drinking milk for no apparent reason.

In such cases, mother must do something to cause the child to acquire the milk-drinking habit, or to coax it along, for milk is a food needed in abundance by the growing child. There are many ways by which the child can be taught to like milk. Oftentimes if he is permitted to drink milk from a pretty cup or glass, never used for anything else, it will taste much better to him.

One mother writes that she induced her three-year-old daughter to drink milk by putting a pretty picture on the bottom of the glass for her to see when the glass was drained. Sometimes the put pieces of hard candy in the glass, and the little girl was anxious to drink the milk that she might obtain the sweet.

Drinking milk through straws, such as are used at soda fountains, always appeals to children, and especially so if the milk is tinted with pure vegetable coloring or flavored with fruit juices.

These "encouragements" need only to be used for a short time. An appetite for milk and the habit of drinking it regularly will soon be developed, and with a little care and tact on Mother's part, it will become permanent.

A DAINTY MORNING FROCK.

4722

4722. Housework seems lighter when one can attend to its various duties, arranged in a dress made from Pattern 4722. Percale in blue and white, or green and white plaid gingham, would be an attractive development. This style is also good for linen, linens and saten.

The Pattern is cut in 7 Sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 5 1/2 yards of 32-inch material. The width at the foot is 2 yards.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Send 15c in silver for our up-to-date Spring and Summer 1924 Book of Fashions.

THE MERRY-GO-ROUND CLUB.

I was once a member of a very interesting club—the Merry-Go-Round Book Club. We met once a month at the homes of the various members.

The first meeting was at the home of the woman whose name began with A, and so on down the line, but a hostess could exchange days with another member if desired.

When the club was formed there were sixteen members. The only dues and conditions were that each person should purchase a standard book of fiction.

A committee was appointed who compiled a list of books to start with. This list was discussed at the first meeting, a few new ones suggested and then each of us chose a book to purchase.

At the next meeting the books started the rounds. Each one having read her own book passed it on to the mem-

A CLOSE SQUEAK

BY THE HIRED MAN.

PART II.

That afternoon we started to fill the big haymow. The Boss also took the job of filling the big mow, seemed like he could get twice as much up at once as any of the boys of us; he'd get it jammed full of hay, then give me the signal and stand by the fork till it would start off, then upper regions, then he'd hop off, unconcerned as you please. It was dangerous. I was back of the Boss, driving the team that was hitched to the big cable. Two more men were up in the loft, raising the hay away as the big fork dropped it. Then the mow would start back, looking for all the world like a big spider with its legs doubled up under it. . . . None of the men saw the accident. The little Missus happened to be watching for the back porch and I heard her scream. I dropped my lines and sprinted, but she beat me there. The fork had struck him on the head, making a mighty ugly-looking wound. He never moved and at first I thought just had gone the Road, but his heart was still beating.

We got him into the house and in no time old Doc Smith was there and Doctor Tom was with him! I never knew just how that happened. . . . Things were mighty serious. A ticklish piece of operating had to be done. The old doctor wouldn't even attempt it, but he put it up to Doctor Tom. Seems the old man knew all about the young one. He put the case before the Missus for her to decide. The just said, "If he'll do it, Doc Tom," and then things began to move lively. I haven't the slightest idea how long it took. When there's an operation on hand, the folks who are waiting always have time to go around the world two or three times. The little Missus at first was nervous as a witch but towards the last she sort of wilted and sat there, still, with her head in her hands. Doctor Tom told me to stay close in case they wanted anything, so there I sat and twiddled my thumbs, and kept up a steady thinking. I've always said that if I had the say-so as to who does the most good in the world, preachers or doctors, the doctors would come out a snap and I'd go ahead. It seemed to me that Doctor Tom's work of saving the man who was making the woman he—Doctor Tom—loved, was really miserable, must be just a hell of a hard job as a man's work.

After about an hour or so, he came out and said, "Well, the little Missus, 'Everything's out nicely, and we hope for the best," he said. "Wilson is a marvelous surgeon and has done everything that can be done. Now we can only wait results and be patient. We are both rather exhausted, you suppose you could make us a cup of coffee?"

No one ever heard of Doc Smith being "exhausted." The coffee-making was a prescription for the sake of the little Missus!

While she was in the kitchen, we

ber whose name began with the letter of the alphabet next to hers. As the meetings came only once every month this gave ample time for reading the book. The books were never discussed for fear of spoiling the pleasure of those who had not yet read them. So the authors were discussed. Each member answered to roll with some interesting fact about the author selected. Light refreshments were served. L. E. B.

IN QUARANTINE.

When the youngster is convalescing from a contagious disease, an interesting form of amusement is to place him at the window with pencil and paper and get him to write the names of objects he can see, dividing them into groups, such as colors one day; flowers and trees the next day; parts of houses, etc., the following day.

USEFUL RECIPES.

Asparagus Salad—Drain and rinse stalks of canned asparagus. Cut rings from a red pepper one-third inch wide. Place three or four stalks of asparagus in each ring. Arrange on lettuce leaves and serve with French dressing to which has been added a little tomato catchup.

Scalloped Asparagus—2 cups milk, 2 tb. butter, 2 tb. flour, salt, pepper, 1 cup bread crumbs, 2 bunches (1 qt.) asparagus, 2 egg yolks. Make a white sauce of the milk, butter and flour and season to taste with salt and pepper. Cook the asparagus until tender, drain and add it to the white sauce. Add the beaten yolks and turn the mixture into a buttered baking dish. Cover with crumbs and brown in a moderate oven.

Rhubarb Relish—4 lbs. rhubarb, 4 lbs. sugar, 1 lemon (juice), 1/2 lb. figs, 1/2 lb. walnuts. Cut the rhubarb in small pieces. Put in a kettle and add sugar and lemon juice, also figs which have been put through food chopper. Bring to boil slowly. Boil about three-quarters of an hour, then put in the nutmeats, chopped coarse. When it boils again, put in glasses and cover with paraffin. Raisins may be used in place of the figs if preferred.

Minard's Liniment for Dandruff

carried the Boss to the bedroom and Doctor Tom sat beside him, a finger on his wrist. I was watching him pass the corner of my eyes as I passed the open door to see if the Boss was only a little pale. I just thought, "Old boy, if you've turned the trick, and saved his life, you ought to be elected the High Grand Supreme Past Master of all the doctors!"

The little Missus brought the coffee. Doctor Tom took the cup in his left hand and drank it without losing touch with the pulse. Never gave the Missus a glance. And he sat right there all night. The Boss might have been his only, long-lost brother. Once he had me sit by the bed and watch while he called up a doctor friend of his in Kansas City to tell him to send out on the next train the best nurse he could find. The only time he spoke to the Missus was when he ordered her off to bed like she was a little kid.

"You're worn out, little girl—go on to bed now and don't worry; John here, will stand by to-night and if there is any need we will call you at once."

She minded him. It was just daylight when the Boss opened his eyes. Naturally he couldn't sense what had happened. Doctor Tom told him just enough to keep him quiet but his eyes were wandering around the room as if he was looking for something and when the little Missus came to the door it was plain to be seen that she was what he was looking for. He reached one hand toward her and, when she put hers into it, he dropped it as soon as she could and I watched him while Doctor Tom went out for a breath of air. I sat there looking at the bed outline of the Boss under the white cover and wondered what in the Sam Hill makes us sorry for six feet of cussedness, just because it happens to be hurt and helpless.

The nurse came that afternoon. Doctor Tom went back to town. He looked sort of petered, which wasn't to be wondered at considering that he hadn't had a wink of sleep the night before, and I guessed he didn't get much the night before that, judging from the frame of mind he was in when I was hid in the pump-room. He was back bright and early the next morning to see how the Boss was coming. His face made me think of a

he had slipped something down under it to keep us from seeing the real feelings that might show.

The Boss improved right along. Doctor Tom came out from town two or three times a day and the nurse was right on the job. The Boss didn't have much to say but the way he watched the little Missus was moving. It reminded me of the way she used to look at him when she first came to the ranch.

The Doctor stayed over in town for about a week. Seemed like he had forgotten all about his rush to get to Denver. I was busy keeping up the farm work and didn't see much that went on at the house.

One day at noon the Missus asked me to hand a new screen door for her and I was just finishing when Doctor Tom came for his regular afternoon call. The Missus had just come out of the pump-room with a glass of fresh water for the Boss when the Doctor went up on the porch. I was trying the new screen, admiring the smooth way it worked and heard him say, "About one more trip will be all that will be necessary. I think I shall come out late this evening and, if everything is still favorable, I shall leave the case with Doctor Smith and catch the early train for Denver."

The glass of water slid out of the Missus' hand and smashed but I don't think they noticed it. I took just one sideways look at them—she looked like she had gone limp all over, and as for him—well—the mask had slipped.

I moyeyed to the barn pronto, without even gathering up my tools. I had a hard proposition of my own to thresh out. Just what life would mean on that ranch without the little Missus, if Doctor Tom should persuade her to go with him, was a prospect I didn't care to face.

I usually hit the hay about ten thirty but what with wondering and worrying all the afternoon, I had the bust-head good and proper. Being no hand to grunt, I didn't say anything about it but along about nine o'clock I went to my room and went to bed thinking maybe I could sleep it off. I hadn't any more than got settled when Doctor Tom and the Missus came out of the kitchen door and stopped under a tree not far from my window. They were talking real low but my big ears couldn't help hearing.

"Tom," she said, "when you came I hated him. If you hadn't tried to save him, I should have despised you!"

Then Doctor Tom said, very low, "Nell, there is just one thing I would rather have than your love and that is your respect. If I had lost that, I should feel I had forfeited my dearest possession. God grant your days may be brighter hereafter. And now I suppose it must be—good-bye!" There was a hushiness in that rumble voice.

"Tom!" Something in her voice made me want to swear or kill someone.

"Yes?"

"Tom, I haven't been kissed for three years! Do you suppose just once . . . It would . . . help me . . . I'm sure."

I felt like yelling at the top of my voice, "Give her a good one, Doc! I'll stuff the sheet in my ears!"

Now nobody but the Lord and me knew about the kiss. As for me, I wouldn't have blamed her if she had gone with him right then and there to Denver or to the end of the world. And the Lord surely knows (since He must have a little love and tenderness. That kiss was a pure and holy thing, that would, as she said, help her. Anyway I knew I could be a good deal better grasshopper if I could have just one of hers to dream about the rest of my days. But . . . glory be! She's going to stick! And from the look in the Boss's eyes, things are going to be different. But it's my opinion that he is going to have to do some plain, old-fashioned courting if he ever wins her back.

On second thought, I don't believe I'll turn this. I'll send it to some editor and maybe he'll polish it up, wash its neck and ears and comb its hair and put it in his paper. It might help some other Boss to see that if he never takes time to love is wife a little, there's usually some other fellow who will. And not all people in this world care so much for plain respect as Doctor Tom and the little Missus.

(The End.)

Over the Clouds.

"You say he holds the altitude record in Washington? Must be an aviator who keeps well above clouds?"

"No—a politician who keeps well above suspicion, that's all."

Real difficulties can be overcome; it is only the imaginary ones that are unconquerable.

The man who habitually kills time kills his own character, his own happiness.

CHEVROLET

—is easily within the reach of all

NEVER before in the history of the automobile industry has such car value been possible. And it is possible now, only because the Chevrolet Car and Chevrolet business principles have been so universally and so favorably received. Chevrolet production has, as a result, rapidly grown in volume until now Chevrolet is the world's largest manufacturer of quality automobiles.

Chevrolet quality is more than apparent. For, the more closely Chevrolet is examined and the more severe the tests demanded, the more convincingly is Chevrolet quality demonstrated and proved.

Moreover, day by day continuous service brings out another economy equal, if not greater in importance, than Chevrolet's remarkably low first cost. Chevrolet is more economical to operate than any other car built, and its maintenance cost is the lowest in the world.

Investigate Chevrolet yourself. Have us demonstrate the model that suits your needs. We can arrange terms that will surely fit your circumstances.

Safe Offer.

Bilkins had no love for his wife's little pet dog, but one day when it mysteriously disappeared, he offered \$25 reward for its recovery.

"But I thought," said a friend, "you hated that dog like poison."

"So I did," replied Bilkins; "I could not bear it."

"Then why on earth did you offer such a big reward for its return?"

"I like to please my wife."

"Well, that may be, but \$25 is sure to bring the dog back."

"I think not," answered Bilkins, "unless someone saw me bury it in the garden."

The Sun Quiz Corner

The First Cunard Steamer.
Question—When did the first Cunard steamer cross the ocean?
Answer—The first Cunard steamer, named after William Cunard, of Halifax, one of the founders of the line, crossed the ocean in 1869. This line has therefore had a continuous existence of 55 years.

Life Insurance.
Question—What life insurance business was done in Canada in 1923?
Answer—The life insurance business written in Canada in 1923 showed a marked increase over previous years, totalling \$83,957,726. Of that amount Canadian companies handled \$414,883,602; British, \$20,265,140; other companies, chiefly American, \$195,918,908.

Canada's Civil Service.
Question—How many members are there in Canada's civil service (Federal)?
Answer—The Federal civil service of Canada has 39,204 members whose salaries total over \$30,000,000.

The Company of One Hundred Associates.

Question—What was the Company of One Hundred Associates?
Answer—The Company of One Hundred Associates was formed in 1627 by Cardinal Richelieu. It received the monopoly of the fur trade; the control of the inland fisheries; possession of all the lands and forts out six thousand settlers, tradesmen and mechanics before 1643; to assist each settler for three years; to bring out two priests for each settlement. Year by year, the Company sent rich cargoes of furs to France, but paid little attention to colonization. In 1663 its charter was cancelled, and Royal Government introduced.

Canada's Wheat Crop Quality.
Question—What was Canada's wheat crop quality in 1923?

Answer—Of the 1923 wheat crop, 96 per cent. was of merchantable quality. Estimate required domestically, 100 million bushels; exportable, 348,261,000 bushels.

The Discovery of the Mississippi.
Question—Who discovered the Mississippi?
Answer—Father Marquette, a missionary to the Indians near Lake Su-

perior, and Joliet, a merchant, having been sent by Joliet to the Indian Council at Sault Ste. Marie, heard of and discovered the Mississippi. In 1673 they sailed down the river as far as the mouth of the Arkansas, then, fearing the Spaniards, they turned back and Joliet carried the news to Quebec.

Canada's First Census.
Q—When was Canada's first census taken?
A—The first census in Canada was taken on October 25, 1688, showing a population of only 760.

Distraint of Tenants' Goods.
Question—Explain—Distraint of Tenants' Goods; Loss of Exemptions.
Answer—Your remedy, when a tenant's rent is in arrears, is to distraint his goods, doing this yourself or getting a bailiff to do it. If the tenant claims the benefit of the statutory exemptions, he must give up possession of the premises forthwith or be ready and offer to do so (Landlord and Tenant Act, Sect. 33). When a tenant, who has not more goods than those that are exempt from seizure, refuses to pay rent and yet retains possession, the landlord may give him a written demand for the amount of rent due, stating that if the rent is not paid he demands the immediate surrender of the premises and that in such a case the tenant may take his exempted goods with him. Then, if the tenant signed and served the said premises within three days after the service of this notice, I am, by the Landlord and Tenant Act, entitled to seize and sell, and I intend to seize and sell, all your goods and chattels or such part thereof as may be necessary for the payment of the said rent and costs (Sect. 34). After this notice is dated, signed and served, the tenant, if he remains in possession without paying the rent within the three days, loses his exemptions.

TO CARRY AUTOS ON COBOURG FERRY

(From The Cobourg Sentinel-Star)
Sir Henry Thornton, president of the Canadian National Railways, and Mr. S. J. Hungerford, vice-president in charge of operation of that railway, were in town for a short time on Friday night, coming over from Rochester on Steamer Ontario No. 2, and going on to Montreal that night in their private cars. They were accompanied to Cobourg by the Mayor of Rochester and President Noonan of the Buffalo, Rochester and Pittsburgh Railway, which in conjunction with the C.N.R. operate the ferries. While in Rochester Sir Henry Thornton promised the ferries and approaches to the docks that Genesee Docks would be fitted up so automobiles can be carried across.

TRADE RETURNS GOOD

(From The Toronto Globe)
The monthly returns of Canadian trade returns for March, just to hand, shows that last March was a remarkably heavy exporting month. The total of Canadian goods exported came to \$92,429,774. For the same month in other years the figures were: 1921, \$68,092,428; 1922, \$59,539,313; 1923, \$76,557,599. If the fall months, when the grain movement swells the export figures, are excepted, the exports of last month are exceeded by only four other months in four years. Statistics do not deflect all the gloom one hears in the streets.

QUESTIONS and Bible Answers

If parents will encourage children to look up and memorize the Bible Answers, they will prove themselves faithful to them in their years.

What rules did the Apostle Paul give for right living? —Colossians 3:12-17

What is promised to children who obey their parents? —Ephesians 6:1-3

What happened immediately after Jesus was baptized of John in the Jordan? —Matt. 3:16-17

MOTOR CAR OUTPUT IN CANADA GROWING

Latest Returns Show Increase Over Previous Record.

Ottawa, May 23—The production of motor vehicles in Canada during 1923 exceeded all previous records and reached a total of 147,582 valued at \$27,369,814, as compared with 101,007 in 1922 and 94,144 made during 1920, according to a statement just issued by the mining and metallurgical branch of the Dominion Bureau of Statistics. Included in the foregoing total was 380 trucks valued at \$755,388.

The value of the production by the industry proper in 1923 was \$26,614,176, and while this was 18 per cent. greater than in 1922, it did not come up to the total value of the 1920 production of \$31,045,846. Service and service parts included in the 1923 total were valued at \$9,390,793, while the same item in 1920 amounted to \$12,754,125, leaving the value of motor cars made in the automobile industry in 1923 at \$27,223,383, and in 1920 at \$28,711,721.

Employment was afforded to 9,305 persons, an increase of 1,961 over the previous year, and 1,624 over the number employed in 1920. Salaries and wages advanced to \$14,998,267, an increase of \$3,724,624 over the previous year, and \$1,667,183 in 1920.

There were 19 firms engaged in the industry in 1923 as against 15 in the previous year. In spite of the increase in number, the capital employment increased from \$47,761,964 to \$50,146,195.

LACROSSE BASEBALL

Deseronto 8, Trenton 6.

(By Pat Jennings)

Deseronto and Trenton met at the Firemen's Park on Monday in the first home league game of the season. This was the first game ever staged here in two years. It was Deseronto's experience that Harry Moore can count himself such a big lead in the first quarter he would be travelling outward with crepe streaming from his hat. A grand total of \$10.00 was taken in at the gate. Is it any wonder that Trenton is almost shovelled off the map when it comes to sport? Lacrosse is a game patronized far more than it is. The youngsters of this town or any other town should be encouraged in playing it and the best way to do this is by your presence at their games.

The surprise of the day was the superb playing of Deseronto's Davis. This was his first season, never handling a lacrosse stick before. All the other boys played well. The only reason for mentioning Davis is because it was his first time. These Deseronto "Mooreites" played in Nanapan on May 28th and gave that town a terrible beating, the score being 19-2. So you see, Mr. Fan, our kiddies have nothing to be ashamed of. Jimmy Lemoire, the manager, is sure working hard, whipping them into shape. It is amusing to watch the cheap sports coming through the fence and hanging around the gate, where they can see the game without paying. It sure is hard to write such small stuff as this but nevertheless, they are only too true. The next time the kiddies play here come on out, and show that Trenton possesses some real good sports. I want to also tell you that nearly half of the \$10.00 was paid by Deseronto lacrosse fans. We were pleased to see our old friend Tommy Stewart, of Deseronto, on the job. He said Harry Moore knew absolutely nothing about lacrosse—had it not been for the fatherly advice he always gives, Deseronto would be down and out.

Line-ups:

Trenton—Goal, Mack; point, Davis; cover point, Carter; 1st defence, Alexander; 2nd defence, Bernard; centre, Larry; 1st home, Filion; 2nd home, Bassett; inside home, Foster; outside home, Bohan; subs, Lewis, Begin and Reynolds.
Deseronto—Goal, Tompkins; point, Lyons; cover point, McDonald; 1st defence, Covert; 2nd defence, Brant; centre, E. Brant; 1st home, Dorey; 2nd home, Houle; inside home, Webster; outside home, Barber; subs, Boyce and Campbell.
Referee—Mr. Cole of Deseronto.

Deseronto 8, Trenton 3.

Deseronto Post The Leaders defeated the first Trenton Juvenile team here on Monday evening by a score of 8 goals to 3, the same score as when these two teams met here last year. The game was fought out from bell to bell and provided lots of excitement. Dr. Wright of Trenton, an old player, refereed and made a good job of it. But

two were penalized and in both cases the infractions were of a minor character.

Trenton scored the first goal on some real clever work and it appeared that the Leaders would have to extend themselves. The first period ended one to one. After that the Leaders began to draw away from the visitors, running in seven goals to Trenton's two.

That Trenton team are dangerous at all times and they never quit trying until the bell rings. They are clever and manly in defeat and that is true sportsmanship. Both the Johnston brothers were about the best on Monday evening, while Hood is a comer. Jimmy Lemoire need not be ashamed of his team losing—they did their best, but no quarter was given none. They had no alibi. The return game in Trenton next Wednesday afternoon will be worth seeing.

The Leaders were not so good as they were in Nanapan last Thursday evening. Their passing at times was wretched and they missed the ball when they might have scored. Tompkins saved what looked like sure goals on more than one occasion.

The teams lined up as follows:
Deseronto Leaders—Goal, W. Tompkins; point, Mack Perry; cover point, Ray Dorey; 1st defence, R. Rixen; 2nd defence, E. Provins; centre, Leo McVicker; inside home, C. Cole; 1st home, B. Whitton; outside home, A. Brennan; 2nd, Sidney Hopping; Subs, M. Maracle, M. Dettlor, J. Barber and A. Robinson.

Trenton—Goal, Rosenplot; point, Bernard; cover point, Filion; 1st defence, Lewis; 2nd defence, Hood; centre, Kennedy; 2nd home, Bohan; 1st home, M. Johnson; outside, L. Johnson; inside, Bizeau. Subs, Taylor, Anderson.

They Fail to See Results

Neighbors say the reason they doubt the educational value of the movies is that Dolly Buttercup has been attending regularly for years.

Milwaukee Journal.

When the Trenton ball team journeyed to Pictou on Monday minus the chances of winning the first league game small. But for the first four innings neither team was able to score and it began to look as though the visitors were good enough for the old Pictou combine.

In the fifth, Trenton scored when Rose got first and Eckert and Anderson each connected to score him. Pictou came back by taking two in their half.

It was in the sixth inning where things went "bumpy." Several errors in the field filled the bases and discouraged Anderson. Heaney was spiked on first and had to be banded up, but stayed in the game. To make a long story short, Pictou scored four runs. A switch was made in the seventh and young Pickett was put in the box, but the youngster could not get a stride. The runs were made by Pictou before the boys could settle down.

Pictou again scored in the eighth, while Trenton could not get a run. In the ninth, making the final score 10-2.

To the onlooker it was purely a case of lack of team work and the mutual understanding, which lost the game. The home team was a combination of players who have been in the same position with the team for years, while Trenton went on the field with an entirely re-arranged line-up. However, things will be different in the future.

The line-up was as follows:
Trenton—Hutt, r.f.; Anderson, pitcher; Peever, 3b.; Williams, c.f.; Heaney, 1b.; Lawrence, s.a.; Bulford, 2b.; Rose, catcher; Eckert, 1f.; Spares, Pickett, Pury, Heaney.

Pictou—H. Campney, 3b.; C. Fredrick, s.a.; J. Welsh, 2b.; S. Croft, pitcher; R. Mulland, 1b.; H. A. Campney, 1f.; N. Walsh, c.f.; R. Fredrick, r.f.; Spares, Bowerman, Wright, McDonald.

MAKE HAY WHILE THE SUN SHINES

Hints for Hay-Making—Various Kinds.

There is an old saying: "Make hay while the sun shines," with which Prof. Wade Toole, of the Ontario Agricultural College, agrees; and for a farmer the farmer who gets sunshine for his job. However, with hay to harvest one cannot always wait for the sunshine. One of the essentials in the production of hay is that it be cut at the proper time. It must have sufficient maturity to ensure curing quality, but over maturity means coarse, fibrous, low quality feed. Sweet clover is ready just as it is beginning to blossom, and the new shoots clover should be cut in the late bud or starting at the base of the plants.

Red clover is handled to best advantage when approximately one-third of the blossoms have turned brown, and timothy just after the second blossom falls.

In curing sweet clover two methods are followed. Perhaps cutting with the

under and stacking up like grain until the crop is dry leaves better results and gives as good results as can be obtained. Or the crop may be cut down and allowed to lie in the swath for about two days' sun, and then raked into small windrows. If the weather is dry about three days in the windrow with an occasional tending makes it ready to harvest. If the weather is catchy it is advisable to coil the crop as soon as it is raked up.

Alfalfa is more easily cured than sweet clover. If the weather is fine it may be cut in the morning and raked the afternoon of the following day. It must not be allowed to remain exposed to the dew too many nights or bleaching results. After raking, if the sun shines, one more day in the windrow generally makes good hay. If rain threatens coil it up immediately and let it make in the coil. In any event be sure it is dry when harvested, and be careful of the leaves in handling as they constitute the most valuable portion of the feed.

Red clover is the common clover hay crop. Much of it is allowed to get over-ripe because it then cures more easily. It may be handled in the same manner as alfalfa; but, unless the crop is heavy it does not usually take quite as long to cure. The haylofter has changed methods to some extent. It is good practice to cut one day, ted the following morning, and rake the next afternoon. If the crop is very heavy it may have to lay over an extra day. It is surprising how much faster hay will make, after it has gone so far when pulled or rolled into windrows. If it is to be coiled the work should be done soon after raking, and the hay should remain in the coils for a few days to sweat out. However, most of it is down out of the windrows and if dry makes good feed the next day.

Timothy is the easiest to cure. If crop and weather are right it may be cut the morning and hauled the next afternoon, and, in fair weather, is always ready by the third day. It is not necessary to coil timothy to cure.

No matter what the hay crop, cut in time, rake as soon as possible to hasten drying, ted only when green or damp and coil in catchy weather. No doubt alfalfa and red clover may be made into the best hay by coiling, but in good weather this extra work is not necessary, and the loader hastens the harvest.

WOOLLEN INDUSTRY

NEEDS PROTECTION

Manufactures Protest Against Tariff Changes—Imports Jump.

"Instead of being able to report progress and prosperity in the woolen and knit goods industry of Canada, the launching of new enterprises and the extension of those in existence, the past year's net result have been disappointing to the majority of the mills," declared George A. Dobbie, of Galt, in his presidential address at the annual meeting of the Canadian Woollen Manufacturers' Association held, which was attended by the largest and most representative gathering in the history of the organization. Questions of tariff protection and depreciated currency occupied the attention of the members the greater part of the day, all of whom voiced emphatic disapproval of the way in which the Dominion Government had handled the tariff issue, which the textile trade described by some of the speakers as disastrous to one of the basic industries of the Dominion. The meeting denounced in no uncertain terms the action of the Government in refusing, despite strong representations made by the textile interests vitally affected, to adjust the tariff in a way that would result in a revival of trade. It was pointed out that the textile interests had in the face of very depressed conditions endeavored to keep their manufacturing establishments in operation, some at a considerable financial loss. They had hoped the Government would rise to the occasion, but their hopes had been shattered.

Entire Strong Protest. Two resolutions received the unanimous endorsements of the meeting. One read: "Whereas the result of forsaking the National Policy and reducing the tariff five times since the war is apparent in the depression which has now lasted for several years, the exodus of thousands of skilled workers to the United States, the closing down of partial operation of many plants, the distress of the farmers whose domestic markets have been restricted, and the general decline in business activities; Therefore be it resolved that this association strongly protests against this ruinous policy which has been followed since the war and is determined to do everything in its power to bring about the restoration of the old National Policy of protection, and with it, tariff rates that will encourage the development of production in Canada."

The second resolution urged the Dominion Government to discontinue the tariff preference now extended to the United Kingdom largely at the expense of the manufacturers of woollen and knit goods in Canada, and suggested that the Government be substantially maintained, and that the tariff preference would have to be submerged or make way for free trade. Mr. Caldwell said that a majority of the people in Canada apparently believed that the woollen trade in England had been built up by free trade. It was true that the cotton trade of Great Britain was originally built by black slave labor on a similar basis to that of the United States. Mr. Caldwell declared that tariff protection had been responsible for the building of the woollen trade in Great Britain, the staple trade of that country, which he exemplified by reading extracts from laws passed in England extending from the reign of Henry I., to 1845 when the law prohibiting the export of woollens to British Colonies was modified, on which occasion British manufacturers were considered out of danger of foreign competition.

Mr. Walter Humphrey, of Boston, who is an executive officer of the National Association of Woollen Manufacturers of the United States, an organization founded sixty years ago, said that in 1919 the textile industries of the United States produced five billion dollars' worth of raw material and paid one billion dollars in wages, adding "the manufacturers of wood would not have grown to such proportions had it not been for the existence of a solid protective tariff. The first Congress of the United States in 1790 had directed the Secretary of the Treasury to prepare legislation for the encouragement and protection of woolen manufacturers and other industries which would tend to render the United States independent of other nations for certain commodities. The speaker showed how the United States had prospered under protection.

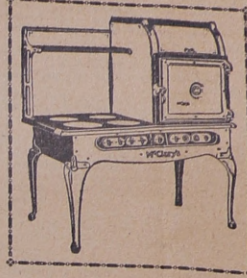

At the close of his address, Mr. Humphrey was asked whether the agricultural bloc in the United States was in favor of protective duties on raw wool which benefited the sheep producer, and he replied that they were unanimous in their support of duties on raw wool.

Col. Robert McEwen, of London, president of the Canadian Woollen Association, and emphasized that the use of woollen materials in Canada was greater than the production. Col. McEwen declared that climatic conditions in Canada were very favorable for raising sheep, and the flocks had been free from devastating diseases. He believed that the lack of interest shown by the breeders in augmenting their flocks was attributable to the free entry into Canada of virgin wool and its substitutes. The speaker stated that following the adoption of a systematic method of handling wool in Canada in increased quantities of Canadian wool had been absorbed by the home manufacturers.

Harpooning Industry. Mr. Boyd A. C. Caldwell said that the tariff situation as handled by the Dominion Government had become a free sport of harpooning Canadian industry for the purpose of extricating political oil, which might be regarded as all right for the ambitions of certain politicians. At the present session of the Federal Government there was witnessed the unusual spectacle of industry being harpooned, and that made to admit that it liked the operation by the simple expedient of having a number of subsidiary industries harpooned for the benefit of the first. Mr. Caldwell predicted a number of extracts from Hansard, beginning with the statement made by the Hon. Chas. Stewart, Minister of the Interior, regarding the death knell of protection, and his statement that the

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

ADVANTAGES OF THE SILO.

One of the chief advantages of the silo is that in many cases it enables withholding stock from the pasture until the grass and the weather conditions are favorable. Never a spring goes by but sacrifices have to be made in the condition of the stock as well as the pastures, by emptying the silos at too early a date. The feed supplies become exhausted, hay and other feed is relatively dear to purchase, and there is nothing for it but to turn out the stock. If one has a silo, it follows that bulky crops will be grown, and as these are preserved without loss, the available supply of feed for the winter months is greatly increased. It would be difficult to estimate accurately the increase of stock that can be carried on a given acreage by the addition of a silo and the growing of silage crops. The advantage lies, not so much in the greater number of animals, but in keeping better those that one has.

Where corn can be grown at all successfully, there is no other crop equal to it for the making of silage. Before deciding that this crop cannot be grown satisfactorily, a careful test should be made, because corn has been so improved in recent years that the experience of the past does not justify a decision for the future. If, however, it is proved that corn of the earlier varieties is not a success, then one can fall back on a mixture of oats, peas, and vetches, or sunflowers, or on such crops classified as clovers.

For cattle feeding, roots were for many years the succulent winter feed used. With the introduction of the silo and the growing of corn, it was soon learned that labor cost was greatly reduced. Besides this, there is the advantage of better thrift in ensilage fed cattle, as well as reduced labor in preparing the feed. Pamphlet No. 35, "Silage and Silo Construction for the Maritime Provinces," records that steers fed ensilage at the Fredricton Experimental Station, made a profit of \$15.32 more per head than those fed on roots as the succulent portion of the ration. The advantages of the silo are equally great for dairy cattle. At this season of the year when next winter's stock rations must be provided for, it is well to consider whether or not one can afford to do without a silo. Even under the best systems of feeding the profits are little enough. By the use of silage, greater profits are undoubtedly made possible, whatever crop is to be grown for the silo.

There are certain essential factors necessary in silo construction. These are strength, smoothness of interior, the absence of angles on the inside and durability. Of the popular types, the stave silo is the most easily and quickly erected, and when given a permanent roof and the hoops kept tight in the summer, it is fairly satisfactory. The concrete silo with walls reinforced by half-inch rods, has the advantage of being permanent. This silo is perhaps the most popular where it can be afforded. It can be constructed by ordinary farm labor. Cement blocks and vitrified tile are also found satisfactory. These several styles of silo are described, and complete instructions for the building of the stave silo, with illustrations, are given in the pamphlet in question, available at the Publications Branch of the Department of Agriculture at Ottawa.

DID YOUR CLOVER KILL OUT THIS SPRING?

If it did, you had better write the Department of Chemistry, Ontario Agricultural College, Guelph, for directions for taking a sample of your soil to discover the reason. Reports from some districts this year show a good deal of winter wheat and clover killed out, states the Department of Chemistry, O.A.C. This is highly undesirable and can be prevented by the use of lime and acid phosphate applied with the crop on which the clover is seeded. In some cases lime is not necessary for the soil is not acid, but where acidity occurs lime is very essential. Phosphorus is a great root farmer and it is the strong, deep-rooted clover and wheat plant that withstands the alternate freezing and thawing of spring weather.

In answer to a circular sent out this spring to the twenty-five co-operative experimenters handling the Lime Phosphate Experiment, the majority report that the clover on the half acre which received crushed limestone and acid phosphate in the fall of 1922 is in perfect shape, while in other cases the untreated section did not winter nearly as well and in one or two cases will have to be plowed up.

If seeding is done with spring grain it is good business to use acid phosphate at the rate of at least 300 pounds per acre, and preferably 400. If the soil is of a lime is also necessary. Clover and alfalfa will carry it over the first winter—the most critical period of the life of the plant.

Farmers in New Neighborhoods

BY HILDA RICHMOND.

When a man moves into a new community, particularly if he moves in from another province or a distant county, there are several things he should attend to without delay. Indeed, there are some things that he should attend to before he leaves his old home in order to begin right in the new one. One of these is to get recommendations from the bank with which he has always done business, from the pastor of the church he attends, and from several of the leading business men.

When he arrives at his new home, he leaves the letters of introduction with the bank and the church and at once establishes his identity and his standing. This is more important than many people consider it. It may help in time of emergency and if the emergency never arises, it gives the newcomer a fine start in every way. It shows that he did not have to slink away from his old home, and though he may be worth little in this world, goods, if he can show good recommendations as to character and integrity he at once gets in touch with good people in his new neighborhood.

DOES THE POSTMASTER KNOW YOUR ADDRESS?

His name and the exact location of his farm should be given at once to the telephone and telegraph offices. Many people neglect this, saying, "We do not expect any messages." But no one knows what calamity, sickness or important business may make it necessary for friends or strangers to look him up.

I used to work in the post office, and it was amazing to see how many death notices and letters and telephone messages were not delivered until too late, because of lack of address. Once a telegram came for John Brown, and after exhausting all their resources the authorities put the customary notice in the post office expecting that John Brown would prove to be a commercial salesman and would call soon. It turned out that the owner of the telegram was a nephew and hired man of a new-comer in a neighborhood some miles from town. His mother was buried two days before he received the notice of her death.

Just a little common sense would have prevented the tragedy for that young fellow who missed a last night

of his mother; but nobody had thought it worth while to announce immediately the arrival in the county of one new family.

LOOK UP A GOOD DOCTOR.

Another wise precaution is to hunt up and get acquainted with a good doctor, as soon as you are located. If the family is healthy and there has been no need of a doctor's services for years past, no harm will be done; and if there are reasons to think the family stars that it knows well to apply instantly for medical aid. It isn't necessary to take up an hour of a busy doctor's time announcing one's intentions or giving a lengthy history of the family, but it is well to get acquainted and make a note of the telephone number and the location of the doctor's office.

After getting settled, write to the exact location of your farm, your telephone number, your rural route, and various other items, and let telephone calls and mail need not be delayed. If you have a common name like John Smith or John Jones, it is well to let your postmaster that your mail is likely to come from certain towns. Then if your friends neglect to put every other address on the letters, Jones will not finger your mail over first and delay it.

A young man once came breezily into the post office to inform me that he had received a letter that did not belong to him, and upon being asked to produce the letter he said it did not amount to anything so he had destroyed it. Of course it did not amount to anything to him, but the right John Smith was very much disturbed when he heard of it. It happened to be a letter from a best girl.

If it is spring, the local dealer who handles repairs for the make of machinery on the farm of the newcomer should be hunted up. An unnecessary delay in corn-planting time means much; and so does stopping to hunt repairs for the harrow or the disk when work is pressing. Getting in touch with the huckster is also advisable in order easily to get groceries in the busy season and to be able to market eggs frequently in hot weather.

Last, but not least, hunt up that church of your choice without waiting for a busy minister to guess that

you intend, some day, to identify yourself with his flock. Finally, subscribe for the local paper.

If you show yourself friendly and anxious to identify yourself and your family with all local interests, you will soon feel well acquainted, and ten to one the ladies of the family will like the new home instead of pining for the old one.

Home-Grown Mangel Seed Best.

In the average results for ten years at the Ontario Agricultural College, very careful field tests show that our home grown mangel seed gave an average percentage of germination from the clusters of 119 per cent, while in the average of the same ten years the imported seed obtained through three of the leading seed houses gave 77, 77 and 76 per cent. We have not obtained imported seed from any source which has given us as high a percentage of germination over a series of years as we have obtained from the seed produced at Guelph.

If farmers who have some good mangels stored in their root cellars, would next spring, when the growth of vegetation is starting, plant these on a piece of well-tilled land, they would be able to grow seed for home use. As near perfect roots as possible should be selected and these should be planted about thirty inches apart each way. We have occasionally obtained as high as a percentage of germination over a series of years as we have obtained from the seed produced at Guelph.

Of the best of the animals body, he will either become weak or lose flesh; sometimes both. A poor farmer driving a poor horse with a whip and a progressive neighbor with a good horseman remarks, "It is not a horse, it's a horse and a whip." Besides corn, he always gives his working team some oats with a little bran or shorts, occasionally a dash of linseed oil meal. Some men will not allow their work horses to touch green grass, declaring "it will make them soft, or cause them to lose their wind." To those of us who know how much good a little green grass does a work horse, in connection with heavy dry feed, depriving a hungry work horse of this appetizing necessity is hard to understand.

Nitrate of Soda Helps in Cold Springs.

In such a season as this, cold and wet, the greatest need of the plant is for nitrates, says the Department of Chemistry, Ontario Agricultural College, Guelph. The ground is so cold and wet that it takes a long time to warm up and as a result bacterial activity is at a low ebb. As a result no nitrates are being formed in the soil and plants cannot make vegetative growth.

To correct this and enable the plant to get away to a good start, apply nitrate of soda one hundred pounds to one hundred and fifty pounds per acre at once. If bought in lots of several hundred pounds it can be obtained at a reasonable price and its benefit is almost certain. Do not, however, apply if heavy rain threatens, as it is soluble and will be lost by washing. Another benefit which will be derived is this. The nitrate of soda dissolves in the soil water and soaks down into the soil. The roots grow and hence the result is a deeper rooted plant more able to withstand the period of drought which so often follows a wet seed time.

Silage Crops.

Where corn cannot be grown satisfactorily, a mixed crop of oats, peas, and vetches has proved to be a very suitable mixture for the making of silage. The ensilage from these crops has high feeding value, containing, for example, twice as much protein as either corn or sunflowers. Corn, on the other hand, where it does well, is to be preferred on account of its very much greater weight of crop that can be grown per acre. In sections where the corn crop is doubtful, it is well, therefore to put in some acres of the cereal mixture. This mixed crop has the advantage of being suitable either for silo or for the making of hay, or it even may be allowed to ripen for silage. When it is to be put in the silo, it must be cut very fine, spread evenly, and well tramped. The keeping quality is greatly improved also by adding plenty of water as the filling proceeds. Unless this is done, the stems being hollow do not pack closely and are almost sure to mould during the curing process. Pamphlet No. 35 of the Department of Agriculture at Ottawa, available at the Publications Branch, goes fully into silage crops, describes the various popular silos, including the construction of the stave silo.

False economy is the hole in the pasture fence by a bee, I always remove the stinger and rub the spot with lard. Try this.—J. M. K.

There's money in a slip 'twixt the seed and the silo. It takes a farmer to be the true optimist.

The only Canadian nurse who lost an arm on the field, pictured while attending a recent convention of the Ontario Amputation Association.

HORSE.

We know that a wide variety of feed is absolutely essential with cows and poultry for high production of milk and eggs. Also that it is necessary for the best growth of pigs, calves and other young animals.

The work horse does not produce food directly, like the cow or hen, but he certainly lends a hand in making crops. And he, too, needs a varied diet to do his best. When hard at work in the hot fields, the horse, puff and sweat. With every extra puff of breath and every extra drop of sweat he is burning up not one or two, but half a dozen or more chemical compounds. And if a variety of feeds is not supplied to refill and refresh the animal's body, he will either become weak or lose flesh; sometimes both.

A poor farmer driving a poor horse with a whip and a progressive neighbor with a good horseman remarks, "It is not a horse, it's a horse and a whip." Besides corn, he always gives his working team some oats with a little bran or shorts, occasionally a dash of linseed oil meal.

Some men will not allow their work horses to touch green grass, declaring "it will make them soft, or cause them to lose their wind." To those of us who know how much good a little green grass does a work horse, in connection with heavy dry feed, depriving a hungry work horse of this appetizing necessity is hard to understand.

Many of the best farmers let their work teams out to pasture at night, because of the better air of the pasture and so that the work animals may secure vitalizing green feeds to mix with the dry ones they eat through the day.

Good farmers and kindly horsemen have always known in a practical way the benefit of green matter with dry feed to the well-being of all animals. Vitamin discoveries and scientific proof of this knowledge.

Many work horses in summer become skin poor, and a few drop dead in the hot fields for want of the complete nourishment that a wider variety of feeds will furnish.

POULTRY.

The wit is the poultryman's worst enemy. It multiplies by millions, feeding upon the fowls from the time they settle upon the perches in the evening until they leave them next morning. Spraying the perches may destroy great numbers, but thousands are left to hatch out new colonies at once.

The best method I have tried to get rid of the pests is to provide two sets of perches. The round ones have blocks nailed upon each end, to prevent turning upon the supports. About every two months these perches should be removed and replaced by the other set. This can be done, even in cold weather, by simply shifting the fowls to their day quarters.

I remove each perch carefully so as not to dislodge any of the mites. Then I spray around with a mixture of kerosene and turpentine, and allow the fowls to return undisturbed. The infested perches have boiling water, with a liberal quantity of kerosene and spirits of turpentine added, poured over every inch of them. Then they are placed on end against a tree or fence, some distance from the poultry house.

Culling.

During the year 414 culling demonstrations were held by the O.A.C. Poultry Dept. Extension men—a total of over 5,000 people attended. In addition to the 414 culling demonstrations, culling schools were held in Woodstock, Port Hope and Napawan. Of the 50,000 hens handled at demonstration, over 17,000 were considered to be culls in so far as profitable egg production is concerned, so says Professor W. R. Graham, Ontario Agricultural College.

There's money in a slip 'twixt the seed and the silo. It takes a farmer to be the true optimist.

Home Education

"The Child's First School is the Family"—Froebel.

A Question of Endurance—By Ora A. Clement.

"Yes, Janet is going to learn music," said Janet's mother, "even if it does worry me nearly to death to make her practice."

"Doesn't she like to practice?" asked the friendly neighbor, who was making a call.

"The first half of her hour she practices very well, but almost every day she begins crying after thirty minutes and she frequently has to be punished for not making her finish the hour."

"You don't mean to say that seven-year-old baby practices for a steady hour each day?" The motherly eyes of the older woman were very bright as she asked the question.

"Indeed she does," the child's mother answered emphatically. "There is one thing more than another that I cannot endure it is dilly-dallying about something. When a thing is begun, I want it finished before I am left."

The caller was silent for a moment, and when she resumed the conversation it was to introduce another subject.

"Did you enjoy the lecture Prof. Mozer gave before the club yesterday?" she queried.

"It was interesting, and he is a pleasing speaker, but I did wish he could have made his lecture shorter. After four o'clock, when I felt that I should be at home getting dinner started, I could not keep my attention on the lecture at all. My mind was somewhere else, and I could scarcely sit still."

"It was a long program, and I can imagine how you felt," the neighbor agreed. "It is very hard to force one's attention when the mind is busy elsewhere."

"Well, I simply can't do it," the younger woman was very positive.

THE CHILDREN'S HOUR

WISHING.

Do you wish the world were better? Let me tell you what to do: Set a watch upon your actions. Keep them always straight and true: Rid your mind of selfish motives, Let your thoughts be clean and high; You can make a little Eden Of the where you occupy.

Do you wish the world were wiser? Well, suppose you make a start By accumulating wisdom. In the scrapbook of your heart. Do not waste one page of folly; Live to learn and learn to live. If you want to give men knowledge You must get it ere you give.

Do you wish the world were happier? Then remember day by day Just to scatter seeds of kindness. As you pass along the way; For the pleasure of the many May oftentimes be traced to one As the hand that plants the acorn Shelters armies from the sun.

THE ORIGIN OF THE PLEIADES.

BY LEBERNE BALLANTYNE.

Because they had no books from which to read, nor any great thinkers to write books for them, the Indians who lived here in North America before we came devised legends about the wonders of nature. These legends were handed down by the young people would sit in the wigwams or long houses and listen during the long winter evenings to the stories told by old men and women about how the stars came into the sky, what caused the trees to grow, why the animals were cunning, and all such things that we too ask our parents about, when we are little boys and girls.

One legend told by the old Huron people long before even Cartier came to Canada, tells very briefly of the Pleiades, a very curious group of stars which we may see almost any bright night high up in the sky. The Indians say these were seven very bright and clever little Indian boys who once upon a time lived here on the earth. They were expert dancers, and whenever a feast was held or a celebration given by their family, the seven brothers were called upon to dance for the company.

One time they were celebrating the harvest by the many usual dances and feasts of thanksgiving, and the seven boys were dancing in a giddy whirl just like the dry leaves, that, falling from the trees are carried around and around by a playful breeze. The boys became hungry and stopped their dance for food, but their people were so busy enjoying themselves that they took no notice of the boys, and when they asked for food, they told them to dance for it.

Clasping hands, they whirled away again while the old men beat time on the deer-skin drums. But as they danced they tried to catch each other. "We are so hungry! We must have food!" just as they said these words a good spirit which was passing becometh them, and they found themselves being whirled up off the ground following this spirit without any effort on their part. Higher and higher they ascended. When their people saw

them rising up to the tree tops, and going even beyond them as high as birds fly, they called frantically to them to come back, promising to give them all the food they wished. However, the little boys did not hear them, for their eyes were on the lovely sky land where they saw all the beauties of the cloud-world. The little spirit fixed their there forever. And turned them into seven beautiful bright stars and they were very happy, and never again were hungry for food.

HOGS

It is a great deal to say in times past about the efficacy of good pastures on the production of live stock. It is a subject worthy of frequent discussion, and it is just as important with regard to hogs as with any of the other domestic animals.

The ancient pig sty with its tiny proportions, its filth and squealing occupants, is, or should be, a thing of the past, so far as commercial hog production is concerned. It is as unnatural for a hog to be confined for long periods in close quarters, as for a man to spend all his life in the house. The evil effects of such treatment may be overcome largely by careful attention to exercise and diet, but it is neither desirable with man, nor profitable with hogs.

In a state of nature hogs roamed the woods and the prairies seeking what they might devour. We have no records of their suffering from intestinal worms and lice, and hog cholera was unknown.

We put rings in their snouts so they cannot root up our nice meadows, and then feed them tankage to replace the worms and grubs, and mineral mixtures to replace the mineral elements which their ancestors were in the habit of rooting in the earth for. We even cut down all the trees, because they interfere with the plow or the binder, or with our distorted aesthetic sense and build artificial shades, that our hogs may enjoy protection from the heat of the sun, which nature demands they should have. Many experts, some of whom employ osteopathic hog doctors to exercise their muscles, and import celery and head lettuce to keep them in health, but, to date, we are still depending upon plenty of range and good pastures to fulfill this requirement.

The best of all forage so far discovered is alfalfa. Clover is a close second, and on rich land rape gives excellent returns. Fall-sown rye or June grass comes earliest in the spring, and oats and peas are very good for the older hogs about June 1. Sweet clover promises to take a position among the best hog forages. Soybeans are greatly relished for fall feed, and up-to-date practice calls for growing them extensively with corn that is to be hogged off.

Many experiments have shown that the most economical gains from growing pigs come from the use of abundant forage in combination with approximately one-half of a full feed of grain. They also show that the acres thus utilized are often the greatest producers of net profits of any on the whole farm.

When replanting corn, instead of using a hoe, use a sharp-pointed stick with a rope of some kind attached. I jab the stick into the soil, drop a grain of corn into the pipe, scratch a little soil into the hole and the job is done.

CLASSIFIED ADVTs

FOR SALE

A QUANTITY OF

POTATOES FOR SALE

G. S. CARTER

Belleville Road

TRENTON NEWS

D. A. Davis of Trenton was in town this week and gave us a call—Dr. J. W. Dion, who has been here on a visit, returned this week to Rome, N. Y.

Mr. and Mrs. C. W. Saylor and son, Clarence, are visiting in Trenton this week.

Wellington meetings will be held tomorrow for Capt. Edwards of the Salvation Army.

Mr. Maude Adams will be absent from her office on summer vacation after the first of July.

Miss Beatrice Debid of Bowmanville, daughter of Dr. Debid, is the guest of Miss Nora Clarke at Wesleyan College.

Mrs. M. J. Brinn and daughter have returned to their home in Rochester, N. Y., after spending two weeks with the former's sister, Mrs. Wm. Boyce.

Mr. Ray Tuite left on Tuesday for Jasper Park, Alta., to take a position with the Geological Survey party of the Dominion.

Messrs. Manley Fox, Webster Hyde, Ernie Bowler and Pat Jennings, took in the horse races and ball games at Belleville Tuesday. Pat today they were the best races pulled off in Belleville in many a moon.

Mr. Harry Stewart of Belleville spent Wednesday in town.

Tommy Potts took in the horse races at Belleville on Tuesday.

Pat Jennings received word from the manager of the boxers who appeared here on the 29th stating they would come down on his gratis. Pat says, "This sure shows real sporting blood."

H. S. Bissell of Toronto has spent a few days with her sister, Mrs. G. N. VanMeer, who has been very ill.

Mrs. J. L. Irish, who has been visiting her sister, J. S. Irish, on Queen Street, for the past month, returned to her home in Orillia to-day.

Misses Shannon, Long, Hennah and Galloway motored to Oshawa on Sunday.

Mr. Maurice Kennedy spent the week-end in Glen Miller before leaving town.

Mr. James Vaughan, who was formerly with the staff at the Hydro in Trenton, and is now employed in Detroit, Mich., is spending a week at his home here.

Dr. and Mrs. G. G. Clegg are visiting Mrs. Clegg's mother, Mrs. A. V. Tweedle, this week.

Mr. S. G. Faulkner, special representative of the Ontario National Development Corporation, Limited, Toronto, of which Mr. W. R. Bonter is district sales manager, spent a few days in town this week.

Mr. Kenneth Statia, late of The Sun staff, is spending some time in Streetsville, where he is visiting relatives.

Mr. Arthur Aioy, Mary, Clifford and Marjorie, arrived from St. Petersburg, Florida, on Wednesday evening. They have taken a cottage at Trenton's popular summer resort, 12 O'Clock Point, for the season.

Mr. and Mrs. Geo. McKee of Toronto are visiting their daughter, Mrs. J. C. Christie, Queen Street.

A member of the local Post Office staff is a winner in a recent contest, conducted by the International Retail Merchants' Ass'n. A great deal of skill was required, but perseverance won for her a handsome prize.

Week-end guests of Mr. and Mrs. W. B. Powers were: Mrs. Alex. McLellan of Toronto and her sister, Mrs. Alex. Mackie, formerly of Toronto, now of Regina, Sask. Mrs. Mackie is visiting in the East.

Mr. H. N. Bird was in Walkerville this week and returned yesterday with a fine new Studebaker sedan car, which, it is understood, he has sold to Mr. George Collins.

Mr. W. J. Turcotte spent Sunday in Montreal visiting Mrs. Turcotte, who was in hospital in that city and is at present undergoing treatment at her sister's home, under the care of Dr. Gadoury. Mrs. Turcotte is progressing favourably.

Mr. and Mrs. C. A. Maguire are visiting Mrs. Maguire's parents, Mr. and Mrs. W. H. Polley.

Mr. and Mrs. Chester W. Lott, Trenton, announce the engagement of their daughter, Wilena, to Mr. J. Alfred Ragsdale, Toronto, son of Mr. and Mrs. W. J. Ragsdale, Smith's Falls, Ont., the marriage to take place quickly June 18th.

Mr. Wilfred Clement of Toronto visited relatives in town recently.

Mrs. W. McFadden of Peterboro has been visiting her brother, Mr. H. Filion, and Mrs. Filion.

Mr. F. McMahon of Rome, N. Y., accompanied Mr. W. Dion, who was home on a visit.

Rev. W. P. Woodger and Rev. W. G. Clarke are in Picton this week attending the Quinte District Methodist Conference.

Mrs. N. N. Sprague returned home last week after spending the winter in California, where she greatly enjoyed her visit.

Mr. V. A. Statia, who this week became proprietor of the Courier-Advertiser in Toronto, is attending the Weekly Newspapers Ass'n meeting.

Mr. Alex. La Morre was at Belleville on Tuesday to enter the advertised motorcycle races, but none were called. In 1913 at Belleville, he won the five mile race in 6:25 against the best amateur riders in Canada.

Rev. C. Wilson and Mr. Wilson of St. Paul's Church, Brooklyn, N.Y., called on the Rev. Canon Armstrong, Rector of St. George's, in Saturday morning on his way to High to visit his former parish at Wooler and Warkworth.

BORN

DELISLE—At Trenton, on Saturday, June 7th, to Mr. and Mrs. F. J. Delisle, a daughter.

ELLIS—At Trenton, on May 19, to Mr. and Mrs. Fred H. Ellis, a son (Robert Harry Reginald).

MAWSON—To Mr. and Mrs. W. H. Mawson, Henry Street, Trenton, on Monday, June 2nd, 1914, a son (Donald Carlyle "Donnie").

CROP OUTLOOK LOOKS FAVOURABLE

Report Furnished by Bank of Montreal.

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its Branches.

General—While the season is backward in Ontario and the eastern Provinces, rather more favourable conditions obtain in most parts of the Prairie Provinces, and the wheat is well above ground in many districts. Cold weather has somewhat retarded growth, but moisture is ample and the seed has generally been in good condition. In Alberta the acreage seeded to wheat is about the same as last year. There is a slight decrease in Saskatchewan and 25 per cent. decrease in Manitoba. In the latter province, however, there is an increase in the acreage for coarse grains. In British Columbia crops are looking well, but are much in need of rain. Details follow:

Prairie Provinces.

Edmonton District—Abundant moisture over whole district and prospect promising. Calgary District—Wheat well above ground. Weather conditions favourable with sufficient moisture. Lethbridge District—Recent rains in north, south and west have improved conditions. Rains are needed in Central and Eastern Sections.

Wheat in the west is being curtailed because of dryness. The crop on irrigated land is doing well. Saskatchewan District—Wheat seeding has been finished. Seeding of other grains will probably be completed in about two weeks. Moisture is sufficient, and conditions are considered favourable.

Regina District—Wheat is all seeded and in many places is several inches above ground. Seeding of other grains should be completed in ten days. The land is in good condition and the outlook is considered satisfactory.

Pastures are fair only. Winnipeg District—Wheat is all sown and reported to be three inches in some localities. Coarse grains are 75 per cent. seeded and the acreage increased. Warm rains required to stimulate growth. Pasture good.

Quebec—Season generally throughout the Province is two to three weeks late. The acreage prepared for crops is greater than last year, but owing to the prevailing cold and wet weather very little seeding has been done. Pastures are also somewhat backward, needing warmer weather.

Ontario—Owing to heavy rains seeding has been interfered with, and some damage has been done to spring grains. Continued cold weather has retarded growth and the season is fully a fortnight late. Fall wheat and hay crops are in good condition.

Grass pastures promise well, but are backward. Late frost reported in some sections has injured the strawberry and tomato crops. Early tobacco plants were damaged but can be replaced. There is an abundance of mud to stimulate growth. Pasture good.

Maritime Provinces.

The season is somewhat cold and backward, but seeding is well under way. New Brunswick—St. John River Valley hay and grass pastures show good prospects, and a larger acreage of potatoes will be planted this year. Nova Scotia—Hay and grass pasture although backward, look promising. In the Annapolis Valley conditions are reported satisfactory. Fruit trees are well budded. Prince Edward Island—Grass pasture in good condition but season backward.

British Columbia—Throughout the province crops are much in need of rain, but are not in present danger. A good showing of field crops is reported. Root prospects are good. Stone fruit is estimated at 60 to 70 per cent. of last year, and apples and pears probably 80 to 85 per cent. Strawberries and raspberries are below average. Pasture is generally good except on higher lands.

IF FIRE MARSHAL VISITS DESERONTO

(From the Deseronto Post)

Fire Marshal Heaton of Toronto, on a visit to Trenton, says all fire hazards must go. He might have more to say on the subject if he ever visits Deseronto. For the benefit of those who don't know let it be said that the fire marshal has power to order the removal of any rubbish that might cause a fire. He also has power to order the owner to remove buildings or alter them when he deems that they constitute a decided fire hazard.

FOR SALE OR RENT

That valuable property on Dundas Street East, formerly known as the Geo. Angus property.

The property has all conveniences and can be bought at a very close price.

Mr. and Mrs. Geo. Anderson and family wish to sincerely thank their kind friends and neighbours for their many kind deeds during their recent deep sorrow and bereavement.

BOTH TRENTON TEAMS WIN GAMES

Walter ("Ben") Bowen Was
Marvellous Between Posts.

INTERMEDIATES ARE GROUP CHAMPIONS

Game at Oshawa Last Night
Won by 6-2 Score--
Who's Next?

(By Pat Jennings)

Trenton defeated Oshawa on their own pond last night to the tune of 6-2. It was reported that Oshawa was not going to try to win. Well, I sure would like to see that guy and find out where he got that kind of bunk, for if ever a team worked to win, Oshawa did last night. Paul Bray's four team never stopped a second, and oh boy! you should have seen that crew dig in when Anderson and Shonker were benched.

This is always where Benny Bowen does extra work. The Oshawa crew came right up in a body, leaving the lone goalie behind. They rained shot after shot, but Benny said you shall not pass—and his commands were obeyed.

Lowery, the referee, almost let the game get away from him in spots, he allowing considerable rough stuff.

The first period was a hard fought one, ending 1-0 in Trenton's favor. The second game saw the Oshawa fans a chance to cheer for their own team. The first period was a hard fought one, ending 1-0 in Trenton's favor. The second game saw the Oshawa fans a chance to cheer for their own team.

The third was all Trenton's. Burns walked down through the bunch and beat out Smith, Oshawa's goalie, for another. Bowden, Oshawa's goalie, came back and scored for his team once again; this boy is a beautiful stick handler and a wicked shot. The next tally went to Jack Kinney's crew. Schinzel made a brilliant rush from end to end and scored. The next goal was good work on the part of the forwards, Schinzel receiving the last pass, ending the game.

Boys, it makes no difference who gets the goals. Always play combination—that's what counts. On to Kingston. Let's go!

Trenton, I told you that our hockey team was a good one; now I feel sure you will turn out in hundreds. Time and space forbids me giving a long write-up of this important game.

Nearly all of the Port Hope hockey team were up to see the game. I wonder why they were so anxious to see this one?

Trenton's "B" team, centre, Shonker; forwards, Wells and Schinzel; subs, O'Rourke and Blakely.

Oshawa — Goal, Smith; defence, Palmer and Clark; centre, Howie; forwards, Bowden and Stevens; subs, Morris and Smith.

Referee—Lowery, Toronto.

Trenton 2; Port Hope 1

Oh man, what a game! and your uncle Patrick did not roll the peanut, thanks to the whole team, who put up such a good game against the speedy Port Hope.

A special train carried about two hundred merry souls from Port Hope to Trenton and all were cock-sure of lifting House and Kinney's scale. This merry throng started from the C.N.R. station for Trenton's ice palace, singing the old song, Ontario—but after the game—what a difference a few minutes will make! About twelve hundred real hockey fans saw P. L. Brown's crew bite the ice here on Monday night, when they were beaten, but by no means disgraced, to the score of 2-1. Bobby Hewitson started the real fire-work. He started both teams into battle on time.

This was without a doubt one of the best games ever staged here. It was exciting from bell to bell; not a dull moment throughout. The game raged between both forward lines for nearly twenty minutes, lacking only about six seconds before full time, when Shonker, Schinzel and O'Rourke broke away three a-breast, O'Rourke securing the last pass, pushed the puck through Hagermann's legs, jumped through and scored, relieving my mind considerably. The bell clanged and the boys rushed to their dressing room to rest after going through the fastest and most exciting twenty minutes ever put in on Trenton ice, the first period ending 1-0 in Trenton's favor.

The second period was even faster

LIVED FIFTY YEARS IN TRENTON

Death of Samuel J. Anderson
—Served in Fenian Raid—
Respected Citizen.

In the death on Thursday, January 29, of the late Samuel James Anderson, at the age of 74 years, 8 months and 19 days, Trenton has lost one of its oldest and most respected citizens. Mr. Anderson, who was born in Consec in 1850 and came to Trenton in 1867, had been a citizen of the town for fifty years.

He had many friends and his ever present cheerfulness was admired by all who knew him and his genial spirit will be missed.

At the early age of 15 years he served with the 16th Infantry in the Fenian Raid in 1865 and he often told many interesting stories of those early days.

In later years he was with the Gilmour Company for a number of years and afterwards carried on the trade of carpenter.

Mr. Anderson is survived by two sons, Sam J. and Paul of Rochester, and three daughters, Mrs. (Mabel) Walter Ellis of Rochester, Mrs. (Florence) Fred Fairman of Trenton, and Gladys of Trenton. He is also survived by two brothers, Nathan and John of Trenton, and a sister, Mrs. Albert Waldron of Trenton.

The funeral took place this afternoon from the home of his daughter, Mrs. Fairman, King Street, Rev. A. L. McCar officiating. Interment was made in St. George's cemetery. The funeral was largely attended.

CANADIAN CLUB

A report of the address by Mr. J. P. Downey, ex-M.P., at the Canadian Club on Thursday evening will be given in next issue.

than the first; not a let-up; all were going at high speed.

Shonker and Anderson were closely watched all night, the former playing the best game of his career. The terrible battle was on. Finnigan Hills could not be trusted, no, not even for a second. He was a wonder, by far the best man on his team; time after time he would come down and shoot, only to be laughed at by Ben Bowen, who, by the way, was unbeatable. After twelve minutes' hard grinding, the speedy Schinzel rushed the puck up, passed it over to Shonker, who shot and just missed. Alone rushed in, got the rebound and sent Micks for Trenton's second tally, ending the second period 2-0 in Trenton's favor.

On the third period Finnigan Hills was not only their best player but was also the cleanest one on his line-up.

Our boys to a man played a game, and a good work.

Referee—Bobbie Hewston, Toronto.

Referee—Bobbie Hewston, Toronto.

NOTES ON THE GAME

Our boys are in grand shape. They skated Port Hope off their feet. Eddie Ellis has sure taken good care of his crew, and too much could be said about his work.

Mr. P. L. Brown, editor of The Port Hope Daily Times, also secretary of the Hockey Club, was down with the boys. Mr. Brown is one of the best sports in Port Hope, and Trenton is always pleased to meet a real sport. Mr. Brown said he would stay in town to see me roll the peanut, but the boys saved him the trouble by trimming his crew.

The writer went into Port Hope, dressing room and tried to get Finnigan Hill to lie down on the job so I would not have to roll the peanut. He only gave me the "des" remarking: "I will play it properly, ever I did before and I'll percent see you roll that peanut." (15:45 p.m.)

It was a great game. The night was hard one for the boys.

Trenton Juniors' terrible surprise on Tuesday night when they defeated their kids to the tune of 5-4. In the first two periods it was Trenton all the way; in fact one may say the whole game was Trenton's. Our kids stepped out on the ice and made Eddie Thomas' crew look like a bunch of hicks. The score was 5-0 well into the third period, when Belleville did manage to slip one by our goalie, Lewis, when Gordon Bowen hung onto the puck behind his goal, losing it to the Belleville crew, who scored three goals in as many minutes. It is quite true that Belleville threw all the weight they had up on their forward line, which was the proper thing to do, as they had nothing to lose but everything to gain. The score sheet has been to the boys. Don't let it go for you are going to get isn't the proper way to win a hockey match; you must play teamwork; without it you will never get very far. You must pass the puck. Don't let it go for you will and it might have to digest. Get rid of it; you can't possibly get through two defence men, and as the centre man is on you.

The boy who uses the puck best deserves more credit than the one who scores. If he did not take it well up and pass it to the scorer the goal would never have been scored. Now, boys, don't think I am a fault finder; it's for your own good and

SOUTH HASTINGS CONSERVATIVES

Enthusiastic Gathering at Belleville—Mr. N. Miron Vice-President for Trenton.

Conservatives from all parts of the new riding of South Hastings gathered at the City Hall at Belleville on Monday afternoon, when one of the most enthusiastic meetings ever held in Hastings was attended by over five hundred delegates.

Mr. George A. Reid of Belleville was chairman of the meeting, having been named as chairman pro tem. The organization meeting was arranged.

Mr. E. Guss Porter, K.C., ex-M.P., H. Duff, M.P., J. C. Hill, M.P., and Mayor W. C. Allen, of Belleville, were called to the platform and were received with cheers. Treasures of municipal associations and Reeves of townships and villages also took seats on the platform.

The question of basis of appointment of delegates to a convention was discussed. Mayor Miron suggested the basis of one delegate to every 100 of population. Major Ponton suggested one for every polling division.

Mr. W. H. Ireland mentioned a situation in which he was in Hastings, when Trenton had 36 delegates, Sidney 36, and Belleville 66.

The standard constitution of the party was adopted tentatively by the convention and was referred to the incoming executive to work out a satisfactory basis for the appointment of delegates to a convention.

Mr. Porter nominated Mr. George Stokes, of Hungerford, as president. "I believe he would make a satisfactory head and it would be a tribute to the Township of Hungerford, where he resides." Mr. Charles Weese seconded the nomination. His election was unanimous.

Other officers elected were: Hon. President, Rt. Hon. Arthur Meighen, Hon. G. H. Ferguson, P. Guss Porter, K.C.

Vice-Presidents were chosen by ballot as follows: Trenton, Napoleon Miron; Frankford, E. O. Freeman; Thurlow, Thomas Leslie; Belleville, Harry A. Thompson; Tyendinaga, Clarence Long; Stirling, Dr. J. McC. McKinnon; Hungerford, John Carleton; Deseronto, W. H. Harvey; Tweed, W. E. Tummon.

gan Hill was not only their best player but was also the cleanest one on his line-up.

ROTARIANS HEAR NURSE TWIDDY

Interesting Address on Important Work in Trenton.

At the Rotary luncheon on Monday, the Trenton Rotarians heard Miss Twiddy, V.O.N., speak on her work in Trenton, carried on under the auspices of the Local Council of Women. Keen interest was evinced in the information imparted by Nurse Twiddy, not only in so far as it dealt with conditions found in Trenton in the course of her daily travels, but in her general remarks on the work of the Victorian Order Nurses.

At the beginning Nurse Twiddy thanked the Rotarians for their sympathy and help in her work.

The chief objects of the work were teaching of the sick and the work undertaken in the home, while child welfare, school work and social work.

A beginning had been made, the nurse explained, in organizing dental and medical service for school children suffering from defects of hearing, and also from defects of sight and speech. This, together with the social work in co-operation with the home and school clubs, etc., body in the child, which it did for a greater receptive faculty in its dental work and later general education.

An improvement in the direction of the education of the masses of the children would result in a more independent outlook on life and in consequence there would be more happiness, cleanliness and comfort in the homes of the future generations.

Nurse Twiddy in thanking the Rotarians for their help in the past, reminded them that "their work was their motto and urged that for the common interest—the welfare of our future Canadian citizens, they co-operate with each other in this great work."

Vice-President Arthur Galt, who presided, thanked Nurse Twiddy for her interesting and informative talk.

APPRECIATION

Trenton, January 23, 1925.

Dear Sir, — Please accept our hearty thanks and appreciation for the splendid assistance you and your ladies have given us in securing a supply of records for our phonograph.

Signed on behalf of the North Trenton School.—M. Payne, Teacher.

Believe it or not, Spring is just weeks away and the weather is warm it will be \$2.00 a week. That is why you want to borrow the Sun.

DEATH CALLS EX-MAYOR ROENIGK

Passes Away Early This Morning—Public-Spirited Citizen Esteemed by Many Friends.

After an illness of about two months, ex-Mayor Lewis E. Roenigk passed away about three o'clock this (Saturday) morning. During the past week his condition continued to grow worse and only at odd times towards the end he was in a state of consciousness, although previously he had at times evinced considerable optimism as to his illness.

To-day many friends mourn his death, for, during his long years of residence in Trenton he had endeared himself to many citizens. His sterling qualities and public-spirited interest in the town won for him the esteem and good will of all. Lewis Roenigk was not only a good citizen of Trenton but he was a good Canadian and also a true Britisher. He was prominently identified with the Conservative party. Although his generous big heart has ceased beating, he has left behind memories for those who knew him best that will help others to tread life's journey.

In 1922, after serving as Councillor, he was elected Mayor of Trenton by the largest vote ever given to a mayor.

Ex-Mayor Roenigk is survived by one brother, Jewell, of Bowmanville, and three sisters, Mrs. McCulloch of Trenton, Mrs. G. Billings of Toronto and Mrs. Knox of place on Monday afternoon at 2 o'clock from his late residence, Division Street. Service will be held in St. George's Church, after which the casket will be interred in the cemetery, where interment will be made.

Ex-Mayor P. J. O'Rourke: "I deeply regret the demise of Ex-Mayor Roenigk, who was an old man, but a public life he always kept to his ideals and in private life he was always the kindly, Christian gentleman. Trenton, through his death, has lost a most loyal and patriotic citizen."

W. H. Ireland, M.P.P.: "Although not unexpected, the death of Ex-Mayor Roenigk has brought mourning to many citizens. Lewis was a public life he always kept to his ideals and in private life he was always the kindly, Christian gentleman. Trenton, through his death, has lost a most loyal and patriotic citizen."

PICTURES SEEN AT PUBLIC SCHOOL

Government Motion Picture Studio Provides Interesting Programme.

Last evening, the auditorium of Dufferin School was filled with the children of the school, accompanied by their parents and friends, to view the Ontario Government Film Studio. The program of motion pictures, interspersed with amusing picture, was much enjoyed by all present.

The first picture, "Through Life's Windows," illustrated the fact that the construction of the eye was clearly shown—the mechanism of a camera being very similar. Then came a picture of Northern Ontario, and a marvel of beautiful scenery. The children, who had watched most intently, then welcomed their old friend, Charlie Chaplin, with shouts of laughter. Next, "A Springtime Harvest," showed the process of making Canada's sweetest product—sugar. This was followed by the pictures of Trenton's own schools and streets, in which many of the audience had the pleasure of viewing themselves as movie actors. After this, another picture of Canada's famous winter sports, a game of hockey between the Granites and the Stars. Their wonderful combination play was shown by means of slow-motion pictures. A pleasant evening then came to a close with another picture of Charlie Chaplin.

Norman Hazell, a pupil of the school, in a few well chosen words, thanked the Film Co. for their kindness in presenting the pictures and expressed his appreciation of the presence of so many friends of the school.

After singing "God Save the King," in which the children heartily joined the crowd dispersed, expressing a wish that another such pleasant evening may be enjoyed in the near future.

The laughter of the children as they looked at themselves on the screen was refreshing, and the enjoyment appeared to be further added to when the smiling countenance of a "Burrhead," who was seated in a prominent position, was shown.

The chief industries of Trenton, also exhibited, formed a source of instruction. These pictures were taken at the opening of the new line.

BORN IN 1863 ON YORK ROAD

Mrs. Amanda Simpson Passes
Away at Age of 82 Years—
Many Attend Funeral.

There passed from our midst last Sunday at the age of eighty-two years, one of the best known and best loved citizens in the person of Amanda Simpson, nee "Mother of the Hill," who had resided in the same house for nearly sixty years.

Born on August 3, 1842, at the old homestead on the York Road, the daughter of the late Reuben and Elizabeth Young, of U. E. Loyalist stock. On September 3rd, 1863, she was married to the late James Simpson, a well known builder in Trenton and district for many years, who died in 1909.

Four sons were born, Irwin, who was a builder in Toronto; Nelson, who was a district engineer, a gold medalist in the war, who died at Sault Ste. Marie in 1906; Homer W., of Bertram, Ontario, and Byron A., who was a mining engineer in Peru for many years and died in New York in 1922.

Mrs. Simpson's Christmas remembrances came from far and near, sometimes bearing a burden, and sometimes a comparatively few truly of the women, possessed of poise, sympathy, grace, keen discernment and strength of character that would have made her an ornament in the highest sense.

She leaves a lasting void in many hearts and an example that makes the world a better place to live in.

The funeral was largely attended. Service was held in Wesley Church, the pastor, Rev. Dr. Laker, preaching a most appropriate sermon. The floral tributes were beautiful and numerous.

WE NEED MONEY; IS YOUR SUBSCRIPTION PAID?

At the present time we need every dollar outstanding for subscriptions, as well as for other accounts. Many of the amounts are small, but three hundred subscriptions in arrears alone represents \$800.

In order to make payments it is necessary to collect outstanding accounts. The co-operation of subscribers and other friends will greatly assist.

On February 16th The Sun's mailing list will be revised, and all subscriptions paid in the meantime will then be credited on labels.

Should any errors appear in dates on labels, subscribers will confer a favour by calling attention to same, so that corrections may be made when the list is revised.

WHY A MANURE SPREADER

The Proverbs of a Wise Farmer to His Son.

BY BERT M. MATHIAS.

My son, hear the wisdom of thy father, and learn the way of growing bigger and better crops. Know thou first, that thy soil is enriched, that thou canstest it.

Learn thou that the food, or humus, that thy soil doth most desire is the humble barnyard manure. It giveth life to the weary and worn soil. It maketh mellow to plow. Manured soil gunneth not when wet. It shapeth not itself into unyielding clods when dry.

It denkieth in the refreshing moisture even three-fold above the capacity of impoverished soil.

It giveth up to the drying wind its store of moisture at a rate one-third as rapid. Its crop withereth not with the noon-day sun.

There, go to, my son, and use a manure spreader.

Again the second time the wise farmer spake a proverb to his son, saying:—Conserve thou the riches of thy fertilizer by conveying it to thy fields with thy spreader as it is produced.

For know thou that manure collected in heaps undergoeth chemical changes and the goodness thereof wasteth away; and that the snow and rain from heaven falling upon the litter of thy barnyard and feed-corn doth straightway dissolve the plant food thereof and carry it into the earth, and to the creeks and rivers, where it doth good unto no man.

For seest thou a man without a spreader, the same is he whose manure collecteth and wasteth even as thy father has spoken.

Therefore, if thou wouldst be a wise farmer, procure unto thyself a manure spreader and show diligence in the use thereof.

Also a third proverb spake the wise farmer.

My son, if thou wilt heed the counsel I have given thee, then will thy corn and barnyards be of no offence to the eye, nor to the nose.

Moreover then mayest thy stock feed and lie down in comfort because their pens are not encumbered with filth and mire.

And thy servant who doeth the chores, toiling in clean yards and pens riseth up each day to call thee blessed.

Yea also, when thou keepest thy barnyard thou dost prevent the multiplying of flies and whose swateth the fly destroyeth pests to his beasts, and fly carriers of filth and disease to himself and those that dwell within his house.

Or whose hath a son should surely possess a labor-saving spreader, for so will he make easy for him a much-despised task, and thereby will he keep the boy on the farm.

Therefore, my son, heed the words of thy father.

Own and use a manure spreader if thou wouldst leave a goodly heritage in worldly goods, and acres rich in productivity.

Then will thy children's children rise up to call thee blessed.

POULTRY.

The name "black head" comes from the fact that the head sometimes turns a dark color, although this is not an ever-present symptom. This condition frequently affects turkeys, and more particularly the young than old, but in rare cases it has been known to affect chickens. For turkeys it is a most serious disease, and often makes turkey raising difficult.

The disease is caused by the ameba, melagris. This can be found in the affected birds in the liver and the bowels. The disease is spread by droppings from affected birds. The first symptoms noticed are a dullness and a drooping of the tail and wings. The feathers are ruffled, and the birds become inactive. A yellowish-green diarrhoea follows, together with lack of appetite and rapid weakening and loss of flesh. Death comes in from three days to a week after the first symptoms, although in extreme cases the bird may live ten days. Occasionally the disease develops a chronic form which will linger on for many weeks.

The very best sanitary measures must be taken immediately. Sick birds should be separated from well birds, and the well ones put in new quarters. Frequently it is necessary to discontinue the raising of turkeys for a year or so on an infected farm. In securing new birds to start the flock, it is always advisable to determine whether or not this condition has been present in the flock at any previous season. Birds from an infected flock should not be sold to other breeders.

Through disinfection, especially of the places where the flocks roost, is necessary. Be careful to see that when feeding and watering the flock everything is as sanitary as possible. Potassium permanganate placed in the drinking water, and also dissolved in water and mixed with feed, is a preventive of this disease. Use of this remedy with every hatch of turkeys until they are at least several weeks old is worth-while insurance against loss of young turkeys.

To brighten up the piano mix equal parts of linseed oil, turpentine and vinegar. Saturate soft cloth with this mixture and rub the surface well. Polish with a clean chamois.

Milk Pooling System Settled.

In an address given by Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner, at the Eastern Ontario Dairy Convention held at Cornwall on January 8, the story was told as to how the question of paying for cheese milk according to the quality, was settled at the Finch Dairy Station. Mr. Ruddick was reviewing the history and accomplishments of this station that has now been disposed of as a government institution. Up to the time of the taking over of the original cheese factory at Finch in 1912, the cheese money had always been divided on the pooling system, that is, according to weight only of the milk delivered. The patrons were urged to agree to the more up-to-date method of accepting payment for their milk according to its quality. This proposal was agreed to but after one year's operation on this basis about one-half the patrons petitioned for a return to the old pooling system. The management then proposed to conduct the factory on both systems. It was advertised that on a certain day those that desired to have their milk pooled would deliver at one receiving platform, and those who preferred to be paid according to quality would take their milk to another. It was intended to keep the two deliveries of milk entirely separate, to sell the cheese separately, and divide the proceeds according to the two systems. When the day arrived on which the division was to begin, not a single patron offered his milk at the pooling platform and the question has never been raised since.

If you wish to keep the gloss on your linoleum, when washing it use lukewarm water to which has been added a tablespoonful of kerosene to a half bucket of water. You will find this to be an excellent cleanser, and at the same time a preservative.

Polish with a clean chamois.

A portrait of H.R.H. the Prince of Wales, by J.A. Mannings, was chosen by Sargent as one of the representative examples of British portrait painting. It will be exhibited at the Grand Central Galleries.

Government Dairy Station Profitable to Patrons.

The Finch Dairy Station, operated by the Dairy and Cold Storage Branch of the Dept. of Agriculture at Ottawa since 1912, has proved a profitable institution to the farmers who were its patrons. The Station when organized by the government consisted of two cheese factories and later another factory closed because its patrons desired to serve the Finch Station. The Station almost immediately extended its operations to the making of butter and the selling of cream and milk. These extensions proved very profitable to the patrons for during the last eight years of operation they received more than \$100,000 above what they would have received had cheese only been made. Dr. J. A. Ruddick, Dairy and Cold Storage Commissioner, announcing this fact, explains that the amount of this premium was arrived at by comparing the net returns to the Finch patrons with the average returns of cheese factories according to the quantity of milk worked up. The Station undertook as one of its objects, the extension of winter dairying. The fact that 14 per cent. of the milk was received during the winter months, more particularly in recent years, accounts for some of the satisfactory premium that the patrons were able to secure through the operation of the Finch Station.

How long will it be before we discover the twenty per cent. of our cows that make us no profit?

By keeping the light out of a well, the dollar it can improve.

Flowering Shrubs for Lawn Decoration

The usual long lists of ornamental shrubs that may be used for foundation planting or lawn decoration, are liable to lead to confusion in the minds of those who would beautify their home grounds. When care is taken to familiarize oneself with the shape, blooming season, growing habits and general adaptability of a small selection and then plants and cares for them, he will almost at once have added great charm to his home that will become an inspiration within the neighborhood.

Properly placing shrubs around a homestead is a comparatively simple task. In fact the very first rule to follow is to make it simple, and then as possible like nature would have it. For a small home lawn, not more than five kinds should be arranged in groups near the corners of the lawn and about the base of the building. Shrubs may also be set to a hedge form to add grace to the picture or to hide unsightly objects. The placing of either individual shrubs or groups of shrubs in the centre of a lawn is not regarded with favor by authorities and is always disappointing.

Many varieties of ornamental shrubs have been tested on the grounds of the Macdonald College at Ste. Anne de Bellevue, Quebec, Mr. T. G. Bunting, Professor of Horticulture, after checking over quite an extensive list, records the following as among the very best:

1. *Philadelphus virginial*,
2. *Viburnum lantana*,
3. *Lonicera tatarica*,
4. *Spiraea Van Houttei*,
5. *Berberis thunbergii*,
6. *Syringa vulgaris*.

Philadelphus virginial is spoken of by Professor Bunting as one of the finest of the mock orange group. *Viburnum lantana* is not so well known, but it is extremely hardy and very ornamental. The next three plants in the list are all well known and may be depended upon to give satisfactory results. *Syringa vulgaris*, otherwise known as the lilac, should be included in any list of the best six varieties. Of these there are many varieties. Probably the best are *Abel Carrierei*, *Charles Joye*, *Emile Lemoine*, and *Pres-*

Despite the grasping fingers of Old Man Winter, Niagara Falls still continues to flow and roar.

Home Education

"The Child's First School is the Family"—Froebel.

The Recompense—By Mildred Anne Leslie.

"Play, laugh, run, strive, and work, and, half, she forgot to appreciate them. They were very wisely and very grave."

There was once a little girl who had the most wonderful mother and father in the world. Also her brother and sister, who were quite grown up, were the finest and most beautiful young persons this particular little girl could imagine. Unfortunately, they had to be away at school nine months out of every twelve, for this family happened to live in a very tiny town.

Father's business was such that he made frequent trips to the country, and still nearer, frequent trips to the city. Whenever there was anything that this little girl could possibly be interested in, Daddy was always willing to let her go along.

Mother could always find time to devise some plan for a dull day. What fun it was to play school with Mother as a teacher! She could teach while she was sewing, or baking, or making beds, or writing a paper for her club. It was all the more fun to have a teacher who made pretty dresses for her pupil while she was actually teaching her to read or write. It wasn't every one who could learn to subtract while sniffing delicious cookies, and know that the food Daddy let her eat quickly she might have just one cookie with her glass of milk!

And oh, the thrills before the first trip on a Pullman with Daddy, to the Convention! Mother and Daughter played the lovely game of "telegraph" for weeks before with chairs and portieres. And when the time came to go, and all of her clothes were packed in Daddy's big suitcase, and she was kissed for the last time, and Daddy was reminded once again to ask the porter on the Pullman or the maid in the hotel to tie her hair ribbon, and the train finally pulled out for a glorious adventure—what a happy little girl she was!

The breath-taking sight of the inside of the big hotel! The distracting sounds of the bustling city! The delicious "never before did anything taste so good" flavor of the food Daddy let her order all by herself! The important feeling of sitting very still beside Daddy at meetings, even when she hadn't any idea what they were all about! And best of all, the joy of going home again and telling Mother all about everything! Jokes were so much funnier, shared with Mother, experiences so much more wonderful after they had been talked over with her.

Once in a while because Mother and Daddy were so good to this all-alone little girl and so thoughtful in her childhood!

Slack Apple Packing Loses Money.

A considerable percentage of the "slack" apples placed on sale. This slackness during travel causes a bruising of the fruit, reducing considerably its selling value. To find out the extent of the saving that might be made by careful packing in order to overcome this loss, the Dominion Fruit Branch shipped two hundred well packed barrels to the Liverpool market. When opened on December 17 but six barrels of this shipment, or three per cent, were found to be slack. On the same day 982 quantity of 5,205 barrels catalogued for auction selling. The reduction of the selling value in this shipment on account of the slackness amounted to \$460.60. Hall all the barrels been as well packed as those of the trial shipment, the loss would have been but \$70.60. Other considerations than packing enter into the question of marketing apples, but on the packing alone considerable saving could be made in the apple export business of Canada.

One can imagine John's feelings when the binder was returned three weeks later with several bolts loose and a few screws gone. He made up his mind then and there that when any one came to borrow from him that he would tell them:

"No, I can not afford to lend it to you outright, but if you wish I will send one of my men over to your farm to operate it for you and you can pay me for the man's time and rent for the implement."

John has not lost a single friend by this new policy. When he borrows, he rents and pays the other fellow for operating the borrowed implement.

Ask for Information.

The Dept. of Physics of the Ontario Agricultural College is prepared to offer assistance in connection with the following list of farm operations and installations:

- (1) Water and sewage disposal systems.
- (2) Lightning rod protective systems for urban and rural structures of all classes.
- (3) Drainage surveys.
- (4) Farm cold storage plants.
- (5) Concrete construction in all branches of farm engineering.
- (6) Anti-freeze mixtures.

The Dept. of Physics invited those interested in any or all of the branches of the Department's work to ask for information relative to the service offered, and to submit problems for solution.

You Carry the Umbrella—He, the Smile.

"My friend, you should carry a smile these cold rainy days as I do."

"Great optimist, I suppose?"

"No, merely an umbrella maker, my friend."

Eels Slow In Forming.

It takes from one to three years to effect the complete transformation from the egg to the eel.

POSTAGE STAMPS

Some useful information for all interested in the collection of Canadian and Foreign Postage Stamps. Questions answered. Exchanges made. Write Stamp Column, The Sun.

JUGO-SLAVIA

Look at the map of re-constructed Europe, and it will most surely strike your eye that drastic re-arrangement of frontiers have occurred in Europe's South-East corner since the War.

Serbia, which, in 1909, assassinated King Alexander and his disreputable Queen Draga; Montenegro, the country of stamps for collectors who delight more in beauty than in rarity; Bosnia—Herzegovina, which once formed an annex to the Kingdom of Hungary, have been wiped off the map.

Not exactly wiped off it but have been deprived of the independent issue of stamps. All these countries have been united by the Constitution of 1921 into the kingdom of Jugoslavia which issued its first stamps on January 17th, 1921. This is the general issue commencing with No. 501 in Scott's catalogue. This issue was produced by the American Bank-Note Company, which on the reverse-values the picture of the then crowned Prince Alexander, and on the obverse-values that of his father, King Peter I, who since has died.

The inscriptions at the top in Cyrillic letters repeated in Roman letters at the bottom, mean "Kingdom of the Serbs, Croats and Slovenes." These races, if we can call them such, form the population of Jugoslavia.

Prior to the adoption of the Constitution of 1921, Bosnia, Croatia, Slavonia and Slovenia, each used its own stamps. Bosnia overprinted its stamps with Drzava S. H. S. which stands for "Government of Jugoslavia." Croatia and Slavonia, with "Kraljevstvo S. H. S." which means "Kingdom of Jugoslavia." The Hungarian stamps overprinted "Hrvatska S.H.S." were issued in the parts known as Croatia-Slavonia.

Very few of these stamps are now being offered by European dealers, and what they do offer consists only of small lots.

The "Chainbreaker" type symbolizing Liberty, was issued by Slovenia, which one should not confuse with Slavonia. This type since has higher values belonging to this issue beat all the other New-Europe stamps as a field for specialization, as they come not only in different printings but also in various perforations and a wide range of shades.

A new set showing King Alexander in larger profile is under preparation and a few values of it have already appeared. The delivery of this new set did not take place as soon as expected, thereby causing a shortage of some denominations in the Jugoslavian post offices.

These denominations they had to have, so that they were forced to overprint stocks of stamps of which there were sufficient on hand with the values of the stamps lacking, which gave us a few more provisionals than the ones issued in Serbia under No. 515 to 620.

The prices for all stamps of Jugoslavia are now at the bottom of the pit and nothing else than an upward tendency in their next move is to be expected.

News Briefs.

Belgium—The current 10c Postage Due stamp has been changed from yellow green to a deep bluegreen color.

Congo—The colors of the current 50c and 75c will be altered shortly.

Estonia—A new stamp 25 penni yellow Type A. 9 imperforate on pellure paper has just made its appearance.

France — To commemorate the 400th anniversary of the birth of the poet Ronsard, a special postage stamp of a 75c value has been issued. The stamp is in blue or ultramarine and shows the bust of Ronsard in a harp's frame. At the left it bears the year 1524 and at the right the year 1924.

Peru—The issue of 1924 stamps seems to be sanctioned in Peru. We have had a cover with one whole No. 212 and an additional half (diagonal).

OUR RURAL POPULATION GAINED 34P.C. URBAN CENTRES IN SAME PERIOD 183P.C.

One Half in Towns and Cities—Proportion of British Races 55.5 Per Cent.; French, 27.9; Other Races Make Up Remainder—First Volume of 1921 Census Just Issued Gives Interesting Information.

The Dominion Bureau of Statistics has today issued the first volume of the final report on the Census of 1921. The main results of the Census have been given out in a series of some thirty bulletins each dealing with specific aspects of population and agriculture. The volume, however, contains the final detailed figures by local units, showing the numbers, sex and geographical distribution of the population, two of the racial origins, and three; the religious. The volume also contains the administrative report on the taking of the Census.

According to the British North America Act 1867, the taking of a Census is one of the twenty-eight specific subjects exclusively assigned to the Dominion as distinguished from the Provincial authority. The first Census Act was passed by the Parliament of Canada in 1870 and the first Census of the Dominion of Canada was taken in 1871. Altogether six decennial Censuses of Canada have been taken since the formation of the Dominion.

Early Census Taking.

Census taking dates from a very early date. Most bulletins each dealing with specific aspects of population and agriculture. The volume, however, contains the final detailed figures by local units, showing the numbers, sex and geographical distribution of the population, two of the racial origins, and three; the religious. The volume also contains the administrative report on the taking of the Census.

First Canadian Census

This report, however, brings to notice that the credit for taking the first census as known in modern times belongs to Canada. The year was 1666, and the census was one of the Colony of New France, as Canada was then called. This census was a systematic record of each individual by name, taken at a fixed date, showing sex, occupation, conjugal and family condition. The records of it are carefully preserved in the Archives of Paris, a transcript of which may be seen in Ottawa. When it is recalled that in Europe the first censuses date only from the eighteenth century—Sweden (1748) and France and England (1801), the achievement of the primitive St. Lawrence colony in its early split of the same. As this cover came from a mining company and was addressed to a smelting concern in the States the split provisional does not seem to have been made to accommodate a philatelist.

Spoiling a Good Thing.

"There is a movement on foot," remarked dad, "to teach geography in our schools by means of postage stamps."

"Aw, gee!" complained little Bobby. "That's a mean trick. What do they want to go and take all the fun out of stamp-collecting for?"

"People On Never Fails to Meet. They are the ones who use as soon as a new stamp-catalogue comes out claim it's no good; and it's rather funny they are the same ones who told us, when the Great War was over, how they would love to run it. Naturally, it is easier to analyze and criticize another fellow's job than to do it better."

stituting what is to-day one of the principal instruments of government administration.

From 1666 to 1763, when the French regime ended, few censuses were taken in New Canada, nor was this census taking frequent, but it was only with the formation of the Dominion of Canada in 1871 that the census was taken in the Dominion of Canada.

Under British occupation there were censuses of Canada in 1765, 1784 and 1791. From 1817 onwards census taking in Canada has been more or less frequent, but it was only with the formation of the Dominion of Canada in 1871 that the census was taken in the Dominion of Canada.

When Canada Grew
As above stated, the main figures of the 1921 Census have already been made available to the public but the following may be noted: the total population of Canada in 1871 was 3,829,257; fifty years afterwards, in 1921 it was 8,788,483, an increase of 132.22 per cent. In the last decade the increase was 21.95 per cent, while in the first decade following Confederation it was 17.23 per cent, in the second 11.76 per cent, in the third 11.13 per cent, and in the fourth 34.17 per cent.

West Leaves East Behind.

It is also interesting to note that in 1871 Ontario possessed nearly 44 per cent of the population of Canada and Quebec a little better than 32 per cent, while in 1921 Ontario possessed 33.38 per cent and Quebec 28.87 per cent of the total population. The relative position of the Maritime Provinces as regards population in 1871 and 1921 is strikingly illustrated by the fact that at the date of Confederation they had 20.8 per cent of the total population as against 11.4 per cent in 1921. Of course, the explanation lies in the growth of the prairie provinces. In 1871 out of a total population of 3,829,257 only 18,000 or .42 per cent dwelt in the Middle West; in 1901 they possessed slightly more than 3 per cent of the total population, while in 1921 they had more than 22 per cent.

The growth of urban population in Canada is forcibly illustrated by the fact that in 1921 there were 109 cities and towns in Canada with a population of 5,000 and over, as against 37 in 1911, 57 in 1901, 45 in 1891, 34 in 1881 and 21 in 1871. In 1891 the population living in urban centres made up 31.5 per cent of the total population; in 1901 it had climbed to 37.5 per cent; in 1911 to 45.4 per cent, and in 1921 to 49.5 per cent. From 1891 to 1921 the rural population showed a gain of 35 per cent as against a gain of 183 per cent in the urban population in 30 years.

By 1921, the census-taking limits, had a population of about 115,000 as against 618,506 in 1921, and Toronto, similarly considered grew in the fifty years from 50,000 to 521,893. Winnipeg, which scarcely found a place on the map in 1871 with 241 persons, in 1921 had 179,087. Among the outstanding features may be noted that Vancouver and Calgary were first noted in the 1891 census, while Edmonton, Regina and Saskatoon did not find a place in the censuses previous to 1901. These are now large and thriving centres of population, trade and industry.

The effects of immigration on the ethnic composition of the population is illustrated by the fact that in 1881, 59 per cent of the population was of English, Irish or Scottish origin, 31 per cent of French origin (nearly all native born) and 2 1/2 per cent, Indian, leaving only about 8 1/2 per cent of the population as belonging to other races, while in 1921, or thirty years later, the proportion was as follows: British races 54 per cent, French 28 1/2 per cent, Indians less than 1 1/2 per cent, and all other races nearly 16 per cent. In 1921 the proportion was British 55.5 per cent, French 27.9, Indians 1 1/4 per cent, leaving all other races with 15.43 per cent of the total population.

Religious Classification.

The section dealing with the classification of the population according to religious beliefs enables persons who are interested in such a classification to ascertain with the fullest detail the relative strength of the various denominations by counties, townships or cities. Of the total population in 1901, the Church of England claimed 13.69 per cent, Baptists 5.92 per cent, Lutherans 1.72 per cent, Methodists 17.07 per cent, Presbyterians 15.68 per cent, Roman Catholics 41.51 per cent, while in 1921, twenty years later, the proportions were, Church of England 16.02 per cent, Baptists 4.80 per cent, Lutherans 3.28 per cent, Methodists 13.18 per cent, Presbyterians 16.03 per cent, and Roman Catholic 35.50 per cent. The Jews, which numbered 16,401 or less than one-third of one per cent of the population in 1901, had 125,190 adherents in 1921 or 1.42 per cent of the total population.

Why?

Dick had his first lesson in astronomy, and when he came home from school he began to enlighten his sister on the mystery of the stars.

"Do you know," he said, "that little star over yonder is very much bigger than our world?"

"Then, why doesn't it keep the rain off us?" she asked.

A Modern Student.

Teacher—"You'll have to stay in after school and work on your geography lesson."

Willie—"I can't locate those cities on the map, but with my radio I can tune in on the whole lot."

Here and There

The following apt comment on the careless motorist and his ultimate fate comes from the Boston Transcript:

"If a freight train at a crossing
"Hits an auto fair and square
"There's the freight train—Where's the auto?
"Echo answers 'Where!'"

Trees at the rate of 20,000 a day have been planted by farmers in Western Canada during the last 20 years, according to a report of the Federal Department of Agriculture. A total of 160,000,000 young trees, the report shows, has been distributed to farmers in that section in 1905.

Canada has entered into negotiations with Germany for a trade agreement which will give her the benefit of the most favored nations agreement. Exports to that country very nearly doubled during 1924 and at the close of the year Germany was practically in the position of being Canada's third best customer.

A co-operative shipment of poultry to New York City, encouraged and handled by the Dominion Poultry Service, Alberta branch, brought good results. The shipment consisted of two refrigerated carloads of turkeys and the shippers received 25 cents a pound for their birds, the New York selling price being 41 cents a pound.

Among the interesting books of the season is "Canada's Great Highway; from the First Stake to the Last Spike," by J. H. E. Secretan, C.E., (published by Thorburn and Abbott, Ottawa). Dealing with the early history of the Canadian Pacific Railway, the volume contains racy reminiscences of life in construction days as experienced by the author, who was a member of the company's engineering staff.

Sailing from New York on January 14, the "Empress of France," a Canadian Pacific steamship, began her 'round-the-world' cruise, which is to last 130 days. The vessel was gaily decked with flags and filled with happy passengers eager to enjoy the experience of a lifetime. F. L. Wanklyn and Mrs. Wanklyn, among those on board. Mr. Wanklyn recently retired from his position as executive assistant of the Canadian Pacific Railway.

The most notable Christmas card this year was one prepared for the redoubtable Colonel George Ham, of the Canadian Pacific Railway, by a number of internationally known newspaper artists, creators of famous comic strip characters. In the centre of the card is a photo of the Colonel, while grouped around him, commenting on his good qualities, are signed drawings of Pa Perkins, Tillie the Toiler and Mac, Barney Google and Spark Plug, Our Gang and Dumb Dora. Colonel Ham is naturally very proud of the card.

SPLENDID CONNECTIONS MADE FOR SASKATOON & EDMONTON BY THE VANCOUVER EXPRESS

A greatly improved transcontinental service is provided by the Canadian Pacific Railway in the Vancouver Express leaving Toronto every night at 9.00 p.m. (effective January 11) for Vancouver.

Direct connections are made at Regina, Saskatoon, and at Calgary for Edmonton.

Leave Toronto 9.00 p.m.; Ar. Winnipeg 10.00 a.m.; Ar. Regina 11.05 p.m.; Ar. Saskatoon 1.05 a.m.; Ar. Calgary 4.10 p.m.; Ar. Edmonton 11.10 p.m.; Ar. Vancouver 7.00 p.m.

The equipment of the Vancouver Express is of the highest standard, including dining car, Tourist, Standard and Compartment-Observation Sleepers.

Travelling to the West on this train makes the trip a pleasure.

Let your nearest Canadian Pacific agent supply detailed information concerning tickets, reservations, etc., and Victoria, Canada's national winter resort, where summer sports may be enjoyed the year around.

To Sleep to-night use RAZ-MAH

to-day for Asthma and RAZ-MAH has brought peaceful nights and rest to thousands who formerly suffered the agonies of Asthma.

RAZ-MAH contains no narcotics or other habit-forming drugs. If it does not give relief we guarantee a refund. "Just swallow two capsules, a box."

OBSCURED BY CLOUDS IN ONTARIO, ECLIPSE VIEWED BY NEW YORK

New York, Jan. 25.—A thin, luminous ring—set with a great gem of soft burning light—hung in the eastern sky over the Atlantic yesterday morning at 9.11 o'clock, while most of New York's population of six millions gazed at it.

For several seconds the jewel sparkled with a pure and mild radiance, then trembled and melted into the circle of light which rimmed the ink disk of the moon. The total eclipse had come, and stars twinkled luminously.

Before the spectator could recover from his breathless wonder at the scene and try to realize its detail in the sky and on the earth, the amazing spectacle was ended.

The marvelously beautiful jewel of white light reappeared again, this time on another part of the thin, luminous ring. It was clear and all-pervading lustre quenched the corona, and then put out the light of the stars.

This ring, with its gorgeous solitaire, drew attention from the orthodox and predicted features of the eclipse. It made a deeper impression on the crowds than any other feature of the heavenly show. The incomparable beauty of this sight, unexpected by most of the watchers, could not do

otherwise than make such an impression, and the effect was intensified by the fact that every observer felt the thrill of a discovery. The advance accounts had given no notice that the eclipse had ornaments of this brilliancy to display.

Scooped tufts of flame about the sun's rim had been predicted, but were not visible to the naked eye. The corona was not large or colorful. There was a profusion of weird and wonderfully beautiful scenery, not calculated to strike terror to the heart as it once did, but well fitted to show humanity its true proportions—to remind mortals that after all they are mere midges living on an under-sized planet that is but a part of a great God-created universe.

The moon was unapologetic, as well as careless of its routs. It was again four seconds late in blinding out the sun. The earth, the sun and all the planets pull the moon in different ways which can be calculated with the greatest precision, but some unknown force speeds it up and slows it down in an unaccountable fashion. It was no surprise to astronomers to find the luminary of night slightly off its course and behind time at the critical moment.

WILL COPY EFFECT OF ECLIPSE ON NIAGARA

Cataract as it Appeared Then
Will be Reproduced in
the Illumination

Niagara Falls, Ont., Jan. 26.—Although Niagara Falls was in the centre of the path of the eclipse only glimpses of the sun were seen, just at the critical moment dense banks of clouds obscured the spectacle. Scientists from Cleveland on the roof of a skyscraper across the river were more fortunate and secured some fine pictures of the corona at totality.

The spectacle from that point was one of rare beauty. Seven beautiful rays of deepest blue wavered from left to right across the waters of Niagara and died away. Interesting observations were made by Percy Ryan, illuminating engineer of the General Electric Company, and a corps of assistants on Goat Island.

"Niagara Falls just as it appeared during the eclipse of the sun can be reproduced," said Mr. Ryan, who will be in charge of the plant illumination scheme here. Tests of the intensity of the light were made. "My primary object in making the observations," said Mr. Ryan, "was to arrive at a decision as to whether or not we would be able to reproduce for future tourists the beautiful effects of the vari-colored lights from the eclipse to the falls. I am certain that we can. In the brief period of time allowed us we succeeded in catching the curve of the lights as it went down and came up. The effect of the eclipse on the falls will be incorporated in the plan of illumination of the falls. Photographs of the eclipse and the falls and rapids were taken during and before totality.

"Niagara Falls just as it appeared during the eclipse of the sun can be reproduced," said Mr. Ryan, who will be in charge of the plant illumination scheme here. Tests of the intensity of the light were made. "My primary object in making the observations," said Mr. Ryan, "was to arrive at a decision as to whether or not we would be able to reproduce for future tourists the beautiful effects of the vari-colored lights from the eclipse to the falls. I am certain that we can. In the brief period of time allowed us we succeeded in catching the curve of the lights as it went down and came up. The effect of the eclipse on the falls will be incorporated in the plan of illumination of the falls. Photographs of the eclipse and the falls and rapids were taken during and before totality.

"Niagara Falls just as it appeared during the eclipse of the sun can be reproduced," said Mr. Ryan, who will be in charge of the plant illumination scheme here. Tests of the intensity of the light were made. "My primary object in making the observations," said Mr. Ryan, "was to arrive at a decision as to whether or not we would be able to reproduce for future tourists the beautiful effects of the vari-colored lights from the eclipse to the falls. Prof. Antoine Mellier of the College of France, says that his researches indicate that Columbus did not discover America.

NIAGARA FALLS TO BE ILLUMINATED

Contract Awarded to Canadian General Electric Company—Colored Lights.

A dispatch from Niagara Falls, Ont., says:—The contract for the illumination of the Falls has been awarded to the Canadian General Electric Company, and the work of installation will be done under the supervision of D'Arcy Ryan of Schenectady. A board of directors of the two cities of Niagara Falls and Quebec, Victoria Park has been appointed, and as follows: Mayor Laughlin, City Manager Robins, J. A. Johnson, S. J. McMillan, J. H. Jackson, J. R. Bond of the Queen Victoria Park Commission. Mayor Laughlin was appointed chairman of the board and J. R. Bond secretary.

The lights to be installed are 24 of 36-inch diameter, low intensity, carbon arc searchlights, and Mr. Ryan will be here on Saturday to decide on the location for these units. In conjunction with the actual illumination of the Falls, color screens will be supplied with the units, so that attractive multi-colored drills may be done with the units.

Canada from Coast to Coast

St. John's, Nfld.—Newfoundland's gold mines of Northern Ontario in 1924 returned an average catch of 12,000 ounces of gold. The aggregate income of the producing mines exceeded \$2,400,000 for the first time on record in this province. The figures show that while the total output for 1924 was about \$2,400,000, yet the mines are entering the year 1925 with production at the rate of close to \$50,000,000 a year.

Summerville, P.E.I.—Fox ranching continued to prosper in Prince Edward Island during the past year, the sale of live foxes and pelts. The foundation stock has brought about a heavy demand on the provincial stock to Upper Canada, Manitoba, Alberta, British Columbia, Oregon, Washington, France and England.

Kentville, N.S.—Nova Scotia potato crop for 1924 is estimated at approximately 90 per cent. of last year, the area planted being in the vicinity of 29,000 acres, giving an estimated crop of 1,450,000 barrels. While not as generally speaking, was harvested in good condition.

Fredericton, N.B.—Mineral production in the Province of New Brunswick was well maintained during the past year, according to a preliminary survey of the industry of the Provincial Dept. of Mines. Coal output declined slightly from 1923 to 1924, but the production of the other principal non-metallic minerals, including natural gas, gypsum and building materials, was well up to the figure of 1923.

Montreal, Que.—Montreal handled 165,139,896 bushels of grain during 1924, the largest amount ever handled by the port in any one year, according to the final figures issued by the Harbor Commissioners. In 1923, 120,107,990 bushels were handled, while in 1922—the best previous year—155,035,817 bushels passed through the port.

Timmins, Ont.—Preliminary figures issued for the month of December show that the raw material will be obtained from the Orient.

PEPALL ARRESTED IN CALIFORNIA HOME

Former Associate of Peter Smith in Bond Deals Imprisoned at Request of British Consul.

Toronto, Jan. 26.—Andrew Pappall, arraigned by Chief Justice R. M. Meredith, the presiding Judge at the trial of Aemilius Jarvis and Peter Smith, as "a fugitive from justice and possibly in control in the United States of the plunder in the Provincial bond scandals"—is again in custody in Los Angeles. This time he is held on complaint of the British Consul at that point, who informed the police there on Saturday that a warrant had been issued in Toronto charging Pappall with theft and bribery arising out of the Provincial bond deals.

Word of his arrest reached the Attorney-General's Department here on Saturday afternoon by wire from the British Consul at Los Angeles. The message stated that Pappall was being held without bail, pending further instructions from Toronto. The necessary papers are being prepared here and will be taken to Los Angeles, probably by Inspector Boyd of the Department of Criminal Investigation, Ontario Provincial Police. While no person in the United States cannot be held by the Attorney-General's Department respecting the specific charges and their wording, the extradition proceedings will be undertaken on five different charges.

Another long legal battle is expected to follow in the United States. In a former case Pappall carried his appeal against deportation direct to Washington, and was successful, despite the fact that the Immigration Board at Los Angeles recommended his compulsory return to Toronto.

Platting the Judge.

Judge—"Prisoner, the jury finds you guilty."

Prisoner—"That's all right, Judge, I know you're too intelligent to be influenced by what they say."

The Quinte Sun

THOS. JARRETT, Editor

Trenton, Ontario, January 31, 1925

NOT ALL SUNBEAMS

Advertising is to-day, the great builder of every successful business. According to Bradstreet, eighty-four per cent. of all firms that fail are non-advertisers.

Jumping on sleds and cutters is a very dangerous sport, and parents will be well advised to caution their children in this regard. A number of youngsters have been knocked down during the past week in attempting to ride swiftly-moving cutters.

SAME HERE, TOO

Same here. Deseronto Post remarks: "The day has gone by when we will pay admission to anything for the pleasure (?) of writing it up. Send around complimentary tickets and we will see that The Post 'covers' your doings."—Belleville Ontario.

NOT IN THE SAME CLASS

(From The Mail and Empire) Premier King attacks the Tories and describes them as "the common foe." Sir John Macdonald used to say he respected the Liberals and would welcome any assistance they could give him in the good government of the country. The difference shows that, as a statesman, Sir John was not in Mr. King's class.

SEES PROGRESS OF THE SUN

(From The St. Marys Journal-Angus) We note with pleasure from week to week, the improved appearance of the Quinte Sun, two members of the staff of which, namely, T. Howard Jarrett and Ed. Edie, were former employees of The Journal-Angus. In the volume of advertising carried, in its excellent news reports and bright editorial columns The Quinte Sun gives every evidence of prosperity. The senior member of the firm, Mr. Thos. Jarrett, the editor, was this year a candidate for the Town Council. His wide experience in municipal matters in past years should make him a valuable member of the Board.

APPRECIATE THE SUN

Mr. G. T. Bissell writes from Toronto: "Your paper is a good medium for Trenton Old Boys and Girls to keep in touch with the old town and vicinity."

Mr. F. G. John writes from Stirling: "I regard The Sun as a very excellently conducted paper."

DIVERSITY OF OPINION

(The Deseronto Post) Over in Tweed, D. H. Morrison of The News was nominated for the village council. This is what he said in declining the honour: "I thank my friends for the honour, but I am not sure I am up to the task. I have not enough of my own. Add this to the last words of famous men. And may Tom Jarrett of The Trenton Sun commit Mr. Morrison's lines to memory. Why a newspaperman should be puffed in these small town municipal pools beats us."

EDUCATIONAL PROBLEMS

(From The Oshawa Reformer) Premier Ferguson, who is also Minister of Education, is now proving himself to be a man of many parts. He is attempting to solve some of the many knotty problems confronting the educationalists of Ontario.

His latest suggestion is that the High Schools and Collegiate Institutes of the Province carry their pupils for an additional two years, thus taking care of what is now usually taught in the university in the first two years of a college course. Mr. Ferguson's claim is that this would tend to popularize our education and also make it easier for the mass of the people to avail themselves of the extra years of study. It is a good suggestion, although it is doubtful if High School teachers will welcome this effort to increase their duties and responsibilities.

Another problem which Mr. Ferguson has not been able to solve is the question of consolidated schools in the rural section. From time to time efforts are made to unite two or three sections and build one school to accommodate all the children in these adjoining sections. Local jealousies, the question of adequate transportation, and perhaps the added expense are deterring factors.

On the other hand it is pointed out that there are hundreds of schools in the Province with less than ten pupils. There are a number with only one pupil. Others have two, three and so on throughout the list. It is very plain that it costs an unreasonable amount to educate one or two children, and it is for this purpose that the Government is trying to induce the people to go in for consolidated schools.

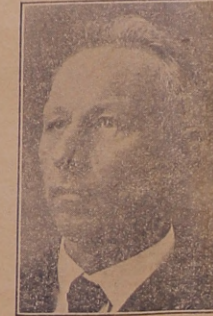

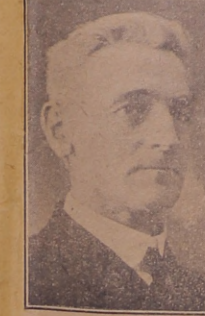

AN INDUSTRIAL COMMISSIONER FOR OSHAWA

(The Oshawa Reformer) It is to be hoped that the City Council will secure the co-operation of the Board of Trade and go ahead with the appointment of an Industrial Commissioner, either a full time man or a part time.

One of the best examples of what an Industrial Commissioner can do is shown in the case of Belleville. Mr. J. O. Herity, who was appointed to the office four years ago, has secured twelve new industries for that city in that time, but modestly gives the bulk of the credit to the co-operation of a live Chamber of Commerce, and an aroused citizen body. No doubt that is part of the effect of having an active Industrial Commissioner, Publicity Agent and Secretary of Chamber of Commerce.

There is no doubt that a number of

R-A-D-I-O

(By Jack Canuck)

Trenton Radio fans have had a variety in every sense of the word this week. Weather conditions, local interruptions and programmes have been different each night.

Last night at receiving station J I N X everything went lovely and

a splendid song and started to tell the world what a shame it was that the United States could not get six per cent. on the money it loaned to Great Britain or something to this effect. Being good Canadians the J I N X gang signed off and tuned in on a mouth-organ solo at "Kauaiis-city-missouri". Being of a sentimental turn of mind the operator whirled the dials and caught an Atlantic City lady singing "I love you". The bunch seemed to have doubts of this, so away went the dials for another spin. They stopped at W G Y in time to hear the final words of the drama, "Inside the Line."

"Just a wee Deoch an' Doris," said a Scotman in Atlanta, Georgia. Wouldn't mind at all, Scottie!

At 12:30 a.m. the room became quiet and J I N X signed off until church time Sunday.

Several wave length changes have been made by broadcasting stations this week.

The wave length of WTAM, the Willard Storage Battery Company at Cleveland, has been changed from 390 meters to 354 meters.

Station WEAR, formerly WJAX, made a change a few days previous to WTAM. These two Cleveland stations have always been on the same wave length, dividing the time on the air. They will continue to do so.

Coincident with the change of wave length, WTAM changed the personnel of the dinner concert entertainments which are broadcast every week day beginning at 6:00 p.m. E.S.T.

The Royal Canadians, under the direction of Guy Lombardo, will be heard in the future only on Monday and Friday evenings. Philip Spitalny and his Music Box Restaurant jazz

band will be broadcast on Wednesday evening at the dinner hour and again beginning at 10:30 p.m., Wednesday night. Tuesday, Thursday and Saturday dinner concerts will be furnished by the Hotel Statler Concert Orchestra, under the leadership of Maurice Spitalny.

Lombardo's Royal Canadians will be broadcast from the studio of WTAM. Other concerts will be by remote control from the Music Box Restaurant and the Hotel Statler.

SPLENDID CONNECTIONS MADE FOR SASKATOON & EDMONTON BY THE VANCOUVER EXPRESS

A greatly improved transcontinental train service is provided by the Canadian Express leaving Toronto every night at 9:00 p.m. (effective January 11) for Vancouver.

Direct connections are made at Regina for Saskatoon, and at Calgary for Edmonton.

Leave Toronto 9:00 p.m.; Ar. Winnipeg 10:00 a.m.; Ar. Regina 11:05 p.m.; Ar. Saskatoon 6:05 a.m.; Ar. Calgary 4:30 p.m.; Ar. Edmonton 11:10 p.m.; Ar. Vancouver 7:00 p.m.

The equipment of the Vancouver Express is of the highest standard, including dining car, Tourist, Standard and Compartment-Observation Sleepers.

Travelling to the West on this train makes the trip a pleasure.

Let your nearest Canadian Pacific agent supply definite information concerning tickets, reservations, etc., and Victoria, Canada's national winter resort, where summer sports may be enjoyed the year round.

FACTS ABOUT OPTOMETRY
By Blakely, Optometrists, Trenton

How important is Optometry? Investigation has proven that at least half the people would be benefited by the services of the Optometrist.

The Optometrist does not prescribe for diseased conditions of the eye? No, though he is often able to detect them, and in such cases recommends that the patient consult an oculist.

Errors of vision are often present when the patient is not aware that they exist? Yes, they are often responsible for much distress without the patient recognizing the cause.

(To be continued next week.)

FOURTH
of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

IN TORONTO

A YEAR after being founded, the Bank of Montreal spread its Branches westward, in July of 1818 establishing Agencies at Kingston and York.

York, which afterwards became the city of Toronto, had then just had its first stage-coach communication established with Kingston and Montreal. It was merely a settlement in a clearing amid unbroken forests from which the Indians came to trade with farmers and other members of the little community. Today Toronto ranks among the largest cities on the continent.

Of the Bank's 567 Branches, 26 are in Toronto and 207 in the Province of Ontario, including Toronto.

BANK OF MONTREAL

Established over 100 years

Total Assets in excess of \$650,000,000

The Most Important

Resolution You Can Make

A CREED OF HEALTH FOR EVERY MAN AND WOMAN

I WANT TO BE WELL. By "well" I mean positively, buoyantly well. I am not satisfied merely to be "not sick" — I believe that being completely well is the condition most fundamental to happiness and success — I realize that I cannot get something for nothing. I realize that to achieve buoyant health, I must regulate my life in accordance with certain natural laws. But I am convinced that nothing which I must deny myself is worth a fraction of that which I will gain — Therefore during this year I shall as far as possible live the natural life which makes for health by taking Chiropractic Adjustments, because they create a condition of body and mind which makes the solution of all life's problems less difficult.

PREMIER FEARS COMING SESSION

If Government's Programme is
Hampered Dominion Election
Will Soon Follow.

The possibility of a Dominion election shortly after the close of the coming session of the House of Commons was foreboding at Toronto recently by the Premier, Right Hon. W. L. Mackenzie King, in the course of an address before the annual meeting of the Provincial Liberal Association, during which he pointed out that the date of the election would depend upon the developments of the 1925 session. If his program were not greatly hampered, then he would be willing to go to the country and ask the endorsement of the people; but if, on the other hand, the Liberal Government were prepared to go through another session and live on its term, the Premier, in a lengthy address before the Liberal Association, covered much the same ground as on the previous evening in March. He said he spent some time in justifying his dickerings with the Progressive Party of the West, which has been responsible for holding him off. He felt that the Liberal Party "is big enough to find room for all classes of people who are opposed to the Conservatives," and the chief of the gathering indicated that his belief was founded upon the popular Premier recognized that at the same time, some division within the ranks of the Liberals, and he threw out the word to the workers to get together and be prepared to get to work at the next election with a united front.

Speaking on the Progressive situation, Hon. Mr. King said: "Tried Hard for Union. "After the last election, we found there were only four Liberals elected West of the Great Lakes. I made it known at that time that I was willing to take into the Government some of those in whom the Progressive Party had confidence, if they were prepared to extend the same confidence in the Liberal administration. At that time they did not accept. Had they done so, I believe we would have to-day the strongest Liberal Party we have ever had; we would have the Tory forces on one side and the forces opposing Toryism on the other, and our victory would be certain."

The Premier went on to declare his confidence in the wisdom of the policy of holding out the friendly hand to the Progressives. He thought that at the next election his party would reap a fine harvest from his dickerings. And, having taken the West into camp in that manner, and having made certain of their support by the holding out of the olive branch to the Western Progressives, his advice was that the Government should be made to work the same thing on the Progressives of Ontario. He thought the Government would be returned, when the time came, but he declared he wanted to make absolutely certain that there would be no slip in the arrangements, and if the Ontario Progressives could be taken into camp, as the Westerners had been, then there would be no doubt of the result. Hon. Mr. King repeated the utterances of the night previous as to the folly of third parties, but at the same time they should not point the finger of scorn at the Progressives merely because they could not agree on all points.

"The time has come," he added, "to welcome them back to Liberal politics, and anyone who reminds them of the past is not playing the game to the best advantage. We have to learn to forgive and to forget, and it may be that we, too, have to be forgiven and forgotten by some."

Forgiveness is Limited. The Premier made it plain that he was perfectly willing to forgive and forget, so far as the Progressives were concerned, but as to the Conservatives, it was a case of battle to the death. He paid his tributes to his Cabinet; he pointed to the "triumph" of West Hastings; he approved the policies of W. E. N. Sinclair, Provincial leader, and repeated much of his earlier address concerning the difficulties of Government "with a majority of one."

Hon. T. A. Low, Minister of Trade and Commerce, asked why the Liberal party had had such a success, and he found the answer in the claim that they had had great leadership. Hon. Mr. King, he assured, was a worthy successor of Sir Wilfrid Laurier. Then he turned to West Hastings, and in searching for an explanation for the result he believed it was mostly due to the work of Hon. Mr. King. There had been many factors in West Hastings, but the greatest was the Premier. Besides, there had been a good Liberal candidate, and there had been organization. That lesson of organization should teach "Tory Toronto."

FRANKFORD

Mr. J. E. Finnigan is attending Grand Lodge of Arch Masons in Toronto this week.

Mrs. W. E. Mills, who has been seriously ill, is improving in health. The young people of the village gave a Dance in the Community Hall on Wednesday night. All report a good time.

A number from here attended the Liberal-Conservative Convention in Belleville this week.

Mr. Earl Bell is in Toronto this week.

The League of the Methodist Church, Frankford, was entertained by the Carmel League on Wednesday night.

GLENFORD REBEKAHS

INSTALL OFFICERS

On Thursday night, January 22nd, Sister Annie Rose, D.D.P., and her installing staff, installed the new officers of the Glenford Rebekah Lodge No. 230, Frankford. As it was only three and a half years since Glenford Lodge has been installed, it has the honour of having the D.D.P. as one of its members, who very ably performed her work.

Following are the new officers for 1925: M.G., Sis. Sarah Smith, S.P.G., Sis. Gertrude Vandervoort; V.G., Sis. Cecelia Smith; Rec. Sec., Sis. Jessie Smith; Fin. Sec., Sis. Ada Hearn; Treas., Sis. Edith Bowman; Warden, Sis. Florence Smith; Con. Sis. Aileen Gunter; Chaplain, Sis. Annie Tripp; R.S.N.G., Sis. Pearl Smith; L.S.N.G., Sis. Almedia Smith; R.S.V.G., Sis. Della Patrick; L.S.V.G., Sis. Evva Ketcheson; I.G., Sis. Bessie Lawrence; and the meeting last night.

After the meeting lunch was served and a social hour spent.

SAVATION ARMY

You are invited to visit our stalls of Sewingwork, Aprons, General Sewing, Cooking, etc. In the evening a musical programme will be given at 8 p.m. Be sure you come.

In the Assize Court.

Prisoner—I thought every man had to be tried by his equals.

Judge—I am your equal.

"Then, why ain't you being tried?"

KING GOVERNMENT'S

IMMIGRATION POLICY FAILS

The much heralded immigration policy of the King Government has fallen down badly during the last year. During the eleven months ending November, 9,046 fewer immigrants entered the country than during the first eleven months of 1923. By the time that the returns for the whole twelve months are in it will be found that the decrease will probably exceed 13,000.

When the Liberals were in Opposition, they made loud complaint over the alleged falling off in immigration. They said that the country could not be expected to develop unless a heavy immigration were secured. They contended that only in this way could the burden of taxation be borne. In short they said: "Put us in office and we will do the immigrants alright. There will be no complaint on that score."

Well, they came into power just three years ago. Has the country received more immigrants? By no means. It has received fewer. During the last three years of the Conservative Government's regime, the total immigration was approximately 356,000, whereas during the three years of the King Government's tenure of office the arrivals have only been 330,000.

Fewer immigrants have been secured and that in spite of a very large increase in immigration expenditure. During the last three years, Parliament has voted for immigration purposes \$11,000,000 as compared with an expenditure of only \$4,713,000 during the last three years that the Conservatives were in office. So there can be no complaint on the ground that the Government has not had the money wherewith to secure immigrants. It has simply fallen down on the job.

The best evidence of this is to be seen in the fact that the Immigration Department announces a new immigration policy every six months. During the earlier months of the year Hon. Mr. Robt. went over to London and made a new arrangement with the British Government that was proclaimed a sure immigration-getter. In the meantime, his Deputy thought he had better go and ground in Europe too, and after he returned home, another new policy was announced.

This means that the public is simply being jollied, nothing more and nothing less. The Government is continually talking of the large number of immigrants that the country is going to get; but the fact is that the country is not getting them. In this respect its policy on immigration agrees with that on conditions generally, for the country is being continually told that prosperity is just around the corner.

Besides, when the immigrants come now they do not stay. The reason is that they cannot find work at remunerative wages. So they pass on to the United States. How can a country expect to find people every year, if it does not look after its home market? A successful immigration policy can be conditioned only on the providing of employment for immigrants.

that a Liberal victory could be seriously enough. "If you want to win seats in Toronto, get together and forget your differences," Hon. Mr. Low made his appeal, "remember that the man who seeks a nomination is the man who gets off to a bad start. Bury your personal feelings, and do not all try to run for Parliament."

GARDENVILLE

Mr. S. Terrill and son spent the week-end at home.

Mr. W. B. Chase, who has been ill for some time, is now on the mend.

Mrs. Russell Young and children are spending a few days with her mother at Belleville.

Sorry to report Master Billy Moynes on the sick list.

Mrs. Mrs. John Dymond of Louisville, N.Y., spent a day in Gardenville with his cousin, Mr. Selim Young.

Mr. H. Alexander and family are able to be out again, after being confined for some time with the grippe.

Mr. and Mrs. John Dymond spent Sunday afternoon with her mother, Mrs. Jane Chase.

Mr. Fred Taylor of Trenton spent Wednesday with her parents, Mr. and Mrs. J. Moynes.

Mr. Fred Taylor has moved on to the Schuler-Humphrey farm.

Mr. Simpson of the Canal has moved into Mr. Carl Taylor's house.

A large number from our vicinity spent Thursday evening at Mr. W. Blakely's, Concession Road.

On Wednesday evening the young people gathered at the home of Mr. and Mrs. Bert Sexsmith and all report a good time.

Master Billy Moynes is on the sick list.

Mr. B. Chase is confined to the house with rheumatism.

The weather here still keeps telling us "Cold, cold." It was down to 26 below zero.

Mr. and Mrs. C. Snider spent this week on the Telephone Road.

Mrs. R. Young spent short time with her parents at Belleville.

Mr. and Mrs. A. Cooper have returned home after spending a week-end in Brighton.

Mr. and Mrs. Ed. Wannamaker of Trenton called on Mrs. T. S. Stapleton on Sunday.

Mrs. R. Bonter has returned home from Trenton.

Mr. Harry Alexander had the misfortune of getting his mail box broken.

A large number gathered at the home of Mr. and Mrs. W. T. Clark recently. A very enjoyable evening was spent.

Mrs. Vanwort of Rednersville has spent a short time with Mr. and Mrs. A. D. Sine.

Mrs. and Mrs. Arnot Young spent Sunday afternoon at Mr. and Mrs. Snider's.

CONSECON

Mr. and Mrs. Cyndy Spencer spent last week with relatives in Rose Hall.

Mr. Collins of Smithfield, spent the week-end with Mr. and Mrs. Ira Parks.

Mr. and Mrs. J. B. Yott entertained a large number of guests at their home last Wednesday evening. Lovely carnations adorned the pretty tables, which a dainty supper was served. After the tea hour, the guests enjoyed the various games and contest. The favors in progressive pedro were won by Mrs. Herring and Mr. Bert Garrett, and in the contest by Mrs. Taylor and Mr. Herring.

Mrs. H. Wolferle is entertaining Miss Gladys Babin from Toronto at the personsage this week.

Miss Marion Bush is visiting her brother, Mr. Ross Bush, and Mrs. Bush at Stockdale.

Miss Neva Carnrike, Trenton, is the guest of Mrs. Burgess Weeks.

Mr. and Mrs. Richard Blakely entertained a number of friends on Friday.

Mrs. Victor Brown, who has been spending the past weeks in Rochester, with her mother, at the home of Mrs. Roscoe, returned home last week.

Mr. S. Forsyth, Jr., spent the past two weeks with Mr. Grant Crosby at Ameliasburg.

Mr. and Mrs. H. Tyler and family, Adams District, spent Sunday with Mrs. James Mass.

Mr. and Mrs. Harry Chase spent Saturday night with Mr. and Mrs. Fred Taylor.

VICTORIA

Mr. and Mrs. J. F. Weese and Beryl were at Mrs. L. Allison's on Sunday.

Miss Geraldine Weese was the hostess of a social evening of the C.G.I.T. at her home on Friday last.

The Ladies' Aid met at the home of Mrs. Geo. Wannamaker on Tuesday.

Mr. and Mrs. Everett Brickman and family were the Sunday guests of Mr. Norman Weese, Trenton.

Mr. and Mrs. Harry Cunningham spent Sunday at his father's, Mr. Fred Cunningham.

Miss Helen Adams spent the week-end with Miss Geraldine Weese.

Alton and Alice McKinley of Pictou are visiting Mrs. Edgar Storm's.

A sleigh-load from the Gore attended the service at Bethel Hall, Belleville, on Sunday evening.

All enjoyed the excellent discourse given by Professor Maines of Albert College, Belleville, at our church on Sunday.

Mr. and Mrs. Lorne Brickman and Andrea, Mr. and Mrs. Henry Montgomery and Mr. and Mrs. M. B. Weese spent the tea hour at Mr. Elwood Spencer's on Tuesday.

Mr. David Calnan is very poorly at the time of writing.

Mrs. Matilda Hubbs is with her daughter, Mrs. Gilford French, Belleville.

WOOLER

Miss Nina Meyers of Trenton is spending a week with Mrs. D. S. Austin.

Mr. and Mrs. W. A. Smith, who have been on an extended trip through the Western Provinces and the States, have returned home.

Mr. and Mrs. A. B. Sharpe were Sunday guests of Mr. and Mrs. S. Sharpe.

Mr. and Mrs. Hugh Gainsforth left on Tuesday for Hallowburton to attend the funeral of the former's uncle, Mr. Wm. Gainsforth.

Mr. and Mrs. Bruce Ellis and Mr. and Mrs. C. F. Weese took dinner Sunday with Mr. and Mrs. L. N. Easterly on Wm. Gainsforth.

Mrs. J. Warren, who has been here since her mother's death, returned to her home at Perth this week.

Mr. and Mrs. Maynard Sharpe entertained a number of friends on Tuesday evening, and Mr. and Mrs. L. evening. Everybody reported a good time at both places.

Ellis left on Wednesday to visit friends and relatives in Toronto.

Mr. and Mrs. Herb Weese spent Sunday with Mr. and Mrs. E. M. Wesels.

Mr. D. S. Austin is attending County Council at Cobourg this week.

A number of cases of mumps have developed in the village and surrounding country this week.

Mrs. E. M. Wesels is spending a few days in Toronto.

CHRISTMAS EXAMINATIONS

WOOLER PUBLIC SCHOOL

"SALADA"

is blended only from tender young leaves & buds that yield richly of their delicious goodness. Try SALADA to-day.

DELICIOUS DRIED FRUIT RECIPES.

It is too bad that dried fruits are neglected. They offer opportunities. Apparently many of us forget that most markets offer dried cherries, figs, pears, apricots, prunes, apples and peaches. Instead of cooking these in the usual uninteresting way, try combining two of them, taking care to wash carefully. Remove the cores and stems and soak at least two hours in warm water.

Apricots and pears, prunes and peaches, apples and cherries, pears and figs or figs and apricots make excellent sauces when cooked slowly with very little sugar. Apricots are so pleasant that they should be used with something or served on cake or as shortcake. They should be left rather tart, as this is their real value.

Open pies made of the mashed and pitted fruit and covered with a meringue make a dessert supreme. Stale slices of cake, softened with the juice and hidden under the chilled fruit, topped with whipped cream, become anything but dried fruit sauce.

The oatmeal or whole wheat cereal will be very interesting to the children who might refuse to eat it, if well cooked prunes, cherries or apricots are added just before serving. They are also good added to cornstarch puddings—well drained, of course, before folding in.

Salads made of peaches, cooked, cooled and drained and their centres filled with cream cheese; prunes stuffed with nuts and chopped fresh apple; figs covered with lemon dressing; cherries drained and marinated in sharp mayonnaise, on beds of lettuce or cream or laid in the hollow of crisp celery—these are both unusual and good to eat.

Try baking any of these dried fruits, covering with an earthen lid, soaked either hot or cold with cream. Add the dried fruits to the weekly list, use them between times, alternating with your own stock of canned things and you will appreciate both of them more besides adding a pleasing variety to the menu that will be reflected in quickened appetites.

HOW TO TEACH A BOY TO EAT.

Tell me how to get my boy to eat things that are really good for him. He hates milk and most vegetables.

L. X.
This was not a serious question in the days when parental discipline insisted that the child eat the food offered or go hungry until willing to yield. Many parents solve this problem by stirring up the child's ambition to be strong and athletic, if a boy, or to be beautiful and of good complexion, if a girl. Then, too, there are ways of making a despised food attractive by special cooking or other preparation. For example, a child who "hates milk" will drink cocoa, eat custard or enjoy a milkshake. Many a child who objects to certain foods will dispose of them if he understands that there will be no dessert until his plate is cleared. Most of these objections to foods can be traced back to the baby days when you made too much of the little one's likes and dislikes.

SUCCESS WITH HER NEEDLE.

A Parisian seamstress, Marcelle Guillon, aged twenty-five and the eldest of the four children of a working-man, has won with her needle the pro-

"DIAMOND DYES"

COLOR THINGS NEW

Beautiful home-dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

"I Hear It Said."

Last night my friend—no says he is my friend—
Came in and questioned me. "I hear it said."
You have done this and that. I come to ask
Are these things true?
A glint was in his eye
Of small distrust. His words were crisp and hot,
He measured me with anger, and flung down
A little heap of facts had come to him.
"I hear it said you have done this and that."

Suppose I have? And are you not my friend?
And are you not my friend enough to say,
"If it were true, there would be reason in it."
And if I cannot know the how and why,
Still I can trust you, waiting for a word.
Or for no word, if no word ever comes!

Is friendship just a thing of afternoons,
Of pleasant one's friend and one's dear self?

No. Friendship is not so. I am my own.

And however near my friend may come to me,
Unto my soul, there is a legend hung
Above a certain strait and narrow way.
Says, "Dear my friend, ye may not enter here!"

I would the time had come—as it has not—
When men shall rise and say, "He is my friend."
He has done this? And what is that to me?

Think you I have a check upon his head?
Or cast a guiding rein across his neck?
I am his friend. And for that cause I walk

Not overclose beside him, leaving still
Space for his silences, and space for mine."
—Barbara Young, in the New York Times.

GREAT INCREASE IN TEA CONSUMPTION

The consumption of tea, it is estimated, increased in 1924 thirty-nine million pounds. The price, as a result, may go to \$1.00 a pound, but even then, tea is the cheapest beverage in the world—aside from water.

Making Most of It.

To make the most of the figure 8 turn it upside down.

Cadet Lucien Hubert has been awarded the Audifred Grand Prix, given by the Academie de Sciences et Morale for the best book of the year in France.

Words! Words!

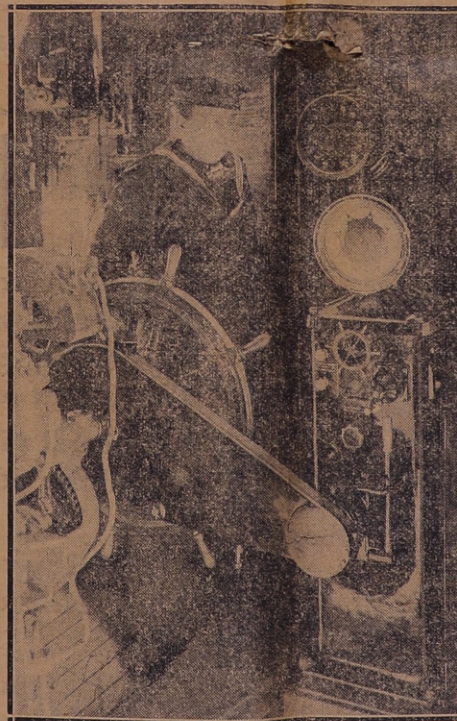

Some very beautiful choral music we heard recently reminded us of a little speech Sir Henry Wood once made to Sheffield chorists. "Now for your greatest fault!" he exclaimed. "Words! Words are your master. When you go and hear a bad comic opera and you listen with rapt attention to the principal comedian, what attracts you? You are able without effort to hear every word he sings. You forget that he has no voice. Now think when you are singing choruses at the next festival what a delight it will be to the public if they hear every word you sing!"

Proved By His Whine. Hubby—"I lead a dog's life I'll say!" Wife—"Everybody knows that by your whine!"

METAL MIKE IS MAN AT WHEEL

THE HELMSMAN WITH HIS MECHANICAL ASSISTANT

"The man at the wheel!" Everyone is familiar with the phrase. A certain romance weaves its spell about the personality of the traditional helmsman;—we picture a giant figure with eyes glued upon the compass card, the light from the binnacle revealing a bearded face and gaunt hands gripping the spokes of the wheel, the only motion a light away to the roll of the vessel and the movement of the wheel as the ship requires helm to keep her upon the set course.

But science has changed all that. In place of our tried and trusted seaman we find a trim, electric instrument, which, while not entirely supplanting him, will do the work under his supervision and that of the Officer of the Watch.

The Officer of the Watch sets the "Gyro-Pilot" upon the given course, and the "Gyro-Pilot" does the rest; the helmsman also receives the course and sees that the Pilot does its duty. Such is the modern day of steering, and it may be considered as ranking among the great inventions of the twentieth century. The principle is not new. For a number of years past torpedoes have been directed to their mark by means of a gyroscope directing the steering gear of this instrument of death. But surely its employment with a view to ensuring the safe and rapid transport of passengers from one continent to another argues that it does not transcend its use in war.

The Canadian Pacific were amongst the first to install the Gyro-Compass on their vessels, and following this progressive policy they were also the first to install the Gyro-Pilot in any ship upon the St. Lawrence route.

Kit Kennedy

BY S. R. CROCKETT.

CHAPTER IX. THE SPOILS OF WAR.

It was ever a great day and bright for Kit Kennedy when Heather Jock came up the loosing to the Black Dornal. It was indeed the one thing which instigated him to keep track of the days of the week. Wednesdays and Saturdays were Jock's statutory festivals, but sometimes he would arrive on another day, mostly, alas! in the gloaming when Kit was going to bed under the determined superintendence of his grandmother, a lady who stood no nonsense on the subject of baths, or apples and the bedclothes—the last mentioned of which had been known to be connived at by the Elder.

But as surely as the Wednesday and Saturday came round, Kit would be found at play on the heights of the Craigs, rolling heathery wildernesses with the most fascinating nooks and corners, hiding-places and rocky watch-towers, that could possibly be imagined by the mind of a boy. Here, with Royal and Tweed, his satellite dogs, Kit kept his vigil, and was always the first to discern, far down the dusty road, the advent of Heather Jock and his donkey. From that point Kit would keep up a procession of wild war whoops, intended to announce that Sir Kit the Kennedy was on the look-out for his enemies, and that whoever attacked his fortress of Craigs Castle did so at his peril.

But secretly and within himself, during all his wild charges and multiplied flourishes of wooden swords and wavings of red petticoat banners, Kit was secretly thinking how he would spend his bi-weekly penny, a life-time's experience of the uselessness of arguing with her husband, she fell back upon her cake-baking, and her proven ability to take it out of Betty Landsborough.

As he overran the possibilities in his mind, the charms of four farthing biscuits were first of all balanced by the superior toothsome of two headed lassie. To this succeeded what might be termed the study of the sea in the shape of gingerbread which was a delectable treat with currant eyes. These last were delightful to pull to pieces, but the extraction of the fruitage (apparently dry fragments of old boots) was a joy fleeting through acute. Again he would call to mind the extended satisfaction of a penny Cairn Edward loaf, a production of human skill which gave as much crust in proportion to its little bread as has ever yet been compassed by merely human bakers.

If Kit were hungry (which happened nine days out of ten), the penny loaf would win the day. But during the season of gooseberries and apples, or when the blackberries were hanging in clusters along the Dornal Bank and down by the Lochie, Kit could afford to treat himself to a daintier gingerbread rabbit or his pennyworth of farthing biscuits which made exactly four bites and no more.

On the morning of this day, the Wednesday after Heather Jock's visit to the house of Kirkswald, Kit Kennedy was early astir. The problem needed more than usually careful consideration. It was true that it was not likely that he would be very hungry. His grandmother, in conjunction with Betty Landsborough her maid, had been meditating the great fortnightly baking of "cake." Now "cake" in Scotland does not mean the stolid overlaid indigestible pudding-stone compound of Christmas England, but the crisp homely farie of thin oatmeal, kneaded and rolled to the thickness of good blotting paper, and thereafter toasted on an iron "gridle" to such a miracle of fresh "crumpiness" that the pen refuses to describe and the mere thought of it secretes appetite.

Now Kit did not steal. Who indeed could be supposed to steal with the approbation and under the instruction of an Elder of the Cameronian Kirk? Sometimes it seemed as if Kit had changed his grandfather's nature. Perhaps the old man felt he must make up to the son for that wherein he had erred in over-severity to the mother. So it chanced that a boy of less than Kit Kennedy's invariably cheerful optimism and sturdy acceptance of the facts of life, would have run a good chance of being spoiled.

But Kit Kennedy was not spoiled. True, he did not steal, but then again he certainly made raids upon the kitchen at intervals. And when his grandmother opened the door of the milk-house, he had even been known to follow close at her back, the soft pads of his bare brown feet making no more sound than a cat's on the stone floor. He would stop when she stopped, to drink when she turned, and finally slip out behind her when like a full-canvassed, deep-carved ship she went about to lock the door. But Kit did not leave the milk-house alone. He brought a pat of butter or a jug of cream with him, still following stealthily in the wake of that stately caravel, Mistress Matthew Armour.

Then, the raid having been successfully carried out, Kit would right gladly repair to the seat, on which under the great beech tree sat the Ruling Elder. Upon this, all unproved, he would deposit his hoard,

and his grandfather, an accessory before the fact, would become still further art and part in the crime by condescending to partake of the spoils of war.

"I wonder ye arena shamed, Matthew Armour, no farther game. Forbye next Sabbath day ye will carry in the communion cups frae the vestry wi' a' the ther elders waldin' shint ye. And yet ye are aye encouragin' that ill-set loon to plunder and torment your ain married wife—the impudent, graceless young rascal that he is!"

"Aweel, aweel, wife," Matthew Armour would say, tolerantly, "I ken that the laddie does me mair guld than I am liky to do him harm."

"Matthew, Matthew," his wife would persist, shaking her head, "mair what ye do. Think, oot o' whatna pit the laddie has been digged. Ye ought to be stricter wi' him than ever ye were wi' your ain, and ye are the verriest verse. The run maunna shine ower warm on him, nor a shadow fa' could on him. He maunna be reproved nor meddled wi' whatever mischief he does. I bid you bethink yersel, Matthew Armour, lest ye reap in heaviness that which ye have sowed so lightly wi' your tongue."

"Margaret," said her husband more seriously, "vince and for a' I have learned my lesson. That boy has showed to me that the worst bairn is better than the best man."

Mistress Armour held up her hands in silent protest against such sentiments. Then, feeling that the matter was far beyond her words, and having a life-time's experience of the uselessness of arguing with her husband, she fell back upon her cake-baking, and her proven ability to take it out of Betty Landsborough.

"Betty," she would cry, as she went into the kitchen, "ye are but a feather-headed lassie. Ye think o' naething but the vain adornment o' your fraill tabernacle, and abins what lads will come up the loasin' courtin' ye this dephane of a snail's pace. Mind ye, there are mair eternal verities to be considered than lads and bonnets wi' gum-floors. And" (in a louder tone, as being more pressing matter for consideration than even the eternal verities) "mind the scones on the girldie. Gin ye frizzle them up into fair sole leather, I declare to peace that I will gie ye a daub on the side o' the head that will pit ye by looking at a lad till September fair. Noo, ye hear me, Betty Landsborough."

Then Mistress Armour, active as at twenty in spite of her sixty-five years, would whisk about quickly with a sense of some unseen presence behind her. Sometimes she would catch a glimpse of a snail's pace, a pair of knickerbockers with a couple of ravished cakes of oatmeal in his hand, making desperate attempts to keep directly behind her, so as to be out of her line of vision, or alternately, to reach the outer door before she could take in the situation and rally her forces.

"O ye blastie!" she would cry, "ye are a' again. And me no done speakin' to your grandfather about your ongan'kin! Think shame! I'll gar ye sup sorrow for this. Gin I was known to be meditating the great fortnightly baking of "cake." Now "cake" in Scotland does not mean the stolid overlaid indigestible pudding-stone compound of Christmas England, but the crisp homely farie of thin oatmeal, kneaded and rolled to the thickness of good blotting paper, and thereafter toasted on an iron "gridle" to such a miracle of fresh "crumpiness" that the pen refuses to describe and the mere thought of it secretes appetite.

Now Kit did not steal. Who indeed could be supposed to steal with the approbation and under the instruction of an Elder of the Cameronian Kirk? Sometimes it seemed as if Kit had changed his grandfather's nature. Perhaps the old man felt he must make up to the son for that wherein he had erred in over-severity to the mother. So it chanced that a boy of less than Kit Kennedy's invariably cheerful optimism and sturdy acceptance of the facts of life, would have run a good chance of being spoiled.

But Kit Kennedy was not spoiled. True, he did not steal, but then again he certainly made raids upon the kitchen at intervals. And when his grandmother opened the door of the milk-house, he had even been known to follow close at her back, the soft pads of his bare brown feet making no more sound than a cat's on the stone floor. He would stop when she stopped, to drink when she turned, and finally slip out behind her when like a full-canvassed, deep-carved ship she went about to lock the door. But Kit did not leave the milk-house alone. He brought a pat of butter or a jug of cream with him, still following stealthily in the wake of that stately caravel, Mistress Matthew Armour.

Then, the raid having been successfully carried out, Kit would right gladly repair to the seat, on which under the great beech tree sat the Ruling Elder. Upon this, all unproved, he would deposit his hoard,

Canada's Dairying Industry.
Question—What is the extent of Canada's dairying industry?

Answer—Canada's dairying industry is one of the oldest and now one of the most important in Canada, with a production value in 1923 of \$288,689,885. Nearly one-half of this was the production of 3,000 dairy factories; \$22,000,000 from dairy butter and \$82,000,000 the value of milk used. Over 2,000,000 cows supplied the milk to the factories.

Investments in Canada.
Question—What is the extent of investments in Canada?

Answer—It is estimated that United States investments in Canada total \$2,425,000,000 and Great Britain \$1,890,000,000 or a total of \$4,315,000,000.

Point in Canada Nearest to the British Isles.
Question—What part of Canada is nearest to the British Isles?

Answer—Cape Breton, in the vicinity of Glace Bay, is the nearest point in Canada to England, and Nova Scotia Bay is the nearest part of the British Isles, the distance to Liverpool or Glasgow is less than one-half of that from Plymouth to Cape Town, and one-fifth of the voyage to Australasia or New Zealand.

Canada as a Gold Country.
Question—Where does Canada rank as a gold country?

Answer—Canada is rapidly rising in importance as a gold-producing country. The production of 1923 reached \$25,702,139 of which Ontario produced over \$20,000,000. The output in 1924 will be much greater with increased waterpower in Northern Ontario.

Canada's Oldest Settlement.
Question—Which and where is Canada's oldest settlement?

Answer—Annapolis Royal is the oldest settlement north of Florida, having been founded by Champlain in 1604. It was finally captured by New Englanders in 1710 when it was renamed for Queen Anne as Annapolis Royal.

Alberta's Progress.
Question—What is the progress of the Province of Alberta?

Answer—Although it is only thirteen years ago that Alberta became a Province, its population has increased fourfold, while the grain yield has increased twenty-fold. The total agricultural products of Alberta in 1923 were worth \$223,000,000. The increased yield of wheat in 1924 with the highest prices will markedly increase the field crop production of that year.

Trade in Horses.
Question—What is the trade in horses in Canada?

Answer—In spite of rather quiet markets, a surprising number of horses has been shipped from the three Prairie Provinces to Eastern Canada. During 1923, 10,000 were shipped from the west to the east, and during the four months of 1924 shipment aggregated 4600.

HELP TO SHOULDER DEFENCE OF EMPIRE

Sir George Foster Urges It Is
Duty of the Dominion—
Should Bear Burdens as
Well as Seek for
Privileges.

Sir George Foster addressed the Trenton Canadian Club last week, also the Empire Club of Toronto, on different subjects.

Urging that the British Empire should speak with a united dynamic voice when it faced the nations of the world, Sir George Foster, addressing the Empire Club on "The Ties of Empire," declared that it was not practical for each dominion to have a separate voice, which, he said, would be fruitful of dissension. "We claim certain rights, let us assume some of the duties that go with them," said Sir George. "I am ashamed every time I meet people in the old country and the conversation turns on the defence of the Empire for up to the present Canada has hardly lifted a finger in this direction. The ocean pathways of the world are kept open and free for every citizen of the Empire, and it is the British taxpayer, taxed as no other taxpayer in the world, who bears the burden, standing erect, pursuing the same course of character and independence, paying every last cent and doling out when it becomes due. It is the British taxpayer who keeps open the sea routes so that our millions of bushels of grain may go to Europe, and what we need is a measuring up to our duties as burden bearers as well as privilege seekers."

Outlining the changes in the ties of Empire during the past sixty years, Sir George, who spoke with undiminished eloquence and vigor at his seventy-seven years, said that these ties had in some respects become considerably loosened, but there were two which still remained strong. There was first the Privy Council, to which the meanest citizen of the Empire might apply for justice. There were some who criticized the Privy Council and thought that this tie should be entirely cut. He did not agree with them. Although criticism might be directed to the personnel of the council, the second tie was the Sovereign, and Sir George said that the universal esteem in which the throne was now held throughout the Empire and the situation that would arise if the monarch of a party were to take the place of a king.

Dwelling on the rapid development of means of inter-communication as helping to bind the Empire closer together, Sir George said that he was recently speaking in the Cecil Hotel, London, and mentioned that it would not be long before statesmen in different parts of the Empire would not only be able to speak to each other over a distance of thousands of miles, but would be able to see each other as they did so. At the conclusion of the speech a man got up and said that if he wished he could supply an illustration there and then. Sir George had been referring to the fact that he went into a room at the top of the hotel, and there they saw the picture of President Coolidge in Chicago, with every gesture indicated as he was delivering a speech, which they could also hear. In two or three years' time, Sir George thought, Ottawa would only be two or three days' journey from London by airship.

In concluding, Sir George said that the British Empire in prestige and power was first among the nations of the world. Britain was the predominant partner, and for the dominions, which did not bear the cost of Empire defence, to say to her, "Don't make any move until you get our permission," was unpractical and unreasonable, and would not get them anywhere. Looking ahead for a hundred years, Sir George saw Canada with a population of 75 millions, Australia with 50 millions, South Africa with 30 millions and New Zealand with 5 millions of inhabitants. He appealed to his hearers to send forward the estate better as it left their hands and passed to the coming generation. A hearty vote of thanks was accorded the speaker, on the motion of Sir William Hearst.

THREE OPPORTUNITIES TO WIN \$1,000

How Many Objects in This Picture Start With the Letter "P"?

The above picture contains a number of objects beginning with the letter "P." Just take a good look at the picture—there are all sorts of things that begin with the letter "P"—"puppy," "pumpkin," "paddle," "purse," etc. Nothing is hidden; you don't have to turn the picture upside down. Make a list of all the objects in the picture the names of which begin with the letter "P." Have the whole family join in—see who can find the most. Don't miss any. Fifty cash prizes will be awarded for the fifty best lists of words submitted. The answer having the largest and nearest correct list of best, second prize, etc.

Young and Old Join in the Fun

The Mail and Empire announces to-day another puzzle game in which all can participate—from the tiniest child to grandfather and grandmother. No object is so small but that the poorest eyesight can see it. It is a test of skill. Your ability to find "P" words determines the prize you win. Right after supper this evening, gather all the members of your family together; give each of them a pencil and sheet of paper—and see who can find the most "P-words." You will be surprised to find how large a list of words you can get with a few minutes' study. Sit down NOW and try it!—Then send in your list and try for the big prizes.

Observe These Rules

1. Any man, woman or child who lives in Canada, and is not a resident of Toronto, and who is not the employee of The Mail and Empire, or a member of an employer's family, may submit an answer.
2. All answers must be mailed by February 27, 1925, and addressed to C. A. Montgomery, Puzzle Manager, Mail and Empire.
3. All lists of names should be written on one side of the paper only, and numbered consecutively 1, 2, 3, etc. Write your full name and address in the upper right hand corner. If you desire to write and bring also use a separate sheet.
4. Only such words as appear in the English Dictionary will be counted. Do not use obsolete words. Where the plural is used, the singular cannot be counted, and vice versa.
5. Words of the same spelling can be used only once, even though they designate different objects, articles, or parts of objects or articles. An object or article can be named only once.
6. Do not use hyphenated or compound words, or any words formed by the combination of two or more complete words, where each word is itself an object.
7. The answer having the largest and nearest correct list of names of visible objects and articles shown in the picture that begin with the letter "P" will be awarded First Prize, etc. Neatness, style or handwriting have no bearing upon deciding the winners.
8. Any number of people may co-operate in answering the puzzle, but only one prize will be awarded to any one household; nor will prizes be awarded to more than one of any group where two or more have worked together.
9. In the event of a tie for any prize offered, the full amount of such prize will be awarded to each tied participant.
10. Subscriptions (both new and renewal), payable in advance at \$5.00 per year by mail in Canada, or \$6.00 per year delivered by carrier boy in Hamilton, will be accepted. However, in qualifying for the \$1,000 Bonus Rewards, at least one new subscription must be sent in.
11. A new subscriber is anyone who has not been receiving The Mail and Empire since January 1914.
12. All answers will receive the same consideration. The Mail and Empire is sent in.
13. All new subscriptions will be carefully verified by the Puzzle Manager. Candidates making old subscriptions as new will positively forfeit the credit of such subscriptions as qualifying for the Maximum Bonus Rewards.
14. Three prominent Toronto citizens, having no connection with The Mail and Empire, will be selected to act as judges to decide the winners, and to select participants by sending in their lists to accept the decision of the judges as final and conclusive.
15. The judges will meet on February 19th, and the announcement of the Prize Winners will be made in The Mail and Empire as quickly thereafter as possible.

EXTRA LARGE PICTURE SENT FREE ON REQUEST.

Subscription Rates—Payable in advance. THE MAIL AND EMPIRE anywhere in Canada by Mail \$5.00 Per Year. Delivered by Carrier Boy in Hamilton or London, \$6 Per Year.

Rural Route Subscribers
This offer applies to Rural Route patrons, as well as subscribers living in cities and towns. If you are already receiving The Mail and Empire, your subscription will be extended from its present expiration. Send in a yearly subscription at \$5.00 and qualify for the big prizes.

C. A. Montgomery,
Puzzle Manager,

WHERE DOES BRITAIN COME IN

Writer in English Paper Makes
Plea for Fair Play—Why
Cost of Living is so High
in England—Relations
With Other Nations
Discussed.

(By Sir John Foster Fraser in the
English Sunday Herald, December
14, 1924.)

The state of Europe is by no means
so placid as we would desire at this
time of the year, when we are all turn-
ing up to try for peace on earth and
good-will toward all men.

It is notorious that the smaller
nationalities, which were provided with
self-determination five years ago, are
thinking more of conflict with neigh-
bours than of internal domestic de-
velopment, and are arming.

An immediate concern of ours is
that Germany has suddenly refused to
comply with the disarmament provis-
ions of the Treaty of Versailles, and
is, at this moment, re-organizing her
army and busily engaged in the man-
ufacture of munitions.

Germany at long last and under
pressure undertook to provide finan-
cial reparations for war devastation,
and we promised to cease our military
occupation of Cologne in about three
weeks' time. In view, however, of
what is going on, it is likely that
the Conference of Ambassadors will de-
cide that we remain on the banks of
the Rhine until Germany gives some
real evidence that she is complying
with her obligations.

Every sane man would like to see
a friendly policy of disarmament
among the European Powers. But it
is a good our diplomats even talk-
ing about that so long as Germany
by her conduct is provoking other
countries to increase their arma-
ments.

Though our French friends are of-
ten inclined to be critical about what
we propose, unless it is to the direct
advantage of France, Mr. Austen
Chamberlain, as Foreign Minister, is,
like the rest of us, warmly sympathet-
ic towards the real interests of
France.

An impression has arisen in Paris,
since Mr. Chamberlain recently had
conversation with M. Herriot, that
Britain is willing to enter into a
British-Belgian-French pact, very
much on the same understanding
which existed in pre-war days. Whether
that is so I do not know, but, if
true, it is a generous proposal, and
a long way in advance of the attitude
we took up a few years back of guar-
anteeing the sovereignty of France
if the United States—which has con-
stantly protested its growing dis-
affection for France—would be one of
the parties, but declining to be the sole
guarantor, as the United States did
not see its way to get committed to
what George Washington would call
"a European entanglement."

It is assumed in Paris that Mr.
Chamberlain did offer a pact in the
interests of France and Belgium. The
proposal, however, has not been fav-
ourably received. It is a pity that
France would have to break her alliances
with Poland and the Little Entente
Powers.

France is always living in dread of
a war of revenge on the part of Ger-
many—that is why the news of in-
creased German armaments is so im-
portant—and if there was a conflict
it would be useful to have Poland,
which to-day is well armed, making
a diversion to the north of Germany.
France also has agreements with the

Czechs and Rumanians, who would
stand in the way of Russia—for there
is a fear that if Germany moved it
would be in conjunction with Russia.
It is not difficult to understand the
French mind and the precautions
taken, so that if Germany means mis-
chief she will have to reckon with
other countries besides France. But
while Britain is now, and will always
be, ready to help France, public opin-
ion in this country is not so favour-
able in its undertaking great responsi-
bilities in the further parts of Europe.
We already have too many expen-
sive responsibilities, and the duty of
our new Government is to decrease
and not augment them.

That brings me right up against
the question which is legitimately agi-
tating the public mind—the heavy bur-
den of taxation and the repayment of
inter-Ally debts.

We are the most excessively taxed
nation in the world. These taxes
hamper industrial development and
directly account for a good deal
of the high cost of living which is
worrying us. Per head of the popu-
lation our annual taxation is to-day
£17 11s., that of France is £9 12s., and
that of the United States a good deal
lower.

During the war we lent our Allies
£2,000,000,000, of which we have not
received a penny in return, capital or
interest, and £1,000,000,000 of this
sum we borrowed from the United
States, which we are now paying
back, with interest, the whole costing
us £130,000,000 a year.

That is a payment made not on our
own account, but on account of our
Allies, and it represents 2s. in the £
to-day is therefore 4s. 6d. instead of
2s. 6d., because the Americans ac-
cepted our credit as good when they
were doubtful about that of our gal-
lant Allies.

I have never joined those who urged
that we should not pay the United
States except when our Allies paid.
We undertook the responsibility to
pay back that £1,000,000,000 with
interest, at the gold dollar rate and
not sterling, and it was not for us to
cavil, but just grin and bear it, and
hand the money out when the busi-
ness-like American people began to
clamour, "When are you going to pay
us back that money we lent you?"

It was a fine and even a noble ges-
ture on the part of Lord Balfour that
all war debts between the Allies
should be wiped out, especially when
we were owed more than twice as
much as we owed ourselves. It was
thought the Americans, having suf-
fered in blood so triflingly compared
with the Allies, would welcome the
opportunity of cancelling the loans.
But Americans were strictly within
their rights in insisting that a loan is
a business affair and insisting on be-
ing paid. The insistence, however
was upon us, and not upon France or
Italy.

Now France is in a satisfactory fi-
nancial position, with comparatively
little unemployment, and her next
Budget will show a surplus and not
a deficit.
The United States, with a century-old
affection for France, did not press
the repayment of the direct loan to
her, amounting to £686,000,000, or
suggest that taxation might be levied
on the French people, as it has been
levied on the British people, in order
that it be raised. There was a curi-
ous and patient waiting for the time
when France reached prosperity.
Now the intimation has been made
that France starts repaying her debts
with interest.

That is straightforward and in ac-
cordance with American business
practice. What has, however, occa-
sioned no little surprise on this side
of the Atlantic is that the United States
Government does not intend to impose
such stiff terms on the French as it
does on us; that, indeed, it is going
to make payment easier and with a
lower rate of interest.

I know the United States too well
and have too great an appreciation
of the American people to believe,
without reluctance, that in repayment
of war debts there is going to be a
discrimination to our disadvantage,
especially as the debt we incurred
was not for us, but mainly for the
benefit of France.

If France has reached so satisfac-
tory a financial position that she can
start repaying the £686,000,000 due
directly to America, it is obvious she
should also start repaying the £693,
000,000 which she owes to us. I trust
there is no foundation for the sus-
picion prevalent in certain quarters
that France is willing to repay the
United States, but has no intention to
repay Great Britain.

Because we know that France bore
the main stress of the war, has passed
through much travail and is con-
sumed with anxiety about the future,
Britain has never, so far, embarrassed
her even by a hint that we expect her
to pay up. Nobody, therefore, can
assert that there is anything unrea-
sonable in our attitude that, as France
thinks itself capable of repaying the
United States, it should, in propor-
tion, start paying what is due to us.
It would contribute something toward
reducing the high taxation with
which we are weighed.

In time, no doubt, the United States
will invite Italy to begin returning
the loaned £100,000,000. If Italy is
able to comply we shall expect Italy
also to begin repaying us the £553,
000,000 we lent her.

We are the only nation in the world
paying our war debts. We will con-
tinue doing so, no matter how it hurts
in raising the money. We have no
wish to take money from either
France or Italy, even by way of in-
terest, to put into our own pockets.
Although our Allies owe us so much,
Lord Balfour three years ago stated
explicitly, and I am glad it is the
policy of the present Government, that
we are not going to ask them to pay
all their debts to us, with interest on
a sterling basis, but only so much,
and no more, as the United States
finds it necessary to receive from us.
We are closing our eyes to a patent
fact if we fail to realize that the de-
cision of the Government to get on
with the construction of the Singa-
pore dockyard—turned down by the
Ramsay MacDonald Cabinet—is not
regarded in a friendly spirit by Japan.

That we are perfectly within our
rights in building the dockyard is un-
disputed. But there is a deal of danger-
ous electricity in the air.

Agent, Town Agent.

Waiting.

A man walking along a country

road found an Irishman perched upon

a sign-post which pointed north, with

this inscription, "To Malvern."

"What are you up there for?"

"Faith," said the other, "I have

been sitting here for two hours, and

I am wondering what time it starts."

A Woman's "In a Minute."

Tom—Why does a woman always

keep a man waiting so long after she

says she'll be ready in a minute?

Tim—Because she picks out a mi-
nute which is half an hour away.

disputed. But for what reason are

we about to build? Let us admit that

it is a case of defence, not defiance,

but a defence in case we unfortun-
ately had any trouble in the East.

New Zealand and Australia are en-
thusiastically in favour of the Singa-
pore station, especially Australia. It

is reported that it will probably cost

£300,000,000. Should the main charge

fall upon the taxpayers of Britain?

New Zealand is willing to contri-
bute £100,000 which is not a deal, but

useful. Australia promises to make

a "substantial contribution," but that

is not definite.

There is no more vigorous country

within the Empire than Australia.

The Australians themselves know

that in forming their Commonwealth

equality had to be given be-
tween the States, notwithstanding

disparity of population and wealth.

In Imperial affairs Australia claims

to be co-equal in decision with the

Mother Country itself. That, accord-
ing to those of us who believe we have

an Imperial vision and rank the coun-
tries of the Empire as equal nations,

is quite right.

That being so, is one thinking too

strictly in economics in suggesting

that Australians should bear an equal

share with the people of Britain in

the cost of construction? Or, if they

object to that, what do they say about

contributing the same per capita that

people in England will be called upon

to pay, especially as the Australians

will be the main beneficiaries.

I am sure, conscious of their

strength and well-being, they would

not like to throw nine-tenths of the

cost upon the folk at home.

Our Admiralty admits that it will

take from eight to nine years to make

an effective naval base at Singapore.

At the time the Washington agree-
ment on the restriction of armaments
will have expired, and, unless a fresh
arrangement is made, there will be
no restraint in armaments.

Who can foretell what is going to
happen here nine years hence? Have
eyes are constantly switched
in the direction of the League of Na-
tions, and the question is raised, What
can it do to preserve peace on earth
and good-will among men. But, although
it cannot do much, I am entirely at
variance with those who declare that
it is useless, a mere gathering of sen-
timental doctrines, and the sooner
it is scrapped the better.

I hold firmly to the view that, with
all its foibles and faults, it is a genu-
ine start along the road which man-
kind must travel unless we are going
to lose faith in the ultimate righting
of things. It has many shortcomings,
but so have had many things which
have ultimately been advantageous to
mankind.

Yes, his Majesty's "relations with
foreign Powers continue to be friend-
ly," but there is a deal of dangerous
electricity in the air.

WHO SAYS "OH, WHAT'S THE USE?"

(Pensacola Journal)

A young man ran for the Legis-

lature of Illinois and was badly

defeated.

He next entered business, failed

and spent seventeen years of his life

paying up debts of a worthless part-

ner.

He was in love with a beautiful

young woman, to whom he became en-

gaged—then she died.

Enterprising politics again, he ran for

Congress and was badly defeated.

He then tried to get an appointment

to the United States land office, but

failed.

Then he became a candidate for the

Vice-Presidency of the United States

and was once more defeated.

One bad failure after another—

and failures—great setbacks.

Then he became one of the greatest

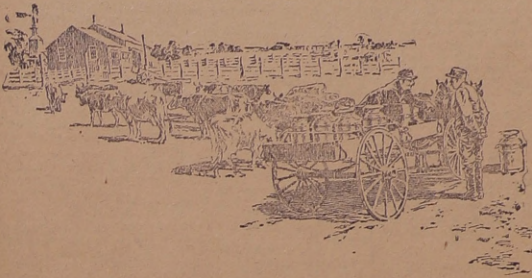

men of America—Abraham Lincoln.

Who says, "Oh, What's the Use?"

"GOLD MEDAL"
A perfect pastry flour
made to a standard

THERE'S something about the
choice of a really superior flour
that makes a great difference in
successful pies and pastry.

That's why "Gold Medal" Flour
has been chosen by such a large per-
centage of successful pastry cooks.
They know quality—nothing but the
best will do.

For "Gold Medal" Flour is made
to a standard—just as the cakes and
pies you bake are made from recipes.

The standard for "Gold Medal"
Flour has long been tested in the
kitchens of the most successful
cooks and in the bakeries of good
bakers. They have all found it so
dependably good that they recognize
it as the standard of quality and uni-
formity—always to be relied upon
for the same good results.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario.

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

A correspondent inquires about asthma. She says she has been troubled with it for twenty years and has tried all kinds of treatments, including patent medicines.

The great trouble in advising treatment for asthma is that it is not one disease, but several. Because one man is benefited by a certain line of treatment, it does not follow that the treatment will apply to every individual. The proper plan is to make a careful study of each case, and have it made before the disease has progressed too far. Consequently, there is no one treatment that applies to all cases. What helps one asthmatic is of no service to the next. For instance, by having his nose treated, one man will find great relief, another receives no benefit from nose treatment, but gets relief by going to a dry climate, where the throat and chest secretions dry up. Again, there is a class of people who benefit greatly by changing to a vegetarian diet, leaving out meats, milk, eggs and similar articles of diet which are rich in amino-acids. Some authorities hold the opinion that asthma is associated with fermentation of the stomach with the resulting irritation and perhaps inflammation. It would thus appear that the eating of certain foods and certain combinations of food might have a very decided effect in increasing or decreasing the symptoms of asthma. For instance, the eating of starches and sugars in excessive amounts tends to produce fermentation in the stomach and intestines, and it is not by any means probable that the irritation caused by the fermentation of the stomach might extend to the lining mucous membrane of the lungs.

In all asthmatic conditions, therefore, it would be wise to omit from the diet all pies and pastry, sugars and starchy foods, including bread. So it would seem that first and foremost the thing to do in trying to effect a cure for asthma, or at least bring about relief from it, is to try and get at the root cause. Why did the asthma start in the first place? What were the conditions associated with its appearance. Had the patient a persistent cough with loss of weight for some time previous to the onset of the asthmatic condition? This is important to know because many cases of bronchial asthma are in reality consumption. Some cases are due to heart disease, some to Bright's disease, some to growths in the nose. What must be done is to find out if there is a curable cause and then to cure it. Cases of asthma which have no apparent cause are about as hard to treat as any disease that affects mankind.

Climate seems to help more cases than anything else, but even this fails sometimes and only palliative treatment can be resorted to. The so-called asthma cures seldom do good, and if taken indiscriminately may do harm. Some often lead to drug habits.

Borrowed Plumes.

Who was a gentle mother
Who labored to make a home,
And then she lay down contented
Till all her dear babes had come.
And, when by her side they nestled,
So helpless and weak and small,
The world was enriched by a matchless love—
A love that surpasses all.

He was a radiant sonneteer,
He jeweled the dark old tree;
He sang to his mate in rapture
A song of the gay and free;
No cloud marred his life's horizon,
He knew neither fear nor pain,
But only that day chafes at night
And that sunshine succeeds to rain.

She is a dainty lady,
In satin and rare old lace,
But her beautiful form and features
But mirror her soul's disgrace,
For over her fair white shoulders
In hanging the mother's hair,
And the bright glossy wing in her
burnished hair,
Was torn from the singer's side.
—Geraldine E. Lyster.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system, his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

When Deep Sea Denizens Take Forty Winks.

Having no eyelids, fish do not appear to sleep. That they rest as regularly as human beings was the opinion of Aristotle over two thousand years ago, and recent observations have confirmed his view.

Among marine fish, the wrasse, conger eel, dory, dogfish, bass, and all fish sleep periodically resting usually at the bottom of the sea.

Being exceedingly light sleepers, it is difficult to observe the nocturnal habits of fish in aquariums, for the slightest increase in light arouses them. The salt-water blackfish, or tautog, is an exception. Lying on its side with its mouth open, the tautog is an exceedingly sound sleeper. As it settles down to slumber faint stripes and spots of black appear all over its body, which give the impression that it has changed its clothes.

Changing Their Color.

More noticeable still are the variations in color of the common sculpin or muskellunge when these fishes take a surprisingly short time to don a nightdress. Clothed in silvery grey when awake, the fish descends among the seaweeds when drowsiness comes. Stripes of darker grey or brown appear almost immediately, and very soon it is not easy to distinguish the sluggard from its surroundings.

As a quick-change artist, however, the muskellunge has few equals. Swimming about in the tropical waters, the parrot fish is a clear turquoise green during the daytime. Finding a quiet nook among the stones and weeds, its color fades to a dull olive. Further changes go on whilst it sleeps. Numerous reddish brown spots appear on its body.

Placed in an aquarium having a plain glass bottom, the parrot fish retains its coat of green and does not put on night clothes. But if a few large stones are dropped into the aquarium, corresponding blotches appear on the sleeping fish.

Is This Your Hobby, Collecting Music?

How is it that more people do not take up as a hobby the collecting of music? Many people collect books, pictures, and stamps, with a view to retaining these against all time. Not many do this with music. Why not start collecting classical music, songs of good quality, and dance pieces—both old and new publications, and also old scores?

Think how interesting to present-day dance lovers would be a series of bound volumes of the dance music since 1900 to the present day. The idea could be carried further and periods could be particularized in when dances are held. As an example, what could be called "the 1906 dance" could be given, when every item should consist of dance music in 1906. Then again think how useful such collections of music would be to our children and their children. Standard pieces of music such as we all as children have to learn, would always be in the music cabinet. Pamela could see when she was learning a Grieg sonata just where her mother had difficulty by the marking on the page. Such collections of music would be exceedingly valuable—as valuable as any library.

Cotton materials with the appearance and feel of wool are being made in Germany. They take dye well, and are already popular with women for sports clothing.

For Every Ill—Minard's Liniment.

BREATHLESS LANGUID GIRLS MADE STRONG BY Dr. Williams' Pink Pills

They Give New Vitality—and more

When girls become breathless, languid and pale, parents should take prompt steps, for delay means danger. The girl in her "teens" cannot develop into robust, happy womanhood without abundant, rich red blood in her veins, and it is the lack of this that is the great trouble with most girls. They grow anemic, depressed and weak, with no appetite, and no interest in life.

Every anemic girl who is struggling to womanhood in a poor state of health, can find splendid, vigorous health, with glowing cheeks and sparkling eyes, in Dr. Williams' Pink Pills. For these pills not only increase the supply of rich, red blood, they create appetite, relieve the weary back and limbs, restore full womanly health and charm, and so transform pale, anemic girls into robust, happy women.

So if you are anemic, let Dr. Williams' Pink Pills help you as they did Miss Clara Chosier, High Falls, Que., who says:—"Before I took Dr. Williams' Pink Pills I was pale, bloodless and badly run down. The least exertion would tire me and my appetite was feeble. A short treatment with Dr. Williams' Pink Pills has changed all this and I am now enjoying the best of health, for which you have my sincere thanks."

EASY TRICKS

A Circus Trick

FIG 1

FIG 2

This is an old time circus trick which, in other days, was performed in front of the side-show as a sample of the wonders to be seen within. The performer took two pieces of tape and tied them around his neck. After a long, but shockingly incorrect explanation of "how it was done," he pulled the tapes and they seemingly passed through his neck.

The two tapes were doubled and the centers tied together by a frail piece of thread (Fig. 1). The performer held his hand over the point where the tapes were tied together and the tapes appeared to be side by side and without preparation. When he put the tapes around his neck, his collar hid the junction of the tapes or he carefully kept his face to the spectators. Tying the ends A and C he tied them together close to his neck. The ends B and D were tied close to his neck, also. When he grasped the tape and gave them a vigorous pull, the thread broke and the tape came away. Because of the method of tying, the appearance of the tape was then exactly as if it had been around his neck.

(Clip this out and paste it, with other of the series, in a scrapbook.)

Wireless Wrinkles.

Women are in fear of developing "wireless wrinkles."

Concentration night after night by the bedside listening closely to the sounds coming from the loud speaker or sitting with earphones jammed against the ears is likely to give women a "radio" face.

The strain of trying to catch every word of wireless broadcast constantly puckers the lines around the woman's forehead and draws more lines around the sides of the mouth.

Women who have been untiring listeners for months are beginning to notice that where their faces have hitherto been absolutely smooth and unwrinkled, a faint network of lines is beginning to appear. Their habitual expressions, instead of being alert and intelligent, have become mechanical and placid.

Length of Rope.

Willie—"Pa sent me for a piece of rope like this."

Shoppman—"How much does he want?"

"Just enough to reach from the goat to the fence."

Care of Battery.

Never allow the solution in your storage battery to get below the level of the plates. Inspect the battery frequently and add chemically pure water. This water may be obtained at a drug store and is known as distilled water. Some fans may be in a position to do the job themselves.

Pay your out-of-town accounts by Dominion Express Money Orders.

Foot Rests for Plowman.

A German inventor has designed a small portable plow which is worked with foot rests upon which the farmer stands.

For First Aid—Minard's Liniment.

Speaking of Birds.

Visitor—"I notice a sign outside that says you want a man to retail imported canaries."

Manager—"Yes, are you looking for the job?"

Visitor—"No, I just wanted to know how the canaries lost their tails."

Tortoise ranging in size from less than 1 in. wide to 2½ feet in diameter are to be bought in London.

MORE THAN 55,000 FARMERS

have bought their farms in Western Canada from the Canadian Pacific. A remarkable fact. Think! There is a reason. The large area of our holdings affording choice of location and land to suit every farming need. Fair price, fair contract, and fair dealing combined with abundant fertility of soil, good climate and social conditions make farm life there desirable and attractive. Thousands more will select their farm from our virgin lands, from our improved farms, and with some capital and determination to work, can make a home and pay for it. Write for our booklet, "The Prairie Provinces of Canada" and leaflet, "Western Canada Forges Ahead." C. L. Norwood, Land Agent, Canadian Pacific Railway, Desk W., Windsor Station, Montreal, Que.

Best For Coughs and Colds

Minard's gives quick relief for coughs and colds, grippe, influenza, etc. Madame E. Edmond Potras, of Faubourg, St. Jean Bte, Quebec, is only one of hundreds who highly recommend it. She writes as follows:

"After having tried several syrups and rubbing lotions for cough I consider that Minard's alone gives satisfaction. I also value it for wars, which I have quickly removed with Minard's."

MINARD'S LINIMENT

Abundant Hair Cared For By Cuticura

Shampoos with Cuticura Soap, preceded by light applications of Cuticura Ointment to the scalp skin, do much to cleanse the scalp of dandruff, allay itching and irritation, stimulate the circulation and promote the healthy condition necessary to produce a luxuriant growth of hair.

Sample Sent Free by Mail. Address Canadian Depot, "Cuticura," P. O. Box 516, Montreal. Price, Soap, One Shilling; Ointment, 2 Shillings. Try our new Shaving Stick.

A WOMAN'S SUFFERING

Relieved by Lydia E. Pinkham's Vegetable Compound

"Verdun, Montreal, Quebec.—"I am one of thousands who have taken Lydia E. Pinkham's Vegetable Compound and I have great faith in it. I can safely say it has relieved my troubles and I shall never be without a bottle of it in my home. Since my last baby was born I suffered from pains and backache and would feel so tired I could not do anything in my home. Since I have been taking the Vegetable Compound I feel so different. I recommend it to all my friends and hope it will cure other women who are suffering from the troubles I had."—Mrs. THOS. H. GARDNER, 821 Evelyn Street, Verdun, Montreal, Quebec.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for the new mother. It is prepared from roots and herbs, contains no harmful drugs and can be taken by the nursing mother. Its worth in restoring the mother to normal health and strength is told again and again in just such letters as Mrs. Gardner writes.

A recent canvass of women users of the Vegetable Compound shows that 98 out of every 100 women taking the medicine are benefited by it. They write and tell us. See evidence on bottles as to call it a dependable medicine for women. It is for sale by druggists everywhere.

FREE - A Farm Library

Many a time one would give much to be able to lay his hands on directions for preparing a spraying mixture, a ration for laying hens or for doing a hundred and one other kinds of work about which he has read. A proper system of preserving and filing pamphlets would meet such a need at all times. Such a system has been devised by the Department of Agriculture at Ottawa. It is fully explained in "THE PUBLICATIONS INDEX BOOK" in which the pamphlets of the Department

and other documents may be recorded in classified fashion. To receive the INDEX BOOK and a LIST OF FREE PAMPHLETS on all farming topics, fill in this slip and return it post free to:

SALVATION ARMY LEADERS VISIT TRENTON

Commissioner and Mrs. Charles Sowton, Territorial Commanders of the Salvation Army in Canada East, with Colonel Abdy, Brigadier Walker and Staff Captain Owen of Montreal, visited Trenton in the interest of Army work and its building scheme.

At night a public meeting was held in the Kings Street Methodist Church, which was fairly well attended.

Rev. Dr. Laker in welcoming the Commissioner to Trenton, spoke of his experience with the Salvation Army and the pleasure it gave him to lend a hand in any way he could.

The Commissioner thanked Dr. Laker for his kind welcome and spoke of the some time, showing the progress of the Army had made, also referred to his own experience in Army work for over forty years, and telling of the work in Sweden by the present Governor, then Chief of the Staff, in starting little prayer meetings when he was on sick leave, the Commissioner himself later being in charge of operations in that country.

He also referred to his work in other countries, showing the great work for humanity the Army is doing.

Mrs. Commissioner Sowton gave a very interesting talk, commencing with her work in Scotland, and then six years spent as an Indian missionary, showing how she overcame the language difficulty by conducting a meeting through four different interpreters.

After Colonel Abdy had soloed, the Commissioner gave an interesting address, taking for his subject the Fourth Chapter of John's 13-14 verses, and pleaded with those present to seek after the Living Water and the true pleasures to be found in serving God.

MORTGAGE SALE Under and by virtue of the Powers of Sale contained in a certain Mortgage which will be produced at the time of sale, there will be offered for sale by Public Auction on Saturday, February 21st, 1925, at 10 o'clock in the forenoon at the office of the undersigned, the following property: Being in the Township of Murray in the County of Northumberland, containing by admeasurement one hundred (100) acres more or less and composed of the north half of Lot Eight (8) in the Fifth Concession of the said Township. The said property is a valuable piece of farm land and on it is a good fruit barn.

Terms of Sale—10 per cent. of the purchase price to be paid at the time of sale and the balance in 15 days thereafter. The property is to be sold subject to a reserve bid. For further particulars and conditions of sale, apply to

HOWARD D. GRAHAM, Solicitor for the Mortgage, Dundas Street, Trenton, Ontario.

MORTGAGE SALE Under and by virtue of the Powers of Sale contained in a certain Mortgage which will be produced at the time of sale, there will be offered for sale by Public Auction on Saturday, February 21st, 1925, at 10 o'clock in the forenoon at the office of the undersigned, the following property: namely, Lot number Fifteen (15) on the south east side of Dundas Street (formerly Bridge Street) and at the intersection of Dundas and Bay Streets according to the registered map of the then Village of Trenton, made in the year 1873 by J. J. Haslett, P.L.S., and registered in the Registry Office for the County of Hastings.

On the said property is erected a large two storey brick combination dwelling house and store.

Terms of Sale: 10 per cent. of the purchase price to be paid at the time of sale and the balance in 15 days thereafter. The property is to be sold subject to a reserve bid. For further particulars and conditions of sale, apply to

HOWARD D. GRAHAM, Solicitor for the Mortgage, Dundas Street, Trenton, Ontario.

NOTICE TO CREDITORS In the matter of the Estate of John Zufelt, late of the Town of Trenton, in the County of Hastings, deceased.

Notice is hereby given that all persons having any claims or demands against the late John Zufelt, who died on or about the 22nd day of October, 1924, at the Town of Trenton in the County of Hastings and Province of Ontario, are required to send by post prepaid or to deliver to the undersigned, solicitor herein for May Stapley, executor and trustee under the will of the said John Zufelt, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities if any, held by them.

And take notice that after the First day of February, 1925, the said Executor will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which shall then have had notice, and that the said Executor will not be liable for the said assets or any part thereof to any person of whose claim he shall not then have received notice.

Dated at Trenton, the 8th day of January, 1925.

H. D. GRAHAM, Barrister and Solicitor, Dundas Street, Trenton.

Cosima Wagner, widow of the great composer, is seriously ill in Bayreuth, Bavaria.

Gertrude's mother had caught a cold, and as a precautionary measure had resorted to that old-fashioned remedy, a glass of hot whiskey.

A little later Gertrude, aged 5, was ready for bed, and as she liked her mother a look of reproach crept into her eyes.

"Mother," she said, solemnly, "you have been using father's scent."

TRENTON NEWS

Mr. and Mrs. Albert Evans, Crown Street, celebrated the 42nd anniversary of their wedding on January 29th, 1925.

Mr. G. S. Carter left on Tuesday morning to spend a couple of weeks in Windsor and Detroit.

Mr. and Mrs. James Murray returned from Owen Sound yesterday.

Mr. W. H. Ireland, M.P.P., joined the Bonne Entente party on their trip to Quebec City this week.

We are pleased to know that Mr. P. J. O'Rourke is recovering from his recent illness.

Mrs. Irvine Hawley, Bancroft, and her two children, are visiting her sister, Mrs. Ernest Monkley, Division Street.

Tom McAuley has leased the premises in the Ireland block (the former Haines Shoe Store) on Dundas Street, and will move his clothing store to that building on March 1st.

If you want to subscribe for or renew any city daily or country weekly, or a farm journal or any other magazine—consult The Sun office.

MAJOR J. I. HARTT, ex-M.P.P. By a coincidence, on the same day (last Saturday) The Quinte Sun published a photograph of Mr. J. I. Hartt of Murray Township, The Quinte Telegram published a photo and sketch of his uncle, to whom The Telegram referred as follows:

Major James Irwin Hartt, Chief Inspector of Crown Timber Agencies and Supervisor of Forestry Operations for the Ontario Government, was born at Riverstown, County Sligo, Ireland, 57 years ago, and came to Canada 41 years ago. With his father he settled on a farm in Murray Township, after a few years entering the employ of the Gilmore Lumber Co., and starting his interesting car business he has followed ever since.

He went overseas with the 17th Battalion, transferring later to the Forestry Corps, where his knowledge of Forestry made him one of the most valued officers. On his return he took up his duties with the Government. In early lacrosse battles he was one of the stars and played in several matches with the late General Sir Sam Hughes. In 1911 he entered the field of politics and represented the Conservatives of East Simcoe in the Ontario Legislature all 1919. One of the best known and most popular Orangemen in Toronto, Major Hartt was Grand Master of the Grand Lodge of Ontario West in 1914 and 1918, Supreme Grand Master of the Loyal True Blue Association, 1911 to 1915, and is a Past Grand Master of Geneva Oddfellows Lodge, Orillia. His slogan, "One tree makes a million matches and one match dears a million trees" has travelled

TRENTON'S MAYOR AND EX-MAYOR EXCHANGE NOTES ON TOWN'S FINANCES

Mayor Cory Says There is a Set Time and Place for Him to Give Account of His Stewardship--In the Meantime He is Not Answering Questions.

The following letters speak for themselves.
Mr. H. D. Graham, Trenton.
Dear Sir:—I have for acknowledgment your letter of the 13th inst. There is a set time and place where I am called upon to give an account of my stewardship to the citizens of Trenton, and when that time arrives I believe that my report will meet with their entire approval.
Until then I have the honour to be
Yours very truly,
H. R. CORY, Mayor.
Trenton, November 21, 1934.

His Worship Mayor Cory, Trenton.
My Dear Mr. Mayor—I have your reply of the 21st inst. and regret that the ratemakers may have to wait until the last day in the afternoon for the information requested by me.
However, I realize your position and it would possibly be folly on my part to answer my questions at this time.
Sincerely yours,
H. D. GRAHAM,
Trenton, November 23, 1934.

Mayor Cory has evidently decided to quit talking about town finances until the annual meeting of electors. It is to be hoped on that occasion the ratemakers will get some non-ratepayers, for there is every need for the ratemakers of Trenton to take greater interest in the affairs of the Corporation than was evinced a year ago.

PUBLIC SCHOOL BOARD TAKES ACTION TO GET FUNDS TO PAY TEACHERS

Differences arising over the non-payment by the Town Council of funds to enable the Public School Board to pay the teachers' salaries during the past two months, have finally led to action being taken by the School Trustees to enforce the payment to the Board of the overdue amount, on its requisition for 1934.
The Mayor and Councilors, it is understood, contend that since only little more than sixty per cent. of the 1934 taxes have been paid, that the School Board are not entitled to receive a greater proportion than already paid to them.
It is learned that this week the Public School Board has taken legal action to get the Council to provide the necessary funds.

ERNEST McCAW DIES SUDDENLY AFTER ARRIVING FOR WORK

Another sudden death shocked the people of Trenton this (Saturday) morning, when it was learned that Ernest McCaw, Stanley St., a well-known life-long resident, had died suddenly, shortly after going to work. He had lately been working at the Benedict-Proctor factory and went to work as usual this morning, but just as he was hanging up his coat, was taken suddenly ill with a heart attack and expired immediately before medical aid could be called.
Mr. McCaw was formerly employed for many years as baggage agent at the C.N.R. down-town station.

DELIGHTFUL AFTERNOON AT BADMINTON CLUB

Mrs. Alex. Lewis, Vice-President, Entertains in Honour of Departing Members.

A delightful social event was held at the Trenton Badminton Clubhouse on Tuesday afternoon, when Mrs. Alex. Lewis, wife of F. L. Lewis, and vice-president of the Badminton Club, entertained at a farewell tea for Mrs. L. S. Bredner and Mrs. J. O. Fraser. The occasion was a most enjoyable one, every detail having been carefully provided for.
Following the exciting games, under the direction of Capt. Anna Sansom and Vice-Capt. Mrs. Stark, tea was served, with Mrs. R. S. Grandy and Mrs. F. V. Heakes presiding at the tables.
Players during the afternoon were: Mrs. J. O. Fraser, Mrs. L. S. Bredner, Miss Ann Sansom, Mrs. Stark, Mrs. W. B. Wilson, Mrs. Ann Dickson, Mrs. W. J. Johnson, Mrs. D. G. Graham, Mrs. H. E. P. Richardson, Mrs. Maile, Mrs. Jean Saylor, Mrs. Spencer, Mrs. F. L. Reid, Mrs. H. E. McClung, Mrs. W. B. McClung, Mrs. E. A. Simmons, Mrs. Peggy Johnson, Mrs. E. V. Heakes, Mrs. R. E. Ford, Mrs. J. W. Farley, Mrs. J. E. Renton, Mrs. M. W. Anderson, Mrs. Don T. Fraser.

Tea guests were: Mrs. R. S. Grandy, Mrs. H. W. Hewson, Mrs. Van Vleet, Mrs. B. J. Bach, Mrs. W. A. Fraser, Mrs. E. James, Mrs. G. Onet, Misses Mary Kerr and M. Robinson. Wing Commander Bredner and Mrs. Bredner leave next month for England, where the Commander will take a special course at the Imperial Air Force College.

Mr. and Mrs. James O. Fraser will leave shortly for Toronto, where Mr. Fraser has received an appointment.
Mrs. Donald Wilson, widow of the editor of The Post and Herald, who her baby was found drowned on the beach of Lake Ontario, between Port Hope and Newcastle, this morning.

C. G. I. T. HOLD DISTRICT MEETING

Interesting Sessions Held in Trenton—All Quite District Represented.

(By Eula Bonter)
On November 17th the C. G. I. T. groups of King Street United and Grace United Churches of Trenton, held a World Friendship Rally. Over 150 girls and leaders from Odessa, Tweed, Cannifton, Picton, Belleville and Concession, attended.
The rally was in charge of Mrs. James H. Redick, of Trenton, Presbyterian secretary of the W.M.S., with which the C.G.I.T. is affiliated.
The activities were conducted in the parlours of King Street Church.
Missionary work of the W. M. S. and C.G.I.T. this year is concerned with day games throughout the world. At ten o'clock the girls began to register. They received identification tags.
At 10:30 Mrs. Redick made a brief speech of welcome, outlining the day's programme. Mrs. Palmatier of Wellington officially welcomed the out-of-town guests.
Miss Nora Tett, of Belleville, then led the sing-song period. Besides several well-known C.G.I.T. favourites, the girls were taught an Indian melody.
An address on the customs of India was given by Miss Jean Catcher of Belleville. This talk cast light on the little-known everyday life of the mass of the people of India. Girls in native costumes illustrated the speaker's remarks.
The book and project talk was conducted by Miss Robina Templeton, Belleville leader. The C.G.I.T. study book for this year is "Freedom" and "India on the March". This story is the story of a modern Indian family adjusting itself to western civilization.
"India on the March" presents a vivid picture of Indian life in the poor villages. Miss Templeton outlined these two books, and also mentioned the subject of the India, which she advised the girls to read.
The recreational period was in charge of Mrs. J. C. Gillan and Miss E. Fowler. Group games were played and by the time this strenuous half-hour was over the players were more than ready for lunch.
Mrs. E. L. Fraser and Mrs. Robert Whyte were in charge of the kitchen, and to their credit a great deal of credit for the day's success.
After the noon hour, a dramatization by the Grace Church group under the direction of Miss Fowler. This story of the struggle of a modern, educated girl of India to maintain her new independence, is very interesting and educational.
The girls were divided into groups and discussion of the problems of India to-day was carried on.
An illustrated lecture on "Missionary Work in India" was given by Mrs. (Rev.) G. D. Campbell, Trenton. Mrs. Campbell pointed out that although India is only one-half the size of Australia, she has a population of 350,000,000 or almost one-fifth of that of the world. The missionary work of the United Church of Canada is carried on in the central plains of India, in the small, poor villages.
The people of India are interesting and fascinating. They are a mixture of dignity and childlikeness.
Mrs. Campbell outlined the work of our own missionaries among these people and mentioned a girls' school which our C.G.I.T. helped to maintain at Indore.
The beautiful worship service with which the day was brought to a close, was conducted by Miss Templeton.
To each girl attending this rally, has been brought a fuller sense of the meaning of "world fellowship." She has been shown that girls of other lands are facing much the same problems as she is, and that her hand stretched in friendship across the sea means a great deal to the girls of India.

Mr. Susan Reid, D.D.G.M., VISITS TRENTON CHAPTER.
ORDER OF EASTERN STAR
Eastern Star, Trenton Chapter 118, received the official visit of Mrs. Susan Reid, D.D.G.M. of District 12, on Monday night, November 19, in their hall on Front Street.
The hall was beautifully decorated with yellow mums and lovely floor lamps for the occasion.
Mr. G. H. Cobley kindly loaned the lamps for the occasion.
Mrs. Susan Reid, D.D.G.M., gave an inspiring address, Dr. E. A. McQuade sang an appropriate solo.
There was splendid attendance of officers and members of Trenton Chapter and a number of visitors from Bancroft, Tweed, Belleville, Ameliasburg, Wellington and Colborne.
At the close of the business meeting, refreshments were served and a social hour spent in dancing.

INTELLIGENCE, ITS NATURE AND MEASUREMENT

Subject of Enlightening Talk at Trenton Rotary Club, by Director Norman Bowser and Past-president R. F. Cannon of Oshawa.

The speaker at the weekly meeting of the Trenton Rotary Club at Hotel Gilbert on Monday evening, was Dr. Norman Bowser, D.D.G.M., Past-president of the Oshawa Club and Inspector of Public Schools for Oshawa and North Hastings. He delivered an interesting and enlightening address on "Intelligence, Its Nature and Measurement."

The occasion was marked by the attendance of members of the High and Public School Boards of Trenton and principals of the High and Public Schools, together with several other visitors.
President Tom Jarrett extended a welcome to the visitors on behalf of the Rotary Club. Past-president Ken Couch introduced the speaker and the appreciation of the address was voiced by Director Norman Bowser and Past-president Ralph Bonter.
Children are born into the world with a biological heritage and a social heritage—thus both heredity and environment play important parts in our ability to grasp situations, said Inspector Cannon, in opening his remarks.
One of the chief functions of our central nervous system, he said, is to form a connection between receptors and effectors, so that the result and reactions may be co-ordinated. Various definitions are given for intelligence, such as: adapting one's self to situations, doing abstract thinking; having the ability to learn, but perhaps the best definition is that intelligence is a function of the central nervous system. If one's central nervous system integrates easily and tenaciously, it is likely to be bright or intelligent, while on the other hand, if the nervous system forms neurone paths with difficulty, and associations are hard to form and are soon lost, one is almost certain to be dull.
The distribution of intelligence follows the curve of chance, or probability curve such as every known variable human trait will follow.
The bell-shaped curve at one end of which stand those of high intelligence and at the other extreme, those of low intelligence. In between are the great numbers of people who vary between those two extremes.
There are many problems in intelligence measurement, Mr. Cannon pointed out. In order that a test is reliable and valid, a great number of subjects must be tested and the test standardized; then again the test must measure abstract, social and concrete intelligence and a fair sampling of problems must be presented. Time enters into the calculation, of course, as does also difficulty.
Some of the commoner terms used in intelligence measurement are intelligence quotient, mental age and chronological age. The chronological age of a subject is the exact age in years and months, and if on a constant test that subject makes a score of 50 and his mental age would be exactly one-half his chronological age.
A great deal of work, the speaker explained, has been done in this field, particularly in Great Britain, England and the United States, and one of the best tests was made up by Binet, a Frenchman, in 1905. This test was revised and is now called the Stanford Revision of the Binet-Simon.

Hundreds of tests have been prepared, he said, but all of them fall within four main classes:
(1) Individual tests involving language.
(2) Group tests involving language.
(3) Individual tests not involving language.
(4) Group tests not involving language.
These tests are prepared to measure the intelligence performance of individuals or groups and are made up of a variety of problems. For the results, it is better to use a number of tests rather than to rely on any particular one. One must be very careful that the examiner does not let his personality interfere in the test results. Besides the above mentioned tests, certain vocational tests have been devised, but this work is still in its infancy and is a specialized field.
Some exponents of intelligence test claim too much for them and rest must be studied very cautiously and carefully. They are being used quite extensively in the diagnosis of feeble mindedness, in the superior intelligence, and mal-adjustment, school field. Also, they are useful to a certain extent in forecasting which pupils will succeed in school work. Intelligence tests will tell us which part of the general scheme, as it is called, is only one of the important factors in determining success. Intelligence tests will tell us which pupils will succeed in school work, but these pupils work hard and are careful. They are being used quite extensively in the diagnosis of feeble mindedness, in the superior intelligence, and mal-adjustment, school field. Also, they are useful to a certain extent in forecasting which pupils will succeed in school work. Intelligence tests will tell us which part of the general scheme, as it is called, is only one of the important factors in determining success. YOUNG WOMEN'S AUXILIARY MEETS

Interesting Program at Regular Meeting at King Street United Church.

The regular meeting of the Young Women's Auxiliary of King Street United Church was held on Tuesday evening, November 6. The meeting was opened with the hymn, "God of Love, O King of Peace," after which the lesson was read by Mrs. Kenneth Greaves and hymn "O God and Father of Mankind" was sung.
After the roll call, minutes of the last meeting and a reading from the Missionary Monthly, Mrs. H. Greaves delighted the members by singing "The Old Rugged Cross."
A synopsis of the first three chapters of the study book was given by Mrs. Maguire and Mrs. Harry Greaves. Mrs. J. W. Farley gave an interesting talk on Chinese customs.
Mrs. Adams then gave a comprehensive and interesting report of the Presbytery held recently in Plainfield.
After the collection was taken the meeting was closed with hymn "Lord While for All Mankind We Pray" and the Mizpah.

A social half hour was then enjoyed by all.
Mrs. Clayton Maguire, Mrs. Harry Greaves and Mrs. Jessie Goodsell had charge of the programme.
The tea hostesses were Mrs. Perry, Mrs. Orchard and Miss Florence Nelson.

TRENTON GOLF CLUB ANNUAL MEETING

Directors Chosen -- Progress is Made in Past Year -- Debt Reduced.

The annual meeting of the Trenton Golf Club was held in the town hall on Wednesday evening.
The reports of the various committees were read and approved by the members present.
In the financial statement for the season of 1934 it was revealed that the club's funds were in the best condition they had been in for the past number of years. During the season just closed the debts of the club were reduced by some six hundred dollars. For the past few seasons the members of the club have had a most difficult job to carry on, but this year, despite the fact that some of the older members of the club were absent, it was found that the financial position of the organization was in a most satisfactory condition.
The election of directors, from which the officers will be chosen, resulted as follows: Wm. B. McClung, Dr. J. E. Renton, H. D. Graham, Dr. F. L. Reid, R. J. Wemyss, Dr. T. Farncombe, Wm. Nugent.
A vote of appreciation to the outgoing officers was moved by Dr. F. L. Reid and received the unanimous endorsement of the members present.
President H. D. Graham was in the chair for the meeting.

TRENTON NEWS

Mr. and Mrs. W. H. Ireland were in Toronto this week.

Mr. and Mrs. A. Simmons were a trip to Toronto this week.

Mrs. W. J. Spicer is spending a few days in Toronto with her daughters.

Miss Eva Morrison motored to Oshawa to spend a week with her aunt, Mrs. Denismar Frier.

Capt. Violet Spicer of the Bloor St. Hospital, Toronto, is visiting her parents on Dundas Street.

Mr. and Mrs. Kenneth Robertson of Mount Pleasant, were guests of Mr. and Mrs. Percy Gauen on Sunday.

Mr. and Mrs. Lennie of Toronto, were in Trenton for the week-end.

Mr. and Mrs. W. H. Blair, Dundas Street West, were in Trenton.

Mrs. Howard Jarrett, who has been spending several weeks in Trenton, returned on Tuesday to her home in New Toronto.

Mr. and Mrs. Lennie left on Saturday for Trenton, where he intends to spend the winter with his daughter, Mrs. Jos. Webb. The Bancroft Times.

Mr. Edwin G. Tykett of Ottawa, was in town last week calling on his aunt, Mrs. Charles Francis, and his cousins, Miss Annie Hawley and Miss Hilton.

Mrs. C. McCullough returned home Monday night after attending the funeral of her nephew, Mr. Richard Yeo, husband of her niece, formerly Miss Edna Billings of Trenton and more recently of Toronto.

Mr. and Mrs. George Vardy left on Friday for a visit to Toronto, where they will attend the Royal Winter Fair, after which they will motor to Orillia to visit Mrs. Vardy's mother and brother in Orillia township.

BUCKINGHAM CHRISTMAS GIFT CONTEST

At November 15th the Trenton Branch of the Canadian Legion is to hold a contest for the Christmas gifts, which means we are assured of 148 toys at present. This contest closes Saturday, December 1st, and we respectfully ask that all persons having Buckingham wrappers leave them in the ballot boxes in all tobacco stores or notify Mr. C. M. Harrison, president, or R. M. Heath, secretary, and arrangements will be made to call for them.

That this work is a very large field, said Mr. Cannon in conclusion. We can safely say this, however, that they will give us the most reliable estimate of what a pupil will subsequently accomplish.

Trenton High School

(By "Shrimp")

One last announcement—Commencement dates—November 29-30. Admission 35 cents.

Basketball—Napanee at Trenton—December 7. This is the last chance Trenton fans will have to see the girls in action—and it should be well worth seeing.

A lot of funny things have been going on around the school this week, so let's make the rounds.

Mr. Spear "brought down the house" one period. "Now, class," he sez, "So and such equals such and so—and if so—why not?"

Elsie Rose jumped when a calendar clattered down behind her. Mr. Spencer inquired what she'd do if a gun went off in her ear—our guess is that she'd simply die!

Miss Jackson had her Composition class writing on the subject, "Why I Stick to the School"—and we saw one paper which contained the following "on account of the gum on the seats."

Mr. Spencer: "Corky, your brain turns a somersault every few minutes."

A Voice—"Well, it's got lots of room."

Now we know who did it: It all started by Mr. Spencer telling George that he had no "stick-to-itiveness"—from that discussion led to Napoleon and at the end of the period the Battle of Waterloo with all its consequences, had been blamed on poor George.

The Lab. makes a good battlefield when Fifth is in one of its playful moods. Lots of ammunition, including wet sponges.

Some scientific Johnny has figured it out that school students should be paid for attending school. What a brain-wave! You ex-pupils should come flocking back to school, so as to be on the pay roll, when it starts.

Vth had an intelligence test one day and as might be expected, the score was practically minus zero.

Charlie Way says the method he uses for hitting the bulls' eye one hundred per cent of the time, is to shoot the hole and then draw the target around it.

At last one of Barney Campbell's arguments has met with general agreement—he has decided that sports must you can't get a king's daughter without a king.

"What on earth is the boys' chorus singing?" queried one of the weaker sex.

"My Wild Irish Rose," was the answer.

"Well, it sure sounds wild!"

Estelle had a hated birthday party, Wednesday evening, and all we can find out about it, is that it was grand time and swell "eats."

T.H.S. BASKETBALL

Junior Game

In reference to Friday's game, we could quote one of our fellow sports writers and say "Trenton Juniors Troupe Belleville"—but we won't. We're just announcing to the world in general that our Junior Girls' Basketball Team won the old "Trenton Juniors" trophy last night.

The game was a game-action from the word go. Our Juniors had the Belleville lasses tied up in knots, although we will say the "bosers put in a kick."

Right—We've put too far for them. For a few minutes it looked as if "our Fergie" wasn't going to get a chance to play Junior—she had already played the first Senior half and the Belleville lasses were in a kick. When that little matter had been settled and Fergie once got started, she "whirl-winded" her way through the Belleville defence and put in a star performance. Every one of those Junior players deserves special mention. Kay Davis scored time after time for Trenton; Elsie Seales and Beattie Bonter were on the up and up all night.

Kene Vanderwater and Estelle Cox did the necessary defence playing efficiently.

Senior Game
Our hard-working Seniors deserve a pat on the back this time. The score, 39-19, goes up for Belleville, doesn't look so imposing, but the girls played a good game. The Belleville defence line just made it the business of the "bosers" hands and the Belleville forwards to sink it into the basket.

In the first half Belleville led the lead by seven points only, but our girls fell behind in the last part of the game. The score at the end of the first half was 14-10, which means we are assured of 148 toys at present. This contest closes Saturday, December 1st, and we respectfully ask that all persons having Buckingham wrappers leave them in the ballot boxes in all tobacco stores or notify Mr. C. M. Harrison, president, or R. M. Heath, secretary, and arrangements will be made to call for them.

ST. GEORGE'S MEN'S CLUB SIX YEARS OLD

Enjoyable Program at Annual Birthday Party in Canterbury Hall.

The St. George's Men's Club celebrated its sixth anniversary at Canterbury Hall on Monday evening.

The president, Mr. F. W. Sherbert, presided, and welcomed the visitors of the club and explained to them that while the actual anniversary of the club was some weeks ago, they had postponed it on account of the Laymen's banquet.

The meeting was opened with the singing of "Canada," after which there followed a varied programme, which included instrumental selections and vocal solos, dances and recitations.

Mr. Harry Gray recited "The Tramp," an humorous number. Miss Jean Fittion gave a piano solo, "For All We Know."

One of the feature numbers on the program was a dance, the Highland Fling, by little Miss Jean Blair, accompanied by Mr. A. H. Foster on the bagpipes.

There were piano solos by Miss Doris Meyers and Miss Jean Fittion, and vocal solos by Mr. Waddington, accompanied by Mr. Newton; guitar solo by Mr. George Roberts, and community singing led by Mr. Reg. Armstrong.

At the completion of the program, the members and guests of the club were served a delightful lunch in the basement.

Dancing was afterwards enjoyed to music supplied by Johnson's orchestra. The dancing to the music of the L.O.L. fife and drum band entertained the audience.

Mr. and Mrs. Ed Weir do not mind.

DELIGHTFUL GROWING ABLE MA

Group D Guild, under the leadership of Mrs. Max W. Smith, combined dance and card party at the Masonic Temple.

Young and old joined with equal enthusiasm to make the evening a most enjoyable one. Guests were present from Trenton and the surrounding districts.

Seventeen tables of card enthusiasts were engaged in euchre and bridge competition. The prizes were won by Miss Mary Wilson for contract bridge; Mr. G. R. Ariz, ladies' auction bridge; Mr. G. Robinson, gentlemen's auction bridge. The euchre prizes went to Mr. W. H. Bonter.

In the afternoon, Mrs. P. Ketcheside and Mrs. J. Ketcheside entertained at a bridge party.

MILK PRODUCERS RECENT RAISE IN PRICE

The Trenton Milk Producers' Association of Trenton, Ontario, held a meeting on Tuesday evening when various matters of interest to members were discussed. Mr. W. A. Jones, president, presided.

The recent increase in the price of milk, fixed by the Milk Control Board, was discussed, and in view of the opinion which it was said, prevailed that the distributors benefited the most by the increase, it was decided to give publicity to the fact that the producers were receiving the larger benefit.

Mr. Fred Wilson, of R. R. 3, Belleville, secretary of the Association, informed the producers, since informed The Quinte Sun that the increase in price charged for milk in Trenton goes largely to the producers, whom, he said, were satisfied with the new price. For he thought, considering the scarcity of feed and the increased cost of producing, that the producers were entitled to the little increase.

There were twelve producers and six distributors present at the meeting.

LOSES THUMB AND FINGER

A serious accident, while cutting wood, cost Frank Smith, aged 18, the loss of his thumb and index finger on the right hand. In some unaccountable manner, the youth brought his hand in contact with the circular saw while cutting wood at the home of Mr. Wesley Saylor. He was taken to the office of Dr. A. C. Driscoll, who rendered first aid before sending him to the Belleville General Hospital.

The second finger was badly lacerated but did not have to be amputated.

CHINESE GOVERNMENT BACKS BOY SCOUTS

The Boy Scout Movement has been definitely established in China under the auspices of the Chinese Minister of Education.

DIED

UNDERDONK—Suddenly, at Toronto on Saturday, November 24, 1934, Thomas Dempsey Underdonk of Albury, beloved husband of Mary Mackay, and father of Mrs. Gerald Moffat. Private funeral at Albury cemetery.

PORT HOPE EDITOR'S DEATH TERMED CLEAR CASE OF MURDER

Police Convinced Arsenic Administered By Other Than Self—Three Weeks Since Death Gives Authorities Late Start—Stomach Held Poison

Port Hope—Abandonment of any suspicion of suicide and determined investigation of what was termed a "pretty clear case of murder" marked the provincial police investigation over the weekend of the death of Donald H. Wilson, 31-year-old editor and publisher of the Port Hope Guide.

Declining to discuss what angles they are following, police state they are convinced that Wilson's death followed the administration of a form of arsenic by some person or persons other than himself. The young newspaperman, third generation of a family which has published the Guide for a century, died in agony in hospital on October 23, and examination by Professor L. Joslyn Rogers of the University of Toronto revealed that "a large amount of arsenic" was present in his stomach.

Receipt of Prof. Rogers' report launched the long-delayed probe of the circumstances which surrounded Wilson's death, but the three-week period has given the police a late start on the case. As a result, the preliminary investigation has not yet included a discussion of the case with the immediate relatives of the dead man, including his young wife with whom he had been residing immediately prior to his death, after an estrangement which had terminated last January with their reunion.

DETAILED REPORT AWARDED
Search for the source of the arsenic has also been suspended pending a more detailed report from Professor Rogers, whose tentative studies did not reveal what form the poison had held. Because of its numerous affiliations—with commercial, zinc, lime, and other products—comparison of the arsenic with the arsenic which is recorded, will be exceeded.

It was reported that the arsenic was obtained from a local dealer, and that the arsenic was used in the manufacture of a product. The arsenic was found in the stomach of the dead man, and it was reported that the arsenic was used in the manufacture of a product.

have been the strides made in Ontario in the study and handling of offenders that the number of inmates in reformatories and county jails is considerably reduced, and the Women's Jail Farm at Concord, operated by the City of Toronto, is to be closed for lack of inmates, the report states.

"This decrease in crime convictions in the face of depression and unemployment should awaken gladness in the hearts of all those who are interested in the law-abiding citizenry," says the report in part. Dealing with the problem of treatment accorded prison inmates, the report declares that lack of individual attention in these institutions is one of the things that is wrong with the prison system. Satisfactory and adequate work for prisoners is one problem that has never been properly solved, it is alleged. Speaking of education in prisons, the report stated that "it might be a good thing to make school attendance compulsory in all our penal institutions."

"The supreme stupidity of the prison system lies in the fact that it takes criminals of every type and treats them in the same way," the report continues. "It matters not whether the man is a thief, a drunkard, a child assassin, a political offender, a debtor, a forger, a bigamist or is guilty of manslaughter. In all essentials they are dealt with alike. No matter what our view of human conduct may be, it remains a fact that the prisoner is a separate person in need of separate attention. A majority of prisoners are suffering from mental disease and do not require punishment but medical attention. Many imprisoned for sex offences belong to this class."

Chief Constable D. C. Draper is president of the association, which for its chief objectives prison reform and the rehabilitation of ex-prisoners.

Wear Old Clothes Until Threadbare, Germans Advised

Berlin—Dr. Karl Gerdorfer, Herr Hitler's new "dictator," took action against rising prices today, ordering National Socialists to wear their old clothes "down to the last thread" and threatening profiteers with "merciless" treatment.

He told Germans "no one loses one bit of his dignity if he wears threadbare clothes," while "the acts against the nation's interests if he hoards clothing."

In an address explaining his functions as commissar for control of prices, Herr Gerdorfer criticized the tendency to alarm and spoke reassuringly about the raw materials situation.

He said prices and wages would be maintained at the same level and "every unjustifiable price rise will be mercilessly dealt with."

Declaring his chief duty would be to prevent the rise of prices of necessities he warned manufacturers they must be content with small profits and instructed merchants to refuse to sell unusual quantities of any commodity.

The surplus of imports over exports was reduced to 52,000,000 marks (approximately \$20,800,000) compared with 161,000,000 marks during the second quarter.

\$26,000,000 Revenue Gain
Canada's Earnings For Seven Months Soar; More Also Spent

Ottawa—Recovery of business is reflected in the Dominion revenue statement for the first seven months of the fiscal year. Total ordinary revenue shows an increase of \$26,000,000 for the period April to October, inclusive.

The big producer was the sales tax, which, with excise taxes, yielded \$63,863,000 since April 1, or \$8,000,000 more than the corresponding period last year.

Customs revenue, totalling \$45,000,000 was \$9,000,000 ahead of last year, excise duties totalling \$26,000,000 were \$5,000,000 up, income tax yielded \$19,404,000 and \$1,000,000 better than last year, while the gold tax thus far has brought in \$3,873,145.

Ordinary expenditure for the first seven months of the fiscal year was \$11,000,000 more than in the like period of 1933, \$5,000,000 of which was accounted for by increased interest on the public debt and \$2,500,000 for old age pensions.

Loans and advances to provincial governments for so far this year have totalled \$23,862,558. Unemployment relief for the seven months under review totalled nearly \$23,000,000, or nearly \$6,000,000 more than in the corresponding period of last year.

"Wie Gekt, Leutnant!"—Hand extended, Chanceller Adolf Hitler of Germany eagerly greets an officer of his guard after official reception of foreign diplomats in Berlin.

THE CENTRAL BANK AND ITS FUNCTIONS

Will Become Active Unit In Canadian Banking January 1, 1935

Now that practically all the plans have been laid by the Minister of Finance for the launching of the new Bank of Canada as an active unit in the Canadian banking system on January 1, 1935, it is interesting to recall what functions the bank will be called upon to perform.

Since chartered banks exist for the purpose of providing credit, it is felt that an institution to take care of the interests and welfare of the community at large was a necessity. The Central Bank is designed to be that the volume of credit available from time to time does not depend solely on the working of competitive business forces, but upon the requirements of the community. To be more specific, the Central Bank is designed to:

- 1.—To act as controller of the volume of credit and currency.
- (a) By a concentration of the nation's gold reserve.
- (b) By the control of note issue.
- (c) By rediscount rates.
- 2.—To be a regulating influence on international exchange by means of national control of currency and credit.
- 3.—To exercise a regulating influence on price levels by raising or lowering the discount rate and by open market operations such as selling securities to check credit expansion and buying securities to stimulate credit expansion.
- 4.—To be a financial adviser to Dominion and Provincial governments with respect to going to the bank for loans and other financial matters.

Mr. Graham F. Towers, recently appointed the Governor of the Bank of Canada, is now investigating all operations of the various central banks of Europe. Mr. J. A. C. Borne has been appointed Deputy Governor, and it is anticipated that he will be appointed in the near future. Upon the return of Mr. Towers to Canada, everything will be in readiness to place the Bank in operation.

The Markets

PRODUCE PRICES

United Farmers' Co-Operative Co. Saturday were paying the following prices for produce:

EGGS—Grade "A1," in cartons through associations, 46¢; and with cases returned, "A" large, 34¢; "A" medium, 31¢; "A" pullets, 25¢; "B," 18¢; "C," 15¢.

BUTTER—Ontario No. 1 creamery, 21¢; No. 2, 20½¢.

POULTRY—(Quotations in cents.)
Hens—Over 5 lbs. 9 12
4 5 lbs. 8 11
3 5 lbs. 7 10
3 to 3½ lbs. 6 9
Old roosters 6 8
Spring chickens—
Over 6 lbs. 12 16
5½ to 6 lbs. 11 15
5 to 5½ lbs. 10 14
4½ to 5 lbs. 9 13
Under 4½ lbs. 8 12
Broilers—
1½ to 2½ lbs. 11 15

WHOLESALE PROVISIONS
Wholesale provision dealers are quoting the following prices to Toronto retail dealers:—
Pork—Ham, 13¢; shoulders, 12¢; butts, 15¢; pork loins, 13½¢; picnic, 11½¢.
Lard—Pure, tierces, 12¢; tubs, 12½¢; pigs, 13½¢; prints, 13¢.
Shortening—Tierces, 9¢ tubs, 9½¢; pigs, 10¢; prints, 9½¢.

HAY AND STRAW
No. 2 timothy hay, baled, ton, \$17.50 to \$18.50; No. 3 timothy hay, ton, \$15 to \$16; straw, wheat, baled, ton, \$10; oat straw, \$7.50 to 8.50.

GRAIN QUOTATIONS
Following are Saturday's closing quotations on Toronto grain transactions for car lots, prices on basis c.i.f. bay ports:

Manitoba wheat—No. 1 Nor., 85½¢; No. 2 Nor., 81½¢; No. 3 Nor., 78½¢; No. 4 Nor., 74½¢; No. 5 Nor., 70½¢; No. 6 Nor., 72½¢.
Manitoba oats—No. 2 C.W., 49½¢; No. 3 C.W., 45½¢; No. 1 feed, 43½¢; mixed feed oats, 34¢.

Independent Women Have Kind of Freedom In Their Faces

New York—Instead of breaking up marriages, wives' careers frequently hold them together. Mrs. Rudolf Jacobi, German artist, asserted recently. Sizing her portraits "Annot," she specializes in painting "The Independent Woman" in the United States and abroad. Managing a home for her husband and two children, Mrs. Jacobi conducts an art school, and she has the dual tasks "mix beautifully."

Professional and business women, she said, "have something new and different in their faces that makes

them more attractive. I can tell by a woman's face whether she earns her own living or is dependent. Independent women have a kind of freedom and dignity in their faces. "All life's problems are solved when a woman is independent. Professional women don't take problems as seriously as those with no profession, and marriages are not endangered because the independent woman does not regard so seriously the trying crises which always arise in married life."

Blond, sturdy and deep-voiced, Mrs. Jacobi is half-German and half-Norwegian. She came to New York from Germany because, she said, the Nazi regime imposed too many restrictions on students.

SIX PER CENT. JUMP IN POWER DEMAND

October Load Is Up For All But One System—603,637 H.P. Sold.

Toronto—Operating statistics of the Ontario Hydro-Electric Power Commission for the month of October reveal a 6.2 per cent. increase in the primary and secondary load (maximum 20-minute peak horsepower) for all the systems over the corresponding load for October, 1933. The comparative figures were 1,451,699 horsepower and 1,366,735 horsepower.

The increases for the various systems involved were: Niagara, 1.8 per cent.; Western Ontario, 4.2 per cent.; Georgian Bay, 2.5 per cent.; Thunder Bay, 10.4 per cent.; and Northern Ontario properties, 30.7 per cent.

In primary load, alone, the increase for all systems was 2.6 per cent. The increase was from 1,105,956 horsepower to 1,134,728 horsepower. The Niagara system registered a gain of 1.4 per cent.; Eastern Ontario, 5.6 per cent.; Georgian Bay, 2.5 per cent., and Northern Ontario properties, 48.5 per cent. The sole drop came in the case of the Thunder Bay system. It amounted to 9.1 per cent.

Purchased power commitments of the Commission, up to the end of October, 1934, amounted to 603,637 horsepower.

U.S. Public Should Know of Existing Social Conditions

St. Louis, Mrs. Franklin D. Roosevelt said in an address here recently that the way to change social conditions "which are a blot on our system," is to bring them before the people "so that they know conditions as they exist."

Mrs. Roosevelt is chairman of the women's committee of the mobilization for human needs, which sponsored the women's crusade held this year throughout the United States. In her audience were women who had led the movement in 12 middle-western states.

Referring to a statement by Harry Hopkins U. S. federal administrator, that relief should not be permanent, Mrs. Roosevelt said: "no one wants to be permanently taken care of by the government, but we do want to retain the organizations which teach us how to live better. I am glad when I find people who are not satisfied with what they have. It is a sign that they are getting a vision. We need a vision of the future and what we may have in the future."

One of the most effective phases of the work of the women's crusade, Mrs. Roosevelt said, was in taking small groups of persons out to observe the conditions with which they work.

Woolworth Heir Finally Content
Nice, France, Summer Kirby, one of the Woolworth heirs, and his bride the former Georgian Princess, Leonida Bargration de Mouskhranski, arrived at Villefranche aboard the di Savoia from Genoa after a honeymoon in Venice.

"I'll never marry again," Kirby remarked, "because I am so happy at present. I've been married many times—but this time I am finally content. My wife is the most wonderful woman in the world."

He said they would spend the winter on the Riviera, at his chateau at Montebello, Italy, where he keeps a stable of racing horses.

"Even in the midst of my present happiness I cannot keep away from my horses," Kirby said.

When Experience Didn't Count
A motor car had just knocked down a man, fortunately without injuring him. The young woman driver faced him determinedly.

"I am sorry it happened," she said. "You should take more care when you are walking. I have been driving a car for seven years."

"Well," replied the victim, "I am not a novice myself. I have been walking myself for fifty-seven years."

U.S. TO FOREGO BALANCED BUDGET

Unspent Appropriations Complicate Task of Bookkeeping

Washington—Hone for a balanced federal budget in the new fiscal year beginning July 1, 1935, virtually was abandoned Sunday night when the treasury department made public a statement showing that on Nov. 15 the government still had unspent recovery and relief appropriations of \$6,475,544.919.

It was believed impossible all this money could be spent before June 30, 1935 and the net result was expected to be an unbalanced budget spread at least the three years ended June 30, 1936, instead of merely the two years ended next June.

The huge backlog of more than six billion dollars in unspent recovery appropriations, it was pointed out, is the real crux of the budget situation.

Even though the government does not balance its expenditures with receipts in the new fiscal year, as previously contemplated by President Roosevelt, the recovery costs still could be kept within the existing limits he set. Government spending over the past 17 months has been lower than expected, which leaves large sums of available cash to carry over into the new fiscal year.

For the two year period ending June 30, 1935, President Roosevelt estimated total expenditures of \$16,629,895,667, but only \$9,146,000,000 has actually been spent and the end of this period is only seven months away. Income in the two year period was estimated at \$7,234,004,235, of which \$4,465,000,000 has been taken in.

It was regarded as likely that most of the unexpended recovery appropriations would be used by the Federal Government in view of the fact that recovery has been less rapid than had been expected, and the fact that relief rolls still are large.

Canadian Girl on Board of Education In British Honduras

Amherstburg, Ont.—A Canadian girl, Miss Ethel L. Alexander, whose father, J. H. Alexander, is a resident of Amherstburg, set a precedent when she became a member of a board of education in British Honduras.

Prior to Miss Alexander's appointment, school boards in that colony on the rim of Central America had been considered strictly a masculine matter. Miss Alexander is working in the Honduras for the Anglican Church Missionary Society and is at present stationed at Belize, where she is headmistress of St. John's Girl's School.

Her first missionary appointment took her to Orange Walk, a straggling village of 1,000 inhabitants on the Belize River, near the Guatemala and Yucatan boundaries. Orange Walk has no gas, electricity or running water, and its streets are lit by kerosene lamps hung on poles and attended by a lamp lighter.

Toronto Surgeons Lengthen Man's Leg

Toronto, Ont.—Orthopedic surgeons at a hospital here are bringing to fruition a test case in which they seek to make the legs normal of a man born with one shorter than the other.

The patient, or clinical subject, is George McKay, 20, whose left leg was three inches shorter than his right when he entered the hospital several weeks ago. He is being subjected to corrective principles evolved eight years ago by a St. Louis orthopedist, in which weights are used to stretch the abnormal leg.

McKay's leg has been stretched two inches in five weeks, doctors say. It will be normal.

WINTER BLANKETS WEST WITH SNOW

Three Inches Fall at Calgary—Only Moderately Cold

Winnipeg—Snow blanketed Saskatchewan and Alberta Sunday and jettied into the mountain passes of interior British Columbia. Chill winds blew over Manitoba and snow was expected.

Temperatures ruled below the degrees above the zero mark as freezing rain, but still kept a doze of prairie folk expecting Winter to become a reality within a few days. The long Indian Summer came to an end during the week-end in Manitoba.

Three inches of snow fell in Calgary and interior British Columbia points. Two inches were reported from Medicine Hat, the whole of Southern Alberta was under snow. It was pretty much the same in Northern Alberta, Edmonton had received an inch of snow, and it was still tumbling down.

Three inches of snow fell in Calgary and interior British Columbia points. Two inches were reported from Medicine Hat, the whole of Southern Alberta was under snow. It was pretty much the same in Northern Alberta, Edmonton had received an inch of snow, and it was still tumbling down.

CRIME IN ONTARIO AT LOWEST POINT

Record of 1914 Repeated, Citizen's Service Report States—Education Needed.

Toronto—Ontario's crime level is down to where it was in 1914, the lowest point in the history of the province, according to the fifth annual report of the Citizen's Service Association of Canada. So rapid

has been the decline in crime that the rate of 1914 has been reached. The rate of 1914 was 1.1 per 1,000 population, and the rate of 1934 was 1.1 per 1,000 population. The rate of 1934 was 1.1 per 1,000 population, and the rate of 1934 was 1.1 per 1,000 population.

If you suffer take advantage of this offer to try KRUSCHEN at NO EXPENSE

Sufferers from rheumatism, sciatica, lumbago, overweight — try Kruschen Salts at our expense. Kruschen has brought relief to millions of people scattered over more than one hundred countries throughout the world. Kruschen finds the body of all food refuse, of all poisons and harmful acids which are the root of your troubles and which may some day bring these afflictions upon you.

Ask your druggist today for the Kruschen Giant Package. This consists of one Regular 75c package and a FREE TRIAL BOTTLE. Use the trial bottle first. Use it as prescribed and Kruschen's six natural mineral salts will start you out to a new life. With your internal organs functioning as nature intended, they should you find new health and new energy. Try Kruschen today AT OUR EXPENSE but remember, your druggist has only a limited supply.

FARM-CAMP FOR TRANSIENT MEN

Plan to Rehabilitate 1200
in Pennsylvania Includes
Raising Own Food

Pittsburg.—Taking its own advice to go back to the farm, the Federal Government has established what is believed to be the first farmcamp for homeless transient men on a 235-acre tract of land near Valencia, Pa. By encouraging them to provide own food and shelter, the Government hopes to rehabilitate 1,200 "wanderers of the depression" for useful work in society with the return of better times.

This is the first of three farm-camps which will be established in the Pittsburg district before Christ-

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child
an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors — on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia — the safe remedy for your child."

Remember this — And Always Say "Phillips' When You Buy. Your child deserves it for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

(Editor's Note: To know yourself is to understand, and understanding will enable you to make the most of your latent talents and characteristics. The author of these interesting articles makes an offer to you. Read this article and see how he can help you.)

Here is another letter this time it is from a lady reader who lives in the West. It is similar to many that I receive each week, and shows the various problems that beset so many people.

"I have been going with a gentleman friend for some time, and we are devoted to each other. When we started getting to like each other, my friend told me that we could not get married for some time, because he was living with his mother, who is over 30 years of age, and live with her. He has to look after her, and he is her sole support. She is helpless and can do nothing for herself. She rarely knows any of us, and he really is very lonely. I feel terribly sorry for her, but it does complicate things for both of us."

"I agreed to wait, but time is going on and we seem no nearer marriage. We are both terribly anxious to get married, but my fiancé says we simply cannot as things are. He thinks he is bothering me coming around without having anything definite to offer me for goodness knows when — for he will not marry as long as his mother lives. Neither of us like a long courtship, and he does not like the idea of keeping me on a string, as he says in this way. Can you help us, Mr. St. Clair? We are both in our early forties. I don't know just how you can help, but maybe you can make some suggestion, or offer some advice, that will make the situation more bearable for both of us."

This is, without a doubt an unfortunate position for any couple to be placed in. Time is passing you both by, and you are missing the golden years of companionship that should be yours.

I have studied the writing of both

of you, and find that you are both very ardent, affectionate people. Neither of you is of the cool, dispassionate type, who can control your feelings for a long time.

Your fiancé's mother is very old, but she may linger on for years yet, in which case the situation would become unbearable for you. Then there is the matter of children. The older you get, the more difficult will become your position, from several angles.

I understand that it is not a question of your fiancé's mother being hostile to you, or laying down the law about having a daughter-in-law living with her. It seems to be merely a question of your fiancé's attitude that provides the obstacle.

I am going to be quite frank, because that is what you want. You must put it up to your fiancé that the situation cannot go on in this way for any length of time, and that you must prefer to marry him, and live with his mother whilst she is alive. This is something which you will have to put up with but if you are prepared to do that, and apparently you are then it is better that you get out of the situation as soon as possible. When his mother dies you have your own home.

But it is not practical to keep apart for a practically unlimited time. You are both human, and a situation may arise which would leave you, as the woman, in a disadvantageous position. You will understand what I mean without my going into further detail. I am writing you at greater length direct.

Have YOU a problem in which Mr. St. Clair can help you? Handwriting tells the story of people accurately, scientifically and without any frills. Do you wish to know what your friends are really like? Send specimens of the writing you wish to be analyzed, stating birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope to Geoffrey St. Clair, Room 421, 73 Adelaide St. W., Toronto, Ont. All letters will be confidential.

CENSUS TAKING Full of Perils and Adventures Up North

Ottawa.—Census taking in most countries is a matter of routine, but in Canada it is always a complicated problem—sometimes a perilous adventure.

Beyond the comparatively narrow ribbon of town and farm there is a vast hinterland of bush and barren lake and mountain and sea coasts extending into the Arctic, where the inhabitants are few and widely scattered and yet must be included in the "population." Here the official census taker is helpless and the Federal Government must call to its aid not only its own Royal Canadian Mounted Police and agents of the Department of Indian Affairs, but fur-trading companies and church missions in the Far North.

The time and patience required to collect such data in far corners is seen in the fact that although 1931 was the last census year, the information is still incomplete and reports are still trickling in.

The latest report, received by the Dominion Bureau of Statistics from Moose Factory, tells a thrilling story. It was written by the Rev. J. Emile Sandison, a missionary, who was engaged to take the census along the eastern shore of James Bay.

"I must say," he writes "that the canoe trip gave me a good deal of worry as I had never made that trip in such an unsafe means of conveyance."

"The run is 600 miles along the shore, which means a battle with the elements: rain, snow, winds, ice and heavy fogs. Furthermore, we have to cross three bad spots, namely, Hannah Bay, Rupert's House Bay and Cape Hope Bay—all wide and deep. Everything is fine in good weather, but when it is stormy the trip is very dangerous. Only once did we find ourselves in a storm of that kind; it was in Hannah Bay. It looked as if the sea was going to swallow us. The canoe would be riding on the crest

of the waves, and a moment later plunging into the trough. My guide gave proofs of his marvelous skill in dodging and cutting through the waves. Our canoe had air-tight compartments; it measured 20 feet in length and was covered with a very strong waterproof fabric. I carried two outboard motors in case one should fail."

12 Miles Up

Earth Looks Like A Warped
Checkboard Says Photo-
grapher.

WASHINGTON.—The rarest of photographs — a picture that looks something like an old warped checkboard — has just been developed at the National Geographic Society.

It is a bit of earth, as photographed from the record height of almost 12 miles. It was snapped 800 feet above the ground by Capt. Albert W. Stevens during the ill-fated stratospheric flight of the National Geographic-Army Air Corps balloon Explorer.

The picture shows a section of Nebraska about 10 miles square, over which the balloon was soaring when the bag ripped and started the fast descent that forced Captain Stevens and Major Kepner to jump.

Small hills and ridges appear like ripples on the surface of a pool or like an astronomer's photograph of the moon, edges of the picture are fringed because the film was partially exposed to light when the gondola crashed.

This photograph and others taken at lower levels, should help natural scientists make more accurate adjustments of barographs, instruments that measure altitude.

By comparing the length of an object in the picture with its actual length. The exact height of the balloon can be figured. The focal length, or distance from focus to lens of the camera, also enters this calculation.

World's 'Oldest Flea' Rouses Staid Times

LONDON.—An editorial in the usually staid Times reveals that "the oldest flea" recently was unearthed in East Prussia.

The petrified granddaddy of all is about 5,000,000 years old, the Times said, and asks: "What heights of experience and cunning would he not have scaled by now? If he could speak it is certain he would pour conventional scorn on the hampered lives of his descendants, contrasting them with his ramifications into the woolly hides of mammoths, and the impenetrable thickens of the skins of brontosaurus or plesiosaurs."

"Such soft garments and softer flesh were not revealed by heaven to him."

"WHY RISK FAILURES WITH
DOUBTFUL BAKING POWDER.
LESS THAN 1/2 WORTH OF
MAGIC MAKES A FINE BIG
CAKE. AND YOU ARE SURE
OF SUCCESSFUL RESULTS."

Mrs. CLARY HUNT, Chief Dietician
for Gillett Products, Toronto

MAGIC costs so little! Just think—it actually takes less than 1/2 worth of Magic to make a delicious layer cake. Why take chances with doubtful baking powder? Bake with Magic and be sure!

Mail Rocketed Ship to Shore

Tryout Near Calcutta Proves
Successful—Service May
Be Installed

Calcutta, India.—Ship-to-shore rocket mail delivery was tested successfully today in the estuary of the Hooghly River near Calcutta. A small steamship rocketed mail 1,000 yards, obviating the necessity for a landing in the dangerous shoal infested waters.

Post Office and military authorities conducted the test. Post Office officials hoped for a quicker and cheaper mail delivery by use of the rockets, particularly in some areas where mail steamers lose days because of winding rivers.

Military authorities were interested because of the possibility of using the rockets to send dispatches on mountainous frontiers.

TEST SUCCESSFUL.
Trieste, Italy.—A steel tube was rocketed from the side of a mountain near here and landed undamaged in a valley 2 1/2 miles away, with a cargo of 1,500 letters.

The demonstration, testing a

PREVENTS MINERAL DEFICIENCY
Phosphorus Deficiency

STOP LOSSES
Mineral deficiency doesn't stick out like a sore thumb to help you recognize it. Chances are that some animals you own, healthy enough looking but not so good producers, are border line cases. The right minerals are the key to profit right now. Feed one of these C-I-L Mineral Supplements daily to promote thriftiness and productivity. Rich in digestible calcium and phosphorus and nutritionally balanced, they give results with real economy and profit.

C-I-L NUTRI-MIN
100% Available and Digestible
calcium phosphate, (bone derived), wholly digestible, naturally balanced, concentrated calcium-phosphorus salts combined with other minerals supplying iron, sodium and iodine.

C-I-L SOLUBLE MINERALS
The entire mineral portion of bone, specially processed to secure digestibility and balanced with other essential minerals. Contains phosphorus, calcium, iodine, sodium, chlorine, iron and sulphur. Take no risks of mineral deficiency.

CHAIN STORES

(The Comox Argus, Courtenay, B.C.)

According to evidence put forward by the Royal Commission, chain stores are convicted not only of beating down prices to the consumers by "mass leaders" but also of short weighing their customers and dishonestly substituting an inferior article for a well-known brand.

Here and in Vancouver favorite (and hated) leaders are being forced to the farmers; in the Maritimes it is found they have been using fish for the same purpose.

PEANUT POLITICS

(From The Havelock Standard)

In Peterboro City and throughout the county, renewals of authorities to sell hunting, trapping and angling licenses are only being granted to bona fide Liberals, and even Chris Graham of Peterboro, secretary of the Peterboro Fish and Game Protective Association, and who by virtue of his office, has in the past issued such licenses, has been refused a renewal. Such peanut politics is in striking contrast to the action of the late government, which granted licenses to Liberals and Conservatives alike, with a view of granting licenses to those in the best position to serve the public.

PROMISE OF SPECIAL SESSION IN THE DISCARD

(From The Toronto Telegram)

It is now over four months since the Hepburn Government assumed office. According to all the information available it will be another four months before the Legislature assembles. But eight months of government by order-in-council is not dictating that lofty beacon of Liberalism, the Toronto Globe. It finds the "lone voice" raised in protest by Wilfrid Heighington, M.P.P., "singularly unimpressive."

HEPBURN WIELDS AXE IN OTTAWA

(From The Ottawa Journal)

The Hepburn axe has fallen upon Hector Caruthers, who is replaced as license issuer of motor vehicles in Ottawa by a Liberal politician.

Mr. Caruthers has never taken any part in politics. In fact he was not even an appointee of a Conservative Government, as issuer of motor licenses. He was appointed on the recommendation of the Ottawa Board of Trade by the Durney Government, a Progressive Government, which with all its faults was neither a mean nor a viciously partisan government.

Mr. Caruthers has been an unusually valuable citizen of Ottawa. As secretary and manager of the Automobile Club of Ottawa, he is equally indefatigable and courteous—he knows everything about the roads and the tourist accommodation everywhere in Eastern Ontario, and not only Ottawa people but thousands of motor tourists profited by his knowledge and his readiness to help.

He was for a time manager of the Civic Public Bureau and did excellent work in that capacity.

When he became issuer of motor licenses, following the representation of Chas. Alex. Ross that the duties be transferred from the police department, he was able to combine that office with his other activities, with advantage to all of them.

The Hepburn Government throws Mr. Caruthers out in order to give a job to a party follower. Injury is done to the public interest in this way. First by the shameful exercise of the principle, particularly vicious when no excuse exists, that to the victors belong the spoils; secondly by personal and interested disloyalty to a public servant; thirdly by injury to important public service.

MRS. T. H. BRYAN DIES IN BROOKLYN, N.Y.

Formerly Margaret R. Dench—Attended Trenton High School—Two Sisters Still Reside in the Quinte District.

The sudden death of Mrs. T. H. Bryan in Brooklyn, N.Y., on November 3rd, came as a great shock to her many friends in Canada. The beautiful service of the Order of the Eastern Star, Sandalphon Chapter No. 290, of which the deceased was a valued member, was followed by the Anglican service, conducted by Dean Fitzgerald of All Saints, Brooklyn. Amid masses of floral tributes she was borne to her last resting place in the Bryan family plot, Evergreen cemetery, Brooklyn.

Mrs. Bryan, formerly Margaret Rose Bryan (Marie) was the third daughter of the late Robert W. and Jennie Dench of the Carrying Place. Graduating from Trenton High School, she taught school near Brighton, and later in Chicago, Ill.

She was married to Thomas Harry Bryan of the Silver Burdette Publishing Co. For the past ten years she had resided in New York City and Brooklyn.

She leaves to mourn her loss, her husband and one daughter, Mrs. R. H. Rawson, and one grandson, Bobby. Three sisters, Miss W. Dench, Ottawa, Mrs. M. B. Weese in Rednersville, and Mrs. Geo. W. Arnott, Frankford, and one brother in Los Angeles, Cal., also survive.

MICHAEL BRENNAN ELLIS, OLD RESIDENT, PASSES AWAY

Trenton's oldest residents, Brennan Ellis, passed to his home on Monday, November 19, at the corner of Byron and Main Streets.

Mr. Ellis had been in failing health for the past two years, having undergone an operation in Kingston Hospital. Born in Hungerford township eighty years ago, the deceased had moved to Trenton thirty-four years ago and had resided at his home on Byron Street for the past thirty-two years.

The survivors are the deceased's widow and six children: three sons, Samuel, Frederick and Charles; three daughters, Mrs. A. L. Casement, Trenton; Mrs. L. Hebert, Belleville; Mrs. W. E. Eschey, Toronto.

The funeral was held on Wednesday morning with solemn services at the Church of St. Peter-in-Chains, conducted by Rev. Father Buckley. Interment was made in the Roman Catholic cemetery.

The pall-bearers were: Messrs. H. Desjardins, Wm. G. Hutton, R. Gallagher, Wm. Bruyca, D. Hennessey, Wm. Turcot.

List of spiritual offerings: Mr. and Mrs. L. Hebert; Mr. and Mrs. A. Casement; Mr. and Mrs. Fred Ellis; Mr. and Mrs. A. Terry; Mr. and Mrs. H. Horn; Mrs. J. Hebert; Mr. and Mrs. R. Odell; Lena, Mary and Flora Shonker; Mrs. Julia Hebert; Mr. and Mrs. Wm. Hutton; Mr. and Mrs. Bedard; Mr. and Mrs. A. Jackson; The Catholic Women's League; Mr. and Mrs. E. Shortt; Mr. and Mrs. L. Collier; Mrs. J. Crawford; Mr. James Wall; Miss C. Ellis.

Floral tributes: cross, Mr. Sam Ellis, Jr. and Miss Lizzie Decote of Belleville; wreaths, Mr. and Mrs. Fred Ellis; C.P.R. Recreation Club; sprays, Mr. and Mrs. Wm. Dale; Mr. and Mrs. F. Colwell; Misses Anna and Helen Galina; basket, Mr. Fred Ellis, Jr. and Miss Mary Lucas.

The solemn meeting was somewhat disturbed by the eloquent young minister pictured in glowing words the selfishness of men leaving their evenings at the club, home. "Think, my hearers," said he, "of a poor neglected wife all alone in the house, rocking the cradle of her sleeping babe with one foot, and wiping away the tears with the other."

COBOURG WANTS RESIDENT MAGISTRATE

(From The Cobourg Sentinel-Star)

Cobourg, the county town of Northumberland and Durham, is without a resident magistrate, and at the meeting of the town council Monday night, this matter was thoroughly thrashed out, with the result that the town clerk was instructed to write to Harold N. Carr, M.L.A., Campbellford, requesting him to make an appointment with the general knowledge to meet Mayor J. P. Delanty and a deputation from Cobourg, also to ascertain how court costs are distributed.

The matter of a police magistrate for Cobourg has been a subject for discussion among the citizens and officials of the town since the new arrangement of itinerant magistrates came into effect, and at the council meeting on Monday night the general dissatisfaction of the public was voiced by several of the councillors. The subject came up for discussion when the Town Clerk read a communication from the Attorney-General's Department asking the town to forward the magistrate's salary.

Following is the letter received: "I beg to advise you that section 15 of the Magistrates' Act provides that there shall be a salaried magistrate for every city and town having a population of 5,000 or over. I would also advise you that section 18 fixes salaries paid to such magistrates."

An Order-in-Council was passed on 16th of September, 1934, appointing W. A. F. Campbell a salaried magistrate for your municipality. Will you be good enough to govern yourself accordingly.

Salary cheques, in future, should be sent direct to this office, in as much as all magistrates are to be paid by this department—W. Dennison, Inspector of Legal Offices.

Serious Condition

Deputy Reeve Maurice Booth said that conditions in Cobourg with regard to the office of magistrate were very serious. There are three magistrates, yet Cobourg is only visited Tuesdays, Fridays and some times Saturdays. The Chief of Police is worried about the situation," said Deputy Reeve. "If a man is arrested and out in the cells for being drunk on Saturday night, he must stay there until Tuesday morning, which isn't fair and is not justice. That in only one instance, and such conditions cannot continue. I am very much in favor of a magistrate for Cobourg. Then there is the question of fees. We don't know where they are going to. As things are now there is no sense or reason; the court is like a ship without a rudder. If Magistrate Campbell cannot come to Cobourg, the magistrate from Lindsay has to come, a distance of sixty miles, which is not my idea of economy."

Mayor Delanty agreed that something should be done to straighten things out, for the situation was very bad.

Councillor W. J. Maher: "Cobourg, as the county town, is not getting as much attention as a small village. I saw somewhere it was advisable to have a magistrate who was a resident. I submit that a resident magistrate knows the people and is in a better position to deal out justice than a man who has travelled sixty miles and knows the circumstances of the cases he deals with. Only last week we had a case where the local police had been working for months to catch the perpetrators of petty thieving which had been going on in the town for a long time, yet when they were caught and appeared before the magistrate they got off. What encouragement is that for the police of this or any other town? I certainly feel Cobourg is entitled to its own magistrate, a man who uses justice with common sense (and I am casting no reflections on the present magistrates). The government might come back and say 'go ahead, have your magistrate, but pay us in addition to your own.' But I don't believe in crossing our bridges till we come to them. No man should be kept in jail from Saturday night until Tuesday. In theory, this legislation is all right but it is not practical."

Mayor Delanty: "As I understand it, the government represents the people, the members are there to carry out the wishes of the public. The people of Cobourg want a resident magistrate, and I suggest we send a deputation to the Attorney-General."

Reeve W. E. Cooper, seconded by W. J. Maher, then moved that the town communicate with H. N. Carr, M.L.A., asking the Attorney-General to make an appointment and the motion was carried unanimously.

The conditions in Trenton, with no resident magistrate, are even worse than at Cobourg, where the county jail is located.

Increased 170,000

In the ten years 1923 to 1933 the Boy Scouts of India increased from 30,000 to over 200,000.

WHO WILL WIN THE ROTARY PONY?

Il Duce Reviews The "No Shirts"

"You cute little tyke," Premier Mussolini must be saying as he chucks the chin of a young Fascist, on a recent visit to a Government camp for children at Sabaudia.

Notable Arrivals Pose For Camera

After enjoying a vacation in England and France, Her Excellency Lady Besborough arrived back in Canada upon the Empress of Britain. Above is shown Lady Besborough between her son and daughter, Lord Duncannon and Lady Moyra, who have also been abroad.

Welsh Wizard With Canucks

Here is Canadians brand new goal tender, the sensational Wilf Cude. Leo Dandurand states he had an offer of \$30,000 for the youngster who practically carried Detroit Red Wings into a Stanley Cup final last winter. Cude has been high spotting Canadians' early season work with sensationalism. He is another British-born player, having first seen the light of day at Cardiff, in Wales. Cude was the most sought after goal tender at the start of this season. Detroit made repeated efforts to buy him in Canucks.

How To Do It Correctly

There's a right and wrong way to rescue a drowning person from a capsized canoe, and here is Capt. Fred C. Mills, National Safety Director of the Boy Scouts of America, as he gave realistic demonstration of the former at Santa Barbara, Cal.

Baer Training Brothers

Everything is jake with Max Baer these days as the young brother, Jacob, better known as "Buddy," to the footstep. Little Buddy, training in Los Angeles for ring only 7 feet 6 1/2 inches tall and weighs 199 pounds.

Princess Marina Chooses Bridal Attendants

The Royal procession at the forthcoming marriage of the Duke of Kent will include (1) Lady Iris Mounbatten, daughter of the Marquis and Marchioness of Carlisle; (2) Princess Ingrid, of Sweden; (3) Princess Juliana, of Holland; (4) Princess Margaret Rose, younger daughter of the Duke and Duchess of York; (5) Princess Irene, of Greece, sister of ex-King George of Greece and cousin of Princess Marina; (6) Princess Elizabeth, elder daughter of the Duke and Duchess of York.

The King's Sons at Varied Activities

(Top Photo)—Attended by Lieut.-Colonel the Hon. Piers Legh, the Prince of Wales recently attended the reception given to members of the English-Speaking Union at Londonderry House in London. Robert W. Bingham, American Ambassador, and Lord and Lady Reading also attended. Left to right are: Lady Reading, Mr. Bingham, the Prince of Wales and Lord Reading.

(Centre Photo)—Prince Henry, Duke of Gloucester, on an official visit to the Antipodes, is pictured with Sir Winston Dugan, Governor of South Australia, (right), and Lady Dugan, behind the Governor, during an inspection of Girl Guides and Boy Scouts at a rally on the Jubilee Oval, Adelaide.

(Bottom Photo)—The Duke of Kent, who is to be married shortly to Princess Marina of Greece, is shown as he presented medals to gunners and drivers of "B" Battery, which won the King's Artillery Cup in London.

MR. A. A. FARRAR WRITES LETTER HOME

Tells How Himself, Wife and Family are Enjoying Trip to the South.

LETTER NO. 1

To my friends and customers in Trenton, Belleville and the surrounding country.

My wife and I are on our honeymoon trip and I am going to describe it to you.

There are nine of us in a Buick car with a black canvas-covered trailer. What all is in this trailer is hard to tell. But I will give you a rough idea: three camp cots, nine folding chairs, a gas stove, lamp, lanterns, sockets of maple syrup, raspberries, pickles, potatoes, etc.; clothing for cold and hot weather for nine of us; dishes, table, a studio couch with spring cushions, a 4-foot spring and mattress and bedding. (We have had some cold nights but always had enough.) A fair-sized tent, poles, etc., and other things too numerous to mention.

We left Trenton around 11 o'clock on October 22nd and hit the trail for Toronto. Our first night was spent in Oshawa in the front yard of a vacant house, one street over from where our Buick car was made.

I forgot to mention that we ran out of gas right in front of General Motors and had to wait until they brought us up two gallons. Claude Graham told me not to wear the car before I left but I thought I'd try. But believe you me, boys, it won't run without gas!

The next day we drove to Sunny-side, in Toronto, and camped there for the night.

We took in some of the sights in Toronto and had no mishaps to amount to anything. I say no mishaps. Well, we stroled up one of the main streets and Geraldine, Gerald and Dorothy decided they wanted to write some cards home. We sat down on a street corner and each one wrote a card. Gerald wrote one to some girl friend and forgot to put a stamp on it; Dorothy wrote one and forgot to sign her name; Geraldine wrote one and did not leave room to tell her teacher to read it to the kids, but said she ought to know enough to.

We left Sunny-side for Hamilton, and saw, I believe, one of the finest rock gardens that any city could have. From Hamilton to St. Catharines, over the new and old Welland Canal, and on to the Niagara River.

We stopped a few minutes to see the aero car over the Niagara River. This is a big steel cage with seats on both sides run from one side to the other on steel cables about 300 feet above the rapids. They wanted 75c each to ride over and back, but I could offer me \$75 and I would stay on dry land.

We went up the hill to see Laura Secord's and Brock's monuments and that is sure one beautiful view.

From there to Niagara Falls, we had a tour of the falls. We were using our tent for the first time. Most of the children saw Niagara Falls for the first time. We went down before dark and then again after supper when the lights were on. This is a sight that I have seen quite often, but I don't believe I would ever tire of it.

The next morning I went down to visit the American consul and waited until 10 o'clock to see him, but found that it was unnecessary.

So we folded up and decided to take in Canada as far as possible and went up the river to Fort Erie. We passed several historical battles and Dorothy, who, by the way, is writing the history of this trip, stopped at each one and wrote it all down.

At Fort Erie we passed under an overhead bridge and just as we got through and going up a grade on the other side, if we did not run out of gas again! Bill went back for gas, and as we were on a narrow pavement I got out and started to direct traffic. How I wished Chief Bain or some of his helpers had been there!

We got gas and drove up to the new Peace Bridge after getting a permit to leave Canada, giving the numbers of our tires, where we were born, how long we were going to be out of Canada, etc., etc. While a lot of red tape we crossed the border.

Here the United States immigration officers had a "go" at us. The first one stuck his head in and tried to count the number in the car. I thought he needed help, so told him nine. He asked, "Are they all of the family?" "No," said I, "this is only part of them; we left the rest at home." This seemed to satisfy him although he did not believe it.

My next step was to go in again and get a permit to enter the U.S. They valued my car at \$400 and the trailer at \$500, and asked for a cash deposit of \$500 bond so that I would be sure and bring back the car and trailer. And when I do, if it's within six months, they will return the money. They need not fear—it will be back, and us, too, long before that, if they keep on taking my money. Excuse me—our money, as it is the wife's money and all I am doing is helping her spend it. I offered them \$50 in Canadian money, but they said they must have coin of the realm. I asked them if it mattered what kind they said it didn't, so I went out the car and brought them in \$50 in American nickels and dimes. I only paid \$46 for them at the bank, so I'm in that much providing it goes far by the time I return.

Well, I guess this is all for now. I will write you again next week.

D. OF E. EUCHE

At the weekly Euchre of the Daughters of England, the following were the scores:

Ladies—Mrs. Alexander 107, Marie Smith 100, Mrs. Patterson 99.

Gents—Mrs. Beale 111, Mr. Woodacre 101, Mr. McDonald 99.

The Euchre will be held on Tuesday evening next week.

ARENA COMPANY ANNUAL MEETING

The shareholders of the Trenton Arena Company met in the Town Hall on Tuesday morning at ten o'clock.

Mr. Wm. House, the president of the company, presided. The minutes for the last meeting were read and adopted. It was shown from the auditor's report that the company had managed to "make ends meet" and the statement was confirmed by the shareholders.

In the election of officers the following were re-elected: president, Wm. House; vice-president, E. L. Fraser; secretary-treasurer, W. B. McClung.

The board of directors is composed of the following members: W. House, E. L. Fraser, M. Tripp, W. A. Fraser, N. J. McNair, C. M. Foster, W. B. McClung, Mr. C. M. Foster replaces the late H. F. Whittier on the board.

The Arena Company has had a difficult task to carry on. Only due to the generosity of the mortgagee, Mr. N. J. McNair, has it been possible.

St. George's Parochial Guild will hold a hard time "At Home" in Canterbury Hall on Tuesday evening, December 4th. Tickets 25 cents.

V. O. N. CHRISTMAS TREE

Remembrance Day has passed and gone, but other remembrances remain. This season of the year reminds us of the proximity of Christmas and its spirit of love and charity. Once again the V.O.N. of Trenton foresees the cheer and comfort which appropriate gifts may bring to many homes, consequently an effort is being made to provide a Christmas Tree for the children attending the clinic.

It has therefore been decided to hold a shower, at the residence of Mrs. R. G. Weddell, Division Street, on the afternoon of Wednesday, December 5th.

This courtesy has been extended to the V.O.N. by the kindness of Mrs. Weddell, and it is expected that many will avail themselves of the hospitality.

Each guest is asked to donate a suitable gift for a child of four years and under, including babies.

Tea will be served during the afternoon, and it is hoped that a record shower of gifts will be on display.

All friends of the Order are cordially invited and their gifts will be gratefully received by the ladies of the organization.

HOW TO GET MORE SAFE HEAT FOR YOUR MONEY THIS YEAR

Do you want safer heat—better heat—more heat for your money this winter? Then be sure and specify "blue coal" every time you order. "blue coal" responds with quick heat when you give it the mildest draft. It burns evenly and steadily with little attention and little waste. It sends cozy, healthful, summertime warmth to every room all day long at lowest fuel cost.

Don't gamble—play safe—always insist on "blue coal". It's colored blue so that you can identify it at a glance. For "blue coal" and the fastest delivery in town—phone us today.

Europe Thrown Into Confusion Through Order Issued by Yugoslavia

Mussolini Demands Airing of Secret Plotting in All Countries — Warns Belgrade — Paris Cabinet Split

ROME.—Premier Benito Mussolini is preparing to ask a complete showdown not only on Yugoslavia's accusations against Hungary, charging complicity in the assassination of King Alexander, but the whole problem of secret plots and counterplots throughout Europe.

This was revealed reliably Sunday night in connection with Yugoslavia's action at Geneva, asking that the Council of the League of Nations take up her charges against Hungary. The Yugoslav Government formally alleged that Hungary was guilty of complicity in the shooting of King Alexander at Marseilles, while starting a goodwill tour last month, declaring the Hungarian Government permitted Croatian terrorists to find asylum there while hatching their plot.

The Yugoslav memorandum to the League stirred up a "hornet's nest" on the continent. Diplomats feared it would bring whole groups of exiled plotters into an international discussion which might prove embarrassing to a number of states.

For example, France might be accused of harboring Fascist plotters against Italy, Czechoslovakia with harboring Nazis, Switzerland with giving refuge to Poles, and Germany with permitting Austrian Nazis to plot against the Vienna Government.

Attacks and counter-attacks were feared which might make it difficult for any nation to remain undisturbed.

All Europe faced the possibility of black insinuations.

The Italian press already has showed what can be awakened in this "truth party," by recalling that the Serbian dynasty started by Kara Georgevitch, to which King Alexander belonged, began when the last ruler of the Obrenovitch dynasty was killed in 1903.

Duce was determined to bring into the open the whole "European merry-go-round" of conspiracy which many believe is whirling the world rapidly toward a new war.

However it appeared that Yugoslavia would be urged to use caution in pressing her charges against Hungary while Italy and France take the lead in bringing the secret diplomacy of post-war Europe before the public.

...having all cards into the open.

ENCH PREPARING FOR WAR

FRANCE.—It is apparent Sunday night, it is getting ready for war the past week of preventing it by a black shadow of armed force and political power.

The danger of conflict growing out of cooling friendships and rising national animosities among nations, clearly seen by French leaders, those talk of "menaces" particularly in the "direction" of Chancellor Hitler, has become outspoken.

French have mingled words of confidence at Europe's stability with warnings to guard against attack.

In the first place, France is enlarging her army, stationing her armaments and rebuilding her air forces in a vast modernization program.

Second, she is seeking to bring Great Britain closer.

FRENCH CABINET SPLIT

The real facts concerning a Franco-Soviet "understanding" remained in dispute Sunday night—a dispute rumored to have caused a rift in the French cabinet—but Russia's "offer" of armed aid against Germany was reliably said to have been actually tendered.

This offer of military aid by

France's old ally in case of a German attack was declared by friends of former Premier Edouard Herriot to have been renewed last Saturday.

It was asserted to have been made by Maxim Litvinov, the Russian foreign commissar, last Spring to the late Foreign Minister Louis Barthou, and again to his successor, Pierre Laval, during a long talk with the Soviet counselor, Marcel Rosenberg, at the foreign office.

Leon Archimbaud, reporter of the budget, stood by his declaration of Friday before the chamber of deputies that it was "undeniable that this understanding exists" while the Russian office limited itself to a denial that there was any "military accord."

Rumors of a rift in the cabinet were vigorously denied by Premier Pierre-Etienne Flandin but friends of Herriot, leader of the Radical Socialists, said he was in discord with Laval, particularly over Russia's negotiations, and had even offered to the premier his resignation from the cabinet, which had been refused and withdrawn.

\$10,000 Party

Mdivanis Stage Costly All-Night Party to End Rumors of Rift

Paris.—Prince Alex Mdivani pointed to the recent costly all-night party, with dinner, champagne and dancing, to prove that all is well between him and the Princess, heiress to a 5 and 10-cent store fortune.

The occasion not only marked the 22nd birthday of the former Barbara Hutton, Prince Mdivani explained, but also was designed "to end rumors of a rift in our happiness."

"I hope everyone will now realize we are happily married and love each other," he said.

And the staff of the Ritz, where the party was held in an opulent setting, was happy too. "We rarely get such parties these days," one employee admitted. He estimated the cost of the affair at slightly more than 150,000 francs (about \$9,750).

The 120 guests, who included princes, a duchess, three barons, 13 counts, and two baronets, among them, danced until a street in Casablanca, Morocco.

Table decorations were formed by beds of orchids and the tables were placed about the ballroom in night club fashion.

Prince Mdivani flew to London the next day en route to New York, while the Princess will go to India for polo. He said they would meet in Indo-China early next year.

BRING GOOD HUMOR TO SERIOUS WORLD

Hungarian Cartoonists Win Applause in London for Tempered Wit

London.—Two Hungarian cartoonists have been the cause of an international congress here which engendered only laughter and handshakes.

They are Alois Derso and Emerik Kelen, artists who have established themselves informally as "official" cartoonists to the League of Nations. Their exhibition in London, arranged by the All People's Association, drew visitors of many nations, including some of the foremost of their "victims."

Although Derso and Kelen, who work jointly have depicted the statesmen as birds, fish, animals, children, toy soldiers and "barkers" in a fair ground, they all seemed very happy about it.

Signor Grandi, Italian Ambassador to London, walked aside those who greeted him upon his entrance, saying, "Just a minute, I have not seen the latest ones yet."

Sir John Simon, British Foreign Secretary, who officially opened the exhibition, was very complimentary. He declared that Derso and Kelen are adding to international accord. Their cartoons, he said, are not vicious distortions but gentle satires which could be appreciated by all nationalities. Moreover, he declared, Derso and Kelen probably do a lot of good by "the way they conduct their leg-pulls."

"Although," Sir John—Simon advised, "I may sometimes fail to recognize myself among those cartooned, I never fail to think how perfect all those others represented are."

Visitors to the exhibition seemed rather puzzled as to how two people could produce one cartoon between them, and could develop a style in which it is impossible to detect

Miss Dorothy Chamberlain, photographed with her father, the Right Honorable Neville Chamberlain, Chancellor of the British exchequer. Miss Chamberlain has just become engaged to Stephen Lloyd, son of Mr. and Mrs. T. Z. Lloyd, of Birmingham.

which of them has done which figure.

The two cartoonists were very modest. They pointed to their drawings and smiled. Eventually they allowed themselves to talk.

"It is easy," said Kelen.

"Yes. Very Good," agreed Derso.

"He," continued Kelen pointing to Derso, "draws from memory, all ways. I draw ever from life. Then when I have drawn my subject Derso suggests how to make it better."

"Often we argue," Derso argued. "But always with good humor."

"He shows me my weak points. Of course we do not always have the same ideas," Kelen added.

"We argue," we hammer. We push, we pull," agreed Derso.

"It is easy," said Kelen.

"I like London very much," turned Derso.

The Markets

PRODUCE PRICES

United Farmers' Co-Operative Saturday were paying the following prices for produce:

EGGS—Grade "A1," in cartons, through associations, 44c, and cases returned, "A" large, 32c; medium, 29c; "A" pullets, 23c; 18c; "C," 15c.

BUTTER—Ontario No. 1, 24c; No. 2, 20c.

POULTRY—(Quotations in cents.)

Hens.	Live Dressed	12
Over 5 lbs.	9	12
4 to 5 lbs.	8	11
3 1/2 to 4 lbs.	7	10
3 to 3 1/2 lbs.	6	9
Old roosters	6	8
Spring chickens—		
Over 5 lbs.	12	16
5 1/2 to 6 lbs.	11	15
5 to 5 1/2 lbs.	10	14
4 1/2 to 5 lbs.	9	13
Under 4 1/2 lbs.	8	12
Broilers—		
1 1/2 to 2 1/2 lbs	11	15

HAY AND STRAW

No. 2 timothy hay, baled, \$17.50 to \$18.50; No. 3 timothy, \$15 to \$16; straw, wheat, 1 ton, \$10; oat straw, \$7.50 to \$8.50.

WHOLESALE PROVISION

Wholesale provision dealers are quoting the following prices to retail dealers:

Pork—Ham, 18 1/2c; shoulder, 13 1/2c; butts, 16 1/2c; pork 1A, 20 1/2c; picnic, 11 1/2c.

Lard—Pure, tierces, 12c; 12 1/2c; pails, 13 1/2c; prints, 13c.

Shortening—Tierces, 9c; 9 1/2c; pails, 10c; prints, 9 1/2c.

GRAIN QUOTATIONS

Following are Sunday's cloth quotations on Toronto grain market for car lots, prices on basis of 100 lbs. per bushel:

Manitoba wheat—No. 1 Northern, 84c; No. 2 Northern, 81c; No. 3 Northern, 78c; No. 4 Northern, 74c; No. 3 C.W., 44c; No. 1 feed, 42c; mixed feed oats, 34c.

Manitoba barley—No. 3 C.W., 58c; No. 1 feed screenings, \$21 per ton.

South African corn, 90c.

Ontario grain, approximate price track shipping point—Wheat, 91c

93; oats, 80 to 83; barley, 43 to 44; corn, 66 to 70; rye, 45 to 47; buckwheat, 40 to 42; malting barley, 64 to 66.

Austrian Thinks Moon Is Like a Nut Kernel of Which Earth Has Not Seen

VIENNA.—The man in the moon isn't in the moon at all, nor are all those cold and lonely looking mountains, according to a theory propounded by Mr. Joseph Weisberger, Austrian astronomer.

Mr. Weisberger has published a book called, "The Riddle of the Double Planet, Earth and Moon," in which he puts forward the theory that the moon, like the earth, is covered with a way that we can never see the globe it encloses.

What they see in moon stratosphere, he contends.

Mr. Weisberger bases his hypothesis on the observation that maps of the moon are exceedingly variable. Lunar geography, he says, is very vague and uncertain. Tomorrow the camera may show a picture of the moon greatly different from the one it caught today.

What one sees, he says, is an ever changing atmosphere shell about the moon, and it may no more resemble the real object than the prickly hull of a chestnut resembles the smooth brown object inside.

Due to the rotation of the moon, the surface of its air cover has assumed the form of waves and spirals of varying density and depth, which resemble mountain chains and craters, not entirely unlike the surface of a cloud on which one may look down from a high mountain peak.

The author of this theory thinks it is substantiated by the character of the shadows in the moon. If the mountains there are really as high as scientists believe they would cast long and dense shadows, he thinks, which would make the edges of the moon dark and jagged like a saw blade. But just the opposite is the case, he asserts, for the brightest part of the moon is near the circumference.

Russia Buys Trees From Anabana Nursery

Mobile, Ala.—The Soviet Government has purchased 10,000 citrus trees in the Mobile region and has appointed Mr. A. M. Troyer, of Fairhope, Ala., a town located near Mobile, as a technical consultant on citrus fruits, to serve in the trans-Caucasian district of Russia.

The trees purchased by Russia have been shipped. Purchase of the trees was made a commission from the Soviet Union with letters of introduction from Dr. Walter T. Swingle, chief physiologist of the United States Bureau of Plant Industry. Four thousand trees were bought.

50 Carloads for West of Clothing, Foodstuffs

Amherst, N.S.—Fifty carloads of clothing and foodstuffs have been forwarded from the Maritime provinces already this year to aid the needy in the dry belt of Western Canada, according to a statement issued by Rev. C. E. Crowell, moderator of the Maritime conference of the United Church which organized the relief project.

INSULL ACQUITTED

Jury Takes Only Two Hours To Reach Decision—Faces Other Charges.

Chicago.—Samuel Insull Sunday enjoyed his happier holidays since the 1929 stock market collapse, undimmed his \$2,000,000 power empire.

A federal court jury had believed his assertions: "Gentlemen, the worst that may be said was that I erred in judgment, not in honesty," and had acquitted him, his son and 15 other former lords of La Salle Street of a charge of mail fraud, \$10,000,000 in magnitude.

Congratulations by telephone and telegram poured in all day into his small hotel apartment where he rested with his wife and Samuel, Jr. Visitors by the score trooped to his quarters and the 75-year-old host greeted them all personally, still exultantly happy over his complete victory in the first prosecution of charges growing out of the collapse of his utilities combine.

"This is the happiest day of my life," he exclaimed.

He himself answered most of the telephone calls, told newspaper men to come in and posed willingly with his family for photographs.

SHOWS FLAIR FOR PROPHECY

He alone, apparently, in a flash of the acumen which brought him to a pinnacle as a traction light and power potentate almost without peer—had gauged correctly the jury's course Saturday.

Its surprisingly short two-hour and two-minute deliberations on a complicated financial case embracing almost 2,000,000 words of testimony had caught court attaches, counsel and most of the defendants themselves by surprise. But not Insull.

"I'll give them two hours," he had said shortly before the jury left the courtroom at 2:21 p.m. Saturday.

But even he blushed as he sat down before Judge James H. Wilkerson shortly after 4:23 p.m., when the jury signalled it had agreed. There was a moment of dramatic suspense. Then Foreman John D. Lent submitted the verdict, which was read by the clerk, granting judicial absolution to all the defendants.

Came next an emotional outburst seldom witnessed in the sedate Federal Court. Some defendants cheered. Spectators rushed through to congratulate all. Papers were tossed wildly about. A few of the defendants' wives wept.

BEGINNING OF VINDICATION

But even in his moment of triumph Insull could think of the days ahead.

"I look upon the verdict as the worst case pending, you know,"

London Expects Quite Active Market for Heavy Water at Good Fat Price

LONDON.—Water is shortly to be marketed here at £2 a gram, not as a result of drought but as a result of a new invention.

For it will not be ordinary water. It is to be the first commercial production of the "heavy water" containing "heavy hydrogen," recently discovered in the United States. Chemists declare that this new water will open vast fields of research, and as the result of many experiments Imperial Chemical Industries Ltd. have established a plant which will enable a steady supply to be maintained at the price of £2 a gram.

So far little is known of the actual importance of this "heavy water." But with a continuous supply chemists are expecting to add discoveries of first rate importance to their present negative knowledge that certain seeds and organisms will not grow in it.

An official of Imperial Chemical Industries declared that the discovery of heavy hydrogen, as well as bringing about a revolutionary change in beliefs in the constancy of the constitution of water, might well bring about a big change in the teaching of chemistry.

"Not only," he declared, "may it have an all-important influence on the growth of plants, but the discovery of heavy hydrogen means that there can be many varieties of each formula in which normal hydrogen plays a part. It may well mean that eventually, even in only three years' time, no one will be able to learn plain chemistry. All students will have to be specialists."

Army Students Must Crop Hair in Canton

Hong Kong.—A report from Canton states that in the interest of "National Salvation," the representatives of the South West Council have issued instructions to all students of high schools, who are now undergoing a course of military training, to crop their hair close instead of allowing it to grow long as formerly.

Attention is also drawn to the fact that oil, hair-cream and even face powder are used by some students. This being contrary to the teachings of the noble profession of soldiering, students are warned that all who disobey this new rule will be forbidden to resume their studies.

Britain to Move Arsenal To Less Pugnacious Place

London.—The Royal Arsenal at Woolwich, the government's huge munition factory and armament store on the south bank of the Thames, which is directly in the line of flight of continental aircraft, is to be removed to the west coast, according to The Daily Herald.

The final decision that paper says has been taken by the Committee on Imperial Defense and the Cabinet, which dispatched a commission of war experts including Lieut. Gen. Sir Hugh J. Elles, Master General of Ordnance to find a site safe from aerial invasion. Areas in Wales, Cumberland and Ayrshire it is said, were visited.

"The removal of the Royal Arsenal," The Daily Herald says, "is part of a general reorganization and redistribution of the nation's munition and aircraft factories being carried out in consequence of the development of bombing aircraft."

U.S. NOW SEEKING DEAL WITH BRITAIN

Informal Navy Accord Proposed as Japs Continue Firm

London.—The significance that lay behind authoritative reports the United States is likely to seek an informal naval accord with Britain was being digested in official quarters Sunday.

It was learned from reliable sources over the week-end that this step is likely in the event of existing naval limitation treaties being ditched through failure of these two countries and Japan to reach an accord in current tripartite conversations.

Japanese insistence on actual naval Japan has made the hope of such an accord being reached dimmer as the conversations proceed.

Meanwhile a tentative arrangement for Japan's forthright denunciation of the Washington treaty was submitted to United States Ambassador-at-large Norman H. Davis by Ambassador Taneo Matsudaira of Japan during a golf match.

The date for the denunciation was not, however, set. The two ambassadors discussed the general outlook but it was understood there was no chance in the general situation as a result. The conversations are virtually deadlocked at present.

Probe Resuming

Ottawa.—Shortweights in grocery stores are now engaging the attention of the royal commission or price spreads and mass buying. When the commission meets again this week Saturday, Cuddy, inspector of weights and measures for the Dominion government, will complete submission of his report on a special investigation into short weights conducted during the summer.

British Business Continues to Gain

London.—Retail trade in Britain is advancing. Official returns now issued show that the money value of such sales was 4.3 per cent more in that month than in the same period last year.

Similar comparisons in regard to other British business activities are more varied. Unemployment has been reduced. Overseas imports and exports have improved, purchases of raw materials in particular showing an increase. Shipping freights are less depressed, iron and steel production and electrical engineering have gone up.

On the other hand bank clearances and post office receipts are down. Cotton, woolen and silk industries are not doing so well. The building trade is also depressed.

British business recovery upon the whole, though less pronounced than was the case six months ago, has thus by no means ceased.

Potato Bonus Urged For New Brunswick

Saint John, N.B.—Both permanent and temporary remedial measures for problems of New Brunswick's potato growers have been suggested here by Fred W. Pirie of Grand Falls, N.B., one of Canada's prominent shippers of seed potatoes.

The permanent solution lies in the production of more seed stock and less table stock, Mr. Pirie said, and in the employment by the Government of a staff of permanent salesmen who are expert potato growers. These salesmen-growers would visit foreign countries, introduce New Brunswick seed, and demonstrate to the growers the methods of getting the best results.

As a temporary solution, Mr. Pirie suggested that this year—and this year only—Maritime potato growers be given a bonus by the Federal Government under a scheme similar to that by which western wheat growers were assisted.

Govt. Economy

So heavy is the burden of taxation that prominent citizens in every section of the country have been protesting that it is essential to reduce the charges of government in order to bring about improved conditions. Unfortunately most of the government expenditure at the present time is uncontrollable. In the Federal field for instance, an estimated expenditure of \$445,000,000 for the year 1933-34, \$313,000,000 for the classification of "uncontrollable." This is made up of \$128,000,000 for interest charges on the national debt, \$55,000,000 to meet the Canadian National Railways deficit, \$58,000,000 for pensions and soldiers' care; \$15,000,000 for subsidies to the provinces for old age pensions and for subsidies to the provinces; \$12,000,000 for old age pensions and \$35,000,000 for unemployment relief. These items are all fixed and uncontrollable. Much of the remainder which is classified as "controllable," is actually uncontrollable, such as the salaries of the Civil Service, Members of Parliament, judges and such officials, with O. C. M. there would be no government.

F.L. 1930 controllable expenditure, \$608, has been reduced by a trifle \$34, 74th \$51,000,000.

You've been wanting to try Kruschen . . . do it now at OUR EXPENSE!

If you've been one of those who have been intending to try KRUSCHEN but haven't, then take advantage of this limited time offer. Go to your nearest drugist and ask for the Kruschen Giant Package. You get the regular generous 75c bottle plus a Free Trial Bottle.

Use the TRIAL bottle first. You'll find, like the people of 119 different countries have found, that there's nothing else quite like Kruschen.

For instance, Kruschen strikes at the usual cause of fat. It eliminates waste and poisons daily. If you have no excess fat you cannot lose weight by taking Kruschen. But you can increase your pep and energy. And you can avoid the many ills which afflict humanity because of internal sluggishness.

Kruschen costs only a few cents a week to use. Your drugist has a limited number of the Kruschen Giant Packages now in stock. And remember, if you are not thoroughly convinced of Kruschen's merits after using the trial bottle you are at liberty to return the unopened regular package to your drugist who will redeem it at full value.

SPIRIT OF CANADA

Special Day to Each Province
Feature at Royal Winter Fair.

Each Canadian province is celebrated at the Royal Winter Fair by a "day" specially dedicated to showing its products and exhibits. This linking of all Canada through common interests in agriculture and nationality was instituted at the first fair in 1922 and has been continued uninterruptedly ever since. It matches "the spirit of Canada."

The days with their mottos are:

If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods
—But All Acid-Forming.
Hence Most of Us Have "Acid Stomach" at Times. Easy
Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion . . . brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this . . . often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Try this just once! Take either the familiar liquid "PHILLIPS" or, now the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS".

Also in Tablet Form:
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS'
Milk of Magnesia
MADE IN CANADA

The Full Value of Cod Liver Oil

PLUS A QUICKER RECOVERY AFTER ILLNESS

To recover the strength and vitality exhausted by illness — we must have energy-packed nourishment that can be quickly and easily absorbed by our bodies.

Scott's Emulsion gives you greater recuperative powers because it is an easily and quickly digestible form of Cod Liver Oil in a solution of bone building hypophosphites of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE

For Sale by Your Druggist

DO YOU KNOW?

SIGN OF A FAIR DAY
That red in the western sky in the evening is supposed to be a sign of fair weather the next day.
"Evening red and morning gray"
Is the sure sign of a fair day;
Evening gray and morning red
Sends the shepherd wet to bed."

INDIAN SUMMER

Do you know the origin of "Indian Summer"?

Funk and Wagnalls New Standard Dictionary describes Indian Summer as "a period of mild weather occurring in the autumn, with haze atmosphere usually along the horizon, and a clear sky." Indian Summer is a term usually applied to any period of exceptionally fine weather occurring during October or November, but the weight of authority seems to place it in November. It is impossible to define it by exact dates. This short period of warm or mild autumn weather is characterized by an almost cloudless sky, a hazy or a smoky atmosphere, and a temperature which is mild in the daytime, but cool at night. It is preceded by "Squaw Winter"—a cold spell when the thermometer first dips below the freezing point. The name is of American origin, but is now used also in Great Britain and corresponds to the British St. Martin's Summer (St. Martin's Day being November 11) when the period occurs in November, and to St. Luke's Summer, or Little Summer of St. Luke (St. Luke's Day being October 18) when it occurs in October. In Germany it is known as "Old Woman's Summer." There is no foundation for the popular belief that the Indian Summer weather was predicted by the American Indians in conversation with the first European settlers, for the legend that the term "Indian Summer" was employed by the early settlers at all. Neither this term or anything corresponding to it is to be found in any Indian language.

HOUSE THAT JACK BUILT

Do you know the author and complete nursery rhyme "The House That Jack Built"?

Nobody knows who originated the rhyming story called "The House That Jack Built." It is described by the Funk and Wagnalls New Standard Dictionary as "an old English nursery story told in cumulative form, every preceding statement being repeated with the introduction of each new one. Similar tales occur in the Hebrew, among the native tribes of Africa, etc." Following is the nursery tale: "This is the house that Jack built. This is the malt that lay in the house that Jack built. This is the rat that ate the malt that lay in the house that Jack built. This is the cat that killed the rat that ate the malt that lay in the house that Jack built. This is the cow with the crumpled horn that tossed the dog that worried the cat that killed the rat that ate the malt that lay in the house that Jack built. This is the maiden all forlorn that milked the cow with the crumpled horn that tossed the dog that worried the cat that killed the rat that ate the malt that lay in the house that Jack built. This is the man all tattered and torn that kissed the maiden all forlorn that milked the cow with the crumpled horn that tossed the dog that worried the cat that killed the rat that ate the malt that lay in the house that Jack built. This is the fish that ate the man all tattered and torn that kissed the maiden all forlorn that milked the cow with the crumpled horn that tossed the dog that worried the cat that killed the rat that ate the malt that lay in the house that Jack built."

Best Apples on

Top of Basket

It does not pay to display the best apples on top of a basket for sale when the apples underneath are of inferior grade. At least Harry Brown of Ottawa, when he was found guilty of false representations as to the content of a basket of apples. The charge was held by Emmerson Paige, of the Department of Agriculture staff and the accused was fined \$25 and \$2 costs.

Registrar of Marriages (to youthful bridegroom): "The young lady is not a minor, is she?"
Bridegroom: "Oh, no; she works in a fish shop!"

Newspapers Used For Saturday Night Bath

Newspapers have a variety of uses besides the manufacturer's disposal of his products through advertising. In many countries they are used extensively for wrapping parcels, while in Mexico they furnish fuel for the Saturday night bath. Water is heated in cylindrical wood-burning water heaters which have a small storage capacity and fuel ranges from old newspapers to wood kindling. Cooking is done generally over charcoal burners, which is practically the only cooking stove used by the poorer classes, while practically all of the homes of the higher-income classes are equipped with grates for charcoal fires. There is no use of coal for domestic purposes and wood is only employed in open fireplaces and water heaters, and, therefore, coal and wood stores are unknown except in the area near the American border. Oil stoves are coming into greater use in recent years, the Mexican Government endeavoring to change the cooking and heating methods of the people in order to conserve the forests which have suffered serious depletion as a result of the tremendous consumption of charcoal. Electrical stoves, ovens and other heating appliances are used only by the more wealthy classes.

"The man I marry must be as brave as a lion, but not forward; handsome as Apollo, but not conceited; wise as Solomon, but meek as a lamb; a man who is kind to every woman, but loves only me." "How lucky we met!"

Dixie Plug gives pipe-smokers a fresh, satisfying and economical smoke—always! You cut each pipeful as you need it—that's freshness. You cut it to suit your taste, coarse or flake—that's satisfaction. It lasts longer in your pipe—that's economy.

PLUG SMOKING TOBACCO

RETURN TO SCENES OF WAR TIME

British Members of Hospital Units in Serbia Re-Visit Country Where They Were on "Active Service"

Three British ex-V.A.D.'s, who served in Serbia (now part of Yugoslavia) during the war and after the armistice, returned recently after 12 years' absence, on a pilgrimage to see the places and people they knew on service. The visitors were Miss Vera Holme, from Birkdale, near Liverpool; Miss Margaret Greenlee, and Miss Margaret Ker, from Scotland.

Both Miss Holme and Miss Greenlee were members of the Scottish Women's Hospital Units on active service during the War and after the Armistice, both in Serbia and on the Salonika front. Miss Ker took part in relief work in Serbia after the war.

All three left Belgrade for the last time in 1922, when their relief work came to an end. But they compacted to return together some day, and this year the opportunity came. It was before the assassination of King Alexander of Yugoslavia in March.

ROADS CHANGED.
Miss Holme, who was an ambulance and lorry driver on the Balkan and Bessarabian fronts from early 1915 until late 1917, said her first impression on re-visiting Belgrade was "a changed condition of the roads." "Those war-time roads," she exclaimed. "When we were here practically no roads existed such as the mud. Sometimes we were stuck all night in the mud, miles from anywhere. Sometimes the roads were so bad and full of holes, one actually tried the open country instead. Do you remember those roads, Margaret Greenlee? . . . And now today, the roads everywhere are fine, modern ones, and Belgrade is simply unrecognizable for new buildings."

SERBIA'S PART
"We love Serbia," declared Miss Holme, "and that is why we have come back. Somehow many people in England seem to have forgotten all about Serbia and the brave, gallant things she did in the war. But we have not forgotten."

"Not everybody remembers either today what British women did out here. Some thousands of British women must have served on the Serbian fronts during the war. Figures like Dr. Elsie Inglis, Lady Berridge, Hon. Evelyn Haverford—all of whom are dead now—and Dr. Emile-Hutton, and Dr. Katherine Plish this purpose. Every driver's license law, moreover, might well require that a record of any convictions of the licensee for unsafe driving be written on his card. This record need not be presented in court, but it does afford pertinent information to a traffic officer and will result in greater

certainty of reporting habitual offenders to the licensing authorities. Now it may be that some of these persons are not willful offenders but merely incompetent drivers. That distinction does not lessen the damage they may inflict. Such persons should resolve either to improve their driving or else forego that privilege. For driving is a privilege, and should be treated as such.

U.S. Newspaper Advertising Gains in September

Chicago—An increase in retail advertising of nearly 5,000,000 lines was the big feature of September in the newspaper advertising field, an analysis by Advertising Age of figures based on advertising activity in 77 cities reveals.

The total volume of advertising in the newspapers compared in September was 135,068,000 lines, a gain of 4,132,000 compared with the corresponding month of last year. But classified, which gained over 1,100,000 lines, another reflection of increased business activity, was the only classification besides retail to show a gain.

General advertising declined slightly to 23,000,000 lines, the loss being less than 1 per cent, however. Automotive advertising, which made a big increase in August, was off 10.5 per cent, the total for September being 6,527,000 lines. Financial was also slightly below last year with a total of 5,562,000 lines, a decrease of 5.5 per cent.

PREVENTS MINERAL DEFICIENCY

Grand Champion
"Oakland Field Countess"

THE KEY TO PROFIT

Doesn't it make you feel good to see your animals responding to their feed like a spirited horse to the reins — paying you back generously for every ounce of feed with real progress, productivity and P-R-O-F-I-T? No over-feeding—no bone chewing—the routine of low cost, by using a C-I-L Mineral supplement! You cannot have that kind of response unless your animals are getting sufficient calcium, phosphorus and other essential minerals! Make it a certainty—banish all risks at low cost by using a C-I-L Mineral supplement! Write for free folders telling you how you can turn mineral deficient, doubtful animals into real profit makers!

C-I-L NUTRI-MIN

100% available and digestible. Di-calcium phosphate (bone derived) the wholly digestible, naturally balanced, concentrated calcium-phosphorus salt combined with other minerals supplying iron, iodine, sodium and chlorine.

C-I-L SOL-MIN (Soluble Minerals)

The entire mineral portion of bone, specially processed to secure digestibility, and balanced with other essential minerals. Contains phosphorus, calcium, iodine, sodium, chlorine, iron and sulphur.

CLOSING OF THE INDUSTRIAL SCHOOL

Mr. W. Ed. Stimers Tells of Good Work Carried On at the Victoria Industrial School at Mimico.

(From The Toronto Telegram)
Declared by an authoritative source to be due to lack of funds, Mimico Industrial School will be closed on December 1st and all the inmates, numbering about 160, will be distributed among similar institutions in the province, it was learned today.

It is understood that the first shift will take place today with some forty boys being transferred from the school to the Boys' Training School at Bowmanville. It was also learned that members of the board of management, headed by H. G. Stapells, chairman, had turned in their resignation to the Government.

With the closing of the school it was learned that Captain W. G. Green, superintendent of the school, will go to Bowmanville as deputy superintendent of school there, while W. G. Pettigrew, deputy superintendent of the Mimico School, has been offered the post of visiting inspector. Some other twenty employees of the institution will be dismissed, it was learned.

Captain Green was appointed superintendent of the school in July of 1933, coming from Hamilton where he supervised the Boys' Handicraft School. He filled the vacancy caused by the resignation of Chester Ferrier who superintended the Mimico school for 36 years. Captain Green refused to discuss the closing of the school referring his interviewer to Mr. Sor-soliel.

Founded in 1887

During past years the school had a population of 250 to 300 inmates, but for the past months only 160 boys were in the school, which had its founding way back in 1887 by the late W. H. Howland. One of the backers of the school was the late Beverly Jones, K.C., who served a number of years as president and took a vital interest in the work there of reclaiming wayward boys.

In June of 1933, Mr. Jones was signally honoured by the boys of the school by whom he was looked upon as "father" when he was presented with a huge birthday cake baked by the inmates in the cooking department bearing 94 birthday candles.

Many thousands of wayward lads suffering from street association and lack of home training have passed through its portals with an average of 75 to 80 per cent. being shown the error of their ways and turning out to be fine and useful citizens. The work was carried on quietly with no ballyhoo and the public heard little of the battle that was being waged by the group of officials in reclaiming wayward boys, but the importance of the work was beyond calculation.

Much Good Accomplished

The boys on entering the school found a good education provided, a useful occupation, in some line of trades; regulated hours of rest and recreation, and every effort made to awaken spiritual life and create higher ideals and realization of obligation to others. That this work was accomplished is borne out by the hundreds of testimonials and letters from former inmates and their parents who now hold high positions in cities and towns all over the continent.

Among the many things taught at the school during the regime of Mr. Ferrier was shoemaking, tailoring, printing, carpentering, stationary engineering, farming and gardening, painting and decorating and many other trades. A number of these trades were abolished when Captain Green took charge, it was stated, and a system similar to English boarding schools introduced on a rotating plan. The school was inaugurated by the late William Howland, one time mayor of Toronto, who took a great interest in aiding unfortunate people, "who never had a chance." It is reported that he made regular Sunday morning visits to the city gaol to talk to the prisoners and that he became worried on account of the large number of young boys who mingled with the older lawbreakers. It was before the days of juvenile courts and children's aid organizations and he became interested in the problem.

Covered 62 Acres

Aided by other kind-hearted men, who thought as he did, it was after much effort that the Victoria Industrial School came into being. It took the name of the ruling sovereign of the time, Queen Victoria. The school was intended as part home and part school with training in some trade so that the boys would not have the stigma of a prison. The first inmate was entered at the school on June 14, 1887, and during its first ten years of existence, 527 boys were registered there. The school from its humble beginning has seen many changes until at the present time it occupies sixty-two acres of ground working on a system which has been steadily improved over the years.

The school is maintained by the Government which pays 50 per cent of the cost of keeping the inmates with the municipality sending the boy supplying the other 50 per cent. Donations and honorary memberships also aided in maintaining the school.

With the arrival of Captain Green, new systems were introduced and old ones discarded which resulted in the resignation of several of the officials of the school. One of these was W. Edward Stimers, superintendent of the printing department for 16 years, who resigned on May 1st last.

Printing Won Commendation

During his regime, boys were trained in the printing department in all angles of the trade which resulted in the department turning out some of the finest of printing work which won commendation all over Canada and the United States. A monthly school magazine was edited and printed by the boys as was the annual report of the school. Both were fine samples of the printers' art which won admiration from near and far.

Mr. Stimers also did extensive cru-

MR. W. ED. STIMERS

Trentonian, who for many years was superintendent in charge of the printing department at the Victoria Industrial School, where boys are taught the printing trade.

sading work on behalf of the school extolling its fine points to clubs and organizations throughout Ontario and did much in correcting impressions that the school was a prison and a "hell-hole" for boys.

Another of the officials who resigned was Frederick Pedlar, whose department of instruction of music

and singing to the boys was also abolished about a year ago. Mr. Pedlar conducted the boys' bagpipe band and singing choir which won high efficiency in musical circles of the province.

Cluster Ferrier, former superintendent, refused to make any comment on the wisdom of the closing of the school, but admitted he had a personal feeling for the officials with whom he worked for so many years being let out of their jobs. "It's like losing an old friend," he said, "to hear that these former co-workers who gave their best and co-operated with me to the utmost are now going to be out of a job," he told The Telegram.

"Ed" Stimers was for a number of years printer in the old Advocate printing business, then owned by Ex-Mayor P. J. O'Rourke. Later he was associated with the founder of The Quinte Sun, in the publication of The Canadian Graphic at Toronto.

Mr. Stimers on one or more occasions addressed the Trenton Rotary Club on the work carried on at the school.

JUST A MINUTE, MR. CROLL

(From The Woodstock Sentinel-Review.)

It is not expected of new cabinet ministers that they shall, immediately upon entering office, or for a long time to come, know all about every-

thing that comes under their administration. It is reasonable to expect that they shall take no drastic action until they are conversant at least with the fundamentals of existing organization. Hon. David Croll, Minister of Public Welfare for Ontario, will have made a serious error if he is not headed off in his announced intention to transfer inmates of the Industrial School at Mimico to the Boys' Training School at Bowmanville.

These are institutions of vastly different purpose, dealing with boys of different type and necessarily administered along lines differing greatly.

If the minister chooses to waive aside these considerations, there remain certain obligations to the public, undertaken by the Ferguson Government and maintained by the late Hon. Lincoln Goldie and Hon. W. G. Martin throughout the years.

From the outset it was agreed that boys were not to be admitted to the Bowmanville School on commitment from magistrates' courts—the Mimico and other institutions are for that purpose. The primary purpose of the Bowmanville School was to save merely unruly youngsters from becoming delinquents and from the stigma of police court and commitment to an industrial school.

In the words of the current report

of the department: "The training school is a unique institution in the chain of reformatory organizations of the province. It receives from the social working groups, service clubs, juvenile courts, and even from parents, those children from 10 to 16 years of age who threaten to become delinquent and who have failed to respond satisfactorily to the efforts put forth on their behalf. With the child transferred to a new environment—the school—and with the socializing effort approaching the task from a new angle, an encouragingly large number of these adolescents are stabilized and saved from delinquency."

The report shows 102 boys discharged during the year under review of whom 55 returned home to attend school, 16 were placed in foster homes, 14 on farms, six returned to Children's Aid Societies, six transferred to other institutions and four placed in miscellaneous positions. Wardship was released during the year on 63 boys who had been under supervision.

At the outset, the project enlisted the interest of service clubs throughout the province. The first 100 acres of the property was donated by a Bowmanville Rotarian. Rotary clubs of Ontario provided the money to build and equip the gymnasium; Woodstock Rotary Club gave \$500.

An Eastern Ontario newspaper remarks: "If there is no difference between the boys at the Mimico and Bowmanville schools, as Mr. Croll says, the latter has been operating under false colors for years and the service clubs have been the goats." The opinion that if the minister is to be guilty of this gross breach of trust, and conduct the Bowmanville school as an institution for dealing with all juvenile offenders, including those sentenced by magistrates, there is a moral obligation on the part of the government to return to the service clubs the large sums donated by them.

For The Busy Farmer

Furnished by the
Ontario Department of Agriculture

Manitowlin Island will contribute its share of turkeys again for the Christmas season. A survey indicates that the number of birds on market will be about the same as last year when 50,000 pounds were marketed by the co-operative association.

Reduction of one-half per cent. in interest on loans made by the Ontario Agricultural Board has been announced by Premier Hepburn. The interest in future will be only four per cent. compared with the previous rate of four and a half.

Timothy Rust

If the severity of rust attacks on timothy in the past breeding nursery, Central Experimental Farm, Ottawa, is any indication of the amount of damage which may result from this disease throughout the country, then the efforts which are being made to develop rust resistant varieties of timothy should result in considerable benefit to the grower. Most of the plants from commercial seed at the Central Farm have been practically destroyed by rust during the past two years and many others have been more or less injured. In marked contrast are the plants and strains selected for rust resistance. These show no rust whatsoever, and in consequence they have made a strong, vigorous growth. Only rust resistant selections are being used as parent plants in breeding new varieties of timothy. At the same time, an effort is being made to determine the losses due to rust on timothy as it is grown in farm practice.

Replace Apple Trees

Agricultural Societies in Grey and Bruce are to be commended for giving leadership in the very worthwhile project of replacing apple trees killed last winter, states J. A. Carroll of the Ontario Department of Agriculture. At an Agricultural Society District Meeting in Paisley, November 8th, discussion revealed some agricultural societies were not only recommending that apple trees be planted, but were prepared to give advice on suitable stocks and also arrange club orders from reliable nurseries to take advantage of special rates. This is another indication how the agricultural societies may assume responsibility for agricultural welfare in their respective communities.

New Home Ready For Chicago Stock Show

Finishing touches are now being made on the mammoth new home for the International Live Stock Exposition, which will celebrate its 35th anniversary at the Chicago Stock Yards from December 1 to December 8. When completed, it will be the finest structure in the world devoted to such uses. The central section, or amphitheatre, will seat nearly double the number who could be accommodated in the old building which was destroyed in the fire which swept the Chicago Stock Yards last May.

The foremost herds and flocks from every state in the Union and provinces of Canada will contest the continental championships of their kind at the 1934 Exposition. According to the management, entries closing on November 1st were the biggest in the history of this largest of the continent's agricultural shows, where over 12,000 animals were exhibited last year.

British Apple Market

Only very small quantities of Ontario apples have been arriving in the United Kingdom, according to Mr. Andrew Fulton, overseas fruit representative, reports that since arriving in England a few weeks ago he has found the principal markets all heavily loaded with cheap English apples, with the result that ordinary quality Canadian apples are selling at unusually low prices. On the other hand, Ontario dessert apples of out-standing quality and colour are meeting a good demand in Glasgow, Liverpool and the south of England. While seeing no hope for cooking apples or any variety short of colour making any sale, Mr. Fulton is for the New Year, Mr. Fulton is favourably impressed with the immediate prospects for red dessert apples, providing that value ranging from 22 to 24 shillings are sufficient to remunerate the shippers as a whole. In other words, if shippers cannot get higher prices in the immediate future, they will have to make sales in Ontario for such varieties as Snows, Scarlet and McIntosh at about \$3.50 to \$4.00 a bushel. In other words, it looks like good business to sell locally.

He advises Ontario shippers to place such varieties as Baldwin, Golden, Greenings and Starks with shredded oil paper and place them in cold storage until they are required after the New Year. There is no doubt that good quality apples are going to be scarce and will make good values before the season is finished.

The English apple crop is the largest in many years; the quality is generally very good, though practically every market has more than its share of inferior grades. Values are extremely low, a fact that is influencing the price of Canadian coloured apples.

Ontario Bartlets have met an unfavourable market. The pears have landed in excellent condition, but unfortunately many of them are very small this season, with the result that the market has not been as good as if they had been larger. English pears are quite plentiful, as well as English plums.

BRITISH APPLE MARKET

Scouting in the Land of Egypt

The Egyptian Parliament has recognized the Boy Scouts of that country by passing a law protecting their titles and badges.

Norse Scout Code Same as Canadian

The Norwegian Boy Scouts Association has changed the order of its code of Scout Laws to correspond with that used throughout the British Empire.

Swedish Prince Takes Scout Training

Boy Scout leaders attending training camps in England this summer included H.R.H. Prince Gustaf Adolf of Sweden. The Prince is president of the Swedish Scout Council.

Winter Sports at Swiss Scout Châlet

The international Scout Châlet at Kandersteg, Switzerland, will be open for parties of Scouts wishing to take part in winter sports from December 22 to January 6th.

Pigs being grown during the winter months sometimes develop an unhealthy condition, resulting from a deficient deficiency of some of the vital food elements. Such animals can often be brought into better condition by feeding cod liver oil. If trouble is anticipated, small doses of the oil will probably correct any tendency to a rachitic condition.

Preparing Turkeys

Turkey growers are now beginning to finish or fatten their birds for the Christmas holidays. It is customary to begin the process of preparing the luscious turkeys for the nation's festive dinner tables by feeding them small amounts of grain which are gradually increased until the birds are on full feed. Due to the large supply of wheat available, this grain should be used to advantage in the fattening ration. Wheat has nearly the same fattening qualities as corn, but does not produce the rich yellow colour of flesh that yellow corn does. It is important, however, that all grains be free from moldiness and they should be fed in order to counteract certain diseases that cause heavy loss. Do not confine turkeys for fattening if they have been run on a range, for range birds cannot stand confinement.

32 Boys' and Girls' Farm Teams Competed at the Royal Fair

In the annual National Club Contests in connection with the Boys' and Girls' Farm Club movement thirty-two club teams of two members each representing all of the Provinces of the Dominion, competed in several live stock and field crop projects at the Royal Winter Fair in Toronto, last week. The actual contests were conducted on November 20 and the sixty-four contestants remained in Toronto until Friday evening, November 30, visiting the Royal Winter Fair and other points of interest under the direction of the Canadian Council on Boys' and Girls' Club work. These club teams earned the right to compete in Toronto by winning their respective provincial elimination contests.

An unusual feature of these contests was the inclusion of an oral examination with a judging competition to form the complete contest in each of the projects. Included in the national contest program after several years' experience, it is felt that this form of contest provides an opportunity to measure the general ability and knowledge of the contestants and, in turn, has the effect of encouraging, on the part of the club members, more thorough study of the projects.

Reports for 1934 show a total of 1544 fully organized boys' and girls' farm clubs in Canada with a total enrolment of 26,700 members. The projects undertaken include a variety of farm activities under the general headings of live stock, poultry, field crops and home economics. The results that are being obtained are significant and it is widely recognized reaching economic and educational importance.

Canada Blue Grass—This seed was practically a failure this year due to drought in Southwestern Ontario, where its production is largely confined.

To Train Young Farmers Under the auspices of the Workers' Educational Association of Ontario, University of Toronto, a two-week school for young farmers has been arranged, commencing Monday, November 26th, in the Department of Economics, University of Toronto. The object of the school is to develop the latent talent for leadership among young men and women on the farm so that they may fill important places in their respective communities in developing an understanding of the economic position of Agriculture and its relation to the general field of Canadian and International Economics. It is hoped that the success of this school will result in the formation of County schools and also of study circles in each rural community.

The school will meet for two sessions each day, morning and afternoon, at the University. At the close of each evening an interesting address will be delivered by prominent educationalists and others.

It is proposed to limit the number of successful applicants, everyone who wishes to attend should send in an application now.

Co-operating with the Worker's Educational Association in the promotion of this Agricultural Varsity are the New Canada Movement, United Farmers of Ontario, Junior Farmer's Association, and the Co-operative Union.

The cost, apart from living expenses, will be a registration fee of one dollar.

Applications should be mailed to Donald R. McLean, Muirkirk, chairman of the Organizing Committee, or Drummond Wren, Secretary of the Workers' Educational Association, University of Toronto.

The second estimate of wheat production in the Prairie Provinces for 1934 is two and a half bushels lower than the preliminary estimate of 385 million bushels made on September 11th last.

In the Boys' and Girls' Farm Clubs competition at the Royal Winter Fair, Ontario carried off the trophy in the Dairy Cattle project, through the Markham Dairy Club, and also the trophy in the Seed project through the Durham County Boys' Grain Club.

Why Burn Straw Stacks?

When with the use of suitable chemicals they can be converted into manure the question "Why burn straw stacks?" is really pertinent. Straw is worth something more than as a bedding material, and not the least valuable is its use for the making of artificial manure. The use of 100 pounds of ammonium sulphate and 100 pounds of lime to each ton of straw, and this thoroughly soaked with water, produces a manure of distinct fertilizer value. From three to six months are required for the organic changes to become effective and the resultant substance has much of the appearance and practically the same value as barnyard manure.

Grain Class Winners

The Grain Class, open to Agricultural Societies at the recent Ottawa Winter Fair resulted in very keen competition among Societies in Eastern Ontario, where the production of high class grain has developed so rapidly in recent years.

The purpose of the competition was to encourage the Society to foster the production of different kinds of high class seed grain by its members.

The Royal Agricultural Society was awarded first position, with a total of 450 points of a possible 500. The lots of peas, barley, alfalfa and oats each scored over 90 per cent, wheat alone fell slightly below this high standard.

The leading Societies were placed as follows:

- 1st—Renfrew Society, 450 points.
- 2nd—Pakenham Society, 439 pts.
- 3rd—Larp Society, 434 points.
- 4th—Vankleek Hill Society, 422 points.
- 5th—Drummond Society, 420 points.

Burning Stubble

When stubble has been burned off and the land again seeded, a minimum amount of cultivation, the yields of grain have proven this method to be superior to any other treatment. Objections to the burning of stubble are loss of nitrogen, loss of moisture, and some loss of soil fertility; while supporting the practice are weed control, clean crop and convenience.

Potatoes for Poultry

Farming increases in value as an occupation just in proportion to the extent to which it can be conducted as can be marketed at a profit. Not only must the farmer sell his good quality products at a fair price, but he must also find a market for as much of the crop as possible. It has been found that greater profit per bird can be made and a finished bird of finer quality and flavor produced through crate-feeding on a ration of cooked parts of middlings, rolled oats, boiled potatoes and skim-milk than is the case where corn is fed. Potatoes, finely ground or boiled, are proving exceptionally good for fattening poultry, particularly when fed in conjunction with the "white" grains and milk. Crate-feeding poultry offers a really attractive market outlet for cull potatoes.

Cod Liver Oil and Cattle

Cod liver oil has never attained very great prominence in supplementing the rations of the larger farm animals because the nutrients which it can supply or help to make available, can be procured almost equally well, and much more cheaply, from the ordinary farm live stock feeds, with a minimum of purchased supplements such as protein feeds and minerals.

There are some occasions, however, when cod liver oil constitutes a valuable feed for the larger farm animals.

HEALTH

WHAT HAPPENS?

Results are what count. We frantically give attention to those things which we hope will bring about the desired results, but our real interest is not in the training for the race, but what happens at the race—the result.

To have strength and vigour, you must eat the right kind of foods. It is not the foods which you are interested, but rather what happens to these foods. Will they give you the life more pleasurable for you?

The mouth is more than a receptacle for food. It is a mill where the food is ground up and the digestive juices may get at the little pieces more easily. While the teeth are grinding, saliva is mixed in with the food, not only to lubricate the way and to make swallowing easy, but to start the digestion of starches.

The only acid secretion of the body is found in the stomach. Those who would have real relief for complaint if their stomach were not acid. It is acid gastric juice which begins the digestion of meats and other protein foods. Those who have feared to eat cream on their acid fruits, for fear of curdling, will be relieved to know that there is a substance—rennin—in the gastric juice which curdles milk in preparation for its digestion later on.

The stomach contracts and mixes the foods with its digestive juices. But it is the protein foods which are chiefly changed. Sugars, starches and fats are not digested in the stomach. These are not believed that bread and potatoes should not be eaten in the same meal as meat, fish or fowl, argue that the presence of these two kinds of foods—proteins and carbohydrates—interferes with each other's digestion. There is no scientific evidence to support this argument, while there is such evidence to show that gastric digestion is improved when the two are mixed.

The foods leave the stomach well-mixed and ready for the major part of digestion which occurs in the small intestine. There the surroundings are alkaline and there are present a number of digestive juices from the pancreas, liver and intestine itself. It is the small intestine which completes the work by converting the foods into those simple elements which can be absorbed into the blood stream. They are then carried in the tissues of the body, which tissues build up from these same simple elements their own complex structure.

What is not absorbed is passed along to the large intestine, and some further absorption there takes place. The waste collects low down in the large bowel or colon, whence it is expelled at intervals, thus ridding the body of useless waste material.

NATURAL REMEDIES

Look around you and think; for a few minutes, about these things which are used in their natural state. The chair on which you sit and the table from which you eat are made from wood, a natural product; but they are fashioned by man into something that is better adapted for man's use.

The electric current, which serves so many purposes, comes indirectly from coal taken out of the ground, or from power generated by water wheels. Man has found electricity to be more useful in some ways than the coal itself or the old water wheel. We could go on and on to show how man, by using his intelligence, has been able to take the products of mother earth and from them, to fashion many things for his use and comfort.

Why is it then that there lurks in the minds of so many people a faith in what they call "natural remedies" as distinct from those which are prepared by man? Why is it that many believe that primitive peoples know so much about the curing of disease by the means of plants and herbs? Have these same primitive peoples once suggested that they are likely to be learned in the science of pharmacology?

When the old-time medicine man toured the country, he usually carried with him some remedy which supposedly had come to him, in some mysterious way, through the Indians, or from some far-away land. Often this concoction was called a "tonic" or a "blood-purifier." These were the days when blood was described as being "thin" or "bad," when spring tonics and the cleansing of the blood was accepted as necessary, if unpleasant, adjuncts to the awakening of nature after the cold winter season. Strange to say, these remedies were supposed to come from peoples or countries which were not notoriously healthy.

There is nothing wrong with plants and herbs; indeed, there is much good in them. The field of science, in its inherent magic curative power in the products of the earth. In this, as in other fields, man has learned to take these products and to improve them in various ways in order that they may be used effectively in the treatment of disease. Nor is man limited to plants and herbs in the preparation of healing substances. There is no remedy growing out of the earth for diabetes or diabetes, but man has produced antitoxin and insulin for their treatment. We progress through the use of our intelligence, not by looking to the ignorant for help.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

THE FRANKFORD SUN

FRANKFORD NEWS

FRANKFORD, ONTARIO, DECEMBER 1, 1934

Mrs. George Rogers is visiting Dr. and Mrs. J. Simmons of Elmira.

Mrs. and Mrs. H. Slingerland have been visiting friends in Toronto.

Mrs. A. Hadley and Miss Ruby Hadley spent the week-end in Toronto.

Mr. and Mrs. H. J. Madill and sons were guests of Mr. and Mrs. J. Shurtle at Trenton on Sunday.

Mrs. S. Herrington who has been visiting friends in Wooler, has returned home.

Rev. T. H. H. Hall and Mr. Crawford Hall of Belleville, were guests of Mr. and Mrs. W. N. Simmons on Sunday.

Mrs. Mikel, who has been a guest of her sister, Mrs. Parker Connel, for some weeks, has returned to her home in Colborne.

Mrs. D. W. Gullett of Picton, and Mr. John Windover of Prescott, spent a few days at the end of the week with their mother, Mrs. A. Windover.

Rev. T. H. H. Hall conducted the morning service in Trinity Church, Frankford, on Sunday, preaching a special missionary sermon.

Dr. E. J. Countryman, who came east to attend the funeral of his mother, Mrs. Margaret Breakal, left for his home in Grafton, North Dakota, on Monday.

Relatives and friends from out of town who attended the funeral of late Mrs. Margaret Breakal on Sunday were: Mr. John Moore, Mr. and Mrs. James Moore and Mrs. E. Burnside of Queensboro; Mr. and Mrs. H. Tucker, Mr. and Mrs. W. Countryman, Mr. John Countryman of Tweed; Mr. James Hunter, Mrs. Alex Hunter and Mrs. Donely of Bancroft; Mr. and Mrs. Black and Mrs. George Simmons, Belleville; Mr. Walter Benedict of Hamilton and Mrs. Walter Roberts of Toronto.

TRINITY CHURCH

GUILD REGULAR MEETING

The regular meeting of Trinity Church Guild was held on Wednesday afternoon in the Parish Hall, Frankford, with the president, Mrs. E. E. Ketcheson, in the chair. The meeting opened with a hymn "Stand Up, Stand Up for Jesus" followed by Scriptural reading and prayer by the president.

The minutes of last meeting were read and approved, also an excellent treasurer's report, showing the Fall objective to have been passed. The roll call showed an unusually large attendance.

Several letters were read by the secretary, Mrs. May Price, in answer to letters of condolence sent to members recently bereaved, also thanking the Guild for flowers received on Remembrance day.

The business period followed and a date was set for the party to be given the winning team in the copper contest.

The meeting was closed by Rev. A. S. McConnell and delicious refreshments served by Mrs. May Frost and Mrs. Thos. Birkett.

WINNERS IN COPPER

CONTEST ENTERTAINED

A most delightful party was held in the Trinity Parish Hall, Frankford, on Wednesday afternoon when the winners in the copper contest were entertained by the members of the opposing group.

Progressive cards were enjoyed during the afternoon, after which delicious refreshments were served.

Mrs. Caskey, leader of the winning group, moved a vote of appreciation to Mrs. A. Ferguson and her group for the enjoyable party they had given them, and finished by saying she was like the little girl who, in returning home from her first party and being asked how she had enjoyed herself, said, "Oh, I had a lovely time and ever so much more to eat than I expected."

PULP MILL

RESUMES OPERATIONS

The Frankford Pulp Mill resumed operations on Tuesday of the same day, officials of the Gair Co. and Mr. Kerry of Toronto, made a tour of inspection of the mill and other property.

FRANKFORD, R. R. NO. 4

The Sanborn home had visitors from Toronto on Sunday.

Arthur Orr moved into Mrs. N. Bates' house this week.

Mrs. George Wrightman and Ralph returned from Quebec early this week.

Surely the weather, though dark and cloudy at times, is warm for this time of year.

Thursday this week our public schools were closed on account of the royal wedding overseas.

Mr. J. Forge and Marguerite Chase were united in marriage early this week and were away on a wedding trip.

The Murray township stone crusher is working south of Stockdale. The rock will be used to patch up needy roads.

Fred Palmer, it is understood, has purchased the lot known as the Bowman property, in Stockdale village, and will build a house on it.

The funeral service of the late Mrs. A. Wannamaker was held on Monday in the United Church, followed by interment in Stockdale cemetery. Relatives attended from Warkworth, Toronto, Belleville, including her son Morley and grand-daughter Jean from Brantford, as well as from near-by places. The church was filled. Rev. Mr. Shadboldt and Rev. J. F. Lane conducted a very impressive service.

MRS. MARGARET BREAKAL

AGED FRANKFORD

RESIDENT, PASSES AWAY

Frankford has lost one of its oldest and most beloved citizens, Mrs. Margaret Breakal, who passed peacefully to rest on November 22, 1934. Mrs. Breakal was born at Brookside, county of Fermanagh, Ireland, March 23, 1843. She came to Canada when 15 years old and resided in Elziver township, Hastings County, until 28 years ago when she came to Frankford, where she has resided with her daughter, Mrs. W. E. Windover.

She was a faithful and valued member of the United Church and an earnest worker, having taught classes of boys in Sunday School for many years. Many of those boys remember with gratitude the helpfulness of this sainted, Christian teacher.

The funeral was held on Sunday, November 25th, with interment in the Frankford cemetery. The service was conducted by her pastor, Rev. J. F. Lane, assisted by Rev. A. S. McConnell of the Anglican Church, Mr. McConnell, in quite recent years, came from the same community in Ireland from which Mrs. Breakal formerly came.

Left to mourn her passing are one daughter, Mrs. W. E. Windover, of Frankford, and two sons, Dr. J. E. Countryman, Grafton, N.D., and G. H. Countryman, Fergus Falls, Minn.

Now the labourer's task is o'er;
Now the battle day is past;
Now upon the farther shore
Lands the voyager at last.

There the tears of earth are dried;
There its hidden things are clear;
There the work of life is tried
By a juster Judge than here.

"Earth to earth, and dust to dust";
Calmly now the words we say;
Left behind, we wait in trust
For the Resurrection day.

Father, in Thy gracious keeping
Leave we now Thy servant
Sleeping.

BAY OF QUINTE

WOMEN'S INSTITUTE

Regular Meeting Held at Home of Mrs. McEwen—Mrs. Fred Wilson in Charge of Programme.

The Bay of Quinte Branch of the W. I. held its regular meeting on November 21st at the home of Mrs. McEwen. A goodly number were present.

The business of the month was transacted and it was decided that for December Roll Call, a donation for the Children's Shelter would be received.

Mrs. Fred Wilson was in charge of the following programme:

A song by Mrs. G. Clapp.

The report of Belleville district convention was given by the delegate.

A piano trio by Mrs. Grills, Mrs. Hamilton and Miss Wheeler was much enjoyed by all.

Readings, by Mrs. Frost and Miss M. Reid.

The prize for the contest, "Something made from a yard of cotton" was won by Mrs. Frost.

The meeting closed by singing God Save the King and lunch was served by Mrs. McEwen and committee.

WHITE'S UNITED

CHURCH YOUNG

PEOPLE'S SOCIETY

The Young People of White's Church met on Wednesday evening, November 14th, 1934, for the purpose of organizing a Young People's Society.

The meeting opened with the singing of a hymn, Scripture reading and prayer by the pastor, Rev. James A. Plant.

After a brief talk from the pastor, setting forth the needs and objects of a Young People's Society, the following officers and committees were appointed. The election resulted as follows:

Elsie Hunt, President; Edith Harry, Vice-President; Cecil Jeffrey, Secretary; Jack Ketcheson, Treasurer; Eleanor Saylor, Organist.

Devotional Committee: Elsie Hunt, Edith Harry, Eleanor Saylor.

Literary Committee: Mrs. H. De Mill, Margaret Green, Mary Rush, Norman Hunt, Norman Yatem, Norman Fair.

Missionary Committee: Alice Fair, Gladys Rush, Gladys Rush, Ila Myers, Ila Fair.

Sick and Look-out Committee: Billy Ketcheson, George Bonisteel, Alice Fair, Edith Harry, Clifford Fair.

Meetings will be held every Wednesday evening at 8 o'clock sharp, in the following order: First Wednesday, Devotional; second, Literary; third, Missionary; fourth, Social.

The Poor General

A kindly old general, an ardent horseman, used to visit the hospital every Sunday while in an Indian command. "What's your trouble?" he asked a junior officer patient.

"Fell off my motor bike, sir," replied the subaltern.

"You would do much better," observed the general, "to tell the noisy, smelly thing and get a pony. Then you wouldn't be wasting your time in hospital."

He turned to the occupant of the next bed. "Well, and what's the matter with you?"

"Fell off my horse, sir!"

CONTEST FOR REEVE

AND COUNCILLORS

D. R. Ketcheson and J. B. Patrick for Frankford Reeve—Ship—Five Run for Councillors.

At a well attended meeting the nominations for reeve, councillors and school trustees were held on Monday evening last in the Municipal Hall.

Mr. W. N. Simmons, clerk of the municipality, received nominations until 8.30 p.m., when he declared the nominations closed.

Five were nominated for Reeve, as follows:

Darcy Roblin Ketcheson, by W. J. Gallagher and D. Vandervoort.

John Blake Patrick, by Thos. Sullivan and Harry Lawrence.

George W. Arnott, by Robert McLeod and James Downs.

James Bowen Ford, by Thos. Sullivan and J. E. Finnigan.

Hugh T. Miller, by Hugh Patrick and G. Reid.

For Councillors:

Arthur Ferguson, by Ed. Howard and Geo. Montgomery.

Cyril Ross Turley, by Thos. Sullivan and J. B. Patrick.

Angus Bert Loney, by Thos. Sullivan and N. W. Mabey.

Isaac Striker, by M. O'Malley and R. Embury.

Gerald W. Dickson, by Archie Redgers and Ed. Howard.

Thomas Henry Sweetman, by B. K. Arnott and George Chard.

Charles W. Scott, by J. E. Prentice and George N. Spencer.

George Nelson Spencer, by H. T. Miller and Thos. Burkill.

Arthur John Sprague, by J. M. Bell and J. B. Ford.

For School Trustees:

Russell Embury, by C. R. Turley and H. Harrison.

Dr. J. R. Vining, by Hugh Miller and Thos. Burkill.

H. J. Madill, by Hugh Miller and Thos. Burkill.

Judson Sine, by Harold Terry and N. W. Mabey.

D. O. Leavitt, by George Spencer and J. E. Prentice.

Charles W. Scott, by Geo. Spencer and J. E. Prentice.

W. Floyd Ketcheson, by J. J. Macaulay and Gerald Turley.

G. N. Conley, by L. M. Hendrick and H. Harrison.

Walter C. Morrow, by W. A. Rose and M. Sarles.

The Candidates:

Those who qualified for Reeve are: Darcy Roblin Ketcheson, John Blake Patrick.

Those who qualified for Councillors are: Angus Bert Loney, Gerald W. Dickson, Thomas Henry Sweetman, George Nelson Spencer, Cyril Ross Turley.

An election will be held on Monday, December 3rd.

School Trustees by Acclamation

Those who qualified for School Trustees are: Russell Embury, Dr. Judson R. Vining, W. Floyd Ketcheson.

HILLIER

Miss Margaret Vandewater was the week-end guest of Miss Agnes Palmer. Congratulations to Mr. Cyril Short, Toronto, and Mr. M. Marjorie, who were recently married in Wellington.

Mr. and Mrs. C. L. Jones were dinner guests of Mr. and Mrs. Alex Ratray, Coneseon, on Thursday.

Mr. and Mrs. Harry Fritz spent Sunday with Mr. and Mrs. Wm. Cox, East Wellington.

Mr. and Mrs. Sherman Foster and children and Mrs. Sherwin, visited relatives in Warkworth on Friday.

Miss Anne Lloyd, of Buffalo, N.Y., has gone to Los Angeles, Cal., for a time.

County schools closed on Thursday, it being the wedding of the Duke of Kent and Princess Marina.

Congratulations to Mr. and Mrs. Floyd Smith on the arrival of a fine baby boy.

Rev. Mr. Grant, of Bancroft, exchanged parishes with Rev. J. M. Brownlie for the mission services on Sunday last.

Congratulations to Mr. Roy Cassidy and Miss Gladys Weil, who were recently married by Rev. J. M. Brownlie in St. Andrew's Church, Wellington.

About one hundred guests attended a shower at her home. The gifts were many and beautiful.

The annual bazaar of Christ Church was held in the town hall on Saturday evening. A good crowd attended and a jolly time was spent by all present.

Mr. J. Dorland of Wellington, won the Chesley blanket donated by Mrs. Fred Morton. Over \$75 was realized from all sources.

STEADY PROGRESS

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has the Family Herald and Weekly Star. This is not strange, for it is evident that in times of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes and they find in the Family Herald and Weekly Star a paper which, at \$1.00 per year, gives them every variety of reading, for old and young, all combined in this one publication.

Every issue overflows with practical farming ideas, up-to-the-minute articles, short stories together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been said that the Family Herald and Weekly Star is the best for the least.

Mrs. Brown: "I saw a young man trying to kiss your daughter in the park last night."

Mrs. Green: "Did he succeed?"

Mrs. B.: "No."

Mrs. C.: "That wasn't my daughter."

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form,
of the Bank's

ANNUAL STATEMENT

31st October, 1934

LIABILITIES	
LIABILITIES TO THE PUBLIC	
Deposits	
Payable on demand and after notice	\$630,218,835.10
Notes of the Bank in Circulation	
Payable on demand	35,255,876.00
Bills Payable	
Time drafts issued and outstanding	185,483.19

W. N. SIMMONS
MEN'S STORE - FRANKFORD

By Max M. Morgan

At a gathering the other night (representatives of all the arts being present) it was decided after much argument that literature was the most universal of all the arts.

After going through a broadcasting station yesterday, I decided that speech seemed to have the most universal appeal.

If you want to realize how variegated the programs are—stand in the center of a small room leading to all the studios. It sounds like a madhouse, with a few screeching cats atop the roof-top.

From one you hear the playing of a fiddle and piano. From another an orchestra is rehearsing. In another a play is being timed for the exact minute.

Over all this presides a master of ceremonies, the chief announcer, and he sits at his desk viewing with complacency baskets of mail—fan mail, commenting favorably or criticising the various programs. Letters from British Columbia, Alberta, California, Boston, New York, and the majority of fans write in highly enthusiastic terms.

It made one realize, these letters, that radio is one of the most articulate of the arts, and these a quick response from the public.

The public here, is not afraid of voicing its likes and dislikes. I only hope, after viewing all that fan mail, that the public gets what it wants.

THE TICKLING MAN

From Clairton, Pennsylvania, we have this item. The town tickler is back at this favorite pastime—tickling bottoms of women's feet.

He prefers the early morning hours according to six of his victims. He climbed through bedroom windows, grabbed their ankles and tickled the soles of their feet. He fled when they screamed and giggled.

Just another quirk of the human race!

SPINACH!

Just a moment. Laugh at this one:

"Dearest," sighed the young man, "couldn't you learn to love me?"

"I might," said the girl, "I learned to eat spinach."

B-O-O-K-S

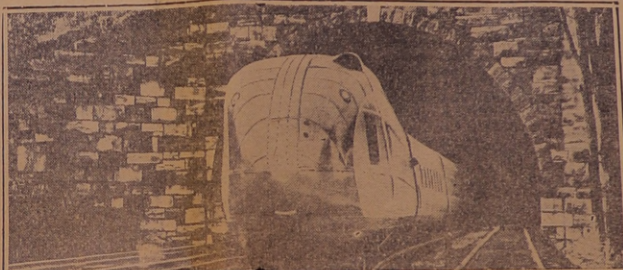

No more delightful gift could be thought of than the set of three sea tales "Mutiny On The Bounty," "Men Against The Sea," and "Pitcairn Island," by Charles Nordhoff and James Norman Hall. These three chronicles deal with one of the most thrilling episodes in history, the famous mutiny on the good ship Bounty and her harsh Captain Bligh, the escape of the mutineers to Pitcairn Island, with native women from Tahiti. The revolt of the native men against the white men, and the wholesale murder of both whites and natives. The only sailor surviving, with the native wives and children, the descendants who now occupy this small island in the South Seas.

56

A promising newcomer to Hollywood is sophisticated Rosalind Russell pictured here during her first film. A starry future is predicted for this young lady whose name is well known in the stage world.

How Would You Like To Travel In This?

A Titanic Trainosaurus—No, it's not a prehistoric monster crawling from his cave, but the new streamlined railroad train speeding into a tunnel leaving Schenectady during tour.

Our Sketch Club

Lesson No. 34

COMMERCIAL DESIGN—It is the purpose of the following lessons to make the art student as practical as possible without actual working experience in a professional studio. I would therefore advise the student to govern himself from the beginning in his study and practice of these lessons, as though he had been actually introduced as an apprentice into a designing room. It will not be necessary to emphasize to the students of this course who are public school teachers the benefits of systematic work and study. To all others I would say that in most designing studios some kind of system is indispensable for the profitable production of the work done there. In some studios the rules are hard and fast, in others so easy that they are hardly noticed, but there is always a controlling power, usually the art director, directing and expecting the work to be done, and enforcing any rules thought necessary to that end. The solitary student, being free from the restraint of outside rule, is apt to become lax and careless in his study. Hence it is doubly necessary for him to be a strict law to himself. It is obvious that if he is studying this series of lessons in order to fit himself for employment as a designer in studios where method, industry and punctuality are required, that he had better train himself to be as methodical, industrious and punctual as possible in his study. I cannot very well lay down any definite rules for the student regarding the study and practice he must give these lessons. He must make those for himself to suit his own necessities and circumstances, governing himself as far as possible by the suggestions here given.

In most studio offices every piece of work is numbered, known as a "docket" number, and frequently each employee keeps a time book, in which he enters the number of every piece of work as he may take it up during the day, noting the time spent on each piece. At the end of the day noting the time spent on each piece. At the end of the day he copies these entries on a "time sheet," which is turned into the office, and the expense of each piece of work, as represented by the time spent on it, is kept account of by its number. I would advise you to keep a time book. Get a small notebook containing ruled paper. With a pen or pencil rule the divisions shown in the cut. FIG. 118. Enter the number of your exercises as given in the lessons, put down the date and the time spent on each exercise, and when you come to work in an actual studio, you will, through this little discipline, have acquired a business habit which will, at least ensure you the good-will and the blessings of the book-keeping staff.

In the next lesson we shall illustrate a sample of "docket" or "time sheet." FIG. 119.

EX. 37—Draw an oblong five inches wide and 7 inches high; one-quarter inch inside the outline draw a border of three lines occupying a 1-4 inch in width altogether. Then letter the word "Design" in bold, simple letters, using your judgment as to size and position of lettering inside the border. Questions will be answered in this department and anyone wishing to receive a personal reply may have the same if a 3c stamped addressed envelope is enclosed with the request. The Art Director, Our Sketch Club, Room 425, 73 Adelaide Street West, Toronto.

Extreme mental cruelty was the grounds on which Mrs. Audrey James Field won divorce from Marshall Field 3rd, Chicago department store magnate. Mrs. Field, a granddaughter of King Edward VII, is shown here in Reno.

Ready To Roll Up Pro Hockey Curtain

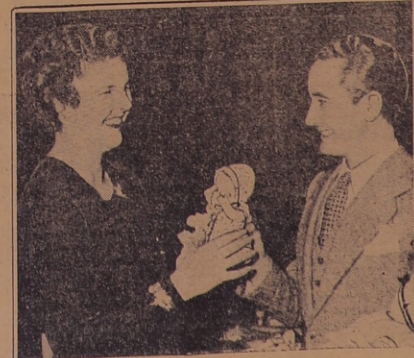

Here is the revamped new edition of Montreal Maroons as they posed and posed for the start of the 1934-35 season. Top row, left to right—Jimmy Ward, who scored a goal against St. Louis, Lionel Conacher in characteristic pose, behind Hooley Smith, who is in front of a new face, is Alex Connell with his rambling peak cap over his lean countenance. Hooley Smith is looking for the birdie in the camera in front of him. Next to Connell is Al Shiel and on the right Baldy Northcott giving the camera man plenty to work on. In the lower row, Earl Robinson, the "Dead Eye Dick" of the forward line is at the extreme left. Next Marvin Wentworth, the sad eyed lad with the hefty body check. Then comes Russell Blinco, familiarly known as "The Professor." Then Stewart Evans and gracefully filling out the picture is Dave Trotter whose long shot brought the first victory of the season to the Maroons and considerable chagrin to Bill Beveridge of the St. Louis Eagles.

"Test Engagement"

So far so good!—Determined to find out their compatibility before it's too late, Lillian Lamonte and Fred MacMurray, film players, enjoy the music in Hollywood night club after announcing their "unofficial test engagement."

For Charity's Sake

Using his voice for selling purposes, Nino Martini, star of the Metropolitan Opera Company, finds a purchaser in Louise Whitehouse during Christmas drive for benefit of needy children.

bowling
Following are scores rolled during the past week in the various leagues, at MacKenzie's alleys.

Kaye's vs. Percivals
Kaye's—B. Hubbs 464, H. Twigg 469, F. Reynolds 450, E. Longdon 554, K. F. Hickerson 119, L. Brummel 225, J. Handicap 150, 839, 926, 756—2521, 3 points.

Percivals—W. Richards 477, G. Weaver 479, B. Rouse 2236, F. Sherbert 395, L. LaMorre 429, D. Hennessey 1127, Handicap 63, 828, 709, 860—2395, 1 point.

Onyon's Painters vs. Furies
Painters—D. Sager 558, B. York 124, E. MacKenzie 671, H. Onyon 579, J. Potts 570, B. House 2310, Handicap 30, 983, 883, 976—2342, 3 pts.

Furies—E. Smith 558, F. Pafford 506, A. Mitchell 570, B. Fisher 1127, R. Roy 997, G. Tough 1126, P. Wilkinson 114, Handicap 41, 803, 920, 964—2779, 1 point.

Kaye's vs. Inconsistent
Kaye's—B. Hubbs 520, H. Twigg 575, C. Hickerson 522, E. Longdon 431, F. Reynolds 421, Handicap 123, 882, 874, 856—2502.

Inconsistent—W. Moore 2232, J. Watts 476, J. Barrett 2353, K. Weaver 563, R. Williams 518, J. Simons 2306, Handicap 325, 945, 902, 924—2771, 4 points.

Bankers vs. Furies
Bankers—M. Holey 567, D. Caskey 463, G. Robertson 570, W. Leadbeater 1126, W. Widess 561, C. Nelson 2363, Handicap 124, 819, 1005, 750—2574, 1 point.

Furies—E. Smith 558, F. Pafford 506, B. Fisher 2346, P. Wilkinson 2263, G. Tough 511, R. Roy 2412, Handicap 78, 942, 879, 1050—2841, 3 points.

MIXED LEAGUE
H. Giguere's vs. E. Follows
Giguere's—O. Lumb 341, M. Baker 249, R. Maggionico 333, E. Bernard 439, R. Williams 424, H. Giguere 415, 576, 932, 943—2451.

Follows—E. Follows 510, R. LaMorre 2230, N. Burr 498, J. Hackett 358, R. Marshall 381, Mrs. Marshall 553, Mrs. Follows 189, 861, 869, 889—2619.

D. McDonald's vs. C. Taylor's
McDonald's—Mrs. Fisher 279, B. Fisher 1135, Mrs. Divine 356, B. Divine 505, Mrs. Barry 215, D. McDonald 687, E. Barry 2344, 792, 765, 964—2521.

Taylor's—Mrs. McCall 278, R. McCall 470, Miss Nidderly 421, P. Moon 671, Mrs. C. Taylor 528, C. Taylor 395, 1011, 803, 949—2763.

A. A. FARRAR WRITES ANOTHER LETTER

LETTER NUMBER TWO

After leaving the immigration offices on the United States side, we decided to spend the day, or what was left of it, in Buffalo.

Policemen here seemed few and far between, and as we were looking for a hotel where my son Leonard was staying, we depended entirely on gas stations for information.

We are drawing a large trailer, but found little difficulty in getting through the streets, but to stop for directions was altogether different.

At last we landed within four blocks of the hotel and walked the rest of the way only to find that he had left a letter of change of address.

Our next trouble was to find a camping place. We asked the first man we saw and he directed us to one about six blocks away. When we arrived here we found that it was a large garage for storage and we were just as much closer to the heart of the city. So we asked the way out, and got on a main street, and when we thought we were near the out-skirts, asked a milkman. He said, "Just turn down at the next corner and go out that way; there are lots of them."

We drove about three miles and stopped at a gas station. This man was a foreigner and we decided we knew as much as he did, so cut across to another highway that led into Syracuse.

We saw a roadside fruit market man, and he said, "Camp right here. And believe me, we were ready."

After supper our son, whom we had telephoned earlier, came out, and we had a night's visit.

In the morning we went over to thank the gentleman who had offered us the ground to camp on, and found out that he was one of the boys from Madoc, just twelve miles from where I used to live.

About ten o'clock we started on our way again towards Syracuse. I will give you here the towns and cities we passed through, as well as the number of the highway, so if anyone wishes to follow us on the map they can do so.

From Buffalo on Highway No. 324 we drove three miles to No. 5 and 20, going through Clarence, Pembroke, East Pembroke to Batavia, Stafford, LeRoy, Caledonia, Avon, East Avon, Lima, West and East Bloomfield, Canandaigua, Geneva, Waterloo, Seneca Falls.

Here we left No. 5 and 20 highway and went up to No. 31, going through Fort Byron, Weedsport, Baldwinsville, Belgium, Euclid, to Cicero, turning off No. 31 onto No. 11 to Brewster Central Square, and two miles further on we camped at the home of my cousin.

We connected up with his electric lights and had a good spot to camp, as I have four relations on the street, which, by the way, was named "Hungry Lane," but only in name.

We decided to spend a week here, as my father's and mother's people are quite plentiful, and nearly all are farmers with full cellars, and the food—sauerkraut and potatoes—sure tells what my ancestors were. My father was Irish and my mother Dutch.

The sauerkraut is made much the same as we make it in Canada, only to each 30-gallon barrel they place a Royal yeast cake on the bottom, and they cut the barrel half full before they start to pack it down so as not to break the yeast cake. This seems to give it a different taste, and they pass around a dish in the evening the same as we serve sandwiches and coffee.

The first night was enough for me; they offered me the second quart, but I refused and I will for good. Breakfast is pancakes and sausage to start with and doughnuts and coffee to finish. I miss my eggs and bacon, but was well satisfied with the pancakes and sausage—but not the doughnuts.

Perhaps I had better lay off this and tell you of the \$10 bill I won at "The Grange" at West Monroe. They had what they called a "game supper" and dance and served rabbits, pheasants and chicken, with the other good things, and we received a feed of the best celery I ever tasted. This is given by a man from Yugoslavia, and he tells me it nearly all goes to Montreal and Ottawa. But what he would not tell me is how he grew it.

Well, I got away from that \$10 prize I got. They announced that the best sauerkraut dancer would receive a \$10 bill and the public were to be their own judges. You know I could always swing them around pretty fair, but I never figured I was extra smart. Well, to make a long story short, I was called to the platform and awarded the prize. Quite a number came and praised me up and the old fellows told about knowing my father. I tell you I began to throw out my chest. The chairman, or whatever you call him, held the \$10 bill up to show all who wished to see what a \$10 bill looked like, I supposed. Well, I will believe it—it was rubber!

I will draw you a rough sketch of it and then close my trap for tonight.

A. A. FARRAR.

Editorial Note: Anyone wishing to see the sketch may do so by calling at The Sun office.

A Yorkshireman was showing an American round London. They came to a busy corner and were watching the traffic.

The American said: "This is nothing, boy! I dare walk across with my eyes closed."

"Yes," said the Yorkshireman, "a man one eye."

"And did he get across?" asked the American.

"Yes, a marble one," replied the Yorkshireman.

A Boy Scout King

It should be a good sign that little King Peter II of Yugoslavia is a Boy Scout—"a brother to every other Scout"—without regard to class, religion or nationality. May he grow up unspoiled!

C.G.I.T. OF KING ST. UNITED CHURCH

An entertaining meeting was held by the C.G.I.T. girls in King Street Church on Tuesday evening.

After singing a few rally songs we opened the business meeting. The minutes of the last four meetings were given and the treasurer's report read and approved by our president.

After hearing about the splendid success of our tea and sale we had a discussion, led by our capable leader, Mrs. Gillan.

The discussion consisted of "What a Girl Ought to Know." Everyone enjoyed it as many questions were asked, and we voted on having more at our business meeting, for then every girl can give her ideas.

At 8:15 we dispersed, much to our regret. —S. Weaver.

'blue coal'

Telephone
(YOUR NUMBER)

It's true that there are cheaper fuels than 'blue coal' but you'll see the difference the very first time you put them into your furnace.

For clean, steady, dependable heat there is nothing to equal 'blue coal'. And when you check up at the end of the winter you'll find that 'blue coal' is actually more economical in the long run than those so-called cheaper fuels. 'blue coal' ignites quickly with a hot draft—burns evenly and completely with little waste—and banks perfectly at night and on mild days.

Why not switch to this fine, trademarked, money-saving hard coal and be sure of getting the same high quality every time you order. Phone us today.

ANGELICAN YOUNG PEOPLE OF QUINTE DISTRICT MEET

Trenton and Frankford Well
Represented—Mr. Leonard
Mills of Toronto Gives
Timely Address—Elec-
tion of Officers.

(By Jack Taylor)

Over 200 Anglican Young People and guests attended the third annual rally of the Hastings and Prince Edward Local Council, held in St. Thomas, Ontario, on Wednesday evening.

A large number of St. George's A.Y.P.A. attended the rally. Members, clergy and guests were present from clubs in Frankford, Tweed, Marmora, Point Anne, Shawville, St. Thomas, Church and Christ Church, Belleville, Wellington, Stirling and Tipton.

These rallies are held annually and are movements of the Anglican Young People of the district together in order to discuss problems, means of improving the A.Y.P.A.'s and above all, to establish a direct feeling of fellowship between neighbouring clubs.

The rally last year was held in Canterbury Hall, Trenton, on November 21st.

A splendid programme, which provided both entertaining and educational, had been arranged by the Local Council.

The rally was opened with the hymn "My Kingdom Come" after which G. C. Craven, of Stirling, president of the Local Council and chairman of the rally, called upon Rev. G. L. Wright, who led the assembly in prayer.

Rev. R. B. Payne, rector of St. Thomas, Belleville, welcomed the visiting clubs and visitors on behalf of the St. Thomas club, and in a short address stated that the St. Thomas A.Y.P.A. rejoiced in the conference being held there, since a gathering of this nature is a distinct inspiration to the place where the rally is held.

Miss Frances Laxier, president of the St. Thomas A.Y.P.A., welcomed the gathering and the continuing said that it was a great credit to their club in being able to entertain the rally in their hall and voiced the hope that all should benefit from the gathering.

Mr. G. C. Craven, president of the Hastings and Prince Edward Council, also voiced his welcome on behalf of the Local Council.

A piano duet by Miss Elsie Carver and Rev. J. M. Brownlie of Wellington, proved very entertaining.

The guest speaker of the evening was Mr. Leonard Mills, president of St. Monica's A.Y.P.A., Toronto, and member of the Provincial Council. Mr. Mills delivered a splendid and enlightening address on "The Church in the Province and the Dominion. The speaker brought greetings from the Provincial Council at Toronto.

"We are living in an age of great speed and an age of speedy transportation, he stated, and large business corporations. As we go about our daily work we glean a very broad knowledge but use it with a narrow education. The speaker said that our daily tasks become monotonous and ineffective to many of us.

"Where are we going?" Mr. Mills put the question to the gathering. "Where are we going as a church, a great country and a great nation?" The speaker quoted the lines from "Ulysses"—"I am a part of all that I have met"—and applying it to the individual, stressed the significance of those lines.

In our daily lives, he said, we assume the characteristics and personality of our friends, and emphasized all that we ought to be, for we assume the characteristics and personality of our friends, likewise they assume ours, so our personality should radiate a spirit of good-will and we should follow the example set by our Saviour, Jesus Christ. A.Y.P.A. friends should be careful, Mr. Mills said, and we should see that our own characteristics and personality is all that it ought to be.

"We are citizens of a great nation," he said, and members of an organization that is not parochial in its outlook.

The speaker read addresses by Louis Papineau given in 1827, and one given nearly 100 years later by the Rt. Hon. Stanley Baldwin, delivered at Cambridge University, and a plea for peace and democracy.

"We are members of an association with high ideals and objective, he continued, but do we examine ourselves to see if we are living up to those high ideals? The individual and collective aim should be—to be of service to our A.Y.P.A. or our Local Council and to be of service to our community. Is our worship doing this? he asked. It should be. For worship gives the great desire to be of service—work is the natural outcome of sincere worship—if we worship sincerely as we ought, we would see tasks that should be done.

The speaker also dwelt on Fellowship, the aim to work for Christ and the church, and stressed the point that a true spirit of Fellowship should be radiated.

One part of the fourfold plan is Edification, he continued, and edification means to build up. What are we doing to build up our A.Y.P.A.? What is our A.Y.P.A. doing to build up the parish? As individuals we must answer them to be able to work them.

In concluding his splendid and instructive address Mr. Mills left a thought with us—that the world today has a greater need of worship—our community, our church, our nation, than it has ever needed before.

SAD DEATH OF TWO SUTCLIFFE BOYS

Little Ones Die From Coal Gas
Fumes—Their Mother, Mrs.
Bruce Sutcliffe, Recovering
in Hospital.

The people of Trenton were greatly shocked and much grieved on Thursday morning when they learned of the sad death in Toronto of the two little sons of Capt. and Mrs. Bruce Sutcliffe, who are well known in Trenton from coal gas, the deadly fumes seeping through the house from the furnace pipes in the cellar.

The mother of the two little boys was also overcome and found in an unconscious condition. She was rushed to the hospital, where she is recovering.

Bruce Sutcliffe, son of Mr. and Mrs. J. A. Sutcliffe, has been in the postal service in Toronto for some years. Mrs. Sutcliffe was formerly Nellie Nugent, daughter of Mr. and Mrs. C. A. Nugent of Sidney.

The funeral of little Donald Bruce Sutcliffe will take place tomorrow (Saturday). The remains will rest at Friarhurst from 1 to 2:30 p.m., after which interment will take place in Belleville cemetery.

SCHOOL BOARD ACTION AGAINST THE COUNCIL HEARD AT OSOODE HALL

(From The Toronto Telegram, December 4th.)

A decision that may be of far-reaching importance in similar cases was delivered by Mr. Justice Kingstone yesterday afternoon at Osgoode Hall, in dismissing the application of the Public School Board of Trustees of Trenton for a mandatory order compelling the Municipal Corporation of the Town of Trenton to pay \$8,769, the balance owing the trustees, according to the estimates.

His Lordship ruled that "as the School Board had been unable to show that the town had funds available for school purposes at present, that the order should not go."

The school board had pressed the motion in order that school teachers' salaries now in arrears and certain outstanding accounts might be paid. The town fought the motion on the ground that only a percentage of the taxes had been collected and the funds were not on hand.

D. Graham, M.P.C. for the board, stated that 75 per cent. of the estimates for public school purposes had been paid. The town, he said, pleaded non-payment of taxes in respect of the 1934-35 year.

Mr. Justice Kingstone asked H. J. Smith, for the town, why the money was not paid, according to statute.

"If the town is not getting taxes, the general fund," queried Mr. Smith. Asked by his Lordship why the town didn't borrow some money, Mr. Smith replied there was no "statutory duty" upon any government to make a loan to the municipality.

"But there is a statutory duty for you to pay the money," his Lordship observed.

"Such an order could be granted, it must be shown the town actually had the funds, according to Mr. Smith.

"Are there no funds at all? Is the town bankrupt?" demanded Justice Kingstone.

"We have no sums to pay this amount—we haven't any such sum," replied Mr. Smith.

"There is no question that all the taxes have been paid—but if all the municipalities acted like Trenton, all the school boards would be in the same position as we are," said Mr. Graham. "Our case the schools are being discriminated against."

"There isn't one word in the mayor's or treasurer's affidavit indicating that they can't go to the bank to-morrow and borrow the money."

His Lordship suggested that the matter be adjourned two weeks and the parties endeavor to arrange an amicable settlement.

"The town is anxious to do its level best," said Mr. Smith.

"I don't know whether that's good or bad," his Lordship said.

We look to the A.Y.P.A. and the individual, in co-operation, in closing, to co-operate and to see that the job is done as it ought to be done.

Miss Grace Bartlett, member of the Provincial Council, spoke a few words as representative of the Extension Committee.

Miss Bernice Arbuckle, of Belleville, gave an exceptionally fine reading in French-Canadian.

Master Donald Cassin entertained with a solo accompanied on the piano by Rev. J. M. Brownlie of Wellington.

CHANGE AT IMPERIAL OIL SERVICE STATION

MR. J. H. KINNEY
Who this week took over the Imperial Oil Service Station on Dundas Street East, Trenton.

Another splendid community gathering was held in the Municipal Hall at Wooler on Tuesday evening, under the auspices of the Trenton Rotary and a fine spirit of good fellowship was in evidence throughout the evening.

About seven o'clock the gathering was called to order by President John Jarrett and after singing "O Canada" and the blessing asked by Rev. J. H. Kinney, the excellent meal was served by the ladies of Wooler.

After which John Jarrett, who was singing and the programme continued with.

Sgt. Major Wiberley had kindly consented to accompany the Rotarians and he led in the songs and also sang several solos himself. The numerous choruses and the enthusiastic applause given the Sergeant-Major, was ample evidence of his popularity as an entertainer.

Secretary Ernie Smith reported another 100 per cent. attendance and the Rotary Club, chairman of the Rural and Urban Committee, said that a greater number from Trenton would have attended, had there not been several counter-attractions.

Mr. Frank Woodger, who was a visitor and said he hoped to see the community gatherings continue.

Mr. O. M. Newton, president, Trenton Chamber of Commerce, expressed his pleasure in joining with the Rotarians for the good-will gathering, and hoped to see more community get-togethers.

The guest-speaker for the occasion was Rev. W. P. Woodger, a member of the Cobourg Rotary Club, who was accompanied by Rotarians Fred McArthur and Arthur Young of that club.

In introducing the speaker, President Tom Jarrett intimated that Rotarian Wendall Woodger was a former resident of Trenton and had at one time, in his early years, lived in Wooler.

Rev. Mr. Woodger, in his opening remarks, spoke of his boyhood days in Wooler and the pleasure it afforded him to address the gathering.

He then addressed the gathering under the title for his address "Life is Like That," and in a most interesting way touched upon many points of human interest and experience.

He said that the life most people live was worth while. "Life is like that" was a familiar phrase and generally was used in relation to disappointment, vexation or when one was not getting what one wanted.

Rev. Mr. Woodger, in his opening remarks, spoke of his boyhood days in Wooler and the pleasure it afforded him to address the gathering.

He then addressed the gathering under the title for his address "Life is Like That," and in a most interesting way touched upon many points of human interest and experience.

He said that the life most people live was worth while. "Life is like that" was a familiar phrase and generally was used in relation to disappointment, vexation or when one was not getting what one wanted.

W. H. FINKLE DIES OF HEART ATTACK

Highly Esteemed Business Man
Passes Suddenly—Many
Tributes to Sterling
Character.

Death came with startling suddenness to Mr. W. H. Finkle, on Monday morning last, in his fifty-fourth year, and the sad event caused a feeling of sorrow among a large number of the residents of Trenton.

Born in Thurlow township, he afterwards resided in Sidney township, coming to Trenton about seventeen years ago. The deceased entered the employ of the Trenton Dairy Co. and advanced until at the time of his demise he was president of the company and the controlling member.

Mr. Finkle attended the convention of the Canadian Creamery Association of Ontario, held in Toronto last week, and on his return was able to attend to his business on Friday as usual, but was seized with a heart attack on Saturday, from which he was unable to rally, and passed away early Monday morning.

He is survived by his wife, two daughters, Mrs. Arnold Campbell, Belleville, and Miss Elma at home; one brother, Mr. Morris Finkle, of Belleville, and one sister, Mrs. Fred Denyer, Belleville Road.

The late Mr. Finkle was a faithful member of King Street United Church, taking a keen interest and prominent part in all of the activities in connection with it, being at one time superintendent of the Sunday School, and secretary of the official board at the time of his death. He was formerly a member of the Public Library Board and a member of the Trenton High School Board.

The funeral service was held in King Street Church on Wednesday afternoon, and was very largely attended by all classes of citizens, besides relatives and personal friends. His pastor, Rev. A. K. Edmondson, had charge of the service, and spoke in highest terms of Mr. Finkle's sterling character.

Interment took place in Belleville cemetery, the pall-bearers being Messrs. W. J. Potts, E. L. Fraser, D. Harrison, J. H. Finkle, Geo. Johnson and Dr. G. F. Wright.

Mr. Finkle was highly esteemed by a large number of citizens, and many of his friends admired his sterling qualities.

Many beautiful floral tributes were banked around the casket.

The following messages were received by Rev. A. K. Edmondson, pastor, King Street United Church:

From Rev. G. L. E. MacQuade, president, Conference of United Churches:

"The death of Mr. Finkle is a severe loss to the church, a wise and consecrated churchman. Deep sympathy with family and your congregation."

From Mr. J. C. Young, Ottawa, president, Conference Lay Association:

"It was my privilege to meet Mr. Finkle years ago in a business way. The late Mr. Valleeau, with whom I was associated in business, appreciated his worth and many times so expressed himself to me. I'm sure his presence will be sadly missed in the home, the church and throughout the whole community."

"Would you kindly convey to Mrs. Finkle and family the sincerest sympathy of the Conference Lay Association, and from myself personally, for their hour of bereavement. May He who is able to succor all those who are in trouble, be their help and guide at this time."

ICE IN THE BAY

With the advent of colder weather during the latter part of the week, ice is gradually forming in the Bay of Quinte. Last year the river was frozen solid in November and the usual short cut across the river was used during November and throughout the entire winter. As yet the river is entirely free of ice.

The nights' near zero weather covered the bay and part of the river with ice.

TRENTON STORES OPEN EVENINGS STARTING DECEMBER 15

To the Buying Public of Trenton and Vicinity, and the Merchants of Trenton:

It has been stated that the stores in Trenton would be open evenings, commencing with Monday, the 15th, and continuing until Christmas. The by-laws of Trenton contain an early-closing by-law which makes it unlawful for many lines of business to remain open evenings until December 15th.

The matter was brought before the Executive of the Chamber of Commerce, at which time it was decided to give instruction correcting this error in order that shoppers would not be disappointed on visiting Trenton in the evenings, until after December 15th.

The Chamber of Commerce recommended that all merchants open their places of business from the 15th to the 25th in the evenings as a service to those who have to and others who wish to shop after 5 o'clock. We request that the merchants of the town to kindly co-operate.

The stores in Trenton are this year better supplied than ever with Christmas goods and merchandise, and you could ask that you make Trenton your shopping centre this year.

Wishing you the compliments of the season and thanking all for their kind co-operation.

A THOUGHT FOR TODAY

Sixteen days to Christmas.
Twenty-two days to municipal nominations.

PRICE FIVE CENTS

MAYOR H. R. CORY WAN'S REIRACION

Writ Will be Issued if Allegation of Mr. C. A. Cameron of Belleville is Not Corrected in Newspaper.

To the Editor, The Quinte Sun, Trenton.

Dear Sir—Mr. H. R. Cory, Mayor of Trenton, has requested me to forward the enclosed copy of a letter I wrote yesterday to Mr. Cameron, and he is desirous that the same be published in your paper, as he feels it is just to him that such a statement as appeared in the Toronto Star should be referred to by him in this way, and the public be advised that he does not propose to allow such a statement to go unchallenged.

He will appreciate it, therefore, if you will publish this letter in the next issue of your paper, which I believe is tomorrow, the 8th inst.

Yours truly,
H. J. SMITH
Trenton, December 7th, 1934.

Charles A. Cameron, Esq., Barrister, Etc., Belleville.

Dear Sir—In the "Toronto Daily Star" of to-day's date, on page 2, column 2, you are quoted as speaking at a meeting held last evening at the Town Hall in Belleville, and saying as follows:

"We find the president of the Belleville Liberal Association canvassing the city from door to door with the mayor of Trenton working for Harold Armstrong, a Conservative, and trying to defeat Mayor Tice, a Liberal."

As you are aware, Mr. H. R. Cory is Mayor of Trenton. This item as it appears in the said newspaper has come to his notice, and he has instructed me to write to you with the request that you immediately take steps to make public correction of this statement, by not only writing to Mr. Cory but also publishing your retraction in newspapers published in both Trenton and Belleville, and to say that if you fail to do this before Monday next, the 10th inst, he will on the next day issue a writ against you and give you an opportunity of proving the truth of the statement before the Court or facing the responsibility of making a statement in public you are unable to substantiate.

I can only trust you will give this matter your immediate attention and meet Mr. Cory's justified requirement of you.

Yours truly,
(Sgd.) H. J. SMITH
Trenton, December 6th, 1934.

enough," remarked the court.

Mr. Smith said there was \$11,000 in the school board treasury which might be drawn on in the meantime.

Mr. Graham argued that the only requirement of a mandatory order in this case was to satisfy the court that the party complained of was distinctly determined not to do what is demanded.

The council, he argued, could not read the estimates and there were items included not for school purposes, he said.

His Lordship in declining to make the order, said that he was not to see the Town Council meet the requisition of the School Board, without delay.

LATE W. H. FINKLE (From an earlier photo)

MANY AT ANNUAL GOLF CLUB DANCE

Social Event Greatly Enjoyed—Presentation of Cups and Prizes.

The annual Golf Club dance held in the Masonic Temple on Thursday evening was a marked success.

A large number from Trenton and other points attended this much looked forward to function of the social life of the town. The hall, as usual, was tastefully decorated and a gay scene was presented with the various colored evening gowns of the ladies and the dress suits of the gentlemen.

Charles Goyer's orchestra of Belleville furnished excellent music for the affair.

At intermission the presentation of cups and prizes won during the season, was held. Mrs. O. E. Fortune presented the cups and Major H. D. Graham announced the donors and winners.

The following is a list of the cup winners:

Club Championship—M.W. Anderson, Barker Handicap—Cup—R. Y. Wenyness.

Whittier Consolation Cup—W. C. Saylor.

Challenge Cup—Reginald Nolan. Anderson Junior Ladies' Cup—Miss Mary Hennessy.

MacLean Cup for Ladies' Handicap Play—Miss Ann Sanson.

Special Prize—Silver candlestick, presented by Mrs. L. Post and won by Mrs. Harold Weller for approaching and putting contests.

Shovel Prize—Jack Lusher, presented by Mr. Herman and won by Miss Ann Sanson.

Special Prize—Knitted suit, presented by G. J. Aziz and won by Mrs. J. L. McLean.

The Quinte Cup, emblematic of the team championship in this district, competed for by Belleville, Napawan and Trenton, was won this year by Trenton for the second consecutive year. The team: R. H. Hunter (captain), R. Y. Wenyness, M. W. Anderson, R. H. Skuce, E. Smith, W. T. Nugent, W. B. McClung, Jack Lusher.

At 12 o'clock a delicious lunch was served and the dancing continued until two o'clock.

At a recent organization meeting of the members of the Trenton Golf Club the election of officers for the ensuing year was held, and the new officers are:

President, W. T. Nugent; Vice-President and Captain, R. H. Hunter; Chairman of Green Committee, W. B. McClung; chairman of Members' Committee, Dr. J. E. Renton.

Chairmen Cups and Handicap Committee, R. Y. Wenyness and W. C. Saylor.

Christmas season is fast rolling on once again, and once again Trenton streets are garbed in their usual Christmas festive decorations.

Christmas trees, garb with colored lights, placed along the main thoroughfare, the numerous red and green lights strung above the streets, add a cheery aspect and instill the season's spirit in the shoppers who are preparing for Santa Claus.

Merchants are dressing windows and arranging Christmas stock in order to display their goods where late shoppers may more readily and easily do their shopping.

Business has been quiet since the Trenton Week and merchants are looking forward to a busy Christmas season.

The decorations for the streets were provided by the Trenton Chamber of Commerce.

At time of writing, smoke is coming from the huge coal pile on the east bank of the Trent River, near the bridge, coal in the centre of the pile having caught fire, which will mean considerable loss to the owner before it can be extinguished.

Alberta Farmer Hailed As "Wheat King" At Chicago Fair

John B. Allsop Twelfth Canadian To Win Grain Title—Honored In Absence—Dominion Entries Score Heavily.

Chicago.—A new wheat kind was crowned Sunday night at the hay and grain show held with the international livestock exposition—and again the coveted crown of the North American grain kingdom rested on the brow of a Canadian—John B. Allsop of Wembley, Alta.

His victory gave to the Dominion's wheat growers their 12th wheat championship since 1919.

The reserve champion—the prince of wheat—was L. E. Peterson of Victoria, Montana.

Allsop and his entry are from the famed Peace River valley of Alberta, where most of the wheat grown is of championship calibre. The grand champion in the wheat division was won by his exhibit of a peck of "Reward" variety grain.

Last year Frank Jackson of El-fro, Sask., exhibited the champion wheat.

Since 1928, when C. Edson Smith of Corvallis, Mont., won his second consecutive wheat crown, the champions have come down from the broad acres of the Dominion's wheat country.

Canadians also shared top honors in the early judging of beans. H. Graham of Iron Springs, Alta., exhibited the champion sample of field beans in the navy variety. The reserve title also went north of the border. A. Giffin of Brooks, Alta., winning the red kidney beans.

Walter Nagel, Fisherville, Ont., won first in white winter wheat, with second going to Wilfred Hedrick, Woodville, Ont. Other places included: 3, N. D. Mitchell, Royal Oak, Sask.; 7, R. C. Chambers, Fenwick, Ont.; 11, Alex. M. Stewart, Alisa Craig, Ont.; 13, Michael Fisher, Formosa, Ont.

Peterson, in winning the reserve wheat championship, had behind him the record of other Montana grain-raisers who since 1919 have been the only farmers of the United States to wrest the crown from their Canadian rivals.

Smith's two championships in 1927 and 1928 and the wheat victory of L. P. Yates of Fishkill, Mont., in 1925, were the only ones chalked up for entries from the United States since the exposition took over the picking of wheat kings from the New York Land Show in 1910.

Cells Won't Hold Midget

Even Chilling at Jail Is Too Small For 74-Pounder

Joliet, Ill.—Albert Testa, 26, may be small, but he is creating more problems for Warden Frank D. Whipp of the State Penitentiary than a whole cell block of ordinary prisoners.

Testa is a midget—51 inches tall and weighs only 74 pounds. He came here from Chicago to serve a year's sentence on a criminal assault charge.

They put him in a cell—the bars were close enough together that he couldn't slip through—and their problems started.

It is customary for convicts to immediately get into uniforms. There wasn't one small enough to fit him, so Testa is getting one tailor-made in the convict shop.

Also, small size shoes and socks had to be obtained for him, and to top it off it was found he was too short to sit at the usual convict table and eat his food, so they've been feeding him in his cell while a high chair was under construction for him.

Testa said he was going out for prison football. He wants to be mascot for the team.

Russian Nobleman Runs Turkey Farm

One-Man Business In New Hampshire Compelled To Take On Helper.

Hancock, N.H.—These are busy days at Hootor Farm in Hancock, where Prince Irakly Tounanoff, former colonel in the Russian Imperial Guard, raises turkeys for the market.

Hootor Farm means "one-man farm." But the Prince had to relent during the Thanksgiving mail-order season to the point of enlisting a helper. Apparently Prince Tounanoff off a little side-hill establishment operates according to Emersonian economics. If a man raises a fatter turkey than his neighbor, the rural free-delivery carrier will wear a heavy wheel rut to his mailbox.

Turkey is marketing about 500 turkeys, filling orders from buyers as far away as California. He never advertises—but his customers do. Hootor Farm is a far-flung from the Bolshevik Revolution which scattered the White Army far and wide, and set the Russian colonel down on a sheltered Hancock slope, in a snug little Cape Cod style farmhouse.

In summer, his wife and young

son stay at Hancock. They spend the remainder of the year in Boston. He joins them after the holiday trade subsides. In the spring he comes back to Hancock to start his new flocks. Turkeys are his specialty although he raises geese, wild ducks, pheasants and other game fowl for domestic buyers.

Prince Tounanoff admits he never saw a turkey before coming to Hancock, except on St. Petersburg banquet tables. He stars all his fowl in incubators, except the wild ducks. No mere man-made contraption can compete with a wild duck, he says, when she undertakes the business of mothering a brood.

The Russian nobleman makes friends with his neighbors and his stock. When a reporter inquired the way to Hootor Farm, one of his neighbors a mile down the road remarked in pointing out the way that the Prince is a "good scout." Another observed wholeheartedly, "He's a prince!"

When the turkeys and all the other kind have gone to roost, the Prince tunes up his violin and plays the music that St. Petersburg danced to in the days of the Tsar, when a prince and an army colonel was somebody around the Imperial Court.

Would he like to go back to Russia? Prince Tounanoff gave a thoughtful caress to the neck of Goo-goo, his pet white goose. No, he finally decided, not unless the old Russia was restored. He admits it may be a long while. It is apparent he hasn't much patience with the Communist regime. He likes the peace and quiet of Hancock.

Prince Tounanoff is well-known through southern New Hampshire, because along with his turkey business he manages to squeeze in occasional lectures on Russia and the Revolution.

New Zeppelin Will Be Used

To Make 2 Trips Monthly Between Germany and U.S. Next Summer

Berlin.—The new German Zeppelin "LZ 129" will make trips from Germany to Lakehurst, N.J., or Miami, every fortnight from July to October, 1935, it was made known here last week.

This trial period has been set pending the construction of the "grand hall" at Rio de Janeiro, where the Zeppelin is to moor during her trips to South America.

In addition, to carrying 50 passengers per trip to the United States the airship will carry mail and certain quantity of merchandise.

According to Dr. Hugo Eckner, captain of the famous Graf Zeppelin, the plans were completed during his recent trip to the United States in the course of conversations with Postmaster James Farley.

The crew will take 48 hours from Europe to American and 55 hours on the return trip, Eckner believes.

Famous Sisters Given Carriages

FIVE PERAMBULATORS ARE RECEIVED ON SIX MONTHS BIRTHDAY—BABIES ARE GAINING

Callander.—Five fine new baby carriages arrived recently at the Dafoe Hospital here to help the famous Dionne sisters celebrate their six-months birthday and the babies liked them.

The quintuplet daughters of Mrs. Olivia Dionne, who astounded medical men and everyone else by living more than a few hours after their birth, were tucked into the carriages and wheeled out on the veranda to enjoy a sleep despite the fact rain was falling. They stretched and kicked in the perambulators apparently enjoying the remoteness after spending most of their time in smaller cots.

There is no argument over ownership of the carriages as each bears a nickel plate with the name of the owner, but there is a growing difficulty of determining at right the identity of each owner.

Dr. A. R. Dafoe north country physician who attended the birth of the babies and has looked after them ever since, said they are becoming more identical each month. Already it is difficult to tell them apart except by reference to the necklaces they wear bearing their names.

Progress of the quintuplets is seen in the steady gain in weight by each since they were born last May 28th. The following table shows their weight in ounces on June 4th when first accurate weights were recorded: On August 28th when they were three months old and on Nov. 28th.

	June 4, Aug. 28, Nov. 28
Yvonne	35 1/2, 114 1/2, 187 1/2
Annette	36, 108, 185 1/2
Cecile	33, 97 1/2, 180 1/2
Emilie	29, 80, 155 1/2
Marie	26, 78 1/2, 147 1/2

Scout Help For Santa Claus

Reconditioned toys turned out by the Saint John, N.B., Boy Scout Christmas Toy Repair Shop to help Old Santa look after needy children.

The Boy Scout Santa Claus Remember Settlers' Kiddies

Ottawa.—The lot of the stranger within our gates is never an easy one, but few agencies have so brightened the Christmas of New Canadians who arrived to wrest homes from the land during the heavy immigration years of the last decade as the Canadian Boy Scouts through the medium of their Toy Shops, which since 1926 have supplied toys to thousands of immigrant children who otherwise would have learned the tragedy of the empty stocking on Christmas morning.

There is no period of the year when the heart strings of new arrivals are so strongly for the old land as during the Christmas season. These pangs are not reduced in the least by the knowledge that every available cent must go into clothing, food and seed, and that nothing will be left to buy little things to go into those stockings being the stove on Christmas Eve. Imagine, then, the delight of a new arrival, the mail man, or a smiling lay in the uniform of the Boy Scouts, brings to the door a parcel with toys for all from Santa's Scout Toy Shop. How that ray of happiness pierces the gloom of what threatened to be a tragic Christmas!

Boy Scout Toy Shops have been carrying on their work of gathering, mending, sewing, painting up and distributing toys to the children of our more unfortunate brothers since 1924, but it was not until 1926 they enlarged their field to take in the children of new settlers in the rural districts. That year, through the

agency of the Dominion immigration authorities, they distributed toys to settlers' children newly arrived at Halifax, Winnipeg, and Calgary.

In 1927 and during subsequent years distribution was placed on a more methodical basis, and names of new settlers, and more recently back-to-the-land settlers, have been supplied through the colonization departments of the Dominion Government and the two railways to the Dominion Headquarters of the Boy Scouts in Ottawa. They, in turn, have directed the nation-wide distribution of toys through the various troops and scout units.

More than 4,000 young new Canadians of all races, creeds and beliefs were brought joy by these Scout Toy Shops in 1927. A year later this number had increased by 500, and in 1933 toys were supplied to more than 9,000 children of the settlers, the majority of whom had been recruited to the land following the hard knocks of misfortune during the depression years.

Plans for a bigger and better year than ever in this great work are being laid for the coming Christmas, and it is hoped by Dominion Headquarters that in more than 200 Canadian towns and cities the Scout Toy Shops shortly will be humming and bustling with the activities of thousands of Scouts busy repairing dolls, carriages, horses, sleighs and all manner and sorts of toys, in order that the great spirit of Christmas may again go into even the most remote corner of the land.

The Markets

United Farmers' Co-Operative Co. Saturday were paying the following prices for produce:

EGGS — Grade "A1," in cartons through associations, 43c; and with cases returned, "A" large, 31c; "A" medium, 25c; "A" pullets, 20c; "B," 17c; "C," 15c.

BUTTER—Ontario No. 1 creamery, 21c; No. 2, 20 1/2c.

POULTRY: (Quotations in cents.)

WHOLESALE PROVISIONS

Wholesale provision dealers are quoting the following prices to Toronto retail dealers:

Pork—Ham, 18c; shoulders, 15c; butts, 15 1/2c; pork loins, 20c; picnic, 12 1/2c.
Lard — Pure, tierces, 12c; tubs, 12 1/2c; pails, 13 1/2c; prints, 13c.
Shortening — Tierces, 9c; tubs, 9 1/2c; pails, 10c; prints, 9 1/2c.

GRAIN QUOTATIONS

Following are yesterday's closing quotations on Toronto grain transactions for car lots, prices on basis c.i.f. bay ports:

Manitoba wheat—No. 1 Northern, 85 1/2c; No. 2 Northern, 81 1/2c; No. 3 Northern, 78 1/2c; No. 4 Northern, 75 1/2c; No. 5, 73 1/2c; No. 6, 74 1/2c.
Manitoba oats—No. 2 C.W., 50 1/2c; No. 3 C.W., 44 1/2c; No. 1 feed, 42 1/2c; mixed feed oats, 34c.
Manitoba barley — No. 3 C.W.,

59 1/2c; No. 1 feed screenings, 32 1/2c per ton.

South African corn, 96c.
Ontario grain, approximate prices truck shipping point—Wheat, 91 to 93c; oats, 30 to 33c; barley, 43 to 44c; corn, 66 to 70c; rye, 45 to 47c; buckwheat, 40 to 42c; malting barley, 65 to 68c.

Big Advance in Fighting Cancer

Winnipeg.—Experiments conducted by a Winnipeg physician may produce important results in the search of science for the cause of cancer. A research committee of the University of Manitoba is now studying the effect of Vitamin "E" on the tar cancer, which produces carcinoma, or cancer in mice.

The work of research has been carried out over a long period by Dr. J. R. Davidson, in the basement of his home. He was careful to point out the work did not represent the long-sought "cure for cancer" but the results were considered invaluable and will be the subject of a thorough check.

Mice were carefully selected and interbred to obtain high susceptibility. They were kept on an ordinary diet which contained a low Vitamin "E" content. This content is found in wheat germ lettuce and other green vegetables. They were then tarred. Prolonged tarring produced ultimately a gas works tar twice a week. alety a typical carcinoma in 50 per cent or more.

DIST IS CHANGED

Dr. Davidson then transferred one group of animals to a diet of high Vitamin "E" content (wheat cereal and lettuce fortified with wheat germ oil). The first group developed tumors which turned into cancer in many cases while the second group showed greater resistance or failed to develop carcinoma.

The results bear no relation to possible effects of such treatment on types of animal or human can-

Trolley Buses

Fleet Will Replace Many Tram Cars in Old London

London, Eng.—Trolley buses are being substituted for trams in London, and it is said that within a year a fleet of 400 trolley buses will replace 80 miles of street railway tracks. The trolley buses are regarded as the last word in modern passenger transport comfort. At present there are 350 miles of tramway routes in London.

According to an official of the transport board, after the first conversion scheme has been completed in the suburbs, work will proceed on the remainder of the programme until trolley buses have replaced trams throughout London.

The official said: "Two types of trolley bus, which are at present being tested in the Kingston district, have proved that this service is in every way superior to the tramcar."

Old Age Retirement Incomes Planned For Employees by Firm

New York.—The General Foods Corporation, a \$61,000,000 company, have announced an old age retirement income plan for its employees.

The plan will be worked through joint contributions by employees and the corporation, employee payments being deducted directly from salary cheques. Income payments start when women employees are 60 and men employees 65 years old. Retirement is not obligatory at that age and employees also may share in an income, with the company's consent at any time within 10 years of the customary retirement age.

"Upon retirement an employee may expect to enjoy an income equivalent to two per cent of his average earnings for every year of his participation in the plan," G. M. Chester, president, explained. "For instance, an employee aged 35 today will, on retirement, receive each month 60 per cent of whatever his average monthly salary may be during the next 30 years."

The plan also provides that if an employee leaves the company prior to retirement age he may have his contributions returned.

The plan is retroactive to September 1.

Peasant Influence Conspicuous in New Mode for Winter

New York.—Fiddle fashion, which started the season completely regal in luxury of line and fabric, has made a quick turnabout and taken up peasant trends.

The success of the Alpine and the Russian Cossack hats of early fall has led directly to the small felt peasant hat. It follows closely the line of the caps and headresses worn on feast days by European country folk.

Worn back from the face, with turned up brims, these hats fit in admirably with the fur collar, the top like a folded kerchief. Others have head-fitting crowns with fluted, upturned brims. The Dutch cap type, flaring over the ears, makes a new frame for a pretty face.

Bright figured kerchiefs, tied either back or front, are made to be worn with these new hats. Peasant shoes, flat-heeled and buckled over the instep, complete the costume. These come in red, green or blue morocco leather a gayer note in footwear than has been offered in many a year.

Daytime dresses also show the influence of peasant costumes. There is the mother Hubbard yoceline; the checked vestee front—both effective details for simple, wearable dresses of black or colored silk. Full sleeves shirred into tight cuffs and full skirts shirred into the waistline are other manifestations of the trend.

To Use Snowmobile

Moosomin, Sask.—Dr. A. R. Dafoe, physician to the famous Dionne quintuplets of Callander, Ont., will ride to his charges in style this winter in a snowmobile.

The physician who ushered into the world five daughters of Mr. and Mrs. Olivia Dionne has ordered the snowmobile from Karl Larch of Spy Hill, Sask. Larch says snowmobiles are the perfect means of winter transportation in the wide open spaces.

Snowmobiles are used in the west to ride over deep snow, shallow snow or frozen lakes and streams. One is in use in Northern Manitoba by a physician who covers a wide territory and last year he found it valuable in dashing to attend children stricken with diphtheria in his far flung area.

Happy is he, who in this life, Bring what will of care and strife, Can keep throughout his threescore and springs, A child's delight in simple things.

Claims Big Dipper Slowly Breaking Up

Cleveland, O.—The Big Dipper, one of the best-known constellations in the sky, is breaking up, because in the middle five of its seven stars are moving out of it at 10 miles a second, the National Academy of Science was told recently. In 50,000 years from now the Big Dipper will be totally unrecognizable because of this break-up, said Dr. J. J. Nassau of Case School of Applied Science.

Tells All

Pangs of conscience forced Otto Von Derck (above), 25-year-old Chicago bank clerk, to confess he had accepted bad checks in a plot that defrauded his employer, the Amalgamated Trust and Savings Bank, of an estimated \$64,000. Four others were arrested in swindle.

KRUSCHEN Strikes at the Usual Cause of

FAT

Try Kruschen at
Our Expense

If excess, unhealthy fat is bothering you, take advantage of this offer to try Kruschen at positively no expense. Your druggist has a limited number of the Kruschen Giant Packages now in stock. This is the Regular bottle together with a separate TRIAL bottle. Use the TRIAL bottle first. Kruschen eliminates waste and poisons from system—daily, if you follow the instructions. It strikes not only at the usual cause of fat but at the root of half the human ills—internal sluggishness. If you have no excess fat, Kruschen will not cause you to lose weight. Kruschen costs only a few cents a week to use—and it makes you feel like a million dollars. Get your Kruschen Giant Package today. If you are not entirely convinced after using the Free TRIAL bottle, your druggist will cheerfully refund your money when you return the Regular package unopened.

Cranking an Auto

(Stratford Beacon-Herald)
A report which comes from Pontiac, Mich., tells about a gentleman of seventy years who started in his car to visit his brother who lived on a farm a few miles out. He ran into a piece of bad road and his car stuck. He worked for a time trying to push it, and then found it necessary to crank the engine. Later he was found sitting in the car—dead.
A doctor who was called said that the reason of the heart attack, which caused death, was too much exertion trying to get the engine started. He gave it as his opinion that only a man in fine physical condition should ever try to crank an engine. The effort was too great for a man of seventy and even for a man of lesser years it was dangerous.
One does not see so much of this now as during the winter when a number of cars are hard to start. Cranking an engine, particularly in a heavy car, is an exhausting work and the man who has any reason to suspect that his heart is not the best should never try it.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people "round 40" think they're "growing old." They feel tired a lot... "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS' Milk of Magnesia" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM:
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

The Winter Protection of Cod Liver Oil

PLUS A GREATER RESERVE OF VITALITY

Winter is a dangerous period for many of us. The cold and wet are constant menaces to health, requiring all our energy to combat.

Winners of Barley-Growing Contest At The Royal Winter Fair

Record Entry—D. L. Scott, City View, Wins First Prize

For the last three years the Ontario and Quebec Brewing Industry has sponsored a competition designed to improve the grade of malting barley grown in the Provinces of Ontario and Quebec.

Under the terms of the competition—open to any grower in the Provinces of Ontario and Quebec—these growers submit a sample of 100 pounds of six row malting barley. The judging of the entries occurs at the Royal Winter Fair at Toronto.

Last year 145 entries were received and this year, 154. The judges this year were: W. J. Lennox, of the Dominion Seeds Branch; Toronto; Professor W. Squire, Professor of Field Husbandry, Ontario Agricultural College, Guelph; Ontario; Leonard Newman of the Dominion Experimental Farm, Ottawa; J. C. Noble, Department of Agriculture, Alberta.

The prizes are substantial—a cash prize of \$500 to the winner, accompanied by a Gold Medal; \$200 to second; \$100 to third; \$50 to fourth, and nineteen prizes of \$10 each to the next in order of merit. The judges report that this year it was very difficult to ascertain the winners. Last year there were many weak entries but, this year, the general average of the entries was so much better than last year that it was a very difficult task to separate them. Apparently, therefore, the competition has been productive of the result aimed at, namely, a general improvement in the grade of malting barley grown in the two Provinces.

The prize winners are:
1. D. L. Scott, City View, Ontario—Gold Medal and \$500 cash.
2. Ray Forest, Douglas, Ontario—\$200 cash.
3. J. Neuhauer, Hespeler, Ontario—\$100 cash.
4. J. B. Robinson, Bolton, Ontario—\$50 cash.
5. J. B. Robinson, Bolton, Ontario—\$10 cash.
6. J. H. Frisby, Gormley, Ontario—\$10 cash.
7. D. M. Oswald, Vankeek Hill, Ontario—\$10 cash.
8. Bruce Bragden, Georgetown, Ontario—\$10 cash.
9. Geo. Newbauer, Morrisburg, Ontario—\$10 cash.
10. J. Henderson, Rosemount, Ontario—\$10 cash.
11. Angelas Laville, Berthierville, Que.—\$10 cash.
12. Douglas Hart, Woodstock, Ontario—\$10 cash.
13. H. K. Hodgins, Carp, Ontario—\$10 cash.
14. J. McGill, Pakenham, Ontario—\$10 cash.
15. F. F. Houghton, Beeton, Ontario—\$10 cash.
16. Howard Jull, Norwich, Ontario—\$10 cash.
17. Nelson Darby, Waverley, Ontario—\$10 cash.
18. Alex. M. Stewart, Alisa Craig, Ontario—\$10 cash.
19. J. A. Ross, Georgetown, Ontario—\$10 cash.
20. J. Elliott, Pakenham, Ontario—\$10 cash.

Mr. Scott has now won first prize and gold medal three times in a row. Of his entry the Judges report, "The prize winning entry is a nice, clean, well prepared, uniform sample of excellent color."

Horsemanship In Robust Diversity At Royal Show

Five-Gaited Classes Will Be
High-Lighted — Hunters
and Jumpers well represented

Horsemanship in the high relief of robust diversity is assured for the forthcoming Royal Winter Fair Horse Show with a worthwhile record for Canada in the five-gaited horses "that made Kentucky famous." These are easily the most perfectly trained saddle horses ridden in everyday life. Their action is the very poetry of equine motion. Responding to the slightest touch of hand or foot or the gentle swerve of the rider's body, their gaits are the walk, trot, fox-trot and the fast going rack—the distinctive characteristic of the five-gaited horses, a mode of going between a trot and a run, yet with a distinctly different limb motion from either.

The Royal this year is specializing in five-gaited classes and its comparative standing on the Eastern American fair show circuit is second to

none outside the State of Kentucky.

Excellent entries of three-gaited saddle horses have been received. These animals of proud and gallant mien are the highest stepping of all saddle horses, a joy to watch in the ring. Their gaits are the walk, trot and canter.

In hunters and jumpers the Royal program, as was expected, is again well filled, as in this regard the Toronto Horse Show stands unsurpassed on the continent. Harness and driving classes will be seen in large numbers, some of the best stables in the United States being represented. Besides there is special military equestrianism. Teams of army officers from Chile (South American), France, the Irish Free State, the United States and Canada compete nightly for the eight evenings of the Fair, November 21-29, the competitions culminating in the sharp snappy contest for the Ferguson International trophy now held by the Irish team.

Even this does not exhaust the Royal's diversity in equine attraction. As a program interlude there is to be an exhibition of magnificent "dressage" or "high-school" riding by Captain Hiram E. Tuttle of the United States Army. Both of his horses have taken six years to train to their present perfection, and have never once known whip or threat. The "manège" requires the execution of not less than 135 different movements by the horses while in the ring.

Finally the eight wonderful cream colored stallions of Jorgen Christensen, who is probably today the world's greatest horse trainer have been secured. It was he who "broke in" the 80 horses for one act at Barnum and Bailey's circus. His stallions are marvels of intelligent performance. Two Shetland ponies will be the "clowns" of this act.

With so much variety the Winter Fair management is particularly proud of the fine Horse Show program to culminate public events marking Toronto's centennial year.

Award Made in Car Dispute

Pittsburgh — Settlement of the long-standing car men's dispute with the Pittsburgh Railways Company has been reached by a special arbitration board's action in awarding the men a wage increase of 20 per cent. The board at the same time recommended that the car men be placed on a five-day schedule instead of the present six-day work week, consequently giving them their present pay for the shorter week.

Building Boom

Industries Working Overtime
to Supply Materials In
United Kingdom

London — Building activity in Britain has bequeathed the country's brick-making industry so much work that manufacturers are finding difficulty in getting it all done.

A rush to keep pace with orders, several firms working as much as six hours overtime, and a 300 per cent increase in imports of bricks to fulfill demands which cannot be satisfied by home production are disclosed as items in expansion problems now facing brick makers.

Meanwhile added significance is given to these disclosures, it is said by the recent publication of the report of the National Housing Committee, which suggests a Statutory Commission to organize a supply of materials for a 10-years housing scheme. It is considered that this would have an important effect in stabilizing "see-saw" motions of demands for bricks.

The present deluge of orders results from "a poor man's boom." It concerns only manufacturers of bricks for the cheaper type of dwelling houses. More expensive bricks and stone facings used for important public and private buildings are not yet in great demand.

Consequently exact and pertinent figures on the subject are difficult to find. Demands for bricks are not equal in all parts of the country. But on the average in areas surrounding large towns, each month sees 75 new hands being added to the 1000 employed. At the same time the total wages bill of the industry has risen by 13.3 per cent in a year.

The demand for new labor is greatest and most constant in the Peterborough and Durham districts. But the outskirts of London are so short of necessary bricks that imports from the Netherlands and Northern Europe have had to be increased threefold. Returns show that in May, 1933, 10,568,000 bricks were imported. The figures for May this year rose to 25,966,000. June shows an increase to a total of 32,887,000 bricks. Elsewhere, although many manufacturers declare themselves to be "snowed under," employment is improving without showing any rapid rise.

Pertinent experience of the brick trade show that boom conditions, which almost invariably include the launching of large public building schemes do not last long. As soon as confidence is lost, the local authorities drop their housing plans. And the brick industry, expanded to meet an expected constant large demand over several years, suffers immensely. Many men are thrown out of work.

Leaders of the industry declare that if they could be given a guarantee that local housing schemes, once started, would be carried to completion, they could expand without fear and so help to stabilize the figures of employment. Such a state of affairs has been visualized as an integral part of any new national housing plan by the National Housing Committee, under the chairmanship of Lord Amulree, vice-president of the Building Industries National Council.

The proposed Statutory Commission would survey housing needs, help local authorities, and see that slum clearance and rehousing were brought under one coherent national scheme. The building program would be financed, Lord Amulree's committee declares by a National Housing Stock under Treasury guarantee.

The committee has budgeted for a minimum of 1,000,000 new houses or 10 shillings a week or less. During an intensive search into prevailing building costs and land charges, the committee has come to the conclusion that subsidization would only be necessary where land is exceptionally expensive and rates high, or where the workers cannot afford 10 shillings a week.

But most important to the brick industry, the committee declares that a housing commission such as they envisage should organize a supply of materials so as to keep

Before Baby Came

down costs by making demand a known quantity.

Although the Amulree committee was a self-constituted body with no legal or constitutional significance, its report seems to have been favorably received. The committee included among its members a past president of the Royal Institute of British Architects, three housing authorities, a director of the Bank of England, and two celebrated progressive business men as well as some technical authorities.

Britain—Japan—U. S. A.

The treaties insuring the status quo in the Pacific have become scraps of paper. To Britain the problem is: What shall we put in their place? An influential school of thought extending to the Dominions has been insisting that Britain shall come to terms with Japan. That would mean a break with the policy of non-recognition of Manchukuo for which the Roosevelt Administration no less than the Hoover Administration stands.

Might not Japan use an entente with Britain for the sole purpose of advancing its dominance on the Asiatic continent? For Britain to lean upon such a reed would be to risk a de facto, with the United States. Even talk of such a course is deeply disturbing to a vast body of British opinion. General Smuts apparently expressed the popular if not the official sentiment of the Dominions in declaring his preference for an understanding with the United States. His statement is to be considered in conjunction with Mr. MacDonald's, and may prove even more important.

The Joy of Work

It has taken a long time to overcome the idea that work is ignoble and that it is a finer thing to be served than to serve, writes the Halifax Chronicle. The idea has not yet wholly disappeared as can be seen by the amount of snobism there is in the world, a snobism arising out of a vulgar estimate of the importance of material possessions or of fashionable place.

Fortunately the great majority

PREVENTS MINERAL DEFICIENCY

Phosphorus Deficiency

MAKE PROFIT MAKERS

Have you some "Puzzle Feeders" eating their heads off, killing your prospects of profit and getting nowhere? In the midst of plenty, they munch bones and may grow drowsy, unthrifty, unproductive. These are the signs that they are not getting enough calcium, phosphorus and other essential minerals. Write today for free folders about mineral feeding, telling how you can turn those puzzle feeders into profit makers by using C-I-L Mineral Supplements, supplying all essential minerals with real economy.

C-I-L SOL-MIN (Soluble Minerals)

The entire mineral portion of bone, especially processed to secure digestibility, and balanced with other essential minerals. Contains phosphorus, calcium, iodine, sodium, chlorine, iron and sulphur.

C-I-L NUTRI-MIN

100% available and digestible, dicalcium phosphate (bone derived), the wholly digestible, naturally balanced, concentrated calcium-phosphorus salt combined with other minerals supplying iron, iodine, sodium and chlorine.

"DOUBLE WEDDING" Trenton High School DELIGHTFUL COMEDY

Grace Church Dramatic Club Again Displays Marked Talent in Annual Presentation.

(By Eula Bonter)

"Double Wedding," a three-act comedy by Jay Loma, was presented by the Grace Church Dramatic Society on Thursday and Friday evenings, December 6 and 7.

An amusing plot and an excellent cast contrived to make the play truly enjoyable to a large audience of townspeople.

Mr. William Lester rendered two charming vocal solos between the acts "Love in Bloom" and an Irish ballad.

Mr. Walter Wrightman gave a violin selection, which was much enjoyed.

Cast of characters: "Grandma," Mrs. Nancy Colbert, "Grandma," from Quebec—Miss Laura Robson, George Colbert, her son—Glen Al-

Yea, Augusta, her snobbish daughter-in-law—Miss Thelma, "Grandma," Bob, her loving grandson—William T. Chambers,

Kathleen, her loving granddaughter—Miss Frieda Waldorf, "Grandma," Mrs. Wellington-Trent, one of the aristocrats—Miss Dorothy Bell,

Monica, her daughter—Miss Maude Munn, Peter Ramsey, in love with Kathleen—Darwin Sager,

James Donohue, in love with Kathleen—V. P. Carwell,

Jane, the maid—Miss Dora Ketcheson, Jarkins, the butler—Frank Part-

ridge, Dr. Emil X. Minnichoff—J. W. Campbell.

The action of the play takes place in the drawing-room of the Colbert home, Trenton, Ontario.

Act 1—Breakfast time. Bob, the Colbert son and heir, is discovered chatting with Jarkins, the butler.

Jarkins leaves the room and Jane, the parlour-maid, enters. It is soon evident that Bob is very much in love with Jane.

He begs her to elope with him, but Jane refuses, pleading that his mother would never forgive him. The two go out.

Jarkins enters, accompanied by a very much excited young chap in overalls who insists upon seeing Kathleen, the daughter of the house.

Kathleen enters, and a quarrel ensues between her and the young man, who, it develops, is Peter Ramsey, a former sweetheart. Kathleen admits that she loves him, but says she can not marry him because her mother has made her promise to marry James Donohue, a wealthy middle-aged friend of the family.

Mr. and Mrs. Colbert come into the room. Mrs. Colbert is so excited at finding the objectionable Peter with Kathleen that she has one of her frequent "heart attacks." The whole family rush to her aid and Kathleen vows never to see Peter again.

Mrs. Colbert soon recovers sufficiently to start another argument with her husband. George Colbert's mother, "Grandma," from Quebec, has written to say that she has all her money and is coming to live with them. Mrs. Colbert is insisting that "Grandma" will not live in her house, when the old lady is ushered in by Jarkins.

Mrs. Nancy Colbert proves to be a delightful old-fashioned lady—very "countersunk" and set in her ways, but she is witty and has a knack of giving friends. From then on, the interest centres around "Grandma" Colbert. She sets about straightening out the tangled love affairs of the Colbert family.

Bursting in upon Augusta, entertaining her socially-prominent friends, Mrs. Wellington-Trent and daughter Monica, Grandma proceeds to "disgrace" her daughter-in-law. Monica is engaged to marry Bob, but Grandma makes no secret of the fact that she thinks Bob is too young for the foppish Monica. Then, too, she insists that she was engaged in her youth to Dr. Emil X. Minnichoff, a famous scientist, who has been invited to the Colbert home.

Augusta is greatly humiliated by her mother-in-law.

Grandma urges on the love affair between Jane and Bob, and, protesting that James Donohue is too old for Kathleen, lends Peter a helping hand. She insists that Augusta's heart attacks are "faked" and that she is not able to prove this point, and a double marriage, Bob and Monica, and Kathleen and James, is arranged for June.

Act 2—Dr. Minnichoff's arrival causes a great stir in the town's social circles. Grandma Colbert is sure that this scientist is none other than her old lover, and she is as excited as a young girl. However, Dr. Minnichoff proves to be the handsome young son of Grandma's friend. He shows a decided preference for Grandma, and Augusta is enraged. She orders her husband to send his interfering old mother to a "rest home" for old ladies.

Late that night, Grandma, heart-broken over this development, sits alone by the fire. Dr. Minnichoff enters, confesses that he is the original Emil and tells her he has become young through a scientific rejuvenation discovery. He begs her to take this treatment and become young also.

Act 3—Grandma has been rejuvenated and, posing as a Russian princess, has come to visit Mrs. Colbert. The male member of the cast are one and all enthralled by this beautiful Princess Nancianna, and Grandma is just in the midst of "showing" Augusta—when she wakes up. The poor old lady has been dreaming in the fireside chair all night.

However, Grandma manages to prove that Augusta's heart is quite sound. She has her own way about her grandchildren's love affairs also, and Dr. Emil presents her with a cheque for \$50,000, an endowment from his father.

Other parts of Ontario report an abundance of snow; in the Quinte district there has been none to speak of.

(By "Shrimp")

Now here's some worthwhile news! From "Queen's," Kingston, comes the word that "Queen's" own "Science" magazine has sold per cent. in the first year since it was published. The average class pass is 4 or 4-50, it's quite a feat.

The general opinion of the Trenton public towards our commencement seems to be that it was "bigger and better than ever." Those outside pats on the back are all to the good for the old Alma Mater.

We neglected to mention that Mr. Stickwood was a co-director of the senior drill, and since that was a "special favourite," he deserves a "special mention."

Basketball—Napanee at Trenton. Friday night's game completes this year's schedule of girls' basketball, and believe you me, it went off with a bang! A little "rough," but plenty exciting. Junior victory for Trenton.

Score 22-10. The Napanee team seemed in A1 condition and ran off some brilliant plays, but Trenton did the scoring.

Senior game went to Napanee. Score—Our girls put up a good fight and the Napanee basketballers put up a better one—34 that's that.

We hope that "Caroline" and "Herbert" don't carry their squabbles on indefinitely. Fourth Form would be a rather uncomfortable place, because they do act realistically!

Reward—dead or alive—for our "Baby Face" Public Enemy No. 1.

Miss Farley asked Alan LaMorre if he had seen any French movies while in Quebec, and Alan replied, "What! pay to hear French talkies when I could hear it spoken free on the streets!"

The girls' gym class were given a new exercise in which we were supposed to be sawing wood. Miss Her-

mine's keys clattered to the floor, and she said, "Now that's the end of our log, girls."

Tommy Emerson, upon the occasion of blowing his trombone at Commencement, felt that his ambition to make one heap big noise in school had been partially satisfied.

"Corky" confesses that he was born and reared in the state of Mumbamba, Africa, and this accounts for his guttural speech.

Classified Ad: Lost, one "Shorter Poems". No long or medium poems accepted. Form V.

Vth has a new theme song: "We chatter, chatter as we go Between the classes row on row That mark our places in the line, The teachers shout, 'Keep time, keep time!'"

Scarce heard—the students babble so."

IV Form News—A lucky dance prize was won by Miss Sally Bradshaw of Belleville.

Later in the evening a much enjoyed cafeteria luncheon of sandwiches, cake, pickles and coffee, was served in the basement. The refreshments were supervised by the ladies of the Guild.

During the remainder of the evening Mr. Ernie Hackett kindly played for dancing and a perfect evening of entertainment was brought to a satisfactory conclusion.

WILLIAM GOSLEIGH DIES IN OSHAWA

Native of Trenton Was Employed by General Motors—Aged 52 Years.

(From The Oshawa Times, Nov. 28)

Following a week's illness, the death occurred in the Oshawa General Hospital last evening of William Gosleigh, 58 Dundas street, Oshawa.

Mr. Gosleigh was born in Trenton 52 years ago, the son of Mr. and Mrs. Octave Gosleigh. Until seven years ago, when he came to Oshawa, Mr. Gosleigh made his home in Trenton.

Upon coming to Oshawa he was employed in the maintenance department of General Motors.

Surviving relatives include his mother and father; his wife, whose maiden name was Nell Hutchinson; two brothers, Alce of Toronto, Vincent of Toronto; one sister, Mrs. Isles of Trenton; two sons, Clarence and Alfred, of Oshawa, and three daughters, Mrs. Legault, Misses Agnes and Vivian Gosleigh, all of Oshawa.

Mr. Gosleigh was a member of St. Gregory's Roman Catholic Church and the funeral will be held from the family residence at 7:30 o'clock Friday morning for mass in St. Gregory's church at eight o'clock. Interment will be made in St. Gregory's cemetery.

na Huyck (Vera Simmons).

Well, if the Juniors came through victorious the Seniors came out just the opposite—and that means just the opposite. But the least said is soonest mended. The Seniors' players they picked up carried on and made a big attempt to make the grade. Marjorie Kinney took all the honours and seemed to be the only one with an eye for the basket as far as scoring went. The final score was, Napanee 28, T.H.S. 14.

Box Score—T.H.S., Marjorie Kinney 14, Napanee, Letitia McCullough 16, Dol Chapman 5, Alice Walters 7.

Line-ups: Trenton—Forwards, Cloris Gauen, Eva Sutcliffe, (Helen Black); centre, Flossie Fitzpatrick; side centre, Marjorie Kinney; guards, Harry Lewis, (Norma Wilson), June Bonisteal, (Leota Ste Croix).

Napanee—Forwards, Letitia McCullough, Dolly Chapman; centre, Alice Walters; side centre, Jean Gaudet (Dorothy King); guards, Margaret Hinch, Helen Henderson.

Parochial Guild of St. George's Church Provides Real Happy Time at Canterbury Hall.

(By Jack Taylor)

"Wear your old clothes" was the motto of the Hard Time "At Home" held in Canterbury Hall on Tuesday evening, under the auspices of the St. George's Parochial Guild, and a real old hard time party it was, and it turned out to be one of the gayest social functions yet held in the hall.

Many attended and many and varied were the fantastic and some picturesque hard time and old fashioned costumes worn.

Rev. F. A. Smith, on behalf of the Guild, heartily welcomed the large number present and suggested if anyone had dignity left to please forget about it for the evening, join in the fun and get into the spirit of the occasion.

It was a party where the coy young miss was not afraid to show a runner in her stocking and where modesty could wear that dress that mother wore when she was a girl.

A minstrel show composed of eight coloured gentlemen: Messrs. Orie Andrews, W. S. Miller, Bill Miller, Geo. Roberts, R. S. Roberts, Orville Ward, Bernard York, R. C. Pearce, with the director none other than Mr. Fred Smith, proved a source of many bursts of laughter, and entertaining old time orchestral selections, "Red Wing," "Turkey in the Straw," "Nellie Gray," were played by the coloured gentlemen, and the instruments were mouth-organ, banjos and the bones. "The Red River Valley" was sung by Mr. Orie Andrews, and the "Old Sledge-Crow" by Mr. Walter Miller, and a duet by Messrs. R. Pearce and O. Andrews, "When It's Lamp Lighting Time in the Valley" brought a great deal of applause.

The minstrels were encored and several more selections, jokes and tap dancing were given.

Little Miss Jean Blair gave a splendid and much appreciated number, the Highland Fling, done with a skipping rope. Encored, she gave another Highland dance which was exceptionally well done. She was accompanied on the violin by Mr. Jack Johnson.

The Grand March gave every person an opportunity to show off the costume.

Intermittently during the evening an old-time orchestra composed of Messrs. Jack Johnson, Arthur Smith, Harold Harvey, Bill Johnson and Roy Simpson, retained a lively spirit with old-time music.

Square dancing was enjoyed. Mr. Wilbert Taylor, who acted as master of ceremonies during the evening, proved a capable caller for the squares.

Mrs. Fred Berry and Mr. Ed. Weir received the judges' award for the best hard time get-up. Miss Ethel Armstrong and Mrs. Max Waldorf won the prizes for the best old-fashioned outfits.

HARD-TIME PARTY DELIGHTFUL EVENT

Parochial Guild of St. George's Church Provides Real Happy Time at Canterbury Hall.

(By Jack Taylor)

"Wear your old clothes" was the motto of the Hard Time "At Home" held in Canterbury Hall on Tuesday evening, under the auspices of the St. George's Parochial Guild, and a real old hard time party it was, and it turned out to be one of the gayest social functions yet held in the hall.

It was a party where the coy young miss was not afraid to show a runner in her stocking and where modesty could wear that dress that mother wore when she was a girl.

A minstrel show composed of eight coloured gentlemen: Messrs. Orie Andrews, W. S. Miller, Bill Miller, Geo. Roberts, R. S. Roberts, Orville Ward, Bernard York, R. C. Pearce, with the director none other than Mr. Fred Smith, proved a source of many bursts of laughter, and entertaining old time orchestral selections, "Red Wing," "Turkey in the Straw," "Nellie Gray," were played by the coloured gentlemen, and the instruments were mouth-organ, banjos and the bones. "The Red River Valley" was sung by Mr. Orie Andrews, and the "Old Sledge-Crow" by Mr. Walter Miller, and a duet by Messrs. R. Pearce and O. Andrews, "When It's Lamp Lighting Time in the Valley" brought a great deal of applause.

The minstrels were encored and several more selections, jokes and tap dancing were given.

Little Miss Jean Blair gave a splendid and much appreciated number, the Highland Fling, done with a skipping rope. Encored, she gave another Highland dance which was exceptionally well done. She was accompanied on the violin by Mr. Jack Johnson.

The Grand March gave every person an opportunity to show off the costume.

Intermittently during the evening an old-time orchestra composed of Messrs. Jack Johnson, Arthur Smith, Harold Harvey, Bill Johnson and Roy Simpson, retained a lively spirit with old-time music.

Square dancing was enjoyed. Mr. Wilbert Taylor, who acted as master of ceremonies during the evening, proved a capable caller for the squares.

Mrs. Fred Berry and Mr. Ed. Weir received the judges' award for the best hard time get-up. Miss Ethel Armstrong and Mrs. Max Waldorf won the prizes for the best old-fashioned outfits.

The musical chair contest was won by Misses Grace Niddery and Betty Weaver.

A lucky dance prize was won by Miss Sally Bradshaw of Belleville.

Later in the evening a much enjoyed cafeteria luncheon of sandwiches, cake, pickles and coffee, was served in the basement. The refreshments were supervised by the ladies of the Guild.

During the remainder of the evening Mr. Ernie Hackett kindly played for dancing and a perfect evening of entertainment was brought to a satisfactory conclusion.

WILLIAM GOSLEIGH DIES IN OSHAWA

Native of Trenton Was Employed by General Motors—Aged 52 Years.

(From The Oshawa Times, Nov. 28)

Following a week's illness, the death occurred in the Oshawa General Hospital last evening of William Gosleigh, 58 Dundas street, Oshawa.

Mr. Gosleigh was born in Trenton 52 years ago, the son of Mr. and Mrs. Octave Gosleigh. Until seven years ago, when he came to Oshawa, Mr. Gosleigh made his home in Trenton.

Upon coming to Oshawa he was employed in the maintenance department of General Motors.

Surviving relatives include his mother and father; his wife, whose maiden name was Nell Hutchinson; two brothers, Alce of Toronto, Vincent of Toronto; one sister, Mrs. Isles of Trenton; two sons, Clarence and Alfred, of Oshawa, and three daughters, Mrs. Legault, Misses Agnes and Vivian Gosleigh, all of Oshawa.

Mr. Gosleigh was a member of St. Gregory's Roman Catholic Church and the funeral will be held from the family residence at 7:30 o'clock Friday morning for mass in St. Gregory's church at eight o'clock. Interment will be made in St. Gregory's cemetery.

na Huyck (Vera Simmons).

Well, if the Juniors came through victorious the Seniors came out just the opposite—and that means just the opposite. But the least said is soonest mended. The Seniors' players they picked up carried on and made a big attempt to make the grade. Marjorie Kinney took all the honours and seemed to be the only one with an eye for the basket as far as scoring went. The final score was, Napanee 28, T.H.S. 14.

Box Score—T.H.S., Marjorie Kinney 14, Napanee, Letitia McCullough 16, Dol Chapman 5, Alice Walters 7.

Line-ups: Trenton—Forwards, Cloris Gauen, Eva Sutcliffe, (Helen Black); centre, Flossie Fitzpatrick; side centre, Marjorie Kinney; guards, Harry Lewis, (Norma Wilson), June Bonisteal, (Leota Ste Croix).

Napanee—Forwards, Letitia McCullough, Dolly Chapman; centre, Alice Walters; side centre, Jean Gaudet (Dorothy King); guards, Margaret Hinch, Helen Henderson.

Parochial Guild of St. George's Church Provides Real Happy Time at Canterbury Hall.

(By Jack Taylor)

"Wear your old clothes" was the motto of the Hard Time "At Home" held in Canterbury Hall on Tuesday evening, under the auspices of the St. George's Parochial Guild, and a real old hard time party it was, and it turned out to be one of the gayest social functions yet held in the hall.

Many attended and many and varied were the fantastic and some picturesque hard time and old fashioned costumes worn.

Rev. F. A. Smith, on behalf of the Guild, heartily welcomed the large number present and suggested if anyone had dignity left to please forget about it for the evening, join in the fun and get into the spirit of the occasion.

It was a party where the coy young miss was not afraid to show a runner in her stocking and where modesty could wear that dress that mother wore when she was a girl.

A minstrel show composed of eight coloured gentlemen: Messrs. Orie Andrews, W. S. Miller, Bill Miller, Geo. Roberts, R. S. Roberts, Orville Ward, Bernard York, R. C. Pearce, with the director none other than Mr. Fred Smith, proved a source of many bursts of laughter, and entertaining old time orchestral selections, "Red Wing," "Turkey in the Straw," "Nellie Gray," were played by the coloured gentlemen, and the instruments were mouth-organ, banjos and the bones. "The Red River Valley" was sung by Mr. Orie Andrews, and the "Old Sledge-Crow" by Mr. Walter Miller, and a duet by Messrs. R. Pearce and O. Andrews, "When It's Lamp Lighting Time in the Valley" brought a great deal of applause.

The minstrels were encored and several more selections, jokes and tap dancing were given.

Little Miss Jean Blair gave a splendid and much appreciated number, the Highland Fling, done with a skipping rope. Encored, she gave another Highland dance which was exceptionally well done. She was accompanied on the violin by Mr. Jack Johnson.

The Grand March gave every person an opportunity to show off the costume.

Intermittently during the evening an old-time orchestra composed of Messrs. Jack Johnson, Arthur Smith, Harold Harvey, Bill Johnson and Roy Simpson, retained a lively spirit with old-time music.

Square dancing was enjoyed. Mr. Wilbert Taylor, who acted as master of ceremonies during the evening, proved a capable caller for the squares.

Mrs. Fred Berry and Mr. Ed. Weir received the judges' award for the best hard time get-up. Miss Ethel Armstrong and Mrs. Max Waldorf won the prizes for the best old-fashioned outfits.

The musical chair contest was won by Misses Grace Niddery and Betty Weaver.

"...So that Our Visitors will be Sorry to Leave"

"If we are going to invite people to this country, we must be honest with them... Courtesy costs nothing and is one of our greatest tourist assets... Let us so treat strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

Rt. Hon. R. B. BENNETT, Prime Minister of Canada, in the Canadian Association of Tourist and Publicity Bureau, November 6, 1934.

Canada's tourist activities represent more than a great industry from which everybody benefits. They provide an opportunity to create what the Prime Minister has described as "that feeling of neighbourliness" which is such a vital factor in building up cordial relations within the family of nations.

For both these reasons, may I urge upon the people of Canada the importance of showing consideration, courtesy and honesty to guests of our country? Let us all do those little acts of kindness which count for so much when one travels in a strange land.

We have a beautiful country. We must keep it so. We want our visitors to travel highways free from disfigurement, walk the streets of cities that are orderly and clean, and find at the end of every day's travel an inviting spot to rest. Canadians should turn their attention now to the important work of preparing for next year's tourist season.

As a nation, we are advertising abroad the attractions of Canada as a holiday land. We must see to it that our guests return home with only the happiest recollections—and the determination to come back again and again.

Nor should we forget, in planning our own vacations, that there are beauties to discover and friendships to be made in our neighbouring provinces. We live in one of the world's most glorious playgrounds—let us learn to know better the rich variety of its travel attractions.

MR. and MRS. J. B. SMITH HONORED ON THEIR 50th WEDDING ANNIVERSARY

A happy event was held at the home of Mr. and Mrs. Joseph Smith, on Saturday evening, Nov. 3, being the occasion of Mr. Smith's 50th birthday and the eve of their 50th wedding anniversary.

Because the immediate members of the family, a large number of other relatives and friends gathered for the occasion. The presentation of two lovely rocking chairs was made and the following address read:

Dear Mother and Father: We and it much pleasure in having the privilege of being present here tonight, this being the occasion of your forty-fifth anniversary of happy married life.

We, the family, have tried to be together on this day to have the pleasure of an enjoyable evening and we hope you will be spared for us to meet many times again.

You have been the best to us, both children and grandchildren, that parents could be, and we could not expect more of either of you.

Perhaps you have not had the best in us children. We are here to express our love for you both by asking you to accept this small token of our love and respect.

It is not the value of the gift but the love it is given with.

We hope you will spend many happy hours in these chairs.

Signed on behalf of the family, Trenton, December 1st, 1934.

Mr. and Mrs. Smith were married in Marmora and Mr. Smith has resided in the County of Hastings for fifty years, arriving from England. They have lived in Trenton a number of years and are highly esteemed by a large circle of friends.

CARD OF THANKS

Mrs. J. E. McCaw and Mrs. H. M. Ward wish to thank their friends for the many acts of kindness and sympathy in their recent sad bereavement.

VOTERS' LISTS, 1934

Municipality of Trenton, in the County of Hastings.

Notice is hereby given that I have compiled with section 7 of the Voters' Lists Act, and that I have posted up at my office in the Municipal Building, Trenton, Ont., on the 26th day of November, 1934, the list of all persons entitled to vote in the said municipal district at municipal elections and that such list remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law, the last day for appeal being the 17th day of December, 1934.

Dated at Trenton, Ont., December 3, 1934.

P. J. O'ROURKE,
Clerk of Municipality of Town of Trenton

W. N. SIMMONS
MEN'S STORE - FRANKFORD

THE FRANKFORD SUN

FRANKFORD NEWS

FRANKFORD, ONTARIO, DECEMBER 8, 1934

Special evangelistic meetings at Standard Church each night this week. Mrs. S. Orr visited relatives in Peterboro last week, returning early this week.

Mr. W. P. Solmes of Smiths Falls visited at his son-in-law's, Mr. A. E. Wood's, on Tuesday.

Rev. W. H. Wagar and wife were visiting her parents, Rev. and Mrs. Shadbot, the past week.

Mrs. Arthur Orr and baby spent a few days with relatives while her husband was attending a convention.

The tax collector of Murray township was at Powell's store, Stockdale, on Tuesday, December 4th, receiving taxes.

Mr. and Mrs. Ed Walt and Arthur Walt were back to Bonarlaw at the home of Mr. and Mrs. M. Barlow during Sunday evening of last week.

Mr. and Mrs. L. V. Wood, with their two boys, of Peterboro, spent part of Sunday at the home of their parents, Mr. and Mrs. A. E. Wood, Stockdale.

The Stockdale A. M. entertained the societies from Waterloo, Tabernacling Zion and Frankford, at a large gathering held in the church basement. A splendid time was enjoyed by all. A spelling match was one of the features.

A miscellaneous shower for the newly married couple was held on Thursday evening at the home of the bride, Mr. and Mrs. C. Chase. A good time was enjoyed by a large crowd. There were many gifts, showing the esteem in which the recipients are held by their many friends.

HENRY WALLACE DIES IN HIS EIGHTIETH YEAR

The death occurred in Frankford on November 30th of Henry Wallace, in his 80th year, at the home of his son, Arthur Wallace. He is survived by his son Arthur, one daughter, Mrs. Arthur Howard, and one brother, Thomas Wallace.

Mr. Wallace farmed in this section all his life until recently. His wife predeceased him several years ago. He will be greatly missed by a large circle of friends.

Interment took place on Sunday, December 2nd, in Frankford cemetery.

FRANKFORD, R. R. NO. 4

Mr. D. C. MacRostie spent the week-end in town with his family.

Mrs. Estelle Kehoe of Cobourg, is visiting friends in Frankford this week.

Miss Jessie Dickson entertained the bridge club at her home on Thursday evening.

Mrs. Murray Reynolds of Foxboro is spending a few days with her sister, Miss Gay, who is ill.

Mrs. W. E. Windover is visiting at the home of her daughter, Mrs. D. W. Gullett, Peterboro.

Mr. and Mrs. B. Chase and Mr. and Mrs. B. Harrison and daughters visited Belleville friends on Sunday.

A number of interesting books of non-fiction have been added to the shelves of the Library recently.

Mrs. H. Nobel and son Hadley are spending a few weeks in Rochester, N.Y., where Mr. Nobel is now employed.

At the annual meeting of the Local Council of Hastings and Prince Edward, held in Belleville on Wednesday evening, Frankford Branch of the A.Y.P.A. had the honour of having their president, Miss Eleanor MacRostie, appointed secretary-treasurer of the Association.

A large number of the members of the Frankford A.Y.P.A. motored to Belleville on Wednesday evening to attend the annual meeting of the Local Council of Hastings and Prince Edward, held in St. Thomas' Parish Hall. A splendid programme was given, the high light being an inspiring address by Mr. Howard Mills, president of the Ontario Council, who motored from Toronto to be present.

The Tax Collector is pressing for payment of taxes. If subscribers who are in arrears paid up, the taxes could easily be paid.

D. R. KETCHESON IS REEVE-ELECT

New Councillors Chosen in Frankford Are Messrs. Loney, Dickson, Spencer and Turley.

The Frankford municipal elections were held on Monday, with the result that D. R. Ketcheson was elected Reeve for 1935, as indicated in the following vote.

For Reeve
D. R. Ketcheson 262, J. B. Patrick 88.

For Councillors
A. B. Loney 242, G. J. Dickson 231, G. N. Spencer 220, C. R. Turley 201.

T. H. Sweetman, the defeated candidate, received 134.

Reeve J. B. Ford retired this year.

DONATIONS SENT TO WEST APPRECIATED

Mr. Roy B. Chapman of Frankford has received the following letter from Gabri, Sask., dated October 30, which acknowledges speaks for itself:

Dear Friend:

In the splendid card of fruit, vegetables, etc., from Brighton to Gabri was found a sheet of paper with your name on it. Many thanks for sending it. It enables me to thank you and others through you for your and their kindness in helping us out in the hard experiences we are having.

Last season's harvest was almost a complete failure. Very few got as much as their seed back; many did not thresh a single bushel. Farmers who a few years ago seemed to be prosperous, have had to go on relief of one kind or another. It is very disheartening.

The potato crop, like everything else, turned out badly. In my own garden I planted 450 hills and dug less than two pails full, ranging in size from a hen's egg to a marble.

The only really good rain we had was in the beginning of June. That gave everything a fine start and we were very hopeful. But after then the showers were few and far between—never going more than three-quarters of an inch deep. That soon dried up and the dust storms began blowing as before.

Let me add that such practical sympathy as yours does more than, perhaps, you realize. It helps wonderfully to give people the heart to carry on. Again thanking you, I am, yours sincerely—D. Bower Millard, Chairman, Distribution Committee.

400 CRAFT PASS UP MURRAY CANAL

According to information supplied by Joseph Perrow, son of Mr. M. Perrow, bridge tender of the Murray Canal, a total of nearly four hundred craft have passed through its waters during the current season. Large craft are required to stop for toll at the Canal office as they pass, while small craft are allowed to proceed without interruption. Present figures show that of the heavy craft 235 have registered, and about 145 small craft have also passed. This information recalls to mind that the last vessel to attempt local navigation, the Red Cloud, found no little water in the canal that she spent some forty-eight hours before getting entirely free of the local waterway. Part of the course had to be navigated with donkey engines to pull the vessel along by means of cables attached to posts on the canal banks.

Vacant Time

Customer—"I want to buy three potted geraniums."

Florist—"We have no geraniums, but I can give you the best thing I have."

Customer—"Chrysanthemums won't do. These plants are to replace some geraniums my wife asked me to water while she was away."

TRENTON SCOUTS BANQUET AT CANTERBURY HALL

(By Scout Clarke McMurray)

Wednesday evening, December 5th, thirty-six Trenton Boy Scouts sat at the festive board at Canterbury Hall for an enjoyable banquet.

The mothers of the boys were present to give a hand with the culinary operations and the serving of the many varieties of delectable eats. It proved a most enjoyable time for all present.

After the banquet we fell in and went to our corners to find out who was present, and then joined our patrols and had the roll call.

We then went into horseshoe formation for investiture, six boys being invested—Nelson McKee, of the Loon Patrol; Lorne Simpson, Fox Patrol; Jack McKibbin, Wolf Patrol; and Albert Cunnell, C. Wilkins and C. McMurray of the Moose Patrol.

A game was played, directed by A. S. M. Yards, where Scoutmaster Campbell formed us up for signalling under A.S.M. Frank Churchill, Scout Bob Behan being successful in the signalling tests.

Field Secretary E. L. Jones, who was present, took charge of another game called "Nigger in the woodpile" and it was great fun trying to catch the black man. We then went back to corners and counting uniforms. Fox Patrol got the most points.

The Scouts were divided into three groups, Mr. Jones taking charge of the second class, in the first and, Scoutmaster Campbell the tenderfoot class in sign reading, and A. S. M. Churchill in charge of beginners.

The troop was then dismissed, after the singing of the National Anthem, until next Wednesday night.

NEW PRINCIPAL OF ALBERT COLLEGE AT KING ST. CHURCH

Rev. Bert Howard Preaches at Morning Service—Reveals Conditions in West.

Sunday, December 2, Rev. Bert Howard, newly appointed principal of Albert College, Belleville, addressed the congregation of King St. United Church at the morning service.

Mr. Howard has seen twenty years of service on the western prairies and he knows the struggle of those early years of settlement and present-day conditions in the west as do few others. The speaker took as his text, "I came into the world that ye might live."

and that abundantly. He pointed out that the three essentials of life are Bread, Beauty and Brotherhood.

The poverty-stricken conditions in the west to-day—the splendid way in which the people, lacking the bare necessities of life, are rising above these tribulations—and the co-operation which the people of the eastern provinces are showing—these things illustrate the three-fold table of essentials.

Mr. Howard's address was highly inspirational. He expressed the appreciation of the people of Western Canada for the helping hand their eastern cousins are extending in this time of need.

NEED FOR BED CLOTHING IN MANY HOMES HERE

W.C.T.U. of Trenton Collecting Bedding and Clothing for Distribution.

After some years of little or no work for the beneficiaries of a large number of families residing in our midst, has resulted in household necessities, such as quilts, blankets, bedding of all kinds, and clothing, becoming depleted to such an extent that many have not sufficient coverings to keep them warm during the winter months.

Though work and money is being supplied, it is not enough to cover these necessities.

The ladies of the W.C.T.U. are making an appeal to all who have a surplus and can spare a quilt, blanket or anything in the clothing line, to remember those not so fortunate, and kindly leave their donations at the police office.

Those contributing will sleep the sounder, knowing they have done something to ameliorate this condition.

C. G. I. T. OF KING STREET UNITED CHURCH

A short meeting of the C.G.I.T. girls was held on Tuesday evening in King Street Church. Owing to examinations no meetings will be held until the Christmas holidays, when we will make our badges with a gold key on them, for our group.

The Golden Key Group plans were to have a meeting with poems, stories and write-up about the work and hikes that a C.G.I.T. girl enjoys.

Plans are made also for the mission project which will occupy our meetings after Christmas.

—By one of the Girls.

To counteract erroneous impressions of the "roughing it" Boy Scouts of Grantham, England, invited parents to a demonstration camp, and served a well prepared meal of roast beef, two vegetables and currant pudding, "cooked before their eyes."

A string of pearls, on Lorne Ave., between Henry and Dundas Streets. Finder please phone 837, Trenton, or write to P.O. Box 587.

CARS IN COLLISION

An accident occurred on Thursday evening, in front of Graham's Garage, when a car driven by Bruce Jones of Belleville, collided with a car driven by Mr. Gilroy of Coe Hill. The cars were proceeding in opposite directions. The Gilroy car suffered damage to the extent of \$30, while the car driven by Mr. Jones suffered a broken wheel.

The police investigated the accident.

CARD OF THANKS

Mr. G. W. Dickson wishes to thank all his friends for their support in electing him to the Council in Monday's elections.

Faster Way Now to Relieve Neuralgia

DISCOVERY ALSO EASES BAD HEADACHES
MUSCULAR PAIN OFTEN IN FEW MINUTES

Remember the pictures below when you want fast relief from pain. Aspirin eases even a bad headache or neuralgia often in a few minutes. An Aspirin tablet begins "taking hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN, the method doctors prescribe. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Get tin of 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN a few minutes after taking.

When in Pain Remember These Pictures

Aspirin is the Trade Mark of the Bayer Company, Limited

The TUDOR HOUSE

By MRS. STANLEY WRENCH

(Author of "Sing for the Moon," "Strange Lovers," etc.)

SYNOPSIS

Michael Borde, 40, unmarried, born and bred in a Birmingham slum, is now a wealthy motor manufacturer. One day he visits the countryside around his old home and rescues Daphne Eden from a menacing tramp. He falls in love and proposes. Daphne accepts and introduces him to her father, who of course is not the father. "Get out of here you cur—you ruined my home—stole my wife and my daughter," Daphne's father dies and she disappears. Michael explains to her friend, Mrs. Gregory that he was misinterpreted. He buys the old Tudor House owned by the Hamill-Hardys. Mrs. Gregory promises to mail a letter from him to Daphne arranging a meeting. Daphne does not appear. On the way home Michael collides with a car driven by Diana Hamill-Hardy.

Mrs. Gregory dies. Daphne hears from her solicitors.

At the solicitors she is met by her stepfather.

"Romance of millionaire," read Lily Eden. "The engagement is announced. The beautiful Miss Diana Hamill-Hardy, who is so well known on the hunting field, to Mr. Michael Borde, the motor-car magnate."

Lily Eden almost rubbed her eyes. There had been times lately when she began to wonder whether, with middle-age creeping upon her, her eyesight was weakening. She studied the features of the man in the picture, then glanced at the girl.

"Well, I'm dashed," she muttered. "It is Michael Borde. A millionaire, too. Well, I'm dashed."

Rose and carnation ... lilac and eucalyptus ... a subtle blend of perfumes; the whizz of a drier, as someone had waves adjusted in her hair; the suave tones of an attendant soothing outraged nerves.

Hastily pulling herself together, Lily Eden faced the forget-me-not spirit again.

"Oh, yes, yes," she said hurriedly. "Face massage ... yes ..."

"Barny," murmured Miss Forget-me-not sweetly, as she studied her features in a glass. "Terrible old hag, too ... wonder what she wants face massage for."

"That's right, madame, a little ... a ver-ee little lower, Parfait, yes, madame. Now, relax ... that is right, madame."

Lily Eden relaxed obediently, but

That Depressed Feeling Is Largely Liver

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned. What you need is a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or chewing gum or rougeage which only move the bowels—ignoring the real cause of trouble, your liver. Take Carter's Little Liver Pills. Purely vegetable. No harsh calomel (mercury). Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Wenzel's False Teeth. The largest seller in the world—grasping teeth so secure yet comfortable they feel natural. Positively no slipping or clicking—blissful comfort assured. Day-long. Forms a special comfort cushion to protect and soothe gums. No colored, gummy paste—keeps mouth sanitary—breath pleasant. Irrespective—all druggists.

her brain was more active than ever it had been in her life before, and beneath her shabby handbag on the platinum-topped stand lay that copy of the illustrated magazine, towards which every few minutes her eyes went, as she racked her brains to remember everything relating to the past.

"Michael Borde. A millionaire. There ought to be some pickings in this for me," ran her thoughts.

"What's it worth to you to know the truth?" she had asked Daphne, racking her brains to know in what way Daphne and Michael Borde would be linked up, especially now he was going to marry another girl.

"No, madame, please do not move." Adroitly the handbag was swathed about her chin, firm but soft fingers pressed her back against the little cushion, a strap was adjusted, and a faint delicious sensation ran over her as she yielded.

"Sorry," she murmured huskily. "I forgot."

"Relax, madame, that is all for the moment," adjured the attendant in white.

Obediently she closed her eyes, but again that cunning brain of hers searched adroitly in the past. The worst of it was five pounds would not go very far; she would have to wait until she heard from Daphne again.

DIANA'S MAN.

How it had come about Michael Borde never could have explained. Even to himself he had to own that he could not remember just how it had happened. Now, as he stood in his dressing room, trying to fasten his tie, he frowned. It was all part and parcel of that extraordinary dream he had dreamed in which he was a central figure.

He muttered, and tore away the offending tie. That was the third time he had spoiled this evening.

It was one of the few things in life he had never mastered, but until now he had never bothered greatly over his inability to tie a dress bow. In town he had murmured so often "Time is money." Refusing to conform to custom, he had a ready-made bow which his shirt-maker assured him was so perfect that even he had been deceived by it, and Michael Borde had thankfully dipped this in place, and strutted around triumphantly, over other poor mortals who had to get the help of their man, or, perhaps a wife. Here, however, the fine edge of his self assurance had been removed, although how it came about he could not tell. Yesterday evening at dinner he had put up his hand nervously, fidgeting that dress tie, seeing Diana Hamill-Hardy's sea-green eyes upon it, and a cold perspiration had broken out on his forehead. Why should he care whether a woman saw through his subterfuge or not? Hang it all, who was she, and what was she to matter? Yet ever since he had been here, he knew that he was not the same.

They were an odd lot, he decided, this country into which she had plunged him when she drove him here, and Lord Trottenleigh had welcomed him as though he were Royalty. Michael Borde had enjoyed himself then, Old Trottenleigh was a decent chap, a bit of a mug, but he was no fool. No doubt he made a decent income out of what he was doing, lending his name to prospectuses, sitting warily and silently on city boards

bored stiff by figures, or possibly taking a sly interest in what went on behind the scenes, but all the time behaving like a gentleman, and not even blinking an eyelash.

Old Trottenleigh had pressed hospitality upon him, and when that country practitioner had declared it would be madness to move him until they got a surgeon down and had his leg attended to, Michael Borde had simply leaned back, and as he told himself, made the best of a bad job.

As it turned out, it was not so much of a bad job, after all. In a fortnight he was engaged to Diana Hamill-Hardy, he was accepted by all in her friends here as one of themselves, in fact he was beginning to believe he was one of them, after all, and serenely had thoughts of employing someone to take out his parents' age. At any rate he was going down to Birmingham at the first opportunity, and would nose around himself, and find out if anyone belonging to old Daniel was left.

Yet what did it matter? Old David belonged to the past. It was the future he was concerned with now.

"He has no background." Memory of those words returned, Michael Borde stepped away from the mirror and frowned.

At last, God, he'd done it, and a tiny sigh escaped him. The tie was fastened. In its way it was a very real triumph. One step nearer that was all. With slow deliberation he untied the bow, grinned at himself, then with equal deliberation re-tied it. Easy, after all, when you got the hang of it. Just as easy as knowing which wines went with what, or learning the patter of point-to-point and polo. In fact, he was beginning to grow really interested in horses.

This was his last night here. Tomorrow he must return to business, and even now at the thought of getting back into harness again he braced his shoulders and knew that he would be glad to leave this behind. It was a new life, and a life he must accustom himself to now, but there were moments when he went uncomfortably hot all over, knowing himself to be outside it all. Trottenleigh well he was a lord, but his people were like the Hamill-Hardys to the days of King John. The created silver, old-fashioned stuff, amonged Michael Borde. This sort of thing couldn't be bought, at least not with money, but it all seemed unfair somehow.

Times had changed. A man did not brace on armour and go out on the battlefield fighting beside his sovereign to be knighted. Hang it all—those thousands of men out of work, whom now his motor-car industry had absorbed, knew his name—and how many, except a few antiquaries, knew anything of the Hamill-Hardys. (To Be Continued.)

Droitwich Center For British Radio

Droitwich Eng.—All but the remotest corners of Britain can now be served by one radio station, with the opening of the new Droitwich transmitter. This station has 700-foot masts, carrying an aerial wire with a power of 150 kilowatts.

Starting 12 years ago with some enthusiastic amateurs at Writtle, near London, with a power of a few hundred watts, British broadcasting has progressed from a transmitter on the roof of a London store to a temporary station at Chelmsford, then to Daventry, and now to Droitwich, not far from the center of England.

A visit to Droitwich shows nearly everything in duplicate, so that within a few moments of a temporary breakdown a switch-over can be made to carry on the program. The machinery, dealing with powers running up to 20,000 volts, is looked after by a staff of 40 men.

The Hick Town

—A hick town is a place where you say, "Gimme Jones' store," and central says, "His phone has been took out."

Grandmother's Remedy Still Good Today

Coarse Roughened Skin Unnecessary

The ideal, healing, protective lotion since 1875. Hinds Honey and Almond Cream makes unnecessary red, work-roughened hands, and complexion coarsened from outdoor exposure. Women use Hinds Honey and Almond Cream, as a preventive and for relief, for chapped skin.

Apply this delightfully fragrant, soothing lotion. Notice how quickly it is absorbed by the skin, leaving no trace of stickiness. Gives instant relief to chapped hands, and healing is rapid and complete. If you believe in "household remedies," apply Hinds Honey and Almond Cream before exposing your skin to raw, damp weather and cold winds. Delightfully cool, soothing and softening in effect. Hinds Honey and Almond Cream offers adequate protection and keeps your skin smooth, soft and white through the roughest work or weather.

What Does Your Handwriting Reveal?

GEO. ST. CLAIR
(Grapho-Analyst)
All Rights Reserved

Editor's Note: Mr. St. Clair deals with another interesting problem this week. You may not be confronted with a similar case, but you probably have some problem in which this well known writer's advice would be welcome. See his invitation to you, following this article.)

Miss Anxious writes as follows: "I work in an office and am very dissatisfied with my work, although I can put up with it for the sake of having something to do and the salary that goes with it. I would much prefer to have studied medicine, and I would have done so if illness had not prevented me from following it up. Now I have the following problem which is worrying me terribly. I am terribly fond of two men, and I really cannot choose between them. Should I marry the young doctor, who will have a long struggle to make before success comes (I am willing to help him in the struggle, if I can make up my mind that I love him enough to marry him). Or should I marry the other man—he is 35 years of age and I am but 27. This man is wealthy and can give me luxuries I have been denied. He is refined and has travelled all over the world. Because of this I feel inferior to him, although he is most unassuming and a wonderful pal. Now Mr. St. Clair, I shall consider your opinion almost final regarding this matter as I simply cannot decide."

In considering this problem, mere consideration of handwriting is not sufficient. As far as character is concerned, there is little to choose between these two men. They are both straightforward and reliable. One has money and doesn't have to worry about making a living. The other—the doctor—has his way to make in the world, and I have no doubt, that barring unforeseen accidents he will do at least fairly well in his chosen sphere.

So it is necessary to use psychology. Here we have a girl who is no longer in the flapper stage, and who ought, generally speaking, to be able to make a choice between two men for her life partner.

It is my belief that she is rather partial to the young doctor. His ambition to get on strikes a responsive and sympathetic chord in her mind, because girls are usually more sympathetic because girls are usually more sympathetic who are striving hard to make progress.

But it is not only this. She herself

wanted to take up the study of medicine and was only prevented by illness. Her interest is thus in medicine and those things that this young doctor represents.

Against all this—and you will notice that I am accepting her own expression that she is very fond of them both, at its face value—we have the wealthy suitor, and "Miss Anxious" is undoubtedly greatly tempted by the possibilities of comfort and financial safety that his money represents.

This latter feature is, I believe, clouding the fact that she is more in love with the young doctor.

Now for a word or two about the girl herself. She is fairly well-balanced temperamentally, is capable and independent. She possesses the capacity to aid the struggling doctor in his efforts towards success, and she also has the sympathy and kindness of heart that would solace him in his struggles.

I advise you, "Miss Anxious" to decide in favour of the young doctor. It is my own personal opinion that you are really more in love with him, and I think you will feel settled after making this decision, and glad that you did so.

I wish you all happiness and hope that your young doctor will not have too arduous a struggle before he reaches comparative success.

The writer of these fascinating articles can help you too. Do you wish to know the story behind your own handwriting? Would you like to know the truth about your friends?—whether they are sincere or deceitful; reliable or dishonest? Send specimens of handwriting you want analysed,

CHILDREN'S CONSTIPATION Ended!

Mrs. H. T. Rowson, Athens, Ont., writes: "My baby boy was troubled with constipation. I gave him Baby's Own Tablets as directed. Before I had given half the box the constipation was righted. By relieving constipation, Baby's Own Tablets prevent more serious ailments developing. Much easier to take than nauseating laxatives and perfectly safe for all little folk from the wee babe to children of school age. 25c package."

Dr. Williams' 166
BABY'S OWN TABLETS

Dogs as House Guards

According to police officials, house dogs, regardless of their size or breeding, just so long as they recognize the difference between their master's footsteps and those of a stranger, form the best protection against housebreaking. The bark of an alarmed dog has saved many families from thieves, they say.

In the Wake of the Storm

Rain, sleet, a high wind, icy roads—every available telephone lineman busy repairing storm damage.

Seeing a five-passenger sedan skid and overturn in the ditch, Bell Telephone linemen, trained to render skilled First Aid, hurry to the scene. Two of the party are unconscious and the other three badly cut about the head and arms.

One of the telephone men attaches an emergency telephone to the wires and asks the operator in the nearest town to send a doctor. The other two linemen staunch the flow of blood and revive the unconscious victims, working to such good purpose and so skillfully that when the doctor arrives he finds that all possible has been done and compliments the telephone men on their First Aid knowledge and prompt help. An oft-told tale of the modern highway.

WING COMMANDER

AND MRS. BREADNER

HONOURED BY FRIENDS

In honour of Wing Commander L. S. Breadner of the Trenton Airport, twenty or more officers and officials of the Trenton Airport and friends rendered him a dinner at the Belleville Club on Tuesday evening. Among those present was Wing Commander G. O. Johnson, who is taking Wing Commander Breadner's place while he is away in England.
The toast to the guest of honour was proposed by Flight Lieutenant F. V. Heakes, and was suitably responded to by Wing Commander Breadner.

Several other impromptu speeches were made by other guests.

On the same evening Mrs. Breadner was honoured in Trenton at a dinner at Hotel Gilbert at 7 o'clock, later going on to Mrs. Grandy's. The farewell dinner was given by the following ladies for Mrs. Breadner: Mrs. G. O. Johnson, Mrs. R. S. Grandy, Mrs. F. L. Reid, Mrs. H. E. Richardson, Mrs. F. V. Heakes, Mrs. W. B. Wilson, Mrs. H. W. Hewson, Mrs. R. G. Ford, Mrs. Brian Carr-Harris, Mrs. W. D. VanVleet, Mrs. W. J. Johnston and Mrs. Alex Lewis.

The Book Shelf

BY MAIR M. MORGAN

THE ROLLING YEARS by Agnes Slight Turnbull (Macmillan, Toronto) \$2.50 is an authentic re-creation of a Scottish farming community of western Pennsylvania. Mrs. Turnbull grew up in this district which accounts for the "alive" quality of the characters in this novel of the McDowell family.

Stern Daniel McDowell, the father, whose Calvinistic nature, allows him no leeway, when his good friend Bob Forsythe breaks the Sabbath law, by "taking in" his wheat, instead of attending church. Daniel reports Robert's fall from grace, even though it grieves him sorely.

Sarah, the mother, who at the birth of her twelfth child, asserts herself. "Twelve children, Daniel, and I've always given in about the names. Now I'm going to have my way. She's to be Jeannie. I've earned it."

David, the son, ambitious, but not to become a farmer. He renounces Teresa, the Forsythe "bound girl" though they both regret it bitterly.

Liza Jane and Betsy, who console each other in their spinstership.

Two love stories—of harum scarum Jeannie and the young schoolmaster and of their daughter and a Scottish student, give the romantic touch. The fine character sketching of the community and the locality give one a vivid picture of the times. Can't you "see" this picture?

"The village now was the centre of the large agricultural community about it. The flour mill was here, the tannery, and the blacksmith shops. Here dwelt also the cabinetmaker,

the weaver, and the tailor. But most important of all, here was Galloway's General Store, which served both as emporium and as bank to all the farmers of the countryside. For there was nothing which Galloway's did not handle. They accepted the farmer's wheat, oats, potatoes, butter, eggs, ham, and sausage, and entered the value of the produce in the credit side of the huge ledger. Then they dispensed groceries, plows, gum boots and calico; horse collars and hair pins; tannery nails and neckties, setting the same down in the debit columns of the farmers. There were no receipts asked for or given."

BOOKS RECEIVED

FREEDOM FAREWELL by Phyllis Bentley (Macmillan, Toronto) \$2.50, a first-rate romance and authentic account of Roman society in the last century of the Republic, with scenes in Rome, in Gaul, in Spain, in Africa.

BETWEEN FRIENDS by Mary Elizabeth Thornhill (S. Reginald Saunders, Toronto) \$2.50, an entertaining, intimate and brilliant autobiography of an enterprising and delightful woman.

THE STUFF MEN ARE MADE OF by Denton Massey (S. Reginald Saunders, Toronto) \$2.00, is in response to appeals for more permanent form of addresses delivered by Mr. Massey to the York Bible Class in Toronto, and broadcast over the radio on Sunday afternoons.

Never Trouble Trouble

If you get up feeling weary,
And the day seems dark and dreary,
With no one to call you, dearie,
Don't sit down in deep despair.
There are others who have troubles
Who, like you, are feeling blue;
So never trouble trouble,
Until trouble troubles you.

Look at the little birdie,
In his shining gilded cage;
He longs to soar to tree tops,
Nor would he be afraid.
But his little throat is swollen
In a burst of joyous song
He has no time for sighing
He sings the whole day long.

So never trouble trouble,
Until trouble troubles you;
There are joys, as well as sorrows,
The whole world through.
Listen to the birdie,
Just listen to him sing;
He has no time for trouble,
Though trouble troubles him.

—Sue M. Griffith.

Anthony Eden Will Surely Be Surprised

TORONTO—Rise of Anthony Eden, British Foreign Minister, in the public eye during the past year has greatly influenced hair styles. Gustave Condos, Chicago beauty expert, told the 11th annual exhibition and convention of the National Ladies' Hairdressers' Association.

Tailoring of the British diplomat's clothes has caused women to buy tailored costumes and with the costumes must come "tailored coiffures," Condos said.

"The new coiffure is streamline off-the-face," he explained. "The hair is up off the neck, with curls carried high. Though the effect is of neatness, and good-grooming, there must be curls to emphasize the feminine."

The three-day convention being attended by 1,500 members from all parts of Canada.

Jane Addams' Successor Has Had Long Experience

Adena Miller Rich Has Spent 40 Years in Social Service.—Life Devoted to Hull House.

An aura of mystery hovers around Adena Miller Rich who has succeeded the late Jane Addams as head resident of Hull House in Chicago.

When her appointment was announced only the briefest facts concerning her long and varied experience in social work were recorded. Neither Who's Who nor any of those "directories of prominent women," so-called, made any mention of her.

Her activities on behalf of the underprivileged, especially those of alien birth and ancestry, have won her such a reputation in welfare circles, however, that the trustees of the oldest of the United States settlements, when they set themselves the seemingly impossible task of finding a successor to Miss Addams, unanimously chose her.

The story of Adena Rich is inextricably interwoven with that of Hull House.

Two decades ago, when she was embarking upon her career of civic service, a slim, golden-haired creature with wide blue eyes, who was acclaimed "the prettiest girl in social work," she went to Hull House to live.

Miss Addams' Secretary

"I shall never forget how worried I was about getting in," Mrs. Rich recalled the other day, sitting at the scarred mahogany desk in the little book-lined study which for nearly half a century served as office for Miss Addams. "I was afraid my credentials wouldn't be acceptable. And even after I was admitted, I was scared to death that I wouldn't last out the six months' probation which the residents, then as now, had to pass."

At Hull House, Mrs. Hull met her future husband, Kenneth F. Rich, a young stock-broker whose aunt was one of Jane Addams' early associates. After their marriage, the Riches set up housekeeping in the Hull House Apartments, a special building set aside for couples wishing to combine the inspiration of settlement life with a normal wedded existence.

Their residence there naturally kept the new Mrs. Rich in touch with what was going on in the House, for one of the requisites to tenancy was and is the leisure-time participation of tenants in its activities.

For a time Mrs. Rich acted as Miss Addams' secretary. Later she directed the evening and young people's clubs. And when her professional attention began to focus

sharply upon the work of the Immigrants' Protective League of which she now is the director, she became Hull House's official ambassador in all matters pertaining to the foreign-born.

Once she gets her administrative work organized she plans to divide her time fifty-fifty between Hull House and the Immigrants' Protective League.

Born to Ease

Young Adena Miller of Erie, Pennsylvania, hardly seemed destined for the dual task she is now setting herself. She was born in the comfortable house that her grandfather, a practicing attorney of Erie, and her mother, one of the organizers of the Ladies' Shakespeare Club, still live. All her young life she had what might easily have become a fatal handicap for the career she elected: Ease and leisure.

Following her graduation from the Erie high school, she entered Oberlin College in Ohio where, in 1911, she won an A.B. degree and a Phi Beta Kappa key.

Mrs. Rich is not quite sure what first turned her thoughts seriously toward social welfare unless, perhaps it was the studies she took in college—chiefly economics and sociology and ethics. Nevertheless she is very certain that the fellowship to the Chicago School of Civics and Philanthropy which she won in her last year at Oberlin, is what headed her toward Hull House.

After completing her graduate studies in social work, she became supervisor of visitors for the Immigrants' Protective League which had its offices in the old settlement. About the same time she went there to live.

During the year ensuing, Miss Miller or—as she shortly became—Mrs. Rich filled a variety of positions, including one with the Girls' Protective bureau under the war department. For three years she acted as executive vice president of the Illinois League of Women Voters.

Enjoys Outside Activities

Gracious, ultra-feminine, clothes-conscious, with a brilliant mind meliorated by bubbling sense of humor, Hull House's new director is the epitome of the modern social worker. She lives her work, yet she finds time to play golf and go to the theatre with her husband who is now a partner in a brokerage firm. And adroitly she lets you know that her acceptance of the salary-less task of carrying on the work begun by her brilliant predecessor is her way of voting confidence in the future of settlements.

"Back in 1928 many people argued that the day of settlements was done. The individuals whom they were designed to aid no longer needed their assistance. They had jobs. They were earning good salaries. They could afford to buy all the education and recreation that the settlements were giving them. But since the depression that argument had faded.

"Today people without opportunity are looking to the settlements to show them how to enjoy their enforced new leisure and make it bring them happiness. That is why I believe that the day of settlements is just dawning and that we at Hull House are only now embarking upon our era of greatest usefulness."

Smart Dog!

We're told of a bird dog named Bob, owned by a broker who lives in Fieldston. He's an excellent retriever and is happy during the hunting season, but all the rest of the year he just sits around the yard, moping and dreaming. One day lately, though, something stirred in him and he disappeared for half an hour. When he returned, he presented his master with a seven-pound roast of beef, rolled and tied and ready for the oven; not a tooth mark in it. The broker had it cooked.—The New Yorker.

This Swagger Knit Holds to Simple Lines, Says Laura Wheeler

KNITTED SUIT

PATTERN 1156

Yearning to look lovelier this Spring than ever? This knitted suits your answer, then, and an easy one, too. Both skirt and swagger jacket are plain knitting, with yoke and cuffs in a loose basket-weave stitch. Choose Gormantown if you'd wear it all year 'round. The jacket alone is practical with summer dresses.

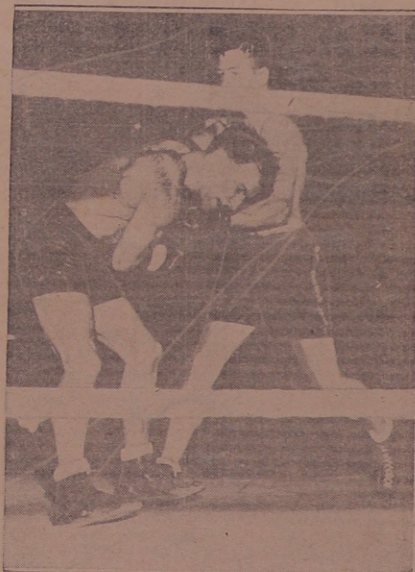

Pattern 1156 comes to you with directions for making this two-piece suit in sizes 16 to 18 and 38 to 40; an illustration of it and of all stitches used; material requirements.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing, 73 Adelaide W., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

A farm building is no more durable than its roof, says the U.S. Department of Agriculture, announcing a new farmers' bulletin on practical roofing.

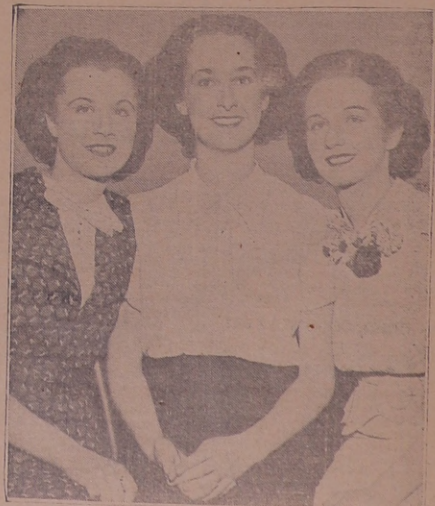

London's housing problem is estimated to include 106,444 overcrowded families living in 218,156 rooms, an average of just over two rooms for each family.

Rocked, --- No Sleep

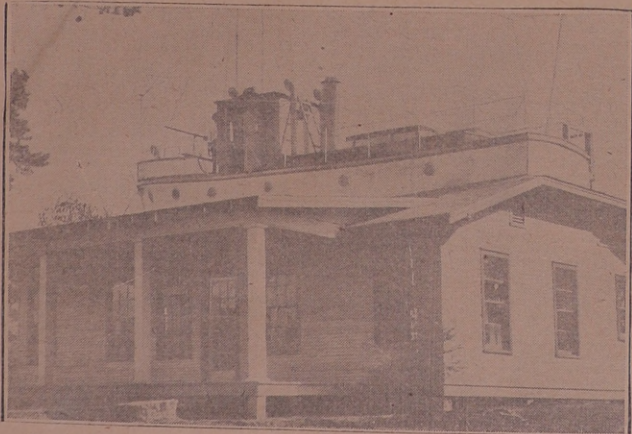

Fredde Miller rocks Petey Saron on his heels but fails to send him to the canvas for the count down 15-round world championship featherweight bout at Coral Gables, Fla. Miller won decision.

Their "Hidden Beauty" Has Been Discovered

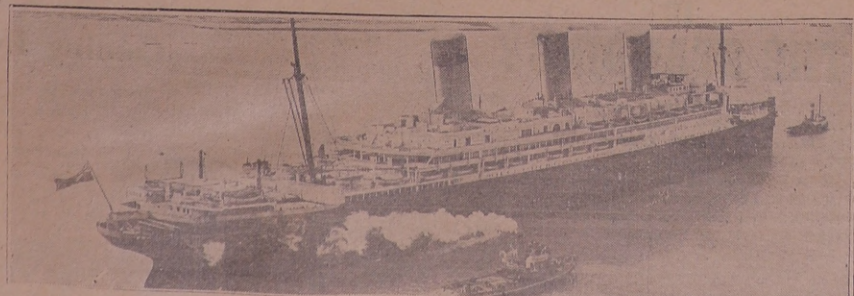

Elenora Greenlaw, chosen Queen of the Mid-West Beauty Trade Show in Chicago with Mary Schold (left) and Clare McGreal (right), runners-up in "Hidden Beauty" contest.

Launched On Roof

Four hundred miles from the nearest ocean and destined never to feel the sea, this boat, modeled after a Coast Guard cutter and complete in every detail, was recently christened on roof of quarters of Fort Oglethorpe, Ga., sea scouts.

End of Last Voyage

After completing her 277th round trip Atlantic crossing the liner Majestic, removed from sailing list, is shown headed for 108 at Southampton where Mauretania was tied up before being sent to ship breakers.

"SALADA" TEA

The GREEN GHOST

by Stuart Martin

SYNOPSIS
In the West Indies, a blond tarron awakes with a premonition of disaster. He finds him—dead. Dr. Sidney Foster, a friend, is joined by Detective "One Eye" Vireck, a police officer. A member of the household is antagonistic toward all investigation. He accompanies Alaud

back to England. Foster follows and finds him—dead. The blond is at the time of her father's death. Alaud, a friend of Foster, is a member of the household. He is antagonistic toward all investigation. He accompanies Alaud

By his own act, or by the result of the quarrel, James Barron had made it impossible ever to get the proof of his son's innocence.

And then, not long after Hughes had entered his position, there came the green ghost to make his misery ten thousand times more frightful. But that was not all. When the will of James Barron came to be presented in England it was found to stipulate that Maud was to marry Hughes within a year. If she did not she was to be disinherited save for a small amount and what small provision she could claim by law.

"But the thing is iniquitous!" cried Foster. "No sane man would make such a will!"

"How it was made I do not know," said the girl. "It must have been during one of his fits of depression when we were in Jamaica. If Hughes dies the estate reverts to me."

She stopped and held out her left hand. On the engagement finger a glorious ring sparkled.

"It is from Captain Swathling," she said. "It came the other day, but I cannot wear it. Yet I would rather die than marry Hughes."

"I congratulate you," said Foster. "Captain Swathling is, I am glad to hear, a good man. What about your lawyers?"

"They are working out the affairs. My father's interests were widespread. Hughes is the sole executor."

"It is an awful position," he muttered. But he was thinking not only about her and Hughes, but about her and the Captain. He remained quiet for some time. "Your father, and now your brother. And the dog."

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE is your regular family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

And my own experience?"
"What was your experience?"
He told her of his journey to the hospital at St. Albans and the result; but he did not mention Elsie Monteith's name, for he intended to deal with that himself. Elsie was in a category by herself. It was she who mentioned Elsie.

"Have you gone to the police about the dog?"
"Not yet. The hospital business and then your brother's case came in the way. But I do not want Hughes to know that I shall call in the police."

"He knows already."

"I never told him."

"No, but Elsie Monteith did. He said so. I expect she mentioned it not knowing that you wanted to keep it secret."

"Ah," he said; he remembered that he had spoken of his intention in front of her.

And swiftly there returned to him the scene when Hughes was standing in Elsie Monteith's room the night she had complained of a headache.

He seemed to hear Hughes' words again: "I am glad you warned me, Elsie. And now you know what you have to do."

The words took on a new meaning to Foster. Why had he not seen this before? Of course they had nothing to do with tablets for a headache as she had made him believe. She had been telling Hughes all that had taken place. She was the spy of Hughes. Good heavens, how blind he had been! She had made love to him so that he might tell her everything; and she would go to Hughes with his whole plans.

It was for that reason that he had been sent on the wild goose chase to St. Albans. Hughes had counted on getting him out of the way. But why had he mentioned a hospital in the telegram? Why not have sent him anywhere else? Of course it was obvious again. He was a doctor. A call to a hospital was one he would most quickly respond to, and they had to name a real hospital lest he become suspicious of a fictitious name. Thus they had named a hospital, but one that was not functioning!

A knock came to the door, and Mrs. Gibbs entered.

"I thought I had better relieve you, doctor. Dinner is nearly over, and I didn't send up Miss Monteith, knowing that you were here."

Foster jumped to his feet.

"Is Miss Monteith in?"

"Long ago. She is just finishing dinner. She was asking for you. How are you, dear?" This to Maud.

"I'll look in, perhaps, later," said Foster, and went on to tidy himself for dinner, glad to face his own crisis. For it was not merely to prepare for dinner that he left the boudoir quickly. The envelope he had picked off the hall table had come from a source who was to influence his immediate, as well as his future, outlook, and he was anxious to see the contents before he met Elsie Monteith.

Even before he put a paperknife into the envelope he experienced a sense of mental sickness. He had taken a course that he believed was perfectly justified, for he had to test every influence that surrounded him and throw into the crucible every personality that opposed him or sought to direct his judgment.

There were several sheets of foolscap in the envelope, typed in red, and as his eyes ran rapidly over the wording a chill struck his heart as if he had come into contact with ice.

A paralysis seized his limbs, his mouth twitched, and a groan escaped him. He had to hold to a chair to prevent himself from falling.

New Dundee Creamery Reports Record Year

KITCHENER, Ont. — The New Dundee Co-operative Creamery, Limited, found last year the best in its history, it was revealed at the 28th annual meeting held in that village.

Nearly \$8,800 was paid out to patrons in dividends while the output exceeded 1,500,000 pounds of butter during the year. This record ranks this creamery as the largest in the province, according to John Scott of the Ontario butter grading station at Toronto. J. W. Abra, retiring director, was re-elected for a three-year term.

"I dislike to face all these bills," "My dear, you don't have to. All I want you to do is foot them."

If you are seeking mental improvement and efficiency, you should write for particulars of the course offered at moderate fees by The Institute of Practical and Applied Psychology.

EVERY DAY LIVING

A WEEKLY TONIC
By Dr. M. M. Lappin

An "Inherited" Tendency

Among my mail I have recently received a letter from a woman whom I have reason to believe is both a devoted wife and mother. She is up against a real problem, and one which will, perhaps, take a lot of time and patience to solve.

"I have previously corresponded with you," she writes, "and your advice has been most helpful each time. I hesitate to trouble you again, but I feel I must tell my secret to someone or I will explode and go crazy. My husband has been drinking in secret a long time. It is now beginning to affect his business and he has lately made some bad blunders which have proved very costly. I have no doubt that he inherited the drinking habit, for his father and grandfather were both addicted to it. What worries me is, not only that our business which we both worked hard to build up may come crash through it, but the possibility of my sons inheriting the same tendency. It would just kill me to see my boys taking to drink."

With regard to the husband, it is not too late yet to wean him from his drinking habit. History is full of instances of men and women whose characters have been changed, and who have been enabled to break with wrong habits. In the story of the Salvation Army is a wonderful record of changed lives. In that book of Harold Regbie's "Broken Earthware," which was so popular a few years ago there are many illustrations of the truth that "human nature can be changed." Some more recent books like those of Hugh Redwood and the others bear witness to this same old truth.

I think my correspondent should be encouraged by these records and persevere in her efforts to win her husband from the wrong habits to which he has become addicted.

Of course this will be no easy job. But if this woman will stick to it, and wisely study to be with her husband as much as possible, and without being unduly ostentatious, show a loving thoughtfulness and regard for him in everything, I think she will win in the end. A plain heart-to-heart talk occasionally might help, but she must be careful to avoid any fault-finding, criticizing, nagging attitude. That would be fatal.

Now about the boys. I don't think this woman should worry herself unduly about them becoming addicted to the same habit. If she will seek to create the proper kind of home environment, that will go far to counteract any inherited tendency that may be in them. I believe that mothers can influence their children a great deal more than fathers can, and given the right kind of home influence, the children cannot help but develop into the right kind of adults.

Of course, it is always better if the parents can cooperate in the training of the children, and here is strong ground of appeal to the husband and father. In making the appeal it is well to remember that very little can be done without some definite effort of will on the part of the person addicted to the habit one is seeking to have broken, so some attempt should be made to persuade this husband and father to exercise his will power in the sake of his boys. And, remember every tendency can be overcome if we have the courage and patience to persevere.

Behind all our perseverance, however, there must be faith in the ultimate success of our efforts. Such a faith needs to be based on sympathy, hope, and love. Get rid of your own fears in the matter. Make up your mind resolutely that you are going to succeed. To be sure on that point from the very start is half the battle. Try it out. Show your husband that you believe in the better man within him and help also to believe in that better man that he is. And, DON'T GIVE UP HOPE!

NOTE: The writer of this column is a trained psychologist and an author of several works. He is willing to deal with your problem and give you the benefit of his wide experience. Questions regarding problems of EVERYDAY LIVING should be addressed to: Dr. M. M. Lappin, room 421, 73 Adelaide Street West, Toronto, Ontario. Enclose a 3 cent stamped, addressed envelope for reply.

Christie's Biscuits

"There's a Christie Biscuit for every taste"

The Book Shelf

BY MAIR M. MORGAN

REGENCY, by D. L. Murray, (Murray's, Toronto), came to my desk at the psychological moment. If you want a good, fat volume of reading that will hold your attention, this is the book. Starting in 1789 we are introduced to Lady Regency Davenport, when she first entered the world of that time. You are immediately, by the excellent prose, carried back into the period.

For instance — "Odds rot his vitals — 'S death — My lady sinks fast — What's that? — Am I crazed?" gives one the expressions of the time. And our heroine — and a heroine she is. Witness this — "If you behave like a child, you shall be chastised like one! If you would escape, relent, and quickly! . . . Regency, will you submit?" he roared.

"Lay it across her, then Jernyn! — D—m her, she brought it on herself! I don't be defied by my own flesh and blood!"

Zero Bathing

(Sarnia Canadian Observer)

The courage and determination of Kirkor Hekimian, an unemployed Armenian youth, is such as to merit a better reward than that which he reaps by going about the country plunging into icebound lakes in this below-zero weather, to demonstrate to doubters that it is possible for a human being to swim in ice-cold water in the open, and survive.

Residents of Stratford, Ontario, were surprised recently to see a young man clad in swimming trunks cutting a big hole in the river ice and eventually plunging into the frigid water.

That is this youth's desperate method of making a living when there are no other jobs to be had. The spectators are willing to pay to see such an exhibition. It seems almost inhuman, but there are individuals who can perform this feat and even appear to enjoy it. Julius Caesar saw a whole population addicted to the habit of bathing in ice-filled rivers when he came, on conquest bent, to ancient Gaul, now France.

Perhaps luxury has rendered the rank and file soft, otherwise we could all take a winter bath in the open and like it. As it is, the popularity today can only endure such an ordeal as a spectacle for which they pay an admission fee, to witness the feat by one who is driven to it to gain a meal ticket.

An artesian well nearly two miles deep is to be sunk near Paris in the hope of finding a new water supply for the city.

EDITORIAL OPINIONS

WAR IN EUROPE

Is there going to be war? What can one reply but: inevitably. It may not be this year, it may not be next, but some day, and that soon enough, it will come. Compromise may delay it, but compromise will not prevent it.

The major league baseball clubs are in the south, where the weather is warm, preparing for the campaign in the north, when the weather gets warm. Cold or wet may delay the campaign opening, but we are sure to have baseball. War is just as certain as baseball, with the date of commencement just a trifle more uncertain.

Of course, we already have war. Italy is in Ethiopia, and all the tragedies and heroisms of war are being enacted there, but because of the remoteness of Africa we do not sense the reality of it.

When we think of war, we think of war in Europe (never, for some reason, in America), and when we say war is inevitable, we mean inevitable in Europe.

The preparations have been made. All the major nations of Europe are better prepared for action today than they were before the last war, in every way, that is, except financially. Invention in defensive and destructive engines of warfare gained great momentum during that struggle. The planes used at the end were infinitely superior to those used at the beginning, as the tank was a development of necessity the great war brought into use.

The momentum then gained was only temporarily slackened with the coming of the armistice, and after the signing of the Treaty of Versailles it gained greater speed than ever. Today what have we?

In the January Readers' Digest there is an article condensed from Review of Reviews, entitled "Can Britannia Rule the Waves?" From it we quote:

"The British then had in the Mediterranean (and the Red Sea) 147 war vessels including the largest superdreadnought afloat, and perhaps 200 battle planes. It was the bulk of the world's greatest navy, steam up, battle flags ready to break—and with the prestige of 400 years of unbroken naval triumph.

"What had Italy? Four battleships out of date, two in dry dock and two without steam up; 15 smaller cruisers, all several years old. But Italy had not been relying on them for several years. She was relying on new weapons: (a) 3000 battle planes capable of 200 to 250 miles an hour, and all equipped for bombing and torpedo launching; (b) over 100 submarines, new, small and fast; (c) 300 sea sleds.

"Italy is the only nation that has these sea sleds. They are called M.A.S. (a capitalization of D'Annunzio's phrase 'Memento Audere Semper,' or 'always remember audacity'). A M.A.S. is a long frail shell of aluminum and light wood which makes 60 knots at contract speed. (One has touched 80 knots; often they go 75.) Each carries two torpedoes. (One torpedo properly placed will destroy a battleship.) It is a bullet or a gust of wind may destroy a M.A.S. They are operated by picked volunteer officers, three to a boat. To be chosen for the M.A.S. is the most hazardous and honorable post in the Italian navy. It is the sort of job that Stephen Decatur would have relished.

"Because of her strategic position in the Mediterranean these three arms (planes, subs and MAS) are Italy's primary naval weapons. With them she can strike any vital part of the 'Roman lake' in one jump.

"When things were hot in October, it was the cordial habit of the Italians to send out a flight of 50 MAS to Alexandria to salute the British warships. Whenever more than two British war vessels got together anywhere in the Mediterranean, an Italian submarine would pop up between them, salute and submerge. Practice flights of battle planes in shock formation went back and forth.

"When the gigantic 'Hood' was steaming majestically from Gibraltar to Alexandria, conveying a proper sense of the might and dignity of Britain, two MAS crossed her bows going south and a little later the same MAS crossed her stern going north. Both times there were proper military salutes. Later the radio in Rome announced (in English) so the officers of the 'Hood' might not be mistaken about it that the two MAS had crossed from Sicily to Africa and back to Sicily while the British battleship was going 40 knots. A neat little demonstration of how to 'cut the life line.'"

Germany has reached the point where she, too, thinks she is invincible in the air. France and Russia also have great air fleets of the most modern machines. Sir Austen Chamberlain said in a recent speech in the British House that in November, 1934, Mr. Baldwin claimed 50 per cent. advantage for the British air force over Germany, but in May, 1935, he didn't know what advantage Britain had. Independent observers think Germany's air strength much greater than is generally supposed, and that her recent bold move in the militarization of the Rhineland is based on the assumption Britain will remain neutral, as she is too busy watching Italy and Ethiopia to engage in any other war. Without Britain Germany feels the rest of Europe can be bluffed. Might even be a good thing if it could be, but it will not happen that way. The preparations have all been made for war, and war they will have. The old military slogan that "the best assurance of peace is to be prepared for war" is just so much damned nonsense.

To one who likes to stay home and grow roses and delphiniums, or to sit in the coolth of his garden of a summer evening with the

hose playing over his grass and know great content, modern warfare seems an unbelievable imbecility. You see things so clearly when you think of them in a situation like this—as we have often done.

War is such a cowardly thing. The strong never hesitates to crush the weak. You never heard of an army of 10,000 going against an army of 1,000 deciding to leave 9,000 behind and fight the battle on even terms. Every civilized consideration for the other fellow is absent. He is looked upon as a monster to be destroyed in every conceivable manner possible. Only when he is beyond self-defense can the hand of humanity be stretched out to him, and if you were to go to assist an enemy you thought mortally wounded and he should raise up with his last remaining spark of strength and shoot you through the heart, he would die a hero for his country. Such is war!

But why write such drooling sentimentalism. Wars are not made by individuals, but by nations, and nations know nothing of humanity. The individual is completely dehumanized during war. Even in times of peace the world is not ruled by reason but by emotion. So why waste time in futile speculation? Europe has prepared for war. Europe will have war. The question is, what part will Britain or Canada have in it?

If the decision was ours to make, it would be none at all. What single good thing came from the last war? Britain is easily the most pacific of all the countries of Europe. One cannot easily call to mind a leading man, civil or military, that has a chip on his shoulder in Britain. Some want more armaments, and some want less, but the nation as a whole seems to sense the futility of settling anything by force at this time.

The same, unfortunately, cannot be said of the other major nations of Europe. They have been practising in deadly earnest and the bloody game for which they have been practising will begin some day soon—far too soon. May Britain and Canada have the good sense to stay out of it.

SPORT A BIG BUSINESS

In the past two decades, sport has advanced from an exercise and recreation to one of the biggest industries of modern times, with golf, from a financial standpoint, leading the way and professional baseball a safe second. Probably football (rugby) is receiving a battle from hockey for third position. Apart from the annual expenditure for these games, there are the immense plants costing millions of dollars scattered about the country. In one year \$6 million dollars was spent in the United States by players in one season for fees, clubs, clothes, etc.

Add to this the stupendous amounts invested in courses, baseball grounds, football enclosures, hockey arenas, tennis courts, and further, try to visualize the total amount paid out in salaries, and one is flabbergasted. Take the hockey rinks in Canada alone; every little town from coast to coast has a covered rink. Then there is the transportation costs of teams travelling from town to town, night after night throughout the season.

Professional sport, too, has advanced not from a financial standpoint alone, but to a higher plane socially. Today every class is represented in professional sport, in fact it is considered a profession that offers equal opportunities with any of the others, without the great expenditure required for education in many of them.

NOTES AND COMMENTS

"If winter comes, can spring be far behind?" It was!

The figures given out by Hon. David Croll, on Tuesday relative to employment in Ontario for the past fourteen months are encouraging indeed. The ranks of the unemployed have been reduced by 28,432 and relief rolls have been reduced by 123,089. If this trend can be continued, and there is every reason to believe that it can, normal conditions should be reached in the no great distant future.

Even as serious a thing as a flood sometimes has its humorous side. The Toronto Globe last week carried a picture of the pier at the C.N.R. bridge here which was upturned by the ice. Underneath the picture was the description, "A house with the roof gone." Also, the heavy destruction of property and serious dislocation of business experienced by Belleville, can have small compensations. We are informed hundreds of rats were drowned in that city by the floods there.

An aerial photograph purporting to be the flooded area of Belleville appeared in The Toronto Telegram last week. The picture was obviously not of Belleville and looked very suspiciously like a part of Port Hope. We thought this a little strange, but when the same picture appeared in The Belleville Ontario Intelligencer a few days later with the large caption: "Aerial View of Belleville's Flooded Area," we began to wonder if our eyes were deceiving us. So we consulted several men about town who claimed to be well acquainted with both places. The unanimous verdict was, "Why, of course, it's Port Hope." Now we are highly amused but nevertheless sympathetic. Anything might happen in a newspaper office—in the midst of a flood.

Mr. W. A. Fraser Gently Reproved

Talking politics with a Trenton man the other day, we remarked that The Cobourg World seemed the most partisan paper in this part of the country—a very strong Conservative paper, we thought. Imagine our surprise when we were told it was supposed to be a Liberal paper. The editorial below was taken from The World, and if the Liberals talk of each other this way, what do the Grits and Tories say of one another, especially at election time?

Anyway, Mr. Fraser, Liberal member for Northumberland, made the House of Commons laugh, and below is the nice gentle way The World reproves him for his levity:

Cain answered "Am I my brother's keeper?"

Pilate fiddled while Rome burned. Nero washed his hands of Christ after handing him over to enraged Hebrews.

Marie Antoinette is reputed to have said, "They have no bread? Let them eat cake."

All have become symbols of flippant or callous irresponsibility. We now add to their number the name of W. A. Fraser, member of parliament for Northumberland in the House of Commons of Canada.

While alien encroachment continues in Canada; while unemployment and misery remain rife; while Hitler unmoved in the face of enormous problems, Mr. Fraser elects to be flippant: to waste the time of the House, his own energy and the hard-earned money of sorely burdened taxpayers.

Small wonder that parliamentary government finds itself on the defensive. Small wonder that Mr. Fraser remained unconcerned when an alien-controlled corporation dictated to an important department of the Dominion government, and apparently unmoved in the face of enormous increases in the export of Canadian nickel for purposes of European rearmament.

Haggis may be a sacred dish to Scotchmen, but there are several million Sassenachs in Canada who believe that legislators are paid \$4,000 a session to give serious consideration to serious measures. They do not feel that any member of the Canadian parliament should try to vie with the irresponsible men and women of history at a time of such gravity as that which now confronts us.

If Mr. Fraser wants haggis let him chop up kidney and liver, flavor it with onion and sage, mix it with oatmeal and suet, put the mixture in a bladder and boil it. But let him remember meantime that he is the elected representative of people who have a social conscience, and who expect him to do something for Canada other than to play the buffoon in an attempt to win cheap applause and notoriety.

New Proprietor of Titus Drug Store

Mr. Frank Haffey of Orillia took over the Titus Drug Store last Saturday. He has been in the drug business for the past twenty years both in Toronto and Orillia. Mrs. Haffey and the children will move to Trenton after school closes and take up residence here. Of the seven children, two are working in Toronto, but the others will join their father, here. Mr. Haffey has been in business in Orillia for the past fifteen years.

On Natural Affinities

Do you ever consider the number of diverse things you associate in your mind? Think of a few—ham and eggs, pork and beans, corned-beef and cabbage, heat and cold. These things do not seem to have anything in common but they just naturally run side by side in your mind. Let us take the close coupling of heat and cold. You say they haven't anything in common? But they have. The heat and cold you associate in your mind are extremes. Doesn't that suggest recent bitter cold and coming intense heat? You wonder what you can do about it—put up with it you suppose.

Well, that is the negative way of dealing with the problem, doing nothing is easy. It is equally easy to deal with the problem constructively. Go beyond heat and cold; the new affinity is comfort and insulation. Comfort means protection against extremes of temperature and the best protection you can get is a blanket of mineral wool spread over the house.

But there is another affinity worthy of your consideration. First we had heat and cold, then comfort and insulation, now it is Red Top Mineral Wool and the Trenton Coal and Lumber Company. They can help you to comfort, telephone them—the number is 76. (Advt.)

Trenton Conservative Association

will hold its annual meeting for the election of officers and general business in the Oddfellows Hall, Friday, March 20, at 7.30 p. m.

The ladies are particularly invited to attend.

Guest Speaker: A. Holly Acres, M. P. P.

H. D. GRAHAM,
President

R. M. ARMSTRONG,
Secretary

GRACE CHURCH W.M.S.

The March meeting of the Women's Missionary Society of Grace United Church was held in the school room of the church on Thursday, March 12th, with the president, Mrs. Jeffery, in the chair.

The meeting opened with Hymn 97, "The morning light is breaking." The devotional leaflet, given by Mrs. Winter, was based on Eph. 4: 1-6, "the spirit of Jesus settling disputes." The subject for prayer was "Peace." Three members, Mrs. H. Coutts, Mrs. Bowen and Mrs. Cory, led in prayer.

Minutes of last meeting were read and approved. The roll call was responded to by a verse of Scripture on "Peace."

Mrs. O. A. Coutts read a letter announcing the tenth annual meeting of the Belleville Presbyterian of the held in Tabernacle Church, Belleville, on March 26th and 27th. Mrs. Cory was appointed as delegate.

Mrs. McCaw, the first vice-president, will be leaving the Society. On motion of Mrs. Watson and Mrs. White, Mrs. Cory was appointed first

Car Ferry Damaged

The Ontario Car Ferry No. 2, was released from the reef, upon which was held just west of Rochester, and was brought back to Cobourg on its own steam. The damage sustained was not so bad as first reported. Some rivets were sprung. The boat will be taken to Kingston for repairs as soon as the harbour there is clear of ice.

vice-president. The April meeting will be the Easter thankoffering service, with Mrs. Alysa and Mrs. O. A. Coutts in charge of program. Then Mrs. Anderson took charge of the meeting. Mrs. Carswell read the Bible readings from Acts, 13th and 14th chapters, and Mrs. Bell read from Acts, 15th chapter. Mrs. Demille sang a beautiful solo, "Peace be still."

Mrs. Anderson read some facts on Temperance. Mrs. Campbell took charge of the study hour on Africa, explaining the missionary work in Africa. Hymn 111, "God bless our native land," was sung and Mrs. Anderson closed the meeting with the benediction.

FRANKFORD NEWS

PERSONALS

Miss Lena Bell is the guest of Mr. and Mrs. Earl Bell of Campbellford. Miss Marion Tucker of Stirling is visiting her grandparents, Mr. and Mrs. George Frost.

Mr. Charles Smith and Mr. J. M. Bell are spending a few days in Campbellford.

Mr. and Mrs. Harold Noble and son Hadley, and Mr. and Mrs. George of Rochester, N.Y., are guests of Mrs. Annie Hadley.

Mrs. Annie Hadley, the Misses Hadley, Mr. and Mrs. Noble and Mr. and Mrs. Pattie attended the funeral of Mr. Herbert Hadley of Stirling on Tuesday afternoon.

Mrs. George Arnett, who has been visiting friends in Ottawa, has returned home.

Mr. Thomas Latta of Toronto, was the week-end guest of his mother, Mrs. Minnie Latta.

Mrs. Hampton of Biggar, Sask., is a guest at the home of her daughter, Mrs. George Dickson.

Mr. Ed. Warren of Kingston spent Sunday at the home of Mr. and Mrs. G. W. Dickson.

Judge Madden of Nanawau presided over the Division Council sittings in Frankford on March 17th.

On Monday evening, March 16th, Dr. Carleton, D.D.G.M., of Prince Edward District No. 19, paid his official visit to Frankford. After the routine work of the Lodge was disposed of, a buffet lunch was served, and a short musical program was enjoyed. Visiting brethren from Trenton, Belleville and Stirling were present.

United Church Women's Association

The regular monthly meeting of the Women's Association of the United Church, met on Thursday, March 12th, at the home of Mrs. Arthur Ford. Mrs. Harry Slingerland, president, was in charge of the meeting. After a hymn and prayer, the Scripture reading was given by Mrs. Delbert Badgley. A short business session followed, after which a program consisting of readings by Mrs. Percy Mikel, Mrs. G. N. Spencer and Mrs. G. Johnson, were given. A "touch and take table" was a special feature at this meeting. Refreshments were served by the hostess, Mrs. Arthur Ford, assisted by Mrs. J. Blecker and Mrs. Harry Bush.

FRANKFORD SUFFERS FROM FLOOD WATERS

Frankford experienced the worst flood in years last week-end, when Trent Street South was submerged, the river flowing over the street on the east and the pond at the west overflowing. Numerous residences were flooded and people marooned in their homes. The Bank of Montreal, H. Turley's residence, Madill's Drug Store, Ford & Turley's Store and Dafoe's Store, all had flooded basements and Mr. Dafoe lost fifty gallons of oil which had recently been stored in the cellar.

Much damage was done along the river front as far north as the paper mill.

Services of Trinity Church on Sunday morning were held in the Parish Hall, due to the heating plant in the basement being put out of commission by water.

Young People's Union Meets in Community Hall

Frankford Young People's Union met on Monday evening, March 16, in Frankford Community Hall, and entertained the Wooler and Ivanhoe young people. The meeting opened with an address of welcome to the visitors, by Lucy Ferguson, president.

The Ivanhoe president presided over the first part of the devotional exercises, which consisted of a hymn and Scripture reading. Rev. Mr. Lackey of Ivanhoe gave an explanation of the Scripture reading. A story was given by Miss Helen Kilpatrick, after which Rev. Mr. Lackey gave the topic.

The Wooler president then took charge of the meeting, when a hymn, Scripture and prayer was given by Miss Mildred McColl, and a reading by Miss Doris Nelson. A piano solo followed, after which Miss Jean Steenburg and Carl Austin rendered a piano and saxophone duet; vocal solo, Miss Edith Austin; topic, Mr. Stephens, after which the National Anthem was sung.

The recreation was in charge of Rev. J. F. Lane, Miss Pryce, Messrs. MacGillivray and Snider. Several enjoyable games were played, followed by refreshments and a social hour.

FRANKFORD SCHOOL BOARD HOLDS MEETING

The regular meeting of the Frankford School Board was held in the Board room on Tuesday evening March 10th, with five of the six members present and chairman R. Embury presiding. The minutes of the previous meeting were read and approved. The communications were read, and a motion passed to have the communications filed—Carried. A motion by J. Sine and J. E. Finnegan was passed, and carried, to have the following accounts paid: B. W. Powers & Son, coal, \$170.42; J. A. Stickle, Insurance premium, \$171.70.

A letter from Miss Foster was received, and a motion was duly passed to grant Miss Foster a leave of absence.

ence for the rest of the term—Carried.

On motion of W. F. Ketcheson and Blake Trippe, that the Board purchase 2 quires of stencil for the duplicator, and supplies that were needed for the duplicator—Carried.

On motion of E. Finnegan and J. Sine that the secretary be authorized to draw \$15.00 from the bank for petty account—Carried.

Meeting adjourned until April 14.

In Memoriam

SMITH—In loving memory of our dear father, George Smith, who passed away on March 21st, 1923. The flowing stream of life rolls on. Recalls the love, the voice, the smile. Of him, who once sat there. His life was one long sacrifice. His heart was true and tender. He toiled so hard for those he loved. Then left us to remember. Sadly missed by wife and family.

FRANKFORD R. R. 4

Spring is coming, as birds are singing and snow is melting fast. Some days have been cold.

Stockdale village creek waters and ice loosened up all channel ice above the dam, which has gone down the creek, leaving the ice on the banks. The break-up carried away stop-logs, chains, etc., from the top of the dam and extensive repairs will be necessary.

Harold Fry went back on Monday to college after spending the last ten days at home.

The snow still comes, and will make more work. At present the snow is very soft.

The players in "The Country Doctor" to be given on March 26th at Stockdale, are very busy getting ready their parts.

The mill men here in Stockdale are trying to salvage logs and chains which were swept away from the dam last week.

Ina Walt is much better, but unable to work yet.

Gordon Orr with his sawing outfit, has completed the wood-piles in the locality.

Don't forget March 26th — "The Country Doctor"—to be presented at Stockdale under the auspices of the Young People's Union, Stockdale United Church.

Murray Township March Meeting

The regular meeting of Murray Township Council was held on March 5th in the Council Chambers, members all present. Minutes of the former meeting were read and confirmed.

Resolutions: By Jarew and Johnson—That the auditors' report for the year 1935 be accepted and the recommendation therewith be printed with the minutes—Carried.

Auditors' Report

Total tax collectable	\$33,466.21
Total tax collected	24,601.68
Total tax discounts	65.73
Total tax unpaid	8,798.80

We, the auditors of Murray Township, have examined the books and suggest that the Roll Book be audited before the tax collector gets out tax bills.

That the Council purchase an adding machine for the use of all officers. Signed—Bruce C. Ellis and Leslie Frost.

By Hart and Crosby—That Mr. Haggarty be authorized by Council to give relief vouchers to men cutting wood to the amount of wood that they cut for the balance of the month—Carried.

By Johnson and Crosby—That relief recipients shall not keep a dog as long as they receive relief from the Township—Carried.

The following orders were drawn on the Treasurer: Counties Treasurer S. R. Osterhout \$22.75; Jas. Hill \$7.88; Belleville Hospital account \$30.63; James Text, office files, \$5.00; Murray Brighton Telephone Co., tolls \$5.64; Fred Hall, potatoes \$4.05; Municipal World, supplies, \$1.04; W. Ashby, truant officer for 1935, \$18.25; W. H. Bell \$15.32; D. J. White \$39.74; Dr. McMullen \$15.50; C. Wessels, constable's fees and sawing wood, \$5; H. V. Jones, \$1.12; Mrs. McConnell \$6.84; G. Wilson \$2.24; S. R. Hart Co. assessment, collector's roll and school census book, \$27.78; Town of Trenton, for relief, January \$27.80, February \$27.40—\$55.20; L. C. McColl, expenses pertaining to trip to Cobourg, \$19.70; J. M. Dafoe \$4.20; C. W. Rutland, 2 cords wood \$16.00; W. E. Twiddy, salary \$37.50, envelopes \$5.00, stamps \$3—\$47.50; Ed. Simmons 25c; W. H. Morrow, expenses to Good Roads Convention, \$25.00; B. E. Ellis, stamps for audit, \$6.17; Geo. H. S.P.O.R.T

SPORTS AT THE TRENTON AIRPORT

With the increase in personnel at the R.C.A.F. camp here sports in this district will receive a big boost. The athletic executive of the fliers is going to get together within a couple of weeks to prepare for the coming season. It is planned to have softball teams, a box-lacrosse club, and if many more are transferred from Camp Borden, which is likely, a baseball team of intermediate or senior rating and last, but not least, a senior O.R.F.U. team.

Leafs vs. Maroons

The National Professional Hockey League schedule will wind up this Saturday night with the Montreal Maroons and Maple Leafs in a close battle for the sectional leadership. The Maroons have a three-point lead over the Leafs with one game to play, while the latter have two meetings Boston tonight, and the Americans Saturday night. If the Toronto team can garner a tie and a victory in the two encounters, the Leafs will emerge leaders, as in the event of a tie at the end of the league schedule, the club with the most victories takes the title. The Leafs have won the group championship every year since 1933. Tonight's clash with Boston and Saturday's engagement with Americans will be watched with interest.

CENTRAL ONTARIO LEAGUE MEETING

The Central Ontario Baseball League had its annual meeting scheduled for Belleville last Saturday, but they were flooded out. The high waters had extinguished fires in the down town section and it was not until late in the afternoon that the heating system in the Y.M.C.A. building was functioning. At the convocation had been slated there, it was deemed advisable to put it off for another week.

Gibbards, of Nanawake, are all set to enter the G.O.B.L. for the coming season. If Lindsay could be induced to take a berth it is quite within the realm of possibility of two sections

being formed, which would cut down travelling expenses for the clubs, which has been the big bogyman in the past.

The Leafs in Training

And while in the question of baseball, it is worthy of note that it is the opening game at the Maple Leaf Stadium. If Bobby Porter attacks, along with "Steamer" Lucas and Earl Cook (but we hope he makes the grade with Cincinnati and does not return) Ike Boone's gang will have a special attraction for Canadian fans.

High School News

(By Shrimp Jr.)

To whom it may concern: The reason the column didn't appear last week was because everyone was trying "at" exams and things around T.H.S. were about as funny as an armament conference.

We may have a basketball game this Friday night if the Nanawake basketballers can manage to swim up, to the east of here, there is an Open Literary affair. If the basketball game does come off the Literary will be held in the afternoon. It looks as if "student councils" are rolling over to sleep on the other side.

Mr. Spear in Zoology Class: "We will now get along to the dogs."

Voice: "Get along, little doggie, get along."

2nd Voice: "Going to the dogs, eh!"

Flash!! Flash!! Page Walt. Winchell. The Agriculture Class has installed an incubator in 17th and is happily awaiting the blessed event. Colin, who has been examining the eggs with a microscope, claims that two-thirds of the would-be chicks have blue eyes — they're probably blondes.

Scandal (by Scoundrel): Is Kay still trying to make Cordie say yes?

Who told Barney she wouldn't kiss him? — we never.

Just what Sir name does Doris expect to have by May 1st?

It certainly takes Ferg to drag the skeleton out of the closet.

If the Shoniker boy doesn't watch out, some of these days he's going to be Ruth-less.

ADVANCEMENT

In step with modern progress, the science of funeral direction is subject to constant improvement and advancement. Our entire staff, thoroughly trained and experienced, follows each progressive step, for both professional pride and personal desire for perfection characterize every phase of services by the Geo. H. Cobley staff. Your inquiries at any time receive careful attention, for we welcome opportunities to discuss problems of this nature with you.

POLICE COURT

Saturday, March 14

A resident of town failed to appear in court on a charge of illegal possession of liquor. A bench warrant was issued for his arrest. When apprehended he was found to be in possession of three partly consumed bottles of wine.

A former resident, now living out of town, whose wife is domiciled here, faced a charge of non-support. He was found guilty and remanded for sentence until called, upon payment of \$5 costs.

Seven local men pleaded guilty to driving cars without three lights showing and relieved of \$1 each. One unfortunate youth had neither the lights nor the dollar. He was given time to pay, but wasn't so sure when he left the court that he wouldn't have to serve the same days in default of payment. Another young man who had been driving about without a tail light had to be advised to remove his tail in the court room. He hadn't so far been able to pay a previous fine of \$13.50 but felt he might be able to spare the dollar for the occasion. Back went the hat on his head as he reached for his pocket. "Take your hat off in the court," he was again warned. "How can I handle a hat and a pocket book at the same time," he queried. And if the pocketbook is of such proportions why was he unable to pay the previous fine, wonders this court reporter.

Two drivers were assessed \$6.50 for failing to produce their operator's licenses. A third man arraigned on a similar charge declared that he didn't have a license and hadn't procured one and he was fined \$15.50, with time to pay. Another offender who had been given a few weeks to settle a previous fine of \$18, appeared and asked for an extension since he had so far been unable to raise the necessary funds. His few weeks of grace will end on the 31st of March.

A middle-aged relief worker at the Airport, who claimed it was the first time he had ever been in trouble, will spend ten days in Belleville jail for being intoxicated in a public place. He was unable to pay the fine, he said, since he made only 20 cents a day.

A young speed demon in town, who had been repeatedly warned about his fast driving, paid the price of his offence, while another young man was assessed \$2 for being unable to produce his driver's license when requested by an officer. He had a license but did not have it with him.

One of the men in charge of construction at the Airport had previously paid \$11.50 for driving his car with four people in the front seat. He had not known that it was an offence, he claimed.

OBITUARY

John A. MacPhail

John A. MacPhail passed away at his home on Lorne Avenue on Tuesday evening. The funeral service will be conducted at the home by Rev. F. A. Smith at 2.30 Friday afternoon, after which interment will be made in St. George's Cemetery.

George Murray

Mr. George Murray died at his home in Murray Township on Tuesday, March 17, at the age of forty-seven years. Funeral takes place from his late residence, Concession 3, Township of Murray, today (Thursday) with service in Carmen United Church. Interment in Carmen Cemetery.

King Street C.G.I.T.

Tuesday evening, March 17th, a special St. Patrick's Day programme was planned for the girls.

The meeting was opened with an exclusively Irish sing-song, consisting of "Come Back to Erin," "I'll Take You Home Again, Kathleen," "The Banks of Killarney," "Sweetheart Darlin'," "My Wild Irish Rose," "MacNamara's Band" and "Danny Boy."

The story of Saint Patrick was narrated by Mary Smithrim. A brief biography of Dr. Janet Miller was given by Laura Harrison. Dr. Miller is the authoress of the book entitled "Jungles Preferred," which is being studied by the girls for their missionary project. A brief episode from the book was read by Edna Smithrim. The interesting story of David Livingstone's work and travels in the heart of Africa, was given by Mrs. Gillan.

The business meeting was opened and plans were made for the service of re-affiliating with the Women's Missionary Society. Mrs. Gillan explained briefly what the service stood for.

Aileen Sutcliffe and Beverley Foster then took charge of the games. A new game which lightened the girls' spirits, was played. The title? "Jaunting Car." Two St. Patrick's guessing contests were played. Phyllis Burrows and Evelyn Bonter won the prizes—green suckers. The ever-popular game of guessing "ads" gave the girls a good appetite for the delightful lunch that followed. Irene Vanderwater won first prize. Credit goes to Mrs. Gillan for staying in the kitchen and missing the fun to prepare the cocoa. Thanks from all the girls.

—Press Reporter.

Prince Edward County Registrar, J. H. Holmes, Dies

Following a paralytic stroke, suffered two weeks ago, John Hedley Holmes, registrar of deeds for Prince Edward County, died about six o'clock Tuesday evening. He had been seriously ill for over two weeks.

IN MEMORIAM

DADSWELL—In loving memory of a dear husband and father, Fred March 17, 1935.

Not just today, but every day I sadly miss you, my dear Dad. Sadly missed by wife and daughters, Rosa and Hazel.

FULLER—In loving memory of William James Fuller (our Jimmy) who passed away March 17, 1932. The unseen string of memory's harp is softly touched today.

For the angels came with speedy hands

And carried our darling away; As God needed one more angel

Around His shining throne The heavenly gates were opened wide

And the Saviour's voice said, "Come."

—Grandma and Grandpa Fuller and Uncle Bert.

BORN

DICKIE—At Belleville General Hospital on March 15, 1936, to Mr. and Mrs. Alex. Dickie (nee Mary Peck) a daughter.

NOTICE TO CREDITORS

In the Estate of MARY POLLEY, Late of the Town of Trenton, in the County of Hastings, Deceased.

All persons having claims against the estate of the said Mary Polley are hereby notified to send in full particulars thereof to the undersigned solicitor for the administrator on or before the 26th day of March, 1936, as after that date the estate will be distributed, having regard only to the claims of which the administrator shall then have notice.

Dated this 3rd day of March, 1936. HOWARD D. GRAHAM, K.C., Dundas Street, Trenton, Ontario. Solicitor for Harry Lafferty, Administrator of the estate of Mary Polley, deceased.

Administrator's Sale of Valuable Residential Property

Sealed tenders for the purchase of the following property will be received by the undersigned up to 12 o'clock noon, Tuesday, March 31st, 1936. This property is being sold in order to close the estate of Mary Polley, deceased.

Parcel 1: Lot 12 and the North East part of Lot 11 on the West side of Murphy Street, Trenton, on which is erected a brick house with all modern conveniences and a good barn which has been converted into three garages. This property is bounded on the East by Murphy Street, on the North by Ford Street, and on the West by Division Street. It is centrally located in a very desirable residential district.

Parcel 2: Part of Lot 13 at the corner of McGill Street and Lorne Avenue in the Town of Trenton have a frontage on Lorne Avenue of 92 feet and depth on McGill Street of 66 feet. On the property is a modern frame house in excellent state of repair with modern conveniences. Possession cannot be given before September 16th, 1936.

Conditions of Sale: Tenders will be addressed to the undersigned and will be received up to 12 o'clock noon, Tuesday, March 31st, 1936. Marked cheque for 10% of the price shall accompany tender; balance shall be payable on or before May 1st, 1936. There shall be a separate tender for each property.

Tenders shall remain open for acceptance until 1 p.m., May 4th, 1936. No tender submitted shall be withdrawn and the highest tender not necessarily accepted.

The property may be inspected any day between 2 and 4 p.m. by applying to the undersigned.

Alberta To Show \$3,297,519 Saving

Details of Refunding Operation Announced in Edmonton

EDMONTON. — Alberta's Social Credit Government had good news for citizens last week though not the kind most Albertans had been expecting since last August when Premier Aberhart's party was swept in to power on a promise to pay \$25 monthly "dividends."

By refunding the provincial gross funded debt and guaranteed issues, a total of \$158,629,510, on a 2.75 per cent basis, the government, in a tentative budget drawn up by its auditor, James C. Thompson, estimated it would save \$3,297,519 of the people's money this fiscal year.

The Thompson plan was a special report on Alberta's financial situation drawn up for R. J. Macdonald, Montreal, adviser to the only Social Credit Government in the world. Mr. Thompson's plan was disclosed in a report given to the legislature Friday.

Mr. Magor will deal with Mr. Thompson's proposals in his financial report to the government. The budget proper is expected to be brought down in the assembly shortly.

From the annual \$3,297,519 saving by the refunding operation as proposed by Mr. Thompson, \$457,115 reduction in interest earnings and \$511,049 for sinking-fund provision would be subtracted. But if the Dominion took over unemployment relief costs, Mr. Thompson estimated an additional \$1,836,968 would be saved.

Despite the prospective savings, however, Mr. Thompson's tentative budget anticipated a deficit of \$4,471,268. The year's revenues were estimated at \$19,783,722 and expenditures \$24,454,992.

Taxes Smother Urge to Build

"Canada needs more houses and better houses," declares the Financial Post. "There is general agreement that the fact that houses are not being built is the main factor in the stagnation, not only of the construction industry, but of many related lines. A revival of housing construction is looked forward to both as a means of checking business depression and as an indication that business has improved."

One thing obviously stands in the way of building, and that is the weight of taxation already imposed, but taxation that is threatened when municipalities face the task of balancing budgets that have been unbalanced by extravagant spending of the past and also by the weight of relief expenditures. People hesitate to put money into houses, because of the additional tax payments, they may thereby incur. They also find it difficult to build because they have seen capital values melt away under the weight of taxes. For taxes do more than impose a portion of the wealth on which they are imposed; they also tend to destroy that upon which they feed.

Authorities should realize that it is possible for taxes to become so onerous as to defeat their end of providing public revenue. That can be true of taxation as a whole as well as of any individual type of tax.

Clarion Call To Women To Arm For Peace As For War

Senator Fallis Says Feminine Influence Is Great and Should Be Properly Used

OTTAWA. — Senator Iva Campbell Fallis told the Ottawa Women's Canadian Club recently that "if the forces of womanhood would mobilize and make themselves as indispensable in the causes of peace as they have in those of war the necessity of women in present public life would soon be felt."

Senator Fallis, speaking on "The Part We Play," mentioned "bitter hostility" pioneer women had to combat in professions and business life. Women of the present, she said, should continue in the footsteps of the pioneers who blazed the trail with difficulty.

Many women, the senator said, fail to realize that politics is only another name for Government and that women should in duty be interested in the Government of their country. She spoke of opportunities afforded women to mold the thoughts and ambitions of future citizens through the home, club activities and the press.

Senator Fallis expressed her intention of speaking before many non-political groups in the east and in the west in the near future and said that she thought this a great opportunity of women in public life to develop a national viewpoint in women and interpret the thought of one section to another.

Wheat Carryover Normal This Year

Canada's Basic Industry Well Launched Into New Year With Brighter Prospects

WINNIPEG. — The mirage of a normal wheat carryover, after playing pranks on agrarians several years, was gathering substance today.

And with higher prices prevailing, Canada's basic industry was well launched into its new year with brighter prospects than for several years—more years than many a farmer cared to recall.

Increased exports were reported by the Board of Grain Commissioners. Higher prices were reported by the Dominion Bureau of Statistics. Quotations on Winnipeg grain exchange were higher. Toronto shipping circles reported wheat bookings for spring shipment heaviest in the last seven years.

But Canada still had a big supply of wheat to sell. Exports of 7,500,000 bushels have to be averaged weekly to bring the present supply of approximately 275,000,000 bushels down to the normal 50,000,000 bushels carry-over at the end of the crop year. Recent exports have been running 3,000,000 to 4,000,000 bushels weekly. Hint of an increase in this was seen in the revived demand for Canadian wheat.

The board of grain commissioners' report issued at Fort William said that 13,283,993 bushels compared with 8,100,132 bushels for the same month last year. Chartering of space for January and February was heavy with 12,000,000 booked for export as soon as Great Lakes navigation opens in the spring was active with some boats at Fort William and Port Arthur already loaded. Toronto reported bookings of Canadian wheat at Montreal for spring shipment to world markets the heaviest in seven years. Space for 6,000,000 bushels has been chartered.

Warns Britain Is Vulnerable

War Secretary Tells of Danger from Air Attack—Immunity Is Gone

LONDON, Eng. — Alfred Duff Cooper, secretary of war, bluntly warned the House of Commons last week that Great Britain was more vulnerable than ever from an attack from the air and faced the risk of becoming embroiled in a European war.

Duff Cooper moved the adoption of a budget for military appropriations and declared:

"We should never proceed under the assumption that in no future conflict on the continent could we be called upon by government of the day to send, at a very short notice, a well-equipped force to take part in modern warfare against the best-equipped forces in the world."

Referring to Napoleon's statement, "Antwerp in the possession of a hostile nation is like a pistol held at the head of Britain," Duff Cooper warned:

"The only results of new inventions is that the menace is greater than before because, today, it is a double-barrelled pistol."

Immunity Vanishes

"The invention of flying, far from rendering us more immune, has robbed us of a great part of our immunity."

"More than ever we are part of the continent of Europe. Less than ever can we realize upon any special advantage from our insular position."

The cabinet minister described a recent Soviet manoeuvre in which 1,200 soldiers jumped from airplanes and descended in parachutes as an indication of the rapid strides the world was making in the air form of military combat.

He admitted that Great Britain's army is not this modern and that the nation was not "experimenting with such advanced forms of destructive war machinery."

Duff Cooper contended that, despite advances in aviation and naval combat, the infantry will still be necessary.

"But," he declared, "the next war will be a war of machinery, and the men, so far as they do not serve to operate these machines, will be useless targets to the enemy."

To Abandon Plan On Trans-Canada

White River Project Promised by Heenan Postponed Indefinitely

TORONTO. — Indefinite postponement of the building of the Sault Ste. Marie-White River stretch of the trans-Canada highway in this province was revealed in the legislature last week with the announcement by Premier Hepburn that only \$2,200,000 had been budgeted as capital payment on unemployment relief, roads, bridges and colonization roads, under Hon. Peter Heenan's department of northern development.

Only recently, Mr. Heenan intimated that the construction of all the all-important Sault-White River link, would be proceeded with this year.

The approximate \$3,000,000 budgeted for northern development road-work and relief will, of course, be

London Moves To Halt Jew-Baiting

LONDON. — Sir John Simon, the Home Secretary told the House of Commons recently that special measures had been decided on to deal with "Jew-baiting" in London's east end. He declared that an additional police detail would be sent to the east end "especially charged with the responsibility of keeping a special lookout for provocative conduct calculated to lead to a breach of the peace."

Sir John said he was not satisfied with the present situation in regard to abuse of Jews in the east-end and added that the gravity of the offence "would certainly justify some pretty smart sentences."

Expect Ten Million In Income Tax

Government Said to Have Underestimated Revenue in Budget

TORONTO. — Although only \$5,000,000 was forecast in the Hepburn budget last week as the net return to Queen's Park from the first year's operation of the new provincial income tax, it is learned that the treasury actually anticipates between \$10,000,000 and \$12,000,000 in revenue from the levy.

The Government is playing safe in its \$5,000,000 estimate. It has intentionally underestimated in this case. The situation renews it is said, the impression of Conservative party ranks that Mr. Heenan and his Government may go to the country late in 1937. The bigger surplus the better with a campaign in the offing.

Only a month or so ago one section of the Opposition party fully believed that the Government might take the election plunge this Fall, but the Premier's recent announcement that there would be no redistribution bill this present session is said to have a petty well-spoken belief. Redistribution will be effected, it is said, before any appeal to the people is launched.

Sees Good Year Ahead for Ontario Cattle Breeders

Increased by contributions from the Dominion Government. These, it is reported, may total some \$5,000,000 or \$6,000,000. In no event, however, will the Hepburn Government embark, it is said, on any new major road project in the north.

"In the long run it is wiser to be a sheep than a wolf, if we want our posterity to survive." — Dean Inge.

Sewing Soldier's Shirts Into Pants

Lady Tweedsmuir Much Interested in Red Cross Workrooms

OTTAWA. — Soldiers' pants and coats cut down to fit Johnny were among the many things Lady Tweedsmuir admired during her visit to the Red Cross workrooms here. She expressed approval of the manner in which torn and worn clothing from the Department of Defense was cut, dyed and made over into suitable clothes for small boys and girls.

While at the workrooms Lady Tweedsmuir also joined the quilting party—of unemployed men—who are making wool-lined quilts for their families with material supplied by the Red Cross. She told the members of the committee who accompanied her she was glad to find they were helping people who needed assistance in the districts beyond city limits.

Brigadier-General C. F. Winter, president of the Red Cross; Mrs. J. A. Wilson, vice-president, and Mrs. W. L. Currier, Jr., explained the work of the organization to Her Excellency and she was amazed to learn that a single worn army force overcoat could supply a small boy with a windbreaker and entire suit, which are cut by volunteer workers and sewn by church circles or the little boy's mother.

The fact that the Red Cross supplied needles and thread, buttons and finishes, which are outside the relief budget, also appealed to the Governor-General's wife. Her own sewing circle at Rideau Hall, sews for the destitute area.

Since the Red Cross quilting bee started last December 1,179 full size quilts have been made—22 single size spreads, nine cot spreads and 11 crib covers.

When Her Excellency smiled as she was informed by an official that men did the work because it keeps them out of their homes in the daytime, and when father makes the much-needed bedding himself he is sure to see the family take good care of it.

SPORT IDOLS

By KEN EDWARDS

BASEBALL

Baseball of Yesterday

The five baseball greats since 1900 have been selected for representation in the Hall of Fame in Cooperstown, New York—Christy Mathewson, Ty Cobb, Babe Ruth, Walter Johnson and Honus Wagner.

The highlight of Mathewson's career came in the 1905 world series when he thrice blanked the Athletics. Matty was probably the greatest pitcher in history of the National League. In the hectic season of 1908 he won the tremendous total of 37 ball games.

Our friend Walter Johnson was 36 games for the Senators in 1913. His strikeout record of 3497 in 21 seasons has never been approached.

A few weeks ago (February 22) the two hundred and fourth birthday of George Washington, Johnson cast a metal disc over the frozen Rappahannock River at Fredericksburg, Va., duplicating the feat of George Washington reputedly performed almost two centuries ago.

You old timers remember Honus Wagner, the greatest shortstop of all time, and Ty Cobb, the greatest ball player who ever lived. Cobb led the American League batters for 12 seasons. In 1915, he stole 96 bases.

George (Babe) Herman Ruth, that phenomenal home-run hitter started in 1913 with the Baltimore club at \$100 a month. For 1931 he had a contract for \$100,000. In 1927, he slammed 60 drives out of the parks in the American League, an all-time mark. Four different years the Babe hit over 50 homers. He hit 40 homers each year for 11 years. Babe Ruth has received more bases on balls and struck out more times than any player listed in the records.

NOTE—Thanks for your letter way down there in California. Today's column is dedicated to our friend Billy Rintoul of Taft, California.

The Late Lou Marsh

The dean of Canada's sports writers passed to the great beyond recently. Lou E. Marsh has gone. No longer will the world of sport be able to read his valuable opinions and observations in his famous "Pick and Shovel" column.

Lou Marsh was much more than a sports writer. He was a sportsman through and through and participated in practically every branch of athletics during his lifetime. He abhorred shady contests of any description and hit hard and often when he thought he detected something wrong. No sporting mogul was too high for Marsh to berate. He said what he thought and called them as he saw them in his days as a referee. His honesty as the third man in the ring or behind a whistle on the ice was never questioned. Sport has lost a great disciple in Lou Marsh. Long may he be remembered and set up as an example to those athletes and sportsmen who are to come after him.

Address your sport letters to Ken Edwards, care of National Press, 57 Bloor St. W. Toronto.

"If the world continues its present policy, every nation shutting out every other nation, a revolution will come in every country, including our own."—Sir George Paish.

"I do not like palaces. I prefer a snug little house of my own where, when my work is over, I can putter around like a schoolboy."—King Carol.

"Aspirin" Trade Mark Sustained

Judgment Given in Favour Of The Bayer Company, Limited.

OTTAWA. — A warning is found in the judgment just given by the Exchequer Court of Canada, in an action brought by The Bayer Company, Limited, owner of the trade mark "Aspirin".

The Bayer Company brought action asking a judgment of the Court restraining the defendant from infringing the trade mark by selling tablets as "Aspirin" which were not the product of The Bayer Company.

The judgment restrains the defendant permanently from putting out any of his own tablets as "Aspirin" or under any name so similar to "Aspirin" as to be confusing and awards The Bayer Company damages and costs.

Contented Cow

At midnight, on February 12th, a cow by the name of Carnation Ormsby, by Butter King completed her official one-year test at the Carnation Milk Farms in Seattle, Wash., and broke a milk record that has stood for sixteen years—the record of Segis Pieterle Prospect, of these farms. The old record, 37,381.4 pounds, as against the new record of approximately 38,650 pounds. She has also broken a butter record that has stood for thirteen years, made by the Canadian Holstein, De Kol Plus Segis Dixie. The old record was 1,384 pounds butter fat. The new record is approximately 1,400 pounds butter fat (1,750 pounds butter).

It is stated that this is the first time in history that one cow has held both records.

Men Adore the Girl Whose Health is Perfect

If you have a clear skin, pink cheeks, bright eyes, you will have many ardent admirers.

A tonic that will help to nourish your body is Dr. Pierce's Golden Medical Discovery. It stimulates the appetite, improves the action of the stomach, makes the food digest better, and you gain strength and greater vitality. Also purifies and cleanses caused by faulty elimination often disappear.

Buy now of your neighborhood druggist. New size tablets 50 cents, liquid \$1.00. Large size, tablets or liquid \$1.50.

Growing Deaf With Head Noises? Try This

If you are growing hard of hearing, and fear catarrhal deafness, or if you have troubling, rumbling, hissing noises in your ears, go to your druggist and get 1 oz. of Permin (double strength) and add to it 1/4 pint of hot water and a little sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy, and the mucous stop dropping into the throat. It is easy to take. Anyone who is threatened with catarrhal deafness or who has head noises should give this prescription a trial.

Hard Work Means Nothing To A Hen

Hard work means nothing to a hen. She just keeps on digging worms and laying eggs regardless of what the business prognosticators say about the outlook for this day or that year.

If the ground is hard, she scratches harder. If it's dry, she digs deeper. If it's wet, she digs where it's dry. If she strikes a rock, she works around it. If she gets a few more hours of daylight, she gives us a few more.

But always she digs up worms and turns them into hard shelled profits, as well as tender and profitable broilers.

Did you ever see a pessimistic hen? Did you ever hear of one starving to death waiting for worms to dig themselves to the surface?

Did you ever hear one cackle because work was hard? Not on your life! They save their breath for digging and their cackles mean eggs.

Success means digging.

Are you digging?

Scottish Education And Reforms

By Prof. S. B. McCready

Editor's Note: This is the eighth of a series of articles which were published recently in the Harriston "Review." While written specially for the "Review" and addressed to residents of Minto Township particularly, we believe they will be found interesting to many of the readers of this paper because the problems of the farm folk of Minto Township are the same problems that confront rural people throughout the province.

I have told you something of Denmark and Sweden in previous articles and now I come to Scotland. This was the land of my forebears. It was something like coming home to see the places I had heard of from my parents in childhood. It is Bonnie Scotland in very truth. One could not escape the impression, though that these were very hard. We saw many unemployed. Coming from Denmark, with its little farms and their independent owners, Scotland's countryside strikes one as a land of large land owners and tenants.

I hardly need to tell anyone in Minto Township that our educational system owes much to Scotland. The so-called Scottish Tradition is in our educational blood and bones. The first school masters in Wellington County were from Scotland. In Harriston, the first school was taught by a Scottish Schoolmaster whose daughter, Mrs. James Smith, is still with us as a well beloved pioneer. Mr. Wm. McFarquhar and Mr. McKenzie were two of the earliest Minto Township teachers whom I remember. The both of them were Scottish.

This so-called "Scottish Tradition" in education requires a word of explanation. In a democratic sense it has been all to the good and deserving of praise. But from the social viewpoint as it has worked itself out in modern life, it has been disastrous and deserving of condemnation. The "Scottish Tradition" means that every child born into a Scottish home, no matter how poor, has an inalienable right to all the education of which he or she is capable of receiving. This devotion to education was strongly urged by John Knox at the Reformation and is inwoven in the Scottish character. Every parish had a school and domestic Scotland led England in popular education by over 200 years.

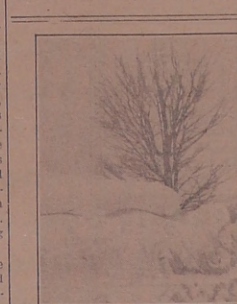

Education is a good servant but a bad master. The "Scottish Tradition" in spreading knowledge widely has over-emphasized the personal benefits of scholastic attainment. Success at school and university meant preferment, position, prizes, and getting on in life. So the schools have become instruments for breeding "rugged individualism" and the "acquisitive spirit." Its philosophy is—every man for himself and the devil take the hindmost; to the victor belong the spoils; to him endowed with gifts, let all the less gifted pay toll. It is the compelling spirit of Big Business and Capitalism.

This philosophy is inherent in the Calvinism that John Knox hammered into the Scottish character. The Protestantism of Luther accepted by the Germans and Scandinavians is a "softer" Protestantism than Calvin's. In part, it explains why the co-operative spirit is possible in Denmark and Germany; while the competitive spirit holds in Canada. Life generally in our own country. The country has paid dearly for the Scottish Tradition. It has built up the town and ruled down the country. The educational tragedy of Canada is that the country has failed to retain for its own security such schools and schoolmasters as might have given our farm folk equal educational opportunity with the town. Country children have

\$500 teachers. City children have the \$2000 teachers. There is something wrong somewhere.

But Scotland has turned over a new leaf. In her after-war reforms a 1918 School Act began the equalization of educational opportunities for all children including those living on farms. They have taken the emphasis off the university-headed "and o'parish," examinations, prizes, scholarships, classics, and honors. Scottish schools are now thinking more of serving the life needs of ordinary boys and girls. One of the Department officials in Edinburgh told me they were looking for a new sort of teacher in Scotland for their pre-school-leaving ages. Not so much teachers of high academic standards as teachers who could inspire boys and girls with interests in music, hobbies, good reading, play, gardening, handicrafts, home crafts, etc. Space does not permit me to give details of the reforms underway in Scottish schools since 1918. I can only hint at a few.

If Minto were in Scotland, the schools of the Township would be administered by an expert Director under a county scheme with the School Board one of the County Council Committees. All teachers would receive the same salaries based on experience and academic standing. The provincial grants would cover all teachers' salaries secured from a provincial income tax. All the pupils would have regular medical, dental and nursing supervision. All the schools would have expert instruction in music and singing. Every home in the Township would be linked with the Libraries in Harriston, Clifford and Palmerston through the schools. If Scotland's plan were followed, the one-teacher country schools of Minto would gradually be replaced by two or three-teacher country schools. At Drew, Teviotdale, etc., with an Agricultural College graduate as principal living in a teacher's residence alongside the school. He would be just as well paid as any teacher in town or city. In the winter months the older boys and girls would be back at school getting instruction in advanced studies along the lines of Robertson's ideas as set forth in the "Scottish Movement" of thirty years ago. The lady assistant in the school would be capable of giving in-

An Old-Fashioned Winter

"Tom and Jim have not come home from school!" exclaimed Mrs. Thompson as she met her husband at the door on his return from work.

It was the night of the terrible snow-storm and although the Thompsons lived only five miles from the big city, all the roads were blocked.

The father set out in the direction of the school in search of the boys. Tom and Jim, finding it im-

Seek To Increase Consumption of Canadian Lamb

Canadian Lamb Committee Points Out Benefits of Campaign to Farmers.

Extension of the campaign inaugurated last year by the Canadian Lamb Committee to eliminate seasonal fluctuations in the price and consumption of fresh Canadian Lamb, has just been announced by W. H. J. Tisdale of Toronto, assistant general manager of the Canadian Cooperative Wool Growers, and chairman of the committee.

"The enthusiastic cooperation of the press and radio was responsible for the success of our initial work in Ontario and Montreal last fall," declared Mr. Tisdale, "and the committee will continue its efforts on a Dominion-wide scale. Our aim is to acquaint Canadian housewives with the varied and attractive possibilities of fresh lamb and to have it more frequently included in the diet of every Canadian family."

The increased consumption of fresh Canadian lamb, he pointed out, will be of enormous benefit to farmers and sheepbreeders across Canada and will contribute substantially to the return of agricultural prosperity, so vital to economic stability.

"Increased lamb consumption will also reflect favorably in every Canadian home-maker's budget," added Mr. Tisdale, explaining that recent improvements in feeding and marketing have made fresh lamb uniformly available every month of the year at consistently moderate prices.

Canada lags far behind other British countries with an annual per capita consumption of 7.2 lbs., he said, while New Zealand has 14.4, Australia 8.2, South Africa 24.5, and Great Britain 31.

Other members of the Canadian Lamb Committee are R. W. Wade, Canadian Sheepbreeders Association; S. E. Todd, Industrial and Development Council of Canadian Meat Packers; L. E. O'Neill, Live Stock Commissioner, Ontario Department of Agriculture; and A. A. MacMillan, Associate Chief, Live Stock Branch, Dominion Department of Agriculture.

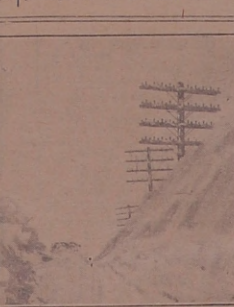

"It is only as we have been forced that we have pushed forward," — George Barton Cullen.

struction to the older girls in home crafts.

The schools would be the Community centres for the work of the Women's Institutes, the Study Clubs and the Musical Societies. The permanent teachers would ensure continuous and constructive leadership. They would naturally be the headquarters of co-operative enterprises.

Perhaps a Township scheme administration would be more suitable for Minto and the other Wellington County townships than the County School Board plan of Scotland. Especially if co-operation between the townships could be devised.

In 1919 Premier Drury declared for educational reform in Ontario, such as Scotland has been busily developing for the past seventeen years. But nothing came of it. We are rather too stiffly set in our ways in Ontario, perhaps, or too self-satisfied?

An Old-Fashioned Winter

"Tom and Jim have not come home from school!" exclaimed Mrs. Thompson as she met her husband at the door on his return from work.

It was the night of the terrible snow-storm and although the Thompsons lived only five miles from the big city, all the roads were blocked.

The father set out in the direction of the school in search of the boys. Tom and Jim, finding it im-

Lost - A Carpet At Ottawa House

Parliamentary Housekeeper Recovers Treasure Without Aid of Sleuths

OTTAWA. — Being called on the carpet is an old story to the housekeepers of the Houses of Parliament but it had a new variation last week when a member who has been resting at home since the election of 1930 decided he must have the same floor covering in his office as during his last term in the House.

A search party was organized and the carpet was found and the member can now pace up and down and compose his speeches on a familiar footing.

Interior decorating problems such as these might prey on the mind of an ordinary housekeeper, but the parliamentary housekeeper differs in two respects from the usual variety he is a man and a bachelor.

Major J. A. MacKinnon knows all the ins and outs of household worries however, as he kept house in a log cabin in the Yukon for 15 years and took a post graduate course in the army when he went overseas with the Yukon Battery raised by Lieut. Col. Joseph Boyle of Woodstock at his personal cost of \$125,000.

Like most men, when it comes to housekeeping worries, Major MacKinnon blames women for most of the trouble. In satisfying members with colour schemes and furnishings, "It is the secretaries and the stenographers who get the fancy ideas," he insists. "Anyway, the main trouble is that when this building was constructed the rooms were designed as offices. Now with all the pictures appearing in magazines and all the talk about interior decoration, they are trying to turn them into dens."

A Newcastle firm is making a \$120,000 astronomical telescope with a mirror of 74 ins. for use at Pretoria, South Africa.

HARNES AND COLLARS

New High Mark Reached In Prepayment of Taxes

KITCHENER. — The prepayment of taxes reached a new high here recently when the \$166,208.95 figure was reached. This is \$103,000 more than at the same time a year ago. It is not too far from the heavy tax interest loan, according to Mayor J. A. Smith, the city would have more money in prepayments than it needs at present. With the city paying 4 1/2 per cent. and the bank charging 5 1/2 per cent. there is a definite saving in interest to the municipality.

CANADIAN ORDER OF FORESTERS

SEPARATION DISPUTE

(Continued from Page One)

county finances. Three items cause the trouble. One is the ninety thousand a year debt due to the county pavement. Second is the twenty per cent charged to the counties on Provincial Highway, previous to when the government assumed full costs, some eighty thousand. Third is a debt of the bank which has accumulated over a period of years.

The sad part of these conditions is that much of this money was wastefully spent. Some of our pavements, that we called permanent roads, would not have lived five years if extensive repairs had not been done in that time. Roads that cost seventeen and eighteen thousand dollars a mile should have been built for half the cost. Money that was spent like water on our Provincial Highway ditches has now to be paid back by the ratepayers, who feel they have gone their limit.

There is considerable agitation in this province to do away with County Councils and I would say, after being a member for seven years, that if they are all like ours, there should be a house-cleaning of the system, or the system abolished.

Our Township Council at present is more economically managed, and is free from political activities. As a member of the Road Commission for the last two years I have tried to have some of these evils corrected, but with little success.

Last year I strongly advocated an investigation before the County Judge into the administration of the county roads. In fact it had been nearly unanimously carried by vote in the Council on two occasions and a solicitor appointed to formulate charges.

But what happened? The County custodians got busy, brought pressure on the powers that be, and it was white-washed with this promise, that changes in the system would be made that would satisfy the ratepayer without the cost of an investigation.

It has become so abominable that some of the municipalities are asking for separation. At the present time I intend, unless something is done shortly, to hand my resignation to the Warden as a County Road Commissioner. I do not want to be a partner in any system that has become so hideous, and all I can say is, "deliver me from the body of this death," or, in other words, "free me from this corpse."

You do to defend the hard-pressed taxpayer.

H. H. MORROW, Wooler.

You can't keep both yourself and your business in a liquid condition.—St. Louis Star-Times.

Seeks Missing Relative,

Miss Anna Jackson

Chief Bain has received a letter from Mrs. Pendlebury, 91 Widgeon Street, Warden, Redcar, Yorks, England, asking him to assist her in locating a relative of hers, a Miss Anna Jackson, who lived in Trenton twenty years ago, and from whom nothing has been heard since.

A photograph of Miss Jackson taken twenty years ago was enclosed on the back of which was written: "Give this smaller one (photo) to Agnes when you see her. It is me with the white bow on my hair—my sister-in-law, Mrs. Chas. Higgins, with the dark bow."

Anyone knowing the present whereabouts of Miss Jackson is asked to get in touch with Chief Bain.
